...UK TOP 15 UNIVERSITY
Imagine waking up on a beautiful campus, just minutes from a world-class city, enjoying outstanding music, art and culture on a weekly basis, having the choice of more than 200 clubs and societies, or starting your own, breaking a sweat in one of the UK’s finest sports facilities, being inspired by arts and culture from all over the world and playing a part in campaigns on the issues that matter to you.

Now you’re getting an idea of what life at UEA is like.
NORWICH IS THE BIG SMALL CITY WHERE OLD MEETS NEW, NATURE MEETS TECHNOLOGY AND LOCAL AND GLOBAL CULTURE COLLIDE.

The bustle of Norwich is just minutes away from campus and offers plenty to inspire and entertain you. Norwich isn’t just a beautiful city, it also boasts a cutting-edge arts scene and is steeped in literary excellence. Here, you’ll find a historic castle and ancient cobbled streets alongside award-winning shopping, theatre, arts and entertainment.

Beyond the city you are surrounded by some of the UK’s most beautiful countryside. You could explore the nearby Norfolk coastline with its stunning beaches and world famous bird reserves. Or enjoy country walks, medieval villages, bustling market towns, and stately homes. Go walking, cycling or sailing on the Norfolk Broads, an incredible National Park. Between the bustling city of Norwich and the big skies of Norfolk, there are so many places to discover during your time at UEA.

www.visitnorwich.co.uk  www.uea.ac.uk/video/norwich

DID YOU KNOW...
NORWICH HAS AN INTERNATIONAL AIRPORT
AND IS LESS THAN 2 HOURS TO LONDON BY TRAIN?

“I think it's the best of both worlds. It's lively like a city should be and yet idyllic like a picture postcard.”
– Jen Barwell, MB BS Medicine Graduate

NORWICH: A FINE CITY

The city has one of the lowest crime rates in the UK
Norwich Market is the largest open air market in the country
Norwich is in the UK’s top 10 for shopping
Norwich has hundreds of pubs dotted around the city and is home to an annual beer festival, as well as many respected craft brewers
Norwich City FC (The Canaries) play at Carrow Road
Norwich is England’s first UNESCO City of Literature

Norwich buzzes with live music, comedy, arts and culture. Be inspired by art house cinema, touring west end and international theatre productions and the thriving literary scene.

See outstanding art from around the world for free at the inspirational Sainsbury Centre for Visual Arts. Designed by Norman Foster this unique building contains the renowned Robert and Lisa Sainsbury Collection. The Centre’s critically acclaimed temporary exhibitions are free of charge for UEA students. You can also enjoy the stimulating events programme and excellent Modern Life Café. The building even appeared as a location in Marvel’s Avengers: Age of Ultron.

www.scva.ac.uk

Norwich is the first UNESCO City of Literature in the UK and UEA is steeped in literary excellence. Since the novelists Malcolm Bradbury and Angus Wilson started the MA in Creative Writing in 1970, many famous writers have taught or studied at the University. These include former Poet Laureate Andrew Motion, Ian McEwan, Kazuo Ishiguro, Rose Tremain, Angela Carter, Ali Smith, Tracy Chevalier, Anne Enright, Naomi Alderman and Tash Aw.

Every year, the University’s Arthur Miller Centre for American Studies and the Centre for Creative and Performing Arts each host an annual literary festival. At these festivals you will be able to attend readings and talks with well-known writers such as Jackie Kay, Edmund de Waal, Sebastian Faulks, Will Self, Jonathan Franzen, Carol Ann Duffy, Simon Armitage, Melvyn Bragg, Eimear McBride and Jo Shapcott.

www.uea.ac.uk/lifest

“Going to university is as much about meeting new people as it is about learning. I met people who have been central to what I have done since, including Paul Whitehouse, Harry Enfield and Vic Reeves.”

– Charlie Higson, Comedian, Writer and Scriptwriter, UEA Graduate

Whether you are passionate about climate change, drama, photography, music, media, sports or something else, with more than 200 clubs and societies, you’re sure to find your niche at UEA.

And if there isn’t a group to suit you, the UEA Students’ Union (UEA|SU) will help you set up a new one. Taking part in a club or society is a great way to meet new people, indulge a passion and take a break from your studies. Plus it’s great preparation for your future career.

www.uea.su/societies

As a UEA student you’ll automatically be a member of UEA|SU. Being a member is a great way to really be heard and lend your voice to the issues that matter to you on campus and beyond. As well as running shops, bars and a nightclub, the Union represents student interests to the University, locally and nationally, and runs campaigns aimed at positive change.

www.uea.su

Our Music Centre is a great place to find your voice at UEA. Whether you are a musician or a music enthusiast, whatever your tastes or ability level, this dedicated facility has something for you. There, you can take advantage of practice and rehearsal space, or join our Symphony Orchestra, one of our choirs or the student-led Music Society’s numerous ensembles.

www.uea.ac.uk/music-centre

“Going to university is as much about meeting new people as it is about learning. I met people who have been central to what I have done since, including Paul Whitehouse, Harry Enfield and Vic Reeves.”

– Charlie Higson, Comedian, Writer and Scriptwriter, UEA Graduate
Our on-campus live music venue, the Nick Rayns LCR, hosts more than 60 gigs a year. Past acts have included Bastille, Example, Ella Eyre, Haim, Ed Sheeran, John Newman, Slaves, Years & Years, Rizzle Kicks, Jake Bugg, Ellie Goulding, Kaiser Chiefs and Coldplay. You can also enjoy weekly club nights, balls, fashion shows as well as gigs at the Waterfront, one of Norwich’s best-loved nightclubs and alternative music venues, which is also run by the Union. See what’s coming up at www.uea.ac.uk/tickets

In Norwich you’ll also find a thriving nightlife scene including clubs, bars, music and comedy venues and 100s of pubs. For a taste of what’s on offer, head to Riverside, Tombland and the Prince of Wales Road. In fact, an evening in Norwich is a great way to finish off a visit to one of our Open Days (see page 42).

“The most amazing and memorable moment in my entire university life was rocking to the live performance of Coldplay in the LCR. It was definitely an experience I will take away with me.”

- Carly Lee, Norwich Business School Graduate

Whilst a student at UEA, Greg James tried his hand as a presenter on UEA’s radio station and went on to win ‘best male presenter’ at the student radio awards. He presented his first show on Radio 1 the day after his graduation ball.
University life isn’t just about studying; it’s all about striking that work-life balance. So we challenged current student Joseph to take part in as many different clubs and societies as physically possible in just seven hours.

**HOW MANY CAN YOU TRY?**

SEE HOW JOSEPH GETS ON.

[YouTube](https://www.uea.ac.uk/video/societies)
At UEA you can take advantage of a wide-ranging programme of sporting, recreational and health-promoting activities on campus through uea+sport, at our £30 million Sportspark facility and our 40 acres of playing field. Our Sportspark has some of the best facilities in the country and is the envy of many other universities.

You can enjoy access to an Olympic-sized swimming pool and a 125-station fitness centre with state-of-the-art cardiovascular equipment and weight machines. Other indoor facilities include five sports halls, 20 badminton courts, five squash courts, a martial arts and dance studio, gymnastics centre and climbing wall.

Within the complex there are floodlit tennis and netball courts, hockey pitches, the Soccerpark with floodlit 3G five-a-side and seven-a-side pitches, an eight-lane national standard athletics track and a state-of-the-art indoor cycle studio.

You will also be able to access a wide range of sports clubs, some you may already love, some you may want to try and others you may not even have heard of. With numerous classes, courses and varying levels of competition to choose from, keeping active, making friends and pursuing sporting excellence is easy at UEA.

If you are an elite athlete capable of representing the University in regional and national competitions, you could be eligible for an undergraduate Elite Sports Scholarship, as well as a sports bursary allowance, access to facilities and specialist support. For more information please email elite.sport@uea.ac.uk

HOME TRUTHS

UEA ACCOMMODATION AT-A-GLANCE

- Ranked as the best student accommodation in the UK twice by the Whatuni Student Choice Awards.
- 4,300 fully furnished rooms, all with free WiFi.
- Affordable rents currently ranging from £73.15 a week for a shared twin room, £138.46 a week for an en suite campus room and £148.82 a week for an en suite room in our newest residences Hickling and Barton Houses*.
- Situated in 200 hectares of natural parkland.
- Perfectly placed: 20 minute bus ride to Norwich city centre, under two hours by train to London from Norwich, Norwich International Airport is just 15 minutes from the city centre, and National Express and Megabus services run directly from campus to destinations all over the UK and Europe.
- Rooms available to meet the needs of students with a range of physical and sensory disabilities or severe allergies and we can accommodate carers.
- Senior Residents are on hand to help you settle in and offer support throughout the year.

“I lived in Norfolk Terrace and it was amazing. The sense of camaraderie and friendship that develops so quickly is astounding.”
- Dan Youmans, Politics Graduate

UEA isn’t just an inspiring place to study, it’s also a great place to live. Just like our campus, student accommodation at UEA is designed to help you make the most of your time here.

UEA is a safe, friendly, comfortable and fun place to live. You are guaranteed a room on campus in your first year (subject to a few restrictions and conditions which can be found on our website below). You will find a range of shops, several bars, a collection of eateries, the Sportspark, the Drama Studio, the Library, the Sainsbury Centre for Visual Arts and the Nick Rayns LCR live music venue, all within a few minutes walk.

Our accommodation includes some award-winning architecture, including grade II* listed Norfolk and Suffolk Terraces. Our award-winning accommodation makes an important contribution to the sense of community we have on campus. We aim to provide high quality, affordable rooms in beautiful surroundings.

www.uea.ac.uk/video/accommodation

*Subject to annual review.
Reach your academic potential with innovative research-led teaching, flexible degree programmes and cutting-edge facilities. Through a mix of lectures, seminars and practical experience you will gain in-depth knowledge of your subject. Not only that, you’ll also develop the analytical, presentation, teamwork and communication skills that are so essential for success after graduation.

At UEA you won’t just learn about what other people have done, thought or said. You will learn by doing things for yourself. That’s because we believe you learn best by experiencing the challenges of your subject first hand.

You will be able to take control of your learning in a variety of ways at UEA. Many of our courses include hands-on classes or modules where you get to put what you’ve learnt in lectures into practice on projects or even in real-world research.

We don’t just want you to listen to what you’re taught. You will be encouraged to engage in debates in seminars and to challenge current thinking with your own ideas. Learning doesn’t end in the classroom either. In and out of lectures, you’ll face multiple opportunities to put new ideas to the test with your lecturers and peers.

You can enhance your studies by starting your own business. Or you could play a part in numerous campus initiatives such as providing legal advice, teaching, mentoring in schools, working with charities, or working in broadcasting, theatre, or journalism. Work placements and internships are a fantastic way to improve your skills. You can gain real-world experience, put your knowledge into practice and build valuable contacts. Placements can also be a vital step towards a graduate role in your chosen career. At UEA you will have access to a huge network of potential employers, locally, nationally and globally. And we will help you find the right placement for you, whether that’s in Norwich or on the other side of the world.

“We want our students to make judgements for themselves. We encourage independent thinkers.”

– Prof Jenni Barclay, School of Environmental Sciences
“I teach a module on comedy and bring lots of industry professionals from my Make Me Laugh research project into class. These include the television comedy writers, producers and directors. This gives students real insight into working processes and creativity in British television comedy.”
– Dr Brett Mills, Senior Lecturer, School of Art, Media and American Studies

Learn from world experts who are leading the way in their fields. At UEA our staff are just as dedicated to you and your studies as they are to their own research. This means your studies are informed by the latest thinking and most up-to-date research. It also means that as well as gaining a solid grounding in your area, you will graduate with in-depth knowledge of the aspects of your subject that are still emerging today. Our research-led teaching is just one of the reasons we score so highly for student satisfaction.

Create a degree as unique as you are, with our flexible degree programmes. Through a mix of compulsory and optional modules, you will gain a thorough grounding in your subject, before tailoring your studies to suit your interests and your ambitions.

Our different Schools of Study collaborate closely with each other in teaching and research so your studies can cross traditional subject boundaries. You can also choose to complement your studies with language classes, sometimes as part of your degree and sometimes for a small additional fee. A range of teaching styles and formats mean you develop a rapport with your lecturers. To help you get the most from your studies, you will be given your own personal adviser. They will monitor your progress, give you feedback and guide you through your course to graduation.

Lots of our degrees include the chance to study abroad. This will give you a unique perspective on your chosen subject. You will also be able to learn about a different culture and have an unforgettable experience to boot. Not only that, a period spent living and studying abroad can give you the edge when it comes to your future career. Depending on the course you choose, you could study at one of more than 100 universities and colleges throughout North America, Latin America, Asia, and Australasia, and over 90 partner institutions across Europe.

Studying abroad can be an incredibly valuable part of your university experience, and we’ll try to consider your preferred destination. Places are not guaranteed however, and may be dependent on certain criteria, such as academic performance. Contact us to find out more. In order to maintain our Study Abroad programme, there is a (refundable) application fee for students wishing to take part.

www.uea.ac.uk/studyabroad
MATURE STUDENTS
For whatever reason you are considering returning to learning, UEA can help you achieve your goals and fulfill your potential. We welcome students of all ages and backgrounds. In fact we see you as an essential part of our rich and diverse community. We operate a flexible admissions policy. That means we will take into account your life and work experiences and any studies you have participated in during the last five years.

Come to UEA as a mature student and you can have a truly life changing experience. You can grow in skills, knowledge and confidence. You can study a subject you have always wanted to study. And you can get the job or career you have always dreamed of.

www.uea.ac.uk/return

PART-TIME STUDY
We offer part-time degree programmes in a number of subject areas, allowing students with outside commitments to complete their studies over a longer period of time, typically five to seven years. All applications are judged on their individual merits, in the same way as applications for full-time degree programmes. Your application for a part-time degree should be made directly to the School of Study and not through the UCAS system.

Subject areas in which part-time degrees are available at the time of writing are listed below.

American Studies, page 58
Art History, page 62
Biology, page 68
Ecology, page 86
English, page 98
History, page 116
Philosophy, page 162

Please contact the appropriate School/Department directly for further information about studying these subjects part time.

OUR PARTNER INSTITUTIONS
We work with a number of institutions to widen access to higher education and to provide a range of high quality courses that lead to an award from the University of East Anglia. Each institution has its own prospectus giving detailed descriptions of the courses it offers and should be contacted directly for further information.

City College Norwich  www.ccn.ac.uk
Easton and Otley College  www.eastonotley.ac.uk
Brooksby Melton College  www.brooksbymelton.ac.uk
Mountview Academy of Theatre Arts, London  www.mountview.org.uk
The Royal Marsden School, London  www.royalmarsdenschool.ac.uk

LEARNING RESOURCES
Whenever, wherever and however you learn best, the library is designed to meet your needs. This facility, located at the heart of campus is open and staffed seven days a week and is open 24 hours a day, 365 days a year.

STUDY AT UEA AND YOU WILL BENEFIT FROM:
- 1,470+ work spaces and 370+ computers located in the library.
- 800,000+ volumes of books and journals.
- 15,000+ new titles that are added to library stock annually.
- Microsoft Office 365 free to download to your own device.
- Extensive collections of specialist materials including government publications, DVDs, music scores and periodicals.
- Online library catalogue and search tools that can be accessed anywhere in the world.
- A wide range of subscribed digital resources such as online databases and e-journals.
- Helpdesk and IT Service Desk open seven days a week.
- Access to UEA software on your device.
- Unlimited free cloud storage with access to your data anywhere in the world.
- Bookable group study rooms with IT and AV equipment.
- Assistive technology and specially equipped workstations for students with visual impairments or mobility difficulties.
- Free high-speed internet connection available in the library, across campus and in student accommodation.
- Campus wide printing, scanning and photocopying facilities.
As a UEA student you could be part of history in the making. Through our partnerships with other institutes on the Norwich Research Park, you could play a role in world-changing research in science and technology.

Norwich Research Park is internationally renowned for its research excellence and is one of Europe’s leading centres for research and development in the areas of plants, microbes, food, health, the environment and computing.

The Park’s partners include the John Innes Centre, the Institute of Food Research, The Sainsbury Laboratory, the Earlham Institute and the Norfolk and Norwich University Hospitals NHS Foundation Trust. The Park is also home to more than 60 science and technology based businesses. Together, they provide a wealth of opportunities for research and employment for UEA students and graduates.

Currently our students and graduates are involved with major research and commercial projects including sustainable agriculture, food security and the prevention and treatment of major diseases.

www.norwichresearchpark.com
UEA’s Senior Lecturer, Dr. Sanderson, has spent decades at the forefront of cataract research. The first team to keep a human lens alive in-vitro, she discovered the part calpains play in the destruction of vision. And her work helped develop a drug to inhibit its activation. Combined with her groundbreaking glaucoma research, creating a system to deliver drugs to the eye via a contact lens, we may soon see a future where millions have their sight restored.

HOW WILL YOU SEE THE WORLD DIFFERENTLY?
www.uea.ac.uk/research
At UEA, international students are a vital part of our vibrant community. So we do everything we can to help you settle in, make friends, get to know your new country and excel in your studies and future career.

For us, it’s not enough that you get world-class teaching at a respected British university in a beautiful environment. You also deserve courses, support and facilities that are specially tailored to your needs. As an international student, you will benefit from world-class teaching, in an inspiring and supportive environment.

You’ll be guaranteed campus accommodation in your first year.* Our friendly campus is situated in 200 hectares of stunning English countryside and Norwich, one of the world’s best small cities, is right on your doorstep. Before you arrive a helpful Pre-Departure Guide for International Students will give you information and advice to prepare you for studying in the UK. You’ll receive guidance on everything from preparing to travel, to health care, to immigration regulations.

*Subject to a few restrictions and conditions.

Join more than 3,500 international students from over 100 countries. At UEA you are not just a number, you are an important part of the community. We will nurture your talent and ensure you have everything you need to thrive, in your studies and after graduation.

STUDY IN THE UK

ENTRY REQUIREMENTS
Typical entry requirements for our courses are expressed in terms of A levels and International Baccalaureate Diploma points on the course pages. However, we also recognize qualifications from many countries and organisations for direct entry to our degree programmes. If you don’t meet the entry requirements for your chosen course, you could complete one of our INTO UEA courses to prepare you for your degree. We can advise whether you will need to take an INTO UEA programme prior to your degree course. See page 31.

SETTLING IN AND MAKING FRIENDS
To help you settle in, we run a special orientation programme. Here you can meet other UEA students and find out more about living and studying in the UK. Throughout the academic year you’ll get to attend fun social events, and will be supported by a dedicated International Student Advisory Team. You’ll also have the chance to join the International Student Society and many smaller societies for students from different countries. www.uea.ac.uk/international

STUDENT SUCCESS PROGRAMME
All international students are invited to take part in our Student Success programme, aimed at helping you achieve your full potential both in your studies and in your non-academic life.

The programme takes a holistic, student-centred approach, helping you explore your strengths, areas needing improvement, and life goals. You’ll benefit from small group sessions and one-to-one appointments with an International Student Adviser. You will meet regularly to help you track your developments and stay motivated.

The Student Success programme is for both students who are already doing well but would like to achieve more and increase their employability, or for students who might be struggling and could benefit from some skills development in order to improve. It complements the role of your adviser in your School, as well as advisers in the Student Support Service, Library, CareerCentral, PAL mentors and staff across the University.

YOUR VISA
International students (non-EEA) in the UK need to meet a range of visa and language requirements. You will have the support of a dedicated team providing advice and support throughout the application and visa processes.

Non-EEA students coming to the UK for six months or more must apply for a Tier 4 (General) student visa in their home country before travelling to the UK. You must be able to show that you meet the UKVI’s minimum requirements for English language. If your studies are being sponsored we require a formal letter certifying the amount of your scholarship.

www.gov.uk/tier-4-general-visa
www.uea.ac.uk/international

INTO UEA

Get ready for your degree with INTO UEA. Created by UEA and INTO University Partnerships, INTO UEA offers international students a range of innovative academic preparation and English language courses.

You will benefit from a purpose-built international study centre on the UEA campus. The centre provides an inspiring and nurturing living and learning environment, with space for 700 students, access to the latest learning technologies and comfortable, modern accommodation. You will be taught by experienced teachers and supported by a dedicated Student Services team.

INTO UEA COURSES INCLUDE:

INTERNATIONAL FOUNDATION
Gain the skills, knowledge and confidence you need to study at degree level in the UK. This course has been specially created to prepare you for direct entry to the first year of an undergraduate degree. Choose from four groups of specialist pathways in business, economics, society and culture; humanities and law; mathematics and actuarial science; and the sciences. The programme combines academic study, intensive English language preparation, study skills and cultural orientation. On completion of the International Foundation, as long as you meet the specified course requirements, you are guaranteed a place on a wide range of undergraduate degree courses at UEA.

INTERNATIONAL YEAR ONE

Get ready for your degree with INTO UEA. Created by UEA and INTO University Partnerships, INTO UEA offers international students a range of innovative academic preparation and English language courses.

You will benefit from a purpose-built international study centre on the UEA campus. ENGLISH FOR UNIVERSITY STUDY AND PRE-SESSIONAL ENGLISH COURSES

Improve your English language level ready for entry onto another INTO programme, or directly onto a UEA degree course. These courses run year-round and in the summer. Whatever your current English language level, we offer a range of courses designed to give you the academic English skills you need to excel at university. Find out more and download our latest brochure at www.intostudy.com/uea
Going to university can bring lots of new challenges. At UEA we will empower you to overcome those challenges. That means you will not only fulfil your potential while you’re here, you’ll also graduate ready to take on the world.

At UEA we offer a whole host of services to help you get the most out of your time at university. Our Student Support Service provides general advice and has teams of specialist advisers. They can help with personal problems, disability support, mental health issues, financial worries, specific learning difficulties and support for international students. So whether you need help managing money, extending your leave to remain in the UK or accessing a counsellor, we can help.

The on-campus Medical Centre provides GP services, specialist clinics and visiting practitioners. It also houses an NHS dental practice and a pharmacy. If you are a parent, the UEA Nursery provides on-site day care. And the University Multifaith Centre offers prayer facilities and a safe place for quiet reflection to all, irrespective of belief.

ACHIEVING YOUR POTENTIAL

Become the best student you can with help from our Learning Enhancement Team. Take advantage of free and confidential tutorials, workshops and a wide range of study guide materials. There is also specialist study support for international students and students with specific learning difficulties.

portal.uea.ac.uk/student-support-service

“If you have any worries, feel overwhelmed with the workload or have any personal issues there are support services available at UEA and people you can talk to.”

– Gemma Oxbury, Mental Health Nursing Graduate
YOUR CAREER

University is about more than just getting a degree. It’s also about discovering where you want to go next and how to get there.

At UEA we will help you choose your future direction and develop a plan to achieve your goals. Through work experience opportunities, networking events and our links with industry, you’ll have the chance to try out different careers and work environments, and build your network. Careers support is built into our degree programmes, to help you graduate with the experience, skills, confidence and contacts you need to begin a rewarding and successful career. We’ll even support you to set up your own business.

LIFE AFTER GRADUATION

FINDING YOUR CALLING

UEA is committed to opening doors for our graduates. We can help you work out what you want to achieve in the world of work. We will help you explore your options through special careers events, carefully designed to introduce you to different sectors and organisations in many countries.

You’ll have access to a dedicated, campus-based team of subject-specific careers advisers. Throughout your degree, you can meet people from industry at networking events and you can try out different careers for yourself through countless internship and work placement opportunities. And you can learn from others through our mentoring programme and at alumni events.

www.uea.ac.uk/careers
YOUR FIRST JOB

YOUR PICK OF EMPLOYERS

UEA degrees are designed to help you graduate with the skills employers are looking for. UEA graduates go on to enjoy a vast range of careers across the health, arts, science and social science sectors in big name multi-national companies, not-for-profit organisations and small enterprises. Our graduates can be found:

- planning events for Apple
- writing stories for The Huffington Post
- writing technical strategy for Google
- writing policy for UNESCO
- developing pharmaceuticals for AstraZeneca

Our Careers Service is on hand to make sure you get your career off to the best start. Services include:

- Dedicated careers portal, MyCareerCentral
- Careers advice and guidance related to your School of Study
- CV writing and interview skills workshops
- Networking and panel events with potential employers
- Annual recruitment and opportunities fairs
- A dedicated vacancy service for part-time jobs, graduate level work, work experience and volunteering roles
- A wide range of student and postgraduate internships and work placements in the local area, the UK and all over the world
- Access to part-time paid internships on campus
- UEA summer internship programme, offering placements in the summer holidays
- UEA mentoring programme
- UEA Award, a skills award programme with bronze, silver and gold levels that celebrates academic and extracurricular achievement and is recognised by graduate employers.
Finding your niche could mean becoming an entrepreneur, starting your own business or social enterprise, or going self employed. Start your own business at our dedicated Enterprise Centre and you will graduate with more than a degree. At UEA you’ll get the inspiration, training and support you need to turn your entrepreneurial ambitions into a reality.

THE ENTERPRISE CENTRE

In 2015 UEA opened The Enterprise Centre. It is a dedicated start-up incubator and home to a burgeoning on-campus start-up community. It also houses Enterprise Central, a hub of support to help you start your own business.

Enterprise Central acts as a dedicated space for student entrepreneurs to grow and develop their business ideas. You can meet like-minded peers, collaborate and innovate with them, and bring your business ideas to fruition. You will have access to all the services and support you need to become a fully fledged entrepreneur. Services include one-to-one business coaching, mentors, skills workshops, grants, funding, competitions and more.

Get support every step of the way in starting your business, from idea to launch. Once your start-up is founded, you can even run your business out of the Centre. You can take advantage of a range of options that meet the changing needs of a growing business, from virtual tenancy, to hot-desking, to co-working, to your very own office.

Student led and ethically traded, Tritiki is a tea company on a mission: to promote well-being during uni life. And UEA’s Student Enterprise team has helped them every step of the way, providing support from concept to product launch. Working with fair trade suppliers around the globe, Tritiki now create tasty blends packed with benefits and act as ambassadors for a complete healthy lifestyle – inspiring other students to be the best they can be. Soon to relaunch as a social enterprise, the Norwich Business School entrepreneurs aim to make a positive impact on the planet, from tea leaf to tea cup.

WHAT COULD YOUR UEA BE ABOUT?

WHAT BUSINESS COULD YOU CREATE?

www.uea.ac.uk/careers/student-enterprise
My time as an MRes student exceeded my expectations. The Faculty was outstanding, and in equal measure academically stimulating and supportive. Its friendly and engaging spirit had an enormous effect on the postgraduate community which in the end turned out to be just as valuable for my studies and enjoyment at UEA.”

– Hoskuldur Olafsson, MRes Graduate
“UEA has a great sense of campus community which I felt when initially visiting the University. The surroundings of the campus along with the friendly and approachable lecturers are first class.”

– Justin Khan, UEA Law Graduate now working at the University of Toronto

Get a taste of UEA life at one of our Open Days. Find out what’s so special about UEA’s unique approach and culture, and discover the subjects and courses that are right for you.

Our students and graduates often tell us that they found their Open Day visit incredibly helpful, so if you’re even slightly curious about UEA, it’s well worth coming to visit us. As a university we always strive to go above and beyond and our Open Day programme is no different.

YOUR OPEN DAY SCHEDULE

Your Open Day is carefully designed to give you a taste of the whole UEA experience, from studies to extracurricular activities to graduation and beyond. Over the course of the day you will find out about student life by speaking to current students. You’ll also see where you will learn, study, play, socialise, eat and shop as a student here.

Your day may include a tour of the campus, and the chance to explore the library, the shops, bars and eateries we have on site. You will see our live music venue, the Nick Rayns LCR, and our £30 million Sportspark facility. You can also look around our lecture theatres and seminar rooms and check out our learning and IT facilities.

Over the course of the day, you will get a feel for both the University as a whole and for the different Schools of Study. You will learn about the courses we offer, and talk to lecturers about course content and our innovative teaching methods. You will also have the chance to visit our award-winning student accommodation and see where you might live.

Open Days give you a complete overview of student life, including an understanding of how you can finance your studies and make the most of your time here. We will even give you a taste of the huge number of graduate careers open to you when you graduate.

Register for your Open Day place at www.uea.ac.uk/openday
WHAT COULD YOUR UEA BE ABOUT?

ASK ABOUT ROOMMATES, CITY SAFETY, FESTIVALS, QUIDDITCH, CHANCES OF RAIN, ALAN PARTRIDGE, ANYTHING.

From the practical to the random, your questions about Uni, answered.
www.uea.ac.uk/ask

HAD AN OFFER ACCEPTED?
ATTEND AN APPLICANT DAY

Once you are offered a place at UEA you can attend an Applicant Day to help you prepare for university life. This is a great way to get to know the University and your School of Study before beginning your studies. You are welcome to bring along parents, guardians and guests too.
You will have the chance to spend the afternoon in your School, meeting academic staff and current students and taking part in taster sessions such as lectures, seminars, practical demonstrations and tours of specific facilities, such as the science labs. You can also choose to take a variety of tours, including library, Sportspark and accommodation tours.

WANT TO VISIT ANOTHER TIME?

Don’t worry if you can’t attend an Open Day or Applicant Day. Simply get in touch to find out alternative ways to visit UEA. We are happy to give you or your parents any information or advice you need. To ask a question about visiting UEA, contact recruitmentevents@uea.ac.uk

TASTER EVENTS

Get a real-life taste of learning at UEA by attending one of our enrichment events. Choose from a series of academic lectures, subject taster days, and residential subject specific summer schools designed for students in Year 12.
www.uea.ac.uk/universitytasters

OPEN DAYS 2017

Friday 7 July
Saturday 8 July
Saturday 9 September
Saturday 21 October

INFORMATION FOR SCHOOL VISITS

Our Higher Education Advisers are on hand to help school and college students as they identify and pursue their university ambitions. We can provide information to careers advisers and teachers or arrange visits for school groups, individual teachers and tutors.
Our advisers are also available to visit schools around the country. During visits they can lead talks and workshops to help students choose the right path for them.
Popular talks for schools include:
• Personal Statements: Securing Five Offers
• Getting it Right First Time
• What’s the Point (The Benefits of Going to University)
• Insiders Guide: The Truth About Student Finance
• Behind the Scenes: Life at University.
Book a school talk by emailing schools@uea.ac.uk
FINANCING YOUR STUDIES

A SMART INVESTMENT

GETTING VALUE
At UEA we think it’s important that everyone has the chance to study, regardless of their financial background. We work hard to keep costs down and to make sure your degree is worth every penny. On average graduates earn an extra £200,000 over their working lives compared to those with just A levels.

We make it a priority that you graduate career ready. This ensures your degree represents good value for money and that you get an excellent return on your investment. To make it as easy as possible for you to finance your degree, we can give you financial advice and support. We can also help you find paid part-time work, internships and professional placements and help you access a wide variety of bursaries and scholarships.

WHAT DOES IT COST TO STUDY AT UEA?
Your costs are made up of a combination of fees, living costs, rent and money spent on course materials. Because you do not pay fees up front, your largest expense is likely to be living costs. UK students can apply for living costs support of up to £8,430 per year to live on.

UEA’s tuition fees for UK/EU students in 2018 are likely to be £9,250, depending on inflation*. A Tuition Fee Loan is available which, along with the living costs support, you only start repaying after you graduate and are earning more than £21,000. After 30 years, anything you haven't paid off is written off. This means you do not have to pay anything before arriving here, nor pay anything back unless you are earning more than £21,000. And because of the 30 year write off, you may never have to pay anything back at all.

Once you are earning more than £21,000 a year, the amount you repay each month depends on how much you earn. Your repayment will only go up as your earnings increase. For example, if a graduate earns £24,000 a year, they pay around £23 a month. That’s about the cost of a smartphone contract. We think that’s good value for a world-class education.**

Taking a loan out might seem nerve wracking, but your Student Loan won’t affect your credit rating. It will not prevent you from getting loans in the future either.

Get an idea of what you could apply for at www.gov.uk/student-finance-calculator

HOW WE HELP KEEP LIVING COSTS DOWN
At UEA we’re committed to keeping living costs down which is why you can expect free internet access on campus, affordable shops and competitive rents. Living in Norwich is good value for money and the campus is full of state-of-the-art facilities to ensure you have everything you need. We also have a careers service to help you find meaningful employment, flexible work opportunities on campus in the shops, bars and offices, along with various internships and placements with graduate employers.

* Please note that tuition fees increase annually for all students (UK/EU undergraduate fees, whose rates are regulated by the UK Government, will be amended in line with any alteration advised by the UK Government). For subsequent years of study please assume a 3% inflationary increase year-on-year

** Source: Dept for Business, Innovation & Skills 2013

BURSARIES, SCHOLARSHIPS AND PRIZES
We offer a range of bursaries for students from under represented backgrounds, as well as scholarships and prizes for high achieving students. These include sports and music scholarships along with £3,000 scholarships to reward exceptional performance in research projects, for example the Extended Project Qualification (EPQ).

Find out more at www.uea.ac.uk/finance

WHAT YOU GET BACK
We want you to get the maximum back for the time and money you invest in your studies. Throughout your degree we use innovative methods to make sure you graduate with the skills, experience, contacts and, most importantly, the confidence you need to succeed in your chosen field. We believe this is one of the reasons we score so highly in the student satisfaction surveys.

QUESTIONS?
Email us at student.finance@uea.ac.uk

FIND OUT MORE ABOUT FINANCING YOUR STUDIES

• UK students can find out more about loans and grants at www.gov.uk/student-finance

• EU students should email EU_team@dlc.co.uk or phone +44 (0) 141 243 3570

• Students from Northern Ireland can find out more at Student Finance Northern Ireland www.studentfinanceeni.co.uk

• Students from Scotland can find out more at Student Awards Agency for Scotland www.sass.gov.uk

• Students from Wales can find out more at Student Finance Wales www.studentfinancewales.co.uk

• International students can find out more at www.uea.ac.uk/international
HOW TO APPLY

YOUR APPLICATION

APPLYING TO UEA
Once you decide to apply to UEA, you can do so through the standard Universities and Colleges Admissions Service (UCAS) process. UCAS charges a fee for this service. For more information go to www.ucas.com

When your application is received by UCAS you will be issued a unique UCAS personal ID number. Please quote this number when contacting the University or UCAS.

ENTRY REQUIREMENTS, TYPICAL OFFERS AND PERSONAL STATEMENTS
We have indicated ‘typical’ offers for most courses including any additional subject requirements specific to your degrees as well as in the course descriptions on pages 52-181.

Across all our courses, you will need to meet one of the following requirements:

- Grade C / Grade 4 or above in both GCSE Mathematics and English Language
- A pass in the International or European Baccalaureate Diploma
- A pass in an Access Course
- A pass in the International or European Baccalaureate Diploma
- A pass in a Foundation Diploma
- A pass in the SCE higher grade examinations
- Irish Leaving Certificate with a grade C or H3 pass in five higher subjects, including English, taken in one sitting
- A pass in an Open University Foundation Course
- A degree from a recognised university

We welcome applications from students with a range of qualifications and professional qualifications. Find out more about the sorts of qualifications we consider at www.uea.ac.uk/ug/entry

If you are in any doubt about the suitability of your qualifications, please contact our Admissions Office on +44 (0) 1603 591515.

As part of your application, you’ll also need to write a personal statement. This is your chance to tell us about any key skills or relevant experience you have. It’s also where you can show us why you’re right for the course, why you want to study at UEA and to tell us about your post degree ambitions. For advice on writing your personal statement, go to www.uea.ac.uk/ug/apply

WHAT HAPPENS NEXT
Upon completion, your application form will go to our Admissions Office. There, our staff will carefully consider each application and reach a decision on whether to make you an offer or to invite you to an interview or audition.

We are planning to admit around 3,800 undergraduates in 2018. Each application is treated on its own merits, and we take the time to carefully consider each UCAS form to reach an informed decision. We consider candidates as individuals and accept students from a very wide range of educational and professional backgrounds.

We will take into account:

- Past and future achievement in examinations (for example, the Extended Project Qualification)
- Demonstrated academic interest in your chosen subject
- Personal interests and extracurricular activities
- Confidential references

The majority of candidates will not be called for an interview, but if you are, don’t panic. Interviews are sometimes a standard part of the application process, and are excellent opportunities for you to find out more about us while we get to know you.

YOUR OFFER
Unless you have already received your examination results, you will probably receive a conditional offer. This is determined by your individual circumstances and the demand for the course. Achievement of the grades stipulated in a conditional offer will guarantee acceptance at UEA.

UCAS EXTRA, CLEARING AND ADJUSTMENT
If your initial application is unsuccessful or your grades are better than expected, depending on your chosen course, you may get another chance to join UEA through the UCAS Extra scheme from February and the Clearing and Adjustment scheme in August. To find out more about clearing or to contact our hotline please visit our webpages during the clearing period:

www.uea.ac.uk/clearing

DEFERRED ENTRY AND A YEAR OUT
Taking a year out between school and university to travel, volunteer or gain work experience can really benefit your future. At UEA we welcome applications for deferred entry. If you are applying for deferred entry, please make sure you tell us how you are going to spend your gap year in your personal statement. To find out more contact the Admissions Office on +44 (0) 1603 591515 or email admissions@uea.ac.uk

INTERNATIONAL APPLICANTS
We welcome international students as a vital part of our diverse community. We accept a large number of international qualifications and each application is carefully assessed on an individual basis.

To join UEA as an international student you will need to prove proficiency in the English language, usually through:

- International English Language Testing System (IELTS) test: overall band score of 6.0 with no less than 5.5 in any component
- Cambridge English Exams (First, Advanced, Proficiency) with a minimum score of 169
- A minimum overall score of the Pearson Academic English Test of 55, with 51 in each component.

For a complete list, please visit www.uea.ac.uk/long-require

You also need to meet the minimum English language requirement specified by the UK Visas and Immigration Service.

www.gov.uk/government/organisations/uk-visas-and-immigration

If you do not yet meet the requirements for direct entry to UEA, our INTO UEA programmes can help you gain the skills you need. Find out more on page 31.

Find out more about studying as an international student on page 28.
OUR COURSES

At UEA our courses aren’t just about getting a degree. They are about the beginning of the rest of your life. Studying at UEA means daily opportunities to investigate, discover and challenge the world around you, through the lens of your chosen subject. Be inspired by attentive lecturers. Discover how to combine critical thinking and creative practice. Learn to apply your studies in the classroom and beyond. And, most importantly, get a head start on your career.

www.uea.ac.uk/courses

“Students appear to like the scale of this relatively small campus university, as well as the quality of its courses.”
— The Times and Sunday Times
Good University Guide 2015
Learn from experts whose teaching is informed by both research and real-world business experience. Benefit from insights into the latest industry issues and debates faced by employers. Graduate ready to make a difference in the financial world.

ABOUT YOU
We are passionate about business and financial issues. If you share our enthusiasm, we would love to hear from you. You do not need to have previously studied business to join our programmes; everyone is welcome and you will be considered for a place based on your individual merits. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
At Norwich Business School you can tailor your degree to match your career ambitions, but whichever degree you choose you will begin by gaining a grounding in core business disciplines. These include financial and management accounting, organisational behaviour, economics for business, the principles of marketing, and how to develop your business skills.

As you progress through your chosen degree you will be able to specialise and tailor your studies to areas that you find particularly interesting and relevant for your future career goals. This innovative structure means that if your interests change before you begin your second year, you can transfer to a different degree offered by Norwich Business School.

To help get your career off to the best start, you can gain certain examination exemptions from the Institute of Chartered Accountants in England and Wales, the Association of Chartered Certified Accountants, and the Chartered Institute of Management Accountants. We work very closely with these professional bodies and our degrees are structured to maximise the number of exemptions you can gain.

BSc Accounting and Finance
This course provides an excellent foundation, not only if you wish to enter the accountancy profession, but also if you plan to follow a career in commerce, industry or financial services such as banking, fund management or insurance. After gaining a grounding in core business disciplines you will learn the theory and practice of financial accounting and reporting. You will then develop your understanding of business finance and accountancy, as well as contract and company law.

As you progress you will turn your focus to advanced modules that are designed to prepare you for your future. You can study Advanced Financial Accounting, Advanced Management Accounting, Audit and Accountability and Personal and Corporate Taxation. In your second and final years, you will have the opportunity to choose optional modules according to your personal interests and career aspirations.

BSc Accounting and Management
This degree is designed for students looking to study a professionally accredited undergraduate course in accounting, alongside the theory and practice of management. After gaining a grounding in core business disciplines you will focus on progressing your management, teamwork and personal development skills, and learn the theory and practice of financial and management accounting, reporting and decision making. You will also develop your understanding of human resource management, and operations strategy and management.

As you progress you will focus on more advanced modules, preparing you for your future. You will study Financial Modelling, as well as Strategic Management. You will also have the opportunity to tailor your degree by choosing from a range of exciting optional modules, according to your personal interests and career aspirations.

BSc Business Finance and Management
Prepare for a career in the financial services industry and learn about the financial aspects of all types of organisation. You will study the key principles of business finance, financial management, financial modelling and the operation of financial markets, alongside other core management disciplines.

You will start with a grounding in core business disciplines, which will prepare you to take modules related to your specialism. These include Introduction to Financial and Management Accounting, Organisational Behaviour, and Economics for Business. Through your studies you will gain a solid understanding of the principles of marketing, as well as developing your business skills.

As you progress you will specialise further through modules in Business Finance, International Business, and Quantitative Methods used for analysing and solving problems, while continuing to develop your management skills.

In your final year you will take more advanced modules and develop a solid understanding of modern finance theory and practice. You will learn the critical issues in making and analysing investment decisions. You will also explore financial intermediation and banking in an international context, with emphasis on assessing the performance, evolution and regulation of banks and related institutions. You will develop the skills needed to analyse financial models using real datasets, including models of valuation, capital appraisal, portfolio choice and risk management, as well as having the opportunity to choose other optional modules according to your areas of interest and career goals.

STUDY ABROAD
Enhance your studies by spending a year studying abroad. You will spend your third year at one of our partner universities before returning to UEA for your final year. This is a great way to boost your knowledge, gain a variety of different cultural experiences and develop your personal and professional skills. For more information see page 21.
About Us
Norwich Business School has an excellent reputation for cutting-edge research and practice. Our teaching is research-led and practical. You will graduate equipped with the theory of business and, importantly, the knowledge of how to apply it to real-world needs. Our lecturers’ specialist research and business experience is a central focus of the modules we offer, which means that you will benefit from an insight into the latest and upcoming business issues, developing knowledge that is desired by employers.

We have very strong research themes centred on responsible business practices, and our high standing was acknowledged in the most recent Research Excellence Framework (REF2014), which places Norwich Business School 17th overall by GPA in the UK and in ninth place for the quality of its research outputs (Times Higher Education). The report designated our research as world-leading or internationally excellent in terms of the impact it has on society, the economy, culture, public policy and services.

During your time at UEA, you will have the chance to receive unique insights into the business world from leading guest speakers from industry. For example, our ‘Inside Business’ seminar series features successful business people, which includes many of our alumni, who are now at Goldman Sachs, PwC and EY. Each seminar offers insights into the transition from student to business life, with speakers openly sharing their experiences and advice. These events also provide you with excellent opportunities to speak to guests from business, fellow students and staff from across the School.

Graduate Trainee Management Scheme
After graduation you have the opportunity to secure a paid nine-month graduate trainee placement as part of our innovative Graduate Trainee Management Scheme (GTMS). Created in partnership with local employers, the GTMS features a number of exciting placements that are ring-fenced for our graduates. The scheme is similar to an industry placement programme, but rather than undertaking work experience in the third year of a four-year sandwich degree, you can gain industrial management experience in a salaried nine-month work placement immediately after graduation. This often leads to permanent employment. The GTMS is available to students who are eligible to work in the UK and who meet a certain level of academic requirement during their studies.

In the 2016 National Student Survey, UEA ranked joint third out of all English mainstream universities on overall satisfaction, with Finance (at 99%) and Business Studies (at 95%) both ranked fourth, and Accounting (at 96%) ranked eighth on the same measure.
BSc Actuarial Sciences
UCAS code H342
A level (typical offer): AAB, including Mathematics at grade A
International baccalaureate: 33, including Mathematics at grade A

Special requirements:
Grade B or 5 in GCSE

ABOUT YOU
Already a strong mathematician, you will be working towards excelling at A level or equivalent in Mathematics. You will be curious about a profession that deals with the financial impact of risk and uncertainty, and evaluates the likely impact of future events, using strong communication and teamwork skills.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
BSc Actuarial Sciences
This course combines depth of study with an excellent level of preparation towards becoming an actuary. You will develop your appreciation of recent actuarial developments and practice, and learn how to link theory with practical application in industry. Your first two years will be spent learning mathematical skills in the School of Mathematics, gaining computing, statistical and practical actuarial skills in the School of Computing Sciences, and studying business and management skills in Norwich Business School. During your second and final years you will also take modules partly presented by actuaries from Aviva.

BSc Actuarial Sciences with a Year in Industry
Spend your third year in a business/commercial environment, working alongside actuaries so that you gain awareness of the application of technical concepts in the workplace. Then return to UEA to complete your final year. This version of our Actuarial Sciences degree is strongly recommended by our contacts in industry, who say that completing a year in industry will significantly enhance your employment prospects. Your year spent in industry also counts towards the work-based skills requirement for becoming a member of the Institute and Faculty of Actuaries. Your first two years will be spent learning mathematical skills in the School of Mathematics, gaining computing, statistical and practical actuarial skills in the School of Computing Sciences, and studying business and management skills in Norwich Business School. During your second and final years you will also take modules partly presented by actuaries from Aviva.

BSc Business Statistics
UCAS code G390
A level (typical offer): AAB, including Mathematics or Statistics at grade A
International baccalaureate: 32, including Mathematics at grade A and one other HL subject at 5

Special requirements: Grade B or 5 in GCSE

Preferably a strong mathematician, you will be working towards excelling at A level or equivalent in Mathematics. You will be curious about a profession that deals with the financial impact of risk and uncertainty, and evaluates the likely impact of future events, using strong communication and teamwork skills.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

During your second and final years you will also take modules partly presented by actuaries from Aviva.

WHERE NEXT?
On successful completion of the BSc Actuarial Sciences or BSc Actuarial Sciences with a Year in Industry, subject to academic performance, you may earn exemptions from the professional actuarial examinations set by the Institute and Faculty of Actuaries. Currently we offer exemptions from the first eight (CT1-C8) examinations, however this will change in line with the Institute and Faculty’s changes from 2019. That means that if you graduate with a good class degree you can expect to be fully qualified within two or three years with the potential to earn a salary as a fully qualified actuary.

Our Business Statistics degree also offers you the opportunity to gain exemptions from up to four of the professional examinations set by the Institute and Faculty of Actuaries.

Our graduates go on to pursue stimulating and influential careers in a wide range of sectors, including business, insurance, pensions, banking, accounting and other financial services.

We work with the University’s Careers Service to offer you support at every stage of your course, from choosing a career path through to applying for graduate jobs.

ABOUT US
These respected, multidisciplinary courses draw on expertise from across the Schools of Computing Sciences, Mathematics, Economics and Norwich Business School. Since much of our work is concerned with real-world applications, we also have excellent links with industry, both for our teaching and research.

We collaborate closely with Aviva, one of the largest insurance companies in the world; they participate in teaching modules on our Actuarial Sciences programmes. This allows you to learn more about the work of actuaries and the potential career paths open to you, and gives you the opportunity to apply your knowledge with a focus on industry.

Join our world-renowned American Studies courses and gain invaluable academic and cultural experience by spending a year in a North American university. Choose to study abroad from our list of more than 50 exchange partners in the United States and Canada. Or opt to spend one semester in Australia, New Zealand or Hong Kong.

ABOUT YOU
You will be working towards three A levels (or equivalent), including English Literature and/or History. You will be excited about a course that’s engaging, world-leading and could include a year studying abroad. You will be open to learning from new cultural experiences in your studies and future career. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
You will learn through participation in lectures, seminars and tutorials as well as public ‘discussion cafes’, internet blogging and filmed ‘visual essays’. You will also have the opportunity to spend a year studying abroad – an option that’s proved as popular with future employers as it has with students themselves. For more information see page 21.

BA American Studies
Engage with diverse forms of cultural expression as you get under the skin of American history, literature, politics and film. You will study literary texts, political and historical documents, bestsellers, music, movies, photography, popular culture and material culture.

First you will gain a solid grounding in your field through a survey of the core issues in American studies. Then, in your second year, you will continue to develop your understanding of the subject by studying a wide range of topics, which could include US intellectual and cultural history; American frontiers; the Cold War; the Beat poets and writers; contemporary or comparative literatures; slavery and civil rights history; American crime fiction; visual culture and American music; or gender and sexuality in America. In your final year you will take advanced seminars in such diverse subjects as American culture and politics in the 21st century; the American body; attitudes to gender in American culture; Californian literature; African American and Native American histories; America and the Vietnam War; US interventionism; or the Supreme Court.

In your final year you will also write a research dissertation on a topic of your choice, supervised by a member of faculty in the department of American Studies.

BA American Studies with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the degree programme in American Studies following successful completion of the foundation year. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. Your modules are taught via lectures, presentations, seminars and study groups, and incorporate a variety of assessment methods to prepare you for the different types of activities you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas including essay writing, research, preparing and giving presentations, and understanding and evaluating scholarly arguments.

BA American and English Literature
Study the works of American writers whilst also expanding your knowledge of English literature. Begin by studying canonical writers and texts in your first year. Then continue to develop your knowledge by studying a wide range of American topics such as the Beat writers, 20th-century American poetry; contemporary American literature; US comparative literatures; crime fiction; American women writers – all alongside English classes covering Shakespeare to Modernism. You will spend your year abroad studying at a leading university overseas. In your final year, you will take advanced topics in subjects covering, for example, the American gothic, Californian novels, the Pacific imaginary, Native American writing and film, and American autobiography – in addition to English literature topics. You will also write a research dissertation on a topic of your choice, guided by your UEA supervisor.

BA American Literature with Creative Writing
Study the literature of the United States while developing your talent as a creative writer. UEA’s creative writing courses are world-renowned and have produced some of the finest writers of the last 30 years. Our American Studies department is also one of the world’s leading centres for the study of American literature: we have been pioneers in the field for more than 50 years. On this degree you will benefit from teaching in both departments.

In your first year you will delve into your studies of American literature. Alongside this, you will develop new creative material and skills through technical exercises and group discussion, and explore strategies for drafting and redrafting new work. Your second-year modules cover the writing of poetry, fiction and drama, as well as topics such as contemporary American fiction. You will spend your third-year studying at a leading university overseas. After you return, you will take advanced final-year modules which offer a foretaste of UEA’s acclaimed MA in Creative Writing.
BA American History
Focus your studies on the history of the United States and its people, its emergence as a world superpower and its influence on global culture.

You will begin by tracking the American story from Native American history, the Revolution and the world of enslaved communities in the Old South, through to the struggles of the Civil Rights era and the crucial decisions of presidents who, by the atomic age, held the fate of humanity in their hands.

As your studies progress you will delve into American intellectual and cultural history, studying topics such as African American freedom struggles, the American frontier, the Cold War, gender and sexuality in American history, or American films of the 1980s.

You will spend your third year studying at a leading university overseas. After you return, you will choose from a selection of advanced topics, which include Native American histories, the Supreme Court, US interventionism, America and the Vietnam War, and American violence. You will also write a research dissertation on a topic of your choice, supervised by a member of our faculty.

BA American Studies, BA American and English Literature, BA American Literature with Creative Writing or BA American History
Study one of the above courses as a four-year programme, with a year in the United States or Canada, or spend your first semester in the United States or Canada and your second semester in Australia, New Zealand, Hong Kong.

You will spend your third year abroad then return to UEA for your final year.

Choose from over 50 North American universities (more than at any other UK university), including institutions in California, Vancouver, Philadelphia, Washington, DC, New York State and more.

While abroad you will be able to choose from the range of modules on offer at your host university, pursue research for your final-year dissertation, and benefit from first-hand experience of life in North America. For more information see page 21.

WHERE NEXT?
Throughout your American Studies degree you will develop cultural awareness and critical skills, which means you will graduate with a global mindset that is enormously valuable in the jobs market. Whether you choose to stay in the UK or aim for a career abroad, your ability to see things from another perspective will be highly valued by employers. If you decide to study abroad as part of your UEA degree, the experience of living, studying and working on a different continent will help you to develop this international outlook even further.

UEA American Studies graduates are known for their strong communication skills and often go into careers in journalism, public relations, marketing and social media. Equally, you may be drawn to the Civil Service, teaching, film production or publishing. Whichever path you choose, your opportunities will be broad.

Get a taste for the careers opportunities on offer at our annual Working with Words conference. Here, more than 40 alumni return to share their stories and showcase a range of career possibilities linked with writing and communication. These include journalism, fiction or non-fiction writing, editing, digital marketing and corporate communications. Working with Words is part of a wider arts and humanities events programme coordinated by our Careers Service. The programme includes several other events dedicated to helping you choose the right career for you, including Careers in Charities and NGOs, Working in Politics and Local Government.

ABOUT US
American studies at UEA is a pioneering centre for teaching and research in the history, literature and culture of the United States of America. We have led the way for more than 50 years and we continue to be at the forefront of American studies, questioning and redefining the boundaries of the subject.

As a student of American studies, literature or history at UEA, you will be part of a community of scholars whose work is shaped by their ongoing engagement with life and scholarship in the United States. More than 70% of our research in American Studies has been rated world-leading or internationally excellent (Research Excellence Framework 2014).

You will be taught by staff who are world experts in their area and whose research defines the field of American studies today. We have particular strengths in African American and Native American history, in regional and trans-national American cultures, and in American literature from Mark Twain to emerging contemporary writing. We range across autobiography, poetry, novels, films, and visual and material culture. Through our work we interrogate categories of race, class, gender and sexuality, and explore the burning issues of the contemporary world, including religion, free speech, the environment and the limits of American democracy.

We ranked third overall for American Studies, with 96% of students saying they were satisfied with their course, in the Guardian University Guide 2017.
BA History of Art
UCAS code V350
A level (typical offer): AAB
International baccalaureate: 33
Length of course: 3 years full time, 5–7 years part time
Study abroad: Optional semester (full time only)

BA History of Art with a Year Abroad
UCAS code V354
A level (typical offer): AAB
International baccalaureate: 33
Length of course: 4 years
Study abroad: Yes, one full year

Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/art-history/courses

Study in a department that benefits from impressive facilities, including a world-class art collection on campus, which has major exhibitions and a dedicated art library. The Sainsbury Centre for Visual Arts was described as ‘perhaps the greatest resource of this type on any British campus’ by The Times and Sunday Times Good University Guide.

ABOUT YOU
You will be working towards three A levels (or equivalent). These could be in any subjects but at least one should involve formal essay writing. You are interested in art, but do not need to have studied the subject previously. We welcome students with non-traditional qualifications and experience, including mature applicants.

ABOUT THE COURSES
BA History of Art
Study the history of art, including Western art and architecture from classical antiquity, the medieval, Renaissance, Baroque and modern periods, through to contemporary art. Complement this with study of the art forms of Islamic, Indian, African, South American, Japanese and Pacific cultures.

You will engage closely with works of art and architecture from different historical and geographical contexts through a wide variety of modules, tailoring your degree by choosing modules that suit your interests. You will learn to think in creative yet rigorous ways about art’s possible meanings. You will also be encouraged to consider art as a transcultural and transhistorical phenomenon connecting different periods and places. In the final year you will complete a dissertation on a topic of your choice, supervised by a faculty member in the department.

Throughout your studies you will be able to study works of art and artefacts firsthand, in the Sainsbury Centre for Visual Arts and on trips to London, Cambridge, and other cities in the UK and overseas. You may also study at a European university or choose from our many partner institutions outside Europe.

BA History of Art with a Year Abroad
Get even more out of your degree by adding a year studying at a university in the United States, Canada, Australia or New Zealand. You can take any of the modules on offer at your host institution, which means you will benefit from exceptional flexibility and breadth of art historical training.

BA History of Art with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the degree programme in History of Art following successful completion of the foundation year. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. Your modules are taught via lectures, presentations, seminars and study groups, and incorporate a variety of assessment methods to prepare you for the different types of activities you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as essay writing, research, preparing and giving presentations, and understanding and evaluating scholarly arguments.

BA History of Art with Gallery and Museum Studies
Gain substantial art historical expertise as well as the knowledge to understand how art and heritage have been displayed and curated. You will study the history of art and the ways in which art has been presented in galleries and museums from the Renaissance through to the present day. While becoming familiar with major issues and themes in art history, you will also be introduced to diverse forms of curatorial practice and display, as well as important issues such as exhibition design, audience development and the public role of museums.

Alongside modules on the history of art and the analysis of visual and material culture, you will be introduced to the history of museums and galleries, and to contemporary gallery theory and practice. Your studies will benefit from close proximity to the Sainsbury Centre for Visual Arts, and museums and galleries in London. You may also choose to study at one of our overseas partner institutions. For more information see page 21.

In your final year you will explore these topics further through advanced optional modules. You will also complete a dissertation on a topic of your choice relating to the history of art and museums, supervised by a faculty member.

BA Archaeology, Anthropology and Art History
Combine archeological, anthropological and art historical approaches to art with this innovative degree. You will study a wide range of material, from the prehistoric through to the present day, and from diverse cultures and societies. As well as introductions to archaeology, anthropology and material culture studies, you will be given opportunities to learn about topics such as the art and archaeology of the ancient Near East, ancient Egypt, pre-Columbian America, and Japan, as well as the art and material culture of African, Asian, European, Pacific, and North and South American societies.

You will explore a wide range of cultures and cultural forms, and consider art as a cross-cultural practice, thereby familiarising yourself with the varied ways in which human creativity has been approached by art historians, archaeologists and anthropologists. In your final year you will complete a dissertation on a topic of your choice, supervised by a faculty member.

You may also take advantage of the opportunity to study at a European university or choose from our many partner institutions outside Europe. For more information see page 21.
ART HISTORY

BA Archaeology, Anthropology and Art History with a Year Abroad

Complement your BA Archaeology, Anthropology and Art History degree with a year abroad at one of our prestigious partner universities in the United States, Canada, Australia or New Zealand. You could spend your third year exploring the contemporary art scene in San Francisco, studying Aboriginal art in Sydney, or visiting Native American museums in Vancouver; while being taught at a university department in one of these cities. For more information see page 21.

BA History of Art and Literature

Study art history and English literature on a degree course that provides you with the historical knowledge and intellectual skills needed to understand both at an advanced level.

You will study both with art historians and academics in the School of Literature, Drama and Creative Writing, learning from their internationally renowned expertise.

This degree combines the study of art and architecture with close analysis of literary texts. This enables you to expand your knowledge of these two central forms of human culture and to develop strong skills of visual and verbal analysis. After building a firm foundation in both subjects in the first year, you can choose from a range of optional modules on the history of art and literature. You will learn about key issues and approaches in art history, such as different artistic techniques, the social functions of art and the history of art exhibitions. You will also study the history and theory of literature from Chaucer and Shakespeare through to the present day. Seminar modules offered by both departments will help you to understand the changing relationship between art and literature. You will also benefit from opportunities to study works of art and artefacts first-hand, in the Sainsbury Centre for Visual Arts or on trips to London, Cambridge, and other cities in the UK and overseas.

In your third year you will complete a dissertation on an interdisciplinary topic of your choice, supervised by academic staff in both history and literature.

BA Archaeology, Anthropology and Art History with a Year Abroad

Length of course: 3 years
Study abroad: Yes, one full year

BA History of Art and Literature

Length of course: 3 years
Study abroad: Optional semester

BA History of Art

Length of course: 3 years
Study abroad: Optional semester

ABOUT US

We are part of a close network of internationally renowned centres for the study of art and architecture in Europe and North America; the arts of Africa, Asia, Oceania and South America; the anthropology and archaeology of art; and museum studies and cultural heritage.

Throughout your course you will study the two disciplines of history and history of art in parallel, taking modules offered by both departments. In your art historical studies you will examine art as it has been practised in Europe and North America, as well as Asia, Africa, South America and the Pacific, from the prehistoric period through to the present day. In your historical studies you will engage with European, American and Russian history over a wide-ranging chronological span. In your third year you will complete a dissertation on an interdisciplinary topic of your choice, supervised by academic staff in both history and art history.

WHERE NEXT?

You will graduate ready to progress to a career or to further postgraduate study. According to the Higher Education Statistics Agency's Destination of Leavers from Higher Education survey 2014-15, more than 90% of our graduates are in employment or postgraduate study within six months of graduating.

Perhaps you will choose to pursue a career directly related to your degree, in academia, museums, galleries, journalism and publishing, arts administration, archaeology, conservation or the commercial art world. Our graduates have also gone on to careers in teaching, business and law.

Whichever path you choose, the arts and humanities events programme, coordinated by UEA’s Careers Service, includes a dedicated art history alumni event to showcase career opportunities and share alumni stories.

BIOCHEMISTRY

BSc Biochemistry
UCAS code C700
A level (typical offer): AAB, including Chemistry and one other Science or Mathematics
International baccalaureate: 32, including HL Chemistry at 5 and one other HL in Science or Mathematics at 5
Special requirements: Grade B or 5 in GCSE Mathematics
Length of course: 3 years

BSc Biochemistry with a Year in Industry
UCAS code C720
A level (typical offer): AAB, including Chemistry and one other Science or Mathematics
International baccalaureate: 33, including HL Chemistry at 6 and one other HL in Science or Mathematics at 6
Special requirements: Grade B or 5 in GCSE Mathematics
Length of course: 4 years

Study biochemistry and immerse yourself in the wonder of biological organisms and processes at the molecular level. Explore all aspects of life from the molecular level, through cells, tissues and organisms, right up to populations and ecosystems. Learn from leading research scientists who are specialists in their fields of study.

ABOUT YOU
You will have a strong background in chemistry and will be enthusiastic about applying this to the study of biological mechanisms. You will be excited about the fundamental impact biochemistry has on many areas of contemporary science. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
Hosted by the School of Biological Sciences, our biochemistry programmes are taught as closely integrated joint degrees with the School of Chemistry. The key feature of these programmes is the flexibility and choice they offer you. You will be able to tailor your degree to match your own interests and career aspirations.

BSc Biochemistry
You will learn the fundamentals of biology and chemistry that underpin the study of biochemistry. Then you will choose from a broad range of modules across topics such as cell and molecular biology, medicinal chemistry, genetics, protein engineering and microbial biotechnology.

There are currently more than 14 modules available on this course, including Genomes, Genes and Genomics; Microbial Biotechnology; Molecular Plant–Microbe Interactions; Cell Signalling; Organic Compounds: Synthesis and Properties; and Inorganic Compounds: Structure and Function.

In your final year, you will have the chance to further develop your laboratory and technical skills with an independent research project in a unique area of science. You could even see your research published.

BSc Biochemistry with a Year in Industry
On this course, in addition to receiving the same teaching and opportunities offered by the BSc Biochemistry, you will also spend a year working in industry, gaining experience that will be highly valued by future employers. We have established research links throughout the UK and beyond, and we will help you in identifying and competing for appropriate industrial opportunities. These might be in pharmaceutical companies, biotechnology or research institute laboratories. During your placement you will be supported by both an industrial supervisor and a mentor from the University.

MSci Biochemistry and MSci Biochemistry with a Year Abroad
In addition to your choice of the above courses, you will complete a further year of advanced study. You will undertake a year-long independent research project, as well as having the opportunity to study advanced biochemistry modules at Master’s level. This is the ideal preparation for progressing onto PhD study and a successful research career.

You can also enjoy the experience and career benefits of living and studying abroad in your third year. We currently have exchange agreements with universities in Europe and North America, including California, Illinois, Massachusetts, Colorado and Missouri in the United States, and in British Columbia, Western Ontario and Calgary in Canada. For more information see page 21.

WHERE NEXT?
Your biochemistry degree could lead to a broad range of employment and postgraduate opportunities. You may go on to work in forensic science, the brewing and food industries, medical biochemistry, science patenting or teaching. Alternatively, you might choose to progress to higher degrees; about a third of our graduates do this, with a number then taking up posts in university, medical or industrial research laboratories. We work together with UEA’s Careers Service to offer you support at every stage of your course, from choosing a career through to applying for graduate jobs and further study.

ABOUT US
Our biochemistry degrees are taught jointly by the Schools of Biological Sciences and Chemistry. This dual approach means that in all elements of the course you benefit from subject-specific experts who inform our undergraduate teaching. These strengths are mirrored in our excellent record of student satisfaction: in both the 2015 and 2016 National Student Surveys, we were ranked first in the UK in Biochemistry, with 100% overall satisfaction.

Our research makes use of a wide array of facilities such as multi-photon and laser scanning confocal microscopes for the study of cells and tissues at the molecular level, high-field nuclear magnetic resonance spectrometers and X-ray diffractometers for the study of molecular structure, mass spectrometers, liquid and gas chromatography systems, and fluorescence and electron microscopes. In the latest Research Excellence Framework (REF2014), 100% of our biology research environment and impact was judged to be world-leading or internationally excellent, and our chemistry research output was ranked fourth in the UK.
We are at the front line of biological sciences, continually working to advance discoveries in the world around us, from antibiotic resistance to biofuels and from cancer to bees.

ABOUT YOU
You will share our passion for biology, and want to take your studies further. You will be excited about our cross-disciplinary approach and a future where your skills and knowledge can have an impact on people’s daily lives.

We encourage applications from students with A levels, IB, Access courses, BTECs or professional qualifications, and will consider a variety of alternatives as equivalent to our stated entry requirements. Our Biological Sciences with a Foundation Year programme is a great choice if you do not meet the academic requirements for our other courses.

ABOUT THE COURSES
BSc Biological Sciences
You will have the chance to explore a broad range of subjects in your first year across all areas of biology, including genetics, biotechnology, evolutionary biology, microbiology and ecology. Then, later, you can tailor your course to your own interests, or specialise in cell biology or biology with science communication. Alternatively, subject to satisfactory academic performance, you can transfer onto the MSci Biological Sciences or BSc Molecular Biology and Genetics programmes.

BSc Biological Sciences with a Year Abroad
Enhance your studies with a year studying abroad. You could study in Australia, where our current exchange partners include Murdoch University, Perth; Macquarie University, Sydney; and University of Auckland, New Zealand. Or study in North America, where we have exchange agreements with universities in California, Colorado, Florida, Illinois, Kansas, Maine, Missouri and Oregon. We also have exchange partners in Canada, including universities in British Columbia and Ontario.

Alternatively, you could study in Europe. If you choose this route, you will take appropriate language modules during your second year, in preparation for a year spent in France, Italy, Germany or Spain. If you study with our partners in the Netherlands and Sweden, you will be taught in English. Learning a second language and the experience of living and studying in Europe will prove to be a valuable asset to you as you begin your career. For more information see page 21.

BSc Biological Sciences with a Year in Industry
Benefit from our established research links throughout the UK and beyond, as we help you in identifying and competing for exciting industrial opportunities. These might be in large pharmaceutical companies, small biotechnology laboratories, hospitals or research institutes. During your year-long placement you will be supported by both an industrial supervisor and a mentor from the University. This course is accredited by the Royal Society of Biology.

BSc Biological Sciences (with Education) to be confirmed
This degree programme is an opportunity to study biological sciences, whilst preparing for a rewarding career in teaching. As well as the course modules outlined in the BSc Biological Sciences, you will undertake two compulsory teaching practice modules, which will include a guaranteed school placement at the end of your first year. You will receive additional teaching experience through fortnightly classroom observation placements, as well as in seminars and workshops delivered by our School of Education and Lifelong Learning – one of the top teacher training institutions in England, with more than 30 years’ experience. During your time on the course you will also have the opportunity to undertake other education modules. This exposure to education and the understanding you will gain will put you in a great position to progress to the UEA PGCE (Initial Teacher Training) course when you graduate.

MSci Biological Sciences
Pursue your particular interests within the biosciences with this flexible MSci programme. In your second and third years, you will have the opportunity to select from more than 25 optional modules covering a diverse range of scientific subjects within the biosciences. In your third year, you will also have the chance to pursue your developing scientific interests through an independent research project. Your fourth year provides an opportunity for Master’s level study in subject areas of your choice. You also undertake a laboratory-based research project.

You will benefit from the opportunities afforded by UEA’s strong research and teaching collaborations with our partners across the Norwich Research Park. These include a number of world-renowned research institutes, including the John Innes Centre, The Sainsbury Laboratory, the Earlham Institute, the Institute of Food Research, and the Norfolk and Norwich University Hospital.

BSc Molecular Biology and Genetics
After the enormous advances made in the last few years, this is the perfect time to study molecular biology and genetics. Choose to study genes in medicine, biotechnology and agriculture and their application in fields such as microbial or plant molecular biology, cellular signalling and evolutionary biology.
Biological Sciences with a Foundation Year

UCAS code: BC9

Requirements: See our website for specific entry criteria. Grade C or 4 or above in GCSE English Language and Mathematics.

Length of course: 4 years

Biological Sciences with a Foundation Year

Gain the skills, knowledge and confidence you need to progress to a degree in a range of biological science specialisations.

During your foundation year you will be assigned an adviser from the School of Biological Sciences who will guide you through your course to ensure you are ready to progress to the degree course of your choice.

WHERE NEXT?

Choose a career in fields such as forensic science, the brewing and food industries, the health service and hospital laboratories, science communication, pharmaceutical companies, intellectual property, teaching, agriculture, ecology and environmental consultancy. Or you might wish to join the third of our graduates who progress to higher degrees, often taking up posts in university, medical or industrial research laboratories. The School of Biological Sciences works together with UEA’s Careers Service to offer you support at every stage of your course, from choosing a career through to applying for graduate jobs and further study.

ABOUT US

We are recognised for consistently providing a high-quality student experience, and are ranked fourth in the UK for our learning resources in Biology in the National Student Survey 2016.

More than 220 people are actively involved in research within the School. This effort ranges from the biochemical, molecular and cellular levels to ecological interactions and evolutionary processes. Some of our research focuses on fundamental processes, for instance on protein structure and microbial energetics, and some is applied research, for example the study of human and plant diseases and conservation biology. We are world leaders in a number of these areas of biological research and you’ll have the opportunity to carry out your final-year projects within any of these fascinating fields.

You will also benefit from our enviable position as an integral partner of the Norwich Research Park, which is also home to the Norfolk and Norwich University Hospital, and four independent, world-renowned research institutes: the John Innes Centre, Institute of Food Research, The Sainsbury Laboratory and the Earlham Institute. As well as housing more than 40 science- and technology-based businesses, Norwich Research Park is one of Europe’s leading centres for research in food, health and the environment, giving you the chance to be exposed to cutting-edge developments in these crucial areas of biology.

“My year abroad in Australia was one of the best experiences of my life. The whole experience was incredible and not only gave me the opportunity to study new and exciting things but also to discover a whole new culture and way of life.”

– Laura Hanton, Biological Sciences with a Year Abroad Graduate

The world is running out of antibiotics. But we’re tapping into a surprising new source – the backs of leafcutter ants.

WHAT WILL YOUR DISCOVERY BE?
www.uea.ac.uk/brilliant
Study biomedicine and learn to apply cellular and molecular techniques to the understanding and treatment of human diseases. Explore areas such as the treatment of cancer, arthritis and cardiovascular disease. And tackle topics including ophthalmology and gastroenterology – all in a world-leading research environment.

ABOUT YOU
You will be excited about developing your understanding of biomedicine, and are working towards qualifications in Biology and another science subject to support this. You will be ready to take full advantage of our world-leading research park to build your future in the biomedical sciences. We welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSE
BSc Biomedicine
Train in a wide range of modern biochemical techniques and the practice of testing ideas by experiment. Take advantage of teaching laboratories offering state-of-the-art equipment and facilities.

As you progress in your studies, you can undertake a substantial independent research project. You will also have the opportunity to specialise with module options. Popular modules on offer include Cancer Biology; Cell Biology and Mechanisms of Disease; Evolution in Health and Disease; Molecular and Cellular Principles of Development; Molecular Enzymology in Biology and Medicine; and Genomes, Genes and Genomics.

WHERE NEXT?
When you graduate, you will have a comprehensive knowledge of the fundamental scientific techniques required for research and clinical investigation into human health and disease.

You will be ready to pursue a wide range of career paths. You might go on to work in industry, management or teacher training. Alternatively, you might wish to progress to a higher degree – a third of our graduates do this. Many go on to take posts in universities, or medical or industrial research laboratories. The School works together with UEA’s Careers Service to offer support at every stage of your course, from choosing a career through to applying for graduate jobs and further study.

ABOUT US
You will be taught by leading academic researchers who are experts in their fields of study. The clinical aspects of your course will also be partly taught by biomedical scientists and consultants from the Norfolk and Norwich University Hospital.

You will have access to the incredible facilities across our affiliated institutions on campus. This includes Norwich Medical School and our Biomedical Research Centre, which houses research groups investigating some of the toughest medical challenges of the 21st century, including cancer, cardiovascular and neurological disease and antibiotic resistance. As part of the world-class bioscience cluster at Norwich Research Park, we are also a key partner in the development of the new Quadram Institute, planned to open in 2018. The Institute will be a £75-million centre for research into the challenges of human health, food and disease that affect the world today. See www.quadram.ac.uk

Knowing how tumours form helps us to break them down. Biologists at UEA have shown how cooperating cancer cells help each other survive by sharing growth factors.

HOW WILL YOU FIGHT CANCER?
www.uea.ac.uk/brilliant
You will explore marketing as a core management discipline, looking at the principles of marketing and marketing strategy. You will develop specialist skills in areas such as marketing communications and market research. You will learn how building brands and understanding market behaviour can determine success. As you become familiar with marketing concepts and terms, you will examine the theories and techniques of leading organisations. You will look at how firms use promotional campaigns in a complex media-driven environment. In your final year, specialist modules cover topics including Market Research, Consumer Behaviour and Strategic Management. This will open the door to a range of marketing careers in business, or with specialist marketing agencies.

STUDY ABROAD
Enhance your studies by spending a year studying abroad. You will spend your third year at one of our partner universities before returning to UEA for your final year. This is a great way to enhance your knowledge, gain different cultural experiences and develop your personal and professional skills. See page 21.

WHERE NEXT?
Our graduates have gone on to build careers in major organisations, including Apple, Google, the BBC, the UK Foreign and Commonwealth Office, Amazon and Fujitsu. Some have even gone on to build their own successful companies, such as Gnaw Chocolate and Zealify. In recent surveys, more than 90% of our graduates went straight into employment or further studies, and almost 80% had professional and managerial jobs six months after graduating.

We work closely with UEA’s Careers Service to offer an Employability Week every year to provide you with access to graduate recruiters from sectors such as IT, global finance and consulting. Events include a mock assessment centre run by a global recruiter, sessions on developing interview skills, writing your CV and selling yourself, and CV-enhancement via volunteering opportunities.

GRADUATE TRAINEE MANAGEMENT SCHEME (GTMS)
Through this innovative scheme you can apply for a paid nine-month graduate trainee placement. Created in partnership with local employers, the GTMS features a number of exciting placements that are ring-fenced for our graduates. The scheme is similar to an industry placement programme, but rather than undertaking work experience in the third year of a four-year sandwich degree, you can gain industrial management experience in a salaried nine-month work placement directly after graduation. This often leads to permanent employment.

ABOUT US
Norwich Business School has a strong research agenda focused on responsible business practice. Our research themes include corporate responsibility, finance and accounting, people in organisations, marketing and branding, competition policy and sustainability in business.

We run a programme of “Inside Business” events that are excellent opportunities for you to meet guest speakers from leading businesses and talk to alumni, fellow students and staff from across the School. Guest speakers have included Karen Jones (Founder of Café Rouge, CEO Food and Fuel), Callum Barton (Chair, Ralph Lauren Watch and Jewelry Co.), Paul Harvey (Managing Director, Citibank), Tamara Ingram (Group Executive, Grey Group), Ladi Balogun (CEO, First City Monument Bank) and Joe Greenwell (Chairman, Ford Britain).
Study chemistry in a School that brings a different perspective to the subject. We pride ourselves on a multidisciplinary outlook, innovative teaching and world-leading research. From synthetic chemistry to spectroscopy and biophysical chemistry, our research has earned us a global reputation for quality, leading our School to be ranked fourth in the UK for research outputs in the 2014 Research Excellence Framework.

**About You**

You will have a curiosity about the way chemicals interact at a molecular level and a desire to understand their impact on every aspect of our lives. You will have the imagination to take this as far as you can, we will supply the knowledge. As with all our degrees, we also welcome students with non-traditional qualifications and experience, including mature students. For instance, you may have already completed two years of the Open University OpenPlus programme, which enables you to apply to join the second year.

**About the Courses**

Whichever of our degrees you choose, you will benefit from substantial laboratory-based teaching with dedicated weekly practical training, allowing you to develop your research skills and experience. You will also develop your skills as a chemist through a combination of traditional lectures, innovative large-group teaching, problem-solving workshops, seminars and small-group tutorials of four to eight students.

We encourage transfer between BSc and MChem courses, depending on the marks you achieve and the topics you study. The chemistry content of our degrees is of a very high standard and where appropriate the programmes are accredited by the Royal Society of Chemistry.

**BSc Chemistry**

This three-year programme will develop your core chemistry knowledge and skills while allowing you to choose optional modules in forensic chemistry, mathematics, physics or environmental science. As you reach the final year of the programme, you will gain an advanced understanding of all aspects of chemistry, enhancing the holistic approach of previous years of study. In your final year you will also undertake a research or literature-based project in your area of interest. It is possible, depending on academic performance, to transfer to the MChem Chemistry at the end of your first or second year.

You will receive additional teaching experience through fortnightly classroom observation placements, as well as in seminars and workshops delivered by our School of Education and Lifelong Learning - one of the top teacher training institutions in England, with more than 30 years’ experience. During your time on the course you will also have the opportunity to undertake other education modules. This exposure to education and the understanding you will gain will put you in a great position to progress to the UEA PGCE (Initial Teacher Training) course when you graduate.

**MChem Chemistry**

Gain the academic training required to become a professional chemist. On this programme, accredited by the Royal Society of Chemistry, you will study all aspects of chemistry and develop strong practical, analytical and problem-solving skills. This will culminate in an independent research project, which you will undertake with supervision from one of our many research groups and lead scientists.

You will develop the practical skills so vital to chemists through laboratory classes held in our modern teaching laboratories. Here you will discover new techniques and learn to use sophisticated instrumentation. These classes complement a wide range of lectures, workshops and tutorials in topics ranging from fundamental chemistry to advanced contemporary research. All this will equip you to make your contribution to the discovery of new chemistry.

In recent years, our students have conducted research projects in incredibly diverse topics. These include the measurement of electron transport across membranes to probe their potential in renewable energy; and the synthesis of molecular switches for nanomachines and the investigation of their microscopic molecular mechanisms.

**MChem Chemistry with a Year Abroad**

Broaden your mind with a year abroad. Our exchange programme is long established and offers you a rare and exciting opportunity. The experience of living and studying abroad will be a valuable asset to you upon graduation. We currently have exchange agreements with universities in North America, including California, Illinois, Massachusetts, Colorado and Missouri in the United States, and in British Columbia, Western Ontario and Calgary in Canada. For more information see page 21.

**MChem Chemistry with a Year in Industry**

Spend your third year on an industrial placement gaining invaluable first-hand experience of chemistry in the working environment. During your placement you will also complete distance learning assignments. You can take a placement in the UK or Europe before returning to UEA for the final year of your degree. Please note that on Year in Industry courses we cannot guarantee a work placement as this decision rests with potential employers. Although you are expected to source your placement yourself, you will be supported by School staff and the Careers Service. If you have not successfully secured a work placement by the end of your second year you can transfer onto the standard four-year MChem programme.
BSc Chemical Physics
UCAS code F190
A level (typical offer): BBB, including Chemistry and Mathematics
International baccalaureate: 33, including H2 Chemistry at 6 and H2 Mathematics at 6
Length of course: 4 years
Requirements:
- Chemistry with a Foundation Year
- UCAS code FF31
- A level (typical offer): BBB, including Chemistry and Mathematics
- International baccalaureate: 33, including H2 Chemistry at 6 and H2 Mathematics at 6
- Length of course: 4 years

BSc Chemical Physics
A key feature of this course is its interdisciplinary and coherent approach, which brings together chemistry, physics and mathematics. Chemical physics is an exciting and intellectually challenging area, and on this course you will be introduced to topics that reflect its full scope. These include the fabrication and properties of nanoparticles, laser systems and their applications, micromsensors, computational modelling and photonics. Our modules include theoretical, experimental and computational components, and laboratory classes will help you develop your practical expertise. Our lecturers are internationally known for their expertise in chemical physics.

MChem Chemical Physics with a Year Abroad
UCAS code F190
A level (typical offer): AAB, including Chemistry and Mathematics
International baccalaureate: 33, including HL Chemistry at 6 and HL Mathematics at 6
Length of course: 4 years

MChem Chemical Physics with a Year in Industry
Enhance your studies by studying abroad. You will spend your third year abroad before returning to UEA for your final year. On your return, you will be able to undertake an independent research project in theoretical, experimental or computational chemical physics. We currently have exchange agreements with universities in North America, including California, Illinois, Massachusetts, Colorado and Missouri in the United States, and in British Columbia, Western Ontario and Calgary in Canada. For more information see page 21.

MChem Chemical Physics with a Year Abroad
Gain invaluable experience by spending your third year on an industrial placement. You will get first-hand experience of chemistry in the working environment. During this placement you will maintain your academic practice through distance-learning assignments. You can take a placement in the UK or elsewhere in Europe. On your return to UEA, you will be able to undertake an independent research project in theoretical, experimental or computational chemical physics.

Chemistry with a Foundation Year
If you do not yet meet the academic requirements for our other courses, our Chemistry with a Foundation Year could be for you. On this course you will gain the skills and knowledge you need to progress to degree-level study. You will be assigned an adviser from the School of Chemistry who will guide you throughout the year to ensure your progression onto your degree course of choice. Find out more about the criteria for this course at: www.uea.ac.uk/study/chemistry-with-foundation-year

WHERE NEXT?
You could go on to work in the UK chemical industry, government or local authority establishments, research organisations, hospitals and water authorities.
Alternatively, you could become one of the many graduates who choose to continue in further study at UEA by progressing to an MSc, PhD or PGCE: The School of Chemistry works together with our Careers Service to offer you support at every stage of your course, from choosing a career through to applying for graduate jobs.

ABOUT US
We are a leading centre for chemistry research in the UK, with 98% of our research ranked as world-leading or internationally excellent in the 2014 Research Excellence Framework. The School of Chemistry’s research themes are light and energy, the chemistry of materials and catalysis, and the chemistry of life processes, and these themes influence and run throughout our taught programmes, ensuring you are at the forefront of research in the field. During your final year you will be able to carry out a research project within one of the School’s research groups, or elsewhere on the Norwich Research Park.
We’re proud to say that all of our courses are accredited or recognised by highly respected industry bodies. Our Chemistry degrees are accredited by the Royal Society of Chemistry (RSC) as satisfying the academic requirements for the award of Chartered Chemist (CChem). All of our chemical physics degrees are recognised by the Institute of Physics.

WHERE NEXT?

WHERE NEXT?

WHERE NEXT?

WHERE NEXT?

WHERE NEXT?

WHERE NEXT?
Prepare for your career by joining a computing department that’s one of the highest-rated in the UK for student satisfaction. You will benefit from expert teaching, excellent facilities, an exciting range of course modules and our close links with industry. Tailor your degree to your future career goals by choosing optional modules that suit your interests and aspirations.

ABOUT YOU

You are passionate about computing. You may already be thinking about the future, and looking for a degree that will help you target the diverse computing job market. You will be studying for at least one A level in Mathematics, Physics, Computing, Electronics, Economics or, especially if you’re thinking of studying on our business programmes, a business-related subject. Alternatively, you might be studying for a BTEC in a science, computing or mathematics-related subject. We encourage applications from students with A levels, IB, Access courses, BTECs and professional qualifications, and will consider a variety of alternatives equivalent to our stated entry requirements. Our BSc Applied Computing Science with a Foundation Year is a great choice if you do not meet the academic requirements for our other courses.

ABOUT THE COURSES

BSc Computing Science

Prepare for a career working with the rapidly changing technology of computing. You will acquire a strong grounding in the theory of computing science, as well as gaining experience and skills in software engineering and problem-solving. In your first year you will study the core material that underpins computing science. Then, in your second and third years, you will structure your degree by choosing from a range of subjects, following the research expertise in the School, allowing you to study topics that relate to your own interests and career aspirations. In your third year you will further expand your knowledge while undertaking a major individual project.

Topics of study currently include: Advanced Software Engineering; Advanced Computer Graphics; Advanced Sound and Image Processing; Computer Vision; Computational Biology; Machine Learning; Embedded Systems; Information Systems; and Systems Engineering.

BSc Computing Science (with Education) to be confirmed

This degree programme is an opportunity to study computing science, whilst preparing for a rewarding career in teaching. As well as the course modules outlined for the BSc Computing Science, you will undertake two compulsory teaching practice modules, which will include a guaranteed school placement at the end of your first year. You will receive additional teaching experience through fortnightly classroom observation placements, as well as in seminars and workshops delivered by our School of Education and Lifelong Learning – one of the top teacher training institutions in England, with more than 30 years’ experience. During your time on the course you will also have the opportunity to undertake other education modules. This exposure to education and the understanding you will gain will put you in a great position to progress to the UEA PGCE (Initial Teacher Training) course when you graduate.

MComp Computing Science

This four-year programme allows you to gain a greater depth of knowledge of computing science. You will follow the BSc programme structure for the first three years gaining a solid foundation in programming, problem-solving, and relevant mathematics and computing theory. You will then develop these themes further through core study in programming, software engineering, data structures and algorithms and operating systems and architectures.

In your final year you will undertake a major research or software development project, where you will work as part of a team. This will normally be in collaboration with research project partners or industry.

MComp Computing Science with a Year Abroad

Prepare for a career working with the rapidly changing technology of computing science. It has a strong emphasis on programming logic devices and embedded systems. If you have a real interest in computing systems, from a software as well as a hardware perspective, this hands-on course is for you. The degree combines the study of hardware design and computer architecture with more traditional computing science subjects such as high-level programming and software engineering. You can choose to deepen your knowledge of computing systems or study wider aspects of computing science such as computer graphics or artificial intelligence. You will gain experience of the embedded computing devices that are at the heart of many everyday products, and the computer networks that enable their processing power to be utilised.

Your final-year project gives you an opportunity to put all that you have learned into practice and develop your professional skills.

BEng Computer Systems Engineering

This specialist degree has a practical focus, meaning you will typically spend 25% more time in the laboratory than on a computing science degree. It has a strong emphasis on programming logic devices and embedded systems. If you have a real interest in computing systems, from a software as well as a hardware perspective, this hands-on course is for you. The degree combines the study of hardware design and computer architecture with more traditional computing science subjects such as high-level programming and software engineering. You can choose to deepen your knowledge of computing systems or study wider aspects of computing science such as computer graphics or artificial intelligence. You will gain experience of the embedded computing devices that are at the heart of many everyday products, and the computer networks that enable their processing power to be utilised.

Your final-year project gives you an opportunity to put all that you have learned into practice and develop your professional skills.

BSc Computer Graphics, Imaging and Multimedia

BSc Business Information Systems
Prepare for a career designing and implementing computerised systems in a business environment. Or learn to become a manager with a full knowledge of the potential of information systems. On this course you will study a combination of subjects in computing, information systems and business through modules taught by both the School of Computing Sciences and Norwich Business School.

The course has a customised first year that develops your basic skills in business and information systems. In your second and third years you can choose the balance between computing and business that best suits your interests and career goals.

In your final year you will complete a substantial individually supervised research project. On graduation you will be highly sought after and ready for a career in IT, management consultancy, programming or business analysis.

A YEAR IN INDUSTRY
Enhance your studies with a year in industry on any of the above courses. You will spend your third year gaining valuable work experience in a field related to your degree before returning to UEA to complete your final year.

BSc Applied Computing Science with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the course of your choice by studying for a Foundation Year. This course gives you a strong platform in the fundamentals of computing and essential mathematics. Following successful completion of this year, you can transfer to the first year of any of the School of Computing Sciences’ degree programmes. If you do very well you will be eligible for entry to the MComp and the Year Abroad programme.

WHERE NEXT?
As a graduate from the School of Computing Sciences, your career prospects will be excellent and varied. For example, you will be well prepared to move into areas such as industry, commerce, research and government. Figures show that jobs in IT and Telecoms are some of the best paid, with an average salary of more than £47,000 – fourth highest in the UK (Reed).

We have close links with industry and business, and our projects are often run in collaboration with industrial partners. This ensures our courses keep in step with employers’ changing needs, and means you can be confident that you will graduate with the skills you need to progress to your chosen career.

Our courses are accredited by the BCS, The Chartered Institute for IT. This means that on graduation you will have fulfilled the academic requirement for registration as a Chartered IT Professional (CIITP) and partially fulfilled those for becoming a Chartered Engineer (CEng).

The School of Computing Sciences works together with UEA’s Careers Service to offer you support at every stage of your course, from choosing a career through to applying for graduate jobs.
Join a drama department noted for its work on the theory of performance, including improvisation, scriptwriting and directing. Gain a range of applied and technical theatre skills. Participate in our student-run theatre company, Minotaur. And be part of an outstanding programme of readings and lectures by poets, dramatists, novelists and visiting scholars.

ABOUT YOU
You will be working towards three A levels (or equivalent), including one in English Literature and/or Theatre Studies, as well as another arts or humanities subject. You will be excited by the theatre. As with all our courses, we welcome students with non-traditional qualifications and experience.

ABOUT THE COURSES
BA Drama
UCAS code W400
A level (typical offer): AAB, normally including Drama, Theatre Studies or English Literature. A second arts or humanities subject is preferred
International baccalaureate: 33, including HL English or Theatre Studies at grade 3 or above
Special requirements: Selection is also by interview and audition
Length of course: 3 years
Study abroad: Optional semester

BA English Literature and Drama
UCAS code WQ43
A level (typical offer): AAB, normally including English Literature. A second arts or humanities subject is preferred
International baccalaureate: 33, including HL English at grade 3
Special requirements: Selection is also by interview and audition
Length of course: 3 years
Study abroad: Optional semester

Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/ldc/courses

In your final year you will take a module bringing literature and drama together through the study of the concept of genre, and of the adaptation of literature for the stage.

BA Scriptwriting and Performance
Combine study of creative writing for each of the major dramatic media – theatre, cinema, television and radio – with practical, critical and historical studies in dramatic literature and performance.

Throughout your course you will be introduced to the specific formats, conventions and techniques of scriptwriting for different forms, and learn by writing scenes and short scripts, and critiquing each other’s work. Working alongside students on other drama programmes, you will develop your writing skills in the context of many aspects of the theatre, including acting, rehearsal and production methods.

In your second year you will have the option to take a work placement in a drama-producing organisation or environment. You will also be able to take part in production and practical project work.

In your final year you have the chance to get involved in the third-year production and/or the third-year project. That could mean a short written piece for performance by other students. You will also write a full-length play or screenplay as part of the creative writing dissertation.

WHERE NEXT?
In your final year you will take a module bringing literature and drama together through the study of the concept of genre, and of the adaptation of literature for the stage.

BA Scriptwriting and Performance
UCAS code WYF84
A level (typical offer): AAR, normally including Drama, Theatre Studies or English Literature. A second arts or humanities subject is preferred
International baccalaureate: 33, including HL English or Theatre Studies at grade 5
Special requirements: Selection is also by interview and audition
Length of course: 3 years
Study abroad: Optional semester

Study ecology with world-leading academics. Explore topics ranging from the molecular genetics of populations, plant science and animal behaviour, to environmental management, biodiversity and conservation, plus the essentials of economics and politics.

ABOUT YOU
You are excited by the possibilities of studying the science of life's interactions and how it underpins our understanding of the natural world and conservation. You will be working towards an A level or equivalent in Biology. As with all our courses, we also welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

BSc Ecology
Explore the key concepts of ecology and learn how organisms behave, evolve and interact with their physical and biological environments. You will study with world-leading researchers from the Schools of Biological Sciences, Environmental Sciences and International Development, and from the Tyndall Centre for Climate Change Research, which is based at the University.

You will learn through lectures, seminars and workshops geared towards helping you understand the theory and concepts behind evolution, behaviour, ecological services, processes and conservation. You will spend time in the laboratory, developing techniques to explore ecology, from microbes and parasites to model organisms. You will also learn in the field. Here you will perfect practical field skills and survey techniques. You will learn how to design a scientific question, complete field projects and be confident in the natural environment. You could join one of our residential field trips to Europe or Swaziland. And you will take your learning to the next level by developing your own unique, independent research, working with a member of staff to understand a system using the latest scientific techniques.

You will graduate as a skilled ecologist ready to take advantage of East Anglia's wealth of varied habitats, or range further afield to countries such as Brazil, Australia and Madagascar.

BSc Ecology with a Year Abroad
Enhance your studies by spending a year abroad. You will spend your third year studying at a university in Australasia, North America or Europe. You will then return to UEA to complete the final year of your degree. This is a fantastic opportunity to experience a new culture, see new ecological problems and solutions first-hand and make connections with partner organisations across the world. For more information see page 21.
ECONOMICS

BSc Economics
UCAS code L100
A level (typical offer): AAB, excluding General Studies
International baccalaureate: 33
Special requirements: GCSE Mathematics at grade B or 5 or above
Length of course: 3 years
L10A (4 years)

Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/eco/courses

Study economics in a lively, friendly, research-oriented department, committed to excellence in teaching. We combine academic rigour with outstanding academic support, as evidenced by the consistently strong performance of UEA economics courses in the National Student Survey. You will develop your powers of analysis and reason – the ultimate transferable skills, highly valued by graduate employers.

ABOUT YOU
In addition to achieving the required academic grades, you are willing to invest in learning economic modelling techniques and quantitative analysis. These are key tools used to analyse the economy and the agents (households, firms and governments) that operate within it. These skills are also in high demand by employers.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
BSc Economics
In this degree you will study all core areas of the economy, from how it works to how it can fail, and how it can be improved.

You will gain a foundation in the key concepts in macroeconomics and microeconomics. You will learn to understand consumption, savings, inflation, interest rates, monetary and fiscal policy, and the global economy. You will also study the behaviour of individuals and households and the decision-making of firms and governments. You will develop the ability to collect, analyse and interpret data – a key skill highly sought by employers. Throughout your degree you will learn economic modelling techniques and develop statistical skills, and have the opportunity to apply these in the form of practical and research-based projects.

As you progress through your degree you will be able to specialise and tailor your studies to areas that you find particularly interesting and relevant for your career goals.

BSc Economics with a Year Abroad
Enhance your studies by taking advantage of our year abroad option. You will spend your third year at one of our partner universities in North America, Europe or East Asia, before returning to UEA for your final year. For more information please see page 21.

BSc Business Economics
This course combines insights from economics with a focus on business. You will develop your understanding of the economic context in which modern businesses operate. You will also acquire the skills to create successful business strategies in a competitive environment.

Through a range of core modules you will strengthen your understanding of the macro- and micro-economy, develop economic modelling and statistical skills, and gain an understanding of the importance of strategic behaviour within a global business environment.

BSc Economics with Accountancy
Gain solid training in economic analysis, ready to pursue an accounting career in business or management. Your studies will incorporate core modules from the School of Economics and Norwich Business School. You will take the same economic core offered by the BSc Economics, while specialising in areas including financial and management accounting and information systems for management.

As well as core introductory modules in economics and business, you will study the macro- and micro-economy. You will also develop economic modelling and statistical skills. As you progress you will be able to choose economic, business and accountancy modules in order to tailor your degree to your own personal interests and career aspirations.

BSc Business Finance and Economics
Study the finance side of business and economics on this course, combining modules from the School of Economics and Norwich Business School. You will gain a thorough training in economic analysis and its application in financial markets and corporate finance.

You will study core introductory modules in economics and business that will strengthen your understanding of the macro- and micro-economy. You will gain skills in economic modelling and statistics, with the opportunity to apply and develop these throughout your degree.

In your final year you can choose modules from a broad selection of economics, business and finance subjects, according to your own personal interests.

BA Philosophy, Politics and Economics
Gain a solid grounding in economic and political science while studying philosophical approaches to understanding human behaviour and society. Throughout your degree you will benefit from a compulsory economics core, which is complemented by specialist modules in politics and philosophy.

The rewards of this multifaceted approach are substantial. You will learn to analyse a given economic, political or social problem using not only economic tools and concepts, but also those from political science and philosophy. By mastering these skills you will be able to present prediction and recommendations that are informed and insightful.

In your final year you will continue to tailor your degree to your interests by choosing from a range of advanced, specialist modules from the School of Economics and the School of Politics, Philosophy, Language and Communication Studies.

UEA ECONOMIC GRADUATES HAVE A
100% EMPLOYMENT SUCCESS RATE

Length of course: 3 years
BSc Politics and Economics

Gain a thorough and high-level training in economics with an emphasis on political behaviour. Many real social problems require both economic and political analysis, and mastering both enables you to present more informed and insightful predictions and recommendations.

In your first year you will gain a foundation in the key concepts in macroeconomics and microeconomics. You will learn economic modelling and statistical techniques. You will also be introduced to social and political issues and controversies.

In your second year you will build on your understanding of the macro- and micro-economy and your statistical skills, and consolidate your knowledge of political and social theories.

In your final year you will continue to tailor your degree to your interests and aims by choosing from a range of specialist modules from the School of Economics and the School of Politics, Philosophy, Language and Communication Studies.

WHERE NEXT?

You will be well placed to choose from a wide range of career opportunities, including business, consulting, banking, politics, insurance, the Civil Service, business economics, personnel, accountancy, marketing, investment and financial risk analysis, and international organisations such as the IMF and World Bank.

Economics graduates are also among the best paid. The Higher Education Statistics Agency reports that economics sits just behind medical and engineering degrees at the top of the graduate salaries table.

As well as providing excellent teaching, we invest heavily in our students, providing substantial internship opportunities. In other student-led activities, you will also have the chance to secure a bursary as a student editor for the Norwich Economic Papers, a scholarly journal run by a student editorial board that offers opportunities to publish academic work, write discussion pieces and enter essay competitions. We also run a series of weekly lectures on contemporary economic issues, featuring talks by senior faculty, visiting experts and alumni and special sessions on developing your employability. All these efforts will help you graduate in a great position to pursue a career in the area of your choice.

ABOUT US

We have an international reputation in many key areas, from economic theory to applied subjects. Our research work covers subjects including behavioural economics, competition economics, environmental policy, conflict, contests and cooperative behaviour, finance and financial markets, labour market studies in the areas of education, family and welfare, and cultural and creative industries.

“I had always wanted to do a degree in economics, and the opportunity to do so at an internationally-recognised, established institution like UEA was fantastic.”

– Tan Jun Jie, BSc Economics Graduate now working in Commodities Sales and Structuring at Standard Chartered Bank, Hong Kong
Study at one of the UK’s premier centres for teaching and research in professional education, UEA’s School of Education and Lifelong Learning is consistently ranked as a top university education department. In the 2016 National Student Survey, UEA was ranked joint third out of all mainstream universities, with academic studies in education receiving an overall satisfaction rating of 93%.

ABOUT YOU
With an inherent interest in children and young people, you will have a passion for learning about education in educational settings and questioning different educational approaches and contexts to learning. You will be interested in how we develop as lifelong learners and the social, psychological, cultural, historical, philosophical and political factors that influence this.

You will be working towards three A levels or alternative equivalent qualifications such as the International Baccalaureate, or you may have other non-traditional qualifications and experience, or be returning to study as a mature student.

Due to the nature of this degree you will be required to undertake an Enhanced Disclosure and Barring Service screening.

ABOUT THE COURSE
BA Education

This degree offers you the opportunity to engage with cutting-edge issues in educational policy, pedagogy and practice, with reference to a range of national and international settings. You will benefit from research-led teaching, and our high ratio of academic staff to students will provide you with consistent interaction, engagement and support throughout your studies.

You will gain the knowledge, understanding and expertise you need to understand education within schooling and other educational contexts. You will study the different approaches to and contexts of learning and how we develop as lifelong learners. Outside the classroom you will study the role of education within societies and cultures, and the interplay between education, childhood, adolescence and lifelong learning.

You will also study the ways in which people learn, both within the UK and beyond. Modules will introduce you to topics such as education as an academic discipline, international education, and learning and teaching in the digital world. You will also explore developmental, moral and social issues. Underpinned by the history, philosophy, psychology and sociology of education, these modules will help you to build the core knowledge you need as your studies progress.

You will develop an understanding of the links between theoretical approaches and real-life examples by combining study at the University with substantial placement experience. This will enable you to develop an in-depth appreciation of the breadth and scope of education as a subject. In your final year you will complete a research project under the supervision of a lecturer who is actively engaged in research.

We integrate key skills learning throughout your studies, to ensure that you have the opportunity to develop the transferable skills valued by employers. These skills, which include teamwork, communication, presentation and problem-solving, will enhance your self-confidence and employability.

STUDY ABROAD
Enhance your studies by spending your third year studying abroad, at one of more than 150 partner universities around the world. This is a great way to enhance your knowledge of education, gain different cultural experiences, learn about educational practices and issues in a different country, explore other subjects and develop your personal skills. These skills and experiences are welcomed and sought after by employers. For more information see page 21.

WHERE NEXT?
The multidisciplinary nature of this degree ensures you will enter the workplace as a skilled and confident graduate and an advocate for education. You could go on to work in a range of sectors, including educational management and administration, youth, community or charity work, museum and gallery education, and supporting learning across educational institutions. You will also graduate with the skills and knowledge necessary to progress to a PGCE in primary school teaching. Alternatively, like many of our graduates, you might decide to continue your studies and undertake other postgraduate courses, such as a Master’s degree.

ABOUT US
Our educational research is internationally recognised, with the potential to inspire educational policymakers and the next generation of educational leaders alike. Our expertise is particularly influential in the areas of cultural studies in education, higher education and society; literacy and development; mathematics education; and sport, health and education.

ENQUIRY DETAILS

For further details on this and other courses, contact Undergraduate Admissions on +44 (0) 1603 591515 or email admissions@uea.ac.uk. Further information is available on the UEA website www.uea.ac.uk/edu.
Get ready to join the rapidly changing and vibrant engineering industry. Study interdisciplinary courses and learn through site visits, lectures from industry speakers and practical project work, as well as placements and an optional year spent working in industry.

ABOUT YOU
You will be excited to begin a career in engineering. You may have already gained practical experience. Depending on your previous experience and qualifications, you may be able to join a degree from the second year. To find out more, contact admissions@uea.ac.uk. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
In the first year of all our degrees, you will gain a solid grounding in engineering, mathematics and practical skills. You will develop the skills and knowledge common to the different specialist areas of engineering, and you will get the support you need to choose a specialism of your own. Taster modules will introduce you to energy, mechanical, civil, electronic and electrical engineering. From your second year on, you will gain further expertise and experience in your chosen field.

Throughout your degree, through case studies and practical experience, you will also learn about professional and ethical engineering practices. That means that when you graduate you will not only have important technical skills, but you will also be a responsible, professional engineer ready to apply your knowledge to the real world.

BEng Engineering
Having gained an invaluable grounding in mathematics and engineering in your first year, in your second year you will go on to develop your learning by following a path in general, mechanical or electronic engineering. In your final year you will put your knowledge into action with an in-depth individual project based on your engineering interests. This project is important in defining your path towards a specific career. Your project could be an experimental research project, a practical construction, a circuit assembly, an experimental controller or something else. You could even draw on the industry contacts you’ve made throughout the course and link your study to a real-world engineering problem. Project management skills are embedded in this course, and you will also gain an understanding of commercial risks and opportunities.

This degree is fully supported by the New Anglia Advanced Manufacturing and Engineering Network (NAAME) and Hethel Innovation Group, which gives you access to a wide range of leading mechanical, electronic and automotive companies.

BEng Engineering with a Year in Industry
Spend your third year working with a company related to your chosen discipline, before returning to complete your degree in the fourth year.

You are welcome to transfer to this Year in Industry option from any of our Engineering courses, whether you are studying Engineering, Energy or Energy Engineering with Environmental Management. A year in industry is a great way to hone your skills, gain real-world experience and make contacts, and has proved as popular with students as it has with employers.

MEng Engineering
This four-year programme allows you to begin your journey towards becoming a Chartered Engineer. After graduating you will be ideally placed to go on to gain the real-world experience needed.

On this course you will complete the team-based design project required for Engineering Council accreditation. This will be a real-world design that answers a current problem. You could design a piece of equipment for anyone from an aircraft operator to a small-scale manufacturer. You will work on your concepts in mixed-discipline teams. You will take the design of your chosen element of your scheme through to detailed calculations, drawings and often a model. You will also have the opportunity to complete two credit-bearing periods of industrial experience.

BEng Energy Engineering
This degree has been developed in partnership with the East of England Energy Group, industry and employers. You will study engineering, applied mathematics, energy resource and project management, with a focus on energy supply. You will gain a grounding in engineering principles and analysis and apply these in design projects, supported by a broad introduction to energy from practising engineers.

As you progress, you will come to complete a large individual project, led by your own interests. For example, you could investigate the impact of a tidal barrage in a particular location; evaluate techniques for large-scale electricity storage; or predict the long-term impact of electric cars on the National Grid. On graduation, you will be a highly sought after, high-calibre candidate in the field of energy engineering.

MEng Energy Engineering
This four-year degree gives you the opportunity to continue studying for another year and gain a Master’s level qualification. Developed in partnership with the East of England Energy Group, industry and employers, this course gives you the chance to put all you’ve learned into practice with a major team-based project. You will create a conceptual and detailed design of a piece of energy infrastructure, such as a district heating system linked to a CHP plant.

You will work in mixed-discipline teams on your concepts and then take the design of a specific element of your scheme through to detailed calculations and drawings.

BEng Energy Engineering with Environmental Management

This is an innovative and flexible degree with great breadth and depth of study. It is also the first step to achieving Chartered Engineer status.

Having gained an invaluable grounding in mathematics and engineering in your first year, you will go on to develop your learning through the study of specific energy engineering topics. You will also undertake a major individual engineering project. Current modules on offer include Nuclear and Solar Energy; Fossil Fuels; Electricity Generation and Distribution; Engineering Project; Renewable Energy and Environmental Assessment; and The Carbon Cycle and Climate Change.

You will graduate with a combination of energy awareness and environmental understanding – which is in high demand from employers today. All businesses are concerned about the cost of energy and companies want to deal with this in a way that always keeps environmental impact and ethics in mind.

WHERE NEXT?

You will graduate with excellent career prospects for working within a thriving engineering industry. Not only are qualified engineers highly sought after but employability and transferable skills are embedded in our courses from the start. Your experience will be enhanced by the teaching you’ll receive from a number of honorary lecturers from industry, who will help you to develop your commercial awareness. You will also have many opportunities to acquire industry contacts.

You will have the advantage of our collaborations with engineering partners. For example, we have close ties with the Hethel Innovation Group, who have links to a multitude of mechanical, composite materials, automotive, control systems and food tech enterprises.

You will also benefit from graduating in a region well known for its engineering, and specifically for its energy engineering industry: East Anglia’s energy economy is expected to rise from £50 billion to more than £75 billion in the next 20 years.

ABOUT US

The Faculty of Science is home to an impressive range of engineering expertise. We are internationally renowned for our research and teaching in many fields, including low carbon innovation, energy efficiency, applied mathematics, computer systems engineering, energy materials, carbon composites, structural optimisation, energy finance and environmental assessment. Our academics produce scientific research at an international level, enhancing the quality of our degrees by ensuring that you’re taught by staff who are experts in their fields and that course content is always up-to-date. In addition, our Industrial Advisory Board is made up of directors from a range of leading engineering companies, meaning you will graduate with the skills and expertise needed to move into modern industry.
Study English in England’s first UNESCO City of Literature – the place where literature, quite simply, is happening. You will be taught by international experts on all periods of literature, from the medieval to the present, as well as by prize-winning poets, novelists, biographers and literary translators. Our courses occupy the boundaries between the historical, the critical and the creative, treating literature with our signature combination of intellectual rigour and creative innovation.

**ABOUT YOU**
You will be working towards three A levels (or equivalent), including English Literature (or the combined English Language and Literature).
You will be keen to participate in and contribute to an environment celebrated for its association with literature, from the Middle Ages to the contemporary. You will be excited about attending our many literary events as a way of building on your studies. If you are applying to study a degree with creative writing, you will be asked to produce a portfolio of work of about five pages as part of the selection process. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

**ABOUT THE COURSES**

**BA English Literature**
Explore writing in English stretching from the medieval period to the present day – from Chaucer, Julian of Norwich and Shakespeare, through Dickens and the Brontës, to Sam Selvon, Toni Morrison and Ali Smith.

Literature is not an abstract or unworldly pursuit, but something that happens in the real world. That is why you will study not only literary context, but also how literature is made, getting your hands on early manuscripts in the city archives. It is also why we host regular extra-curricular events with contemporary writers, who read and discuss their work. In the first year you will gain a rigorous training in the study of literature at degree level. You will explore a range of ways of reading and writing about texts, trying out new approaches. As the culmination of two semesters’ work, you and your fellow students will participate in a conference, collaborating and learning new skills, as you create an event to end your year on a literary-critical high note.

In your second year you will choose from a range of modules covering different literary periods and movements, and also pick more vocational and practical options, such as on journalism or publishing, or opt for one of our innovative ‘creative-critical’ modules. In your final year you become a real specialist, choosing from a huge range of unique modules. The list is refreshed each year, but currently includes nervous narratives; women’s writing in the Regency; Chaucer; trauma and modern literature; revenge tragedy; Latin American narratives; science fiction; medieval monstrosities; queer literature; and the Gothic.

**BA English Literature with a Foundation Year**
Gain the skills, knowledge and confidence you need to progress to the degree programme in English Literature following successful completion of the foundation year. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. Your modules are taught via lectures, presentations, seminars and study groups, and incorporate a variety of assessment methods to prepare you for the different types of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as essay writing, research, preparing and giving presentations, and understanding and evaluating scholarly arguments.

**BA English Literature with Creative Writing**
Develop your creative writing skills while also studying English literature, complementing your critical study of literature with the insights you gain as you develop your own writing practice. At UEA you will learn from practising and published writers of poetry, prose and drama. Creative writing modules form about one third of the programme initially, rising to half in your final year. To increase the ‘creative’ component of the degree, you can also opt for some of our ground-breaking, hybrid ‘creative-critical’ modules. You will learn to read as a writer and write as a reader.

In your first year you will gain a grounding in English literature. Meanwhile, your first creative writing module is made up of structured exercises using objects, handouts and visualisations to introduce you to the craft and discipline of writing prose and poetry. You will begin with writing ‘what you know’, using memories, family stories and your own notebooks. Later, you will encounter the works of other authors as stimuli for your own writing. In your second creative writing module you will explore experimental writing practices, and also engage in a creative collaboration with a student from Norwich University of the Arts.

In your second year you will choose from a range of English literature modules, covering periods of literature from the medieval to the modern, and benefit from creative writing modules taught by practising writers. You can choose to concentrate on one or more of: prose, poetry, scriptwriting and journalism. You will produce work in a series of exploratory exercises and analyses of examples of writing, leading to the submission of your own creative work, together with a critical self-commentary. You will also have the opportunity to participate in group discussion of your work as an aid to the editing and redrafting process.

In your final year you will choose from an extensive range of specialist literature modules, and take an advanced creative writing course, which offers a foretaste of UEA’s renowned MA in Creative Writing, and/or complete a creative writing dissertation.

**BA Literature and History**
Combine the study of literary texts with that of the social and political worlds in which they were created. Historians and literary critics sometimes read the same documents, but they are looking for different things and employing different methods of analysis; this programme offers you the chance to explore both approaches. This combination will lead you towards an understanding not simply of literature or of history, but of culture. (Continued over page)
BA Literature and History (continued)

In both the first and second years you take a module that bridges your two subjects, allowing you to explore the continuities – and the contests – between literature and history. Around this core, you have the chance to construct a programme that reflects your own intellectual interests and enthusiasms. In the second year you may wish to concentrate some of your work around the literature and history of a particular period, such as the Middle Ages, the Renaissance, the Restoration, the 18th century, the Victorian era, Modernism or the contemporary. And in the third year you choose from a variety of specialist literature and history modules. The list is continually updated, but examples of the current possibilities on the literature side include everything from medieval Arthurian traditions to science fiction, and from the Gothic to literature and human rights. Meanwhile, History offerings cover everything from the Crusades to sex, drugs and rock and roll in Sixties Britain, and from the medieval outlawry of the life and times of Queen Victoria.

BA English and American Literature

The writers of Britain and America are deeply connected: often they employ the same language, address the same readers and share cultural reference points. But at the same time, the two traditions differ sharply in their typical values and tone of voice.

On this course you will experience these continuities and distinctions with access to the modules that make up the degrees in English Literature and American Literature, benefiting from the interdisciplinary work of experts in American Studies and the literary focus of the School of Literature, Drama and Creative Writing. You will begin by taking introductory modules in both traditions. Modules such as imagining America and literature in history will provide you with the context within which your future studies will unfold. As your studies progress you will go on to tailor the course you want to follow, with support from your adviser to make sure that you end up with a balanced programme. You will have the opportunity to study English literature from the medieval to the modern periods, and across a range of genres ranging from the traditional (satire, tragedy, the novel) to the modern (crime fiction, sci-fi). Meanwhile, your American literature modules cover subjects such as the Beat poets, Native American writing, and Californian and Pacific fiction, as well as traversing poetry, prose, autobiography and creative writing.

BA Culture, Literature and Politics

Combine the study of literature with the study of its social and political context. This degree is jointly taught by the School of Literature, Drama and Creative Writing and the School of Politics, Philosophy, Language and Communication Studies.

Literature and contemporary culture are not, and have never been, merely sources of entertainment. From Shakespeare to Salman Rushdie, literature has played a powerful part within society. It has been censored and sponsored, used as propaganda, as a means of shaping attitudes, expectations and for protest.

This programme gives you the opportunity to study, in detail and in depth, the ways in which society and its forms of expression are linked. Drawing from a wide range of optional modules in politics and English you will be able to explore questions such as: how are political events and tensions reflected in literary texts and influenced by literary developments? And how do literature and culture influence or underpin the political world? Choosing your own modules, in addition to taking core subjects, also means you can tailor your degree to suit your interests and ambitions.

In your final year you will have the opportunity to write a dissertation and to learn key skills of media production. You could also undertake one of a limited number of work placements in continental Europe or local or national government, or on a research project for a think tank or Member of Parliament. Or you could take part in work shadowing or short placements in the media industry. You will also have the opportunity to spend a semester studying abroad in your second year, at one of our partner institutions.

For more information see page 21.

WHERE NEXT?

Follow the majority of our graduates into careers in the creative arts, media, publishing, teaching, management, charities and NGOs and in the commercial sector. Or go on to further study for a higher degree, or for a professional and vocational qualification.

Norwich’s status as a UNESCO City of Literature makes it a natural home for many writers, both literary and commercial. During your degree you will have the opportunity to gain work experience in copywriting and arts administration. Writers’ Centre Norwich provides internship opportunities that can help you understand the workings of a small arts organisation, and we host a website devoted to the wealth of career opportunities open to our literature students: www.afterenglish.ac.uk.

To help you decide what path to take after you graduate, we hold an annual Working with Words conference. Here, more than 40 alumni return to share their stories and showcase the range of career possibilities linked with writing skills, from journalism, editing and fiction or non-fiction writing, to digital marketing and corporate communications. Working with Words is just one part of a full arts and humanities events programme coordinated by our Careers Service.

ABOUT US

Each semester, the School welcomes a different UNESCO City of Literature Professor: an award-winning author who comes to live and write among us, and to give lectures, seminars and workshops. These have included the Whitbread-winning novelist Ali Smith and the renowned crime writer Ian Rankin.

In the autumn and spring, we also host a series of readings by well-known writers. Recent guests include Richard Dawkins, Jonathan Franzen, Ian McEwan, Jeanette Winterson, Ian Banks and Stephen Fry. Our students also regularly give readings in various informal venues around Norwich.

Please note we cannot guarantee any places for students not enrolled on courses by the time a course is confirmed. The University’s Academic Regulations provide that students may be moved to another course or possibly excluded if they do not meet academic requirements.

Environmental Sciences

Join one of the longest established, largest and respected departments of environmental sciences in Europe. We offer a range of degree programmes, from broad-based environmental sciences degrees to more specialised programmes in geology, geophysics, climate change, meteorology and oceanography, as well as a joint programme with international development.

ABOUT YOU
You will already have a keen interest in the environmental sciences, and will have or be working towards A levels including at least one science or science-related subject (including Geography, Mathematics, Biology, Physics, Chemistry, Environmental Science, Geology or Economics).

We also encourage applications from students with IB, Access courses, BTECs or professional qualifications, and will consider a variety of alternatives as equivalent to our stated entry requirements. Our BSc degree in Environmental Sciences with a Foundation Year is a great option to gain entry onto our BSc or MSci courses if you do not already meet their academic requirements.

ABOUT THE COURSES
BSc Environmental Sciences

Immerse yourself in this diverse field with a degree that reflects the wealth of leading environmental science experts at UEA. Get a broad grounding in the subject and specialise in the areas of your choice. Benefit from an emphasis on the interdisciplinary skills needed to explore and solve today’s environmental challenges.

You will develop your core scientific skills through field, laboratory and classroom study of global environmental challenges. First-year options cover the Earth as a dynamic physical system, the interplay between sustainable development and biodiversity, and the crucial chemical and physical processes that shape the Earth.

Then you will tailor your degree according to your interests, choosing from a substantial range of modules covering all areas of the environmental sciences. Options range from geology to ecology and from oceanography to human society and economics. In your final year, you will undertake an independent research project that matches your interests and select from specialised modules and field courses.

This course is accredited by the Institution of Environmental Sciences (IES). That means you will be eligible for Associate Membership of the IES upon graduation, with the opportunity to achieve Chartered Environmentalist (CEEn) or Chartered Scientist (CSci) status.

MSci Environmental Sciences

This four-year programme follows the BSc structure for the first three years (with the third year studying abroad if you take the Year Abroad option) and culminates with a fourth year of Master’s modules. You will also complete a substantial piece of independent research, supervised by a member of faculty active in environmental research. Optional modules cover advanced topics such as the science and policy implications of climate geoengineering;

sustainable consumption; modelling of environmental and ecological processes using computers, statistics and geographical information systems; and the science and management of environmental pollution.

BSc Environmental Sciences (with Education) to be confirmed

This degree programme is an opportunity to study environmental sciences whilst preparing for a rewarding career in teaching. Together with course modules from BSc Environmental Sciences, you will undertake two compulsory teaching practice modules, which will include a guaranteed school placement at the end of your first year. You will receive additional teaching experience through fortnightly classroom observation placements, as well as in seminars and workshops delivered by our School of Education and Lifelong Learning – one of the top teacher training institutions in England, with more than 30 years’ experience. During your time on the course you will also have the opportunity to undertake other education modules. This exposure to education and the understanding you will gain will put you in a great position to progress to the UEA PGCE (Initial Teacher Training) course when you graduate.

BSc Environmental Sciences and International Development

This joint degree allows you to pursue science in the context of international development. For example, you could take modules in Earth science, climate science or oceanography alongside modules about how natural hazards, climate or loss of biodiversity affect some of the most vulnerable human societies on Earth. You could study hydrology or water resources in Environmental Sciences alongside modules in the School of International Development on the impacts of water scarcity on the livelihoods of people in Sub-Saharan Africa or Latin America. Throughout this degree, you will gain understanding and insight into both environmental and development issues, how these may act together and what we could do to increase the resilience and well-being of developing communities.

During your first year, you will study physical and social sciences, focusing on both the theory and practical aspects of development. In your second and third years you will be able to choose modules from both Schools. You may combine your final-year research project with a semester working with a development project of your choosing. Destinations have included Fiji, Mauritius, Vietnam, India, Peru, Mexico, Mongolia, Thailand, Nepal, Kenya and many more.

BSc Geology with Geography

Study the relationships between the solid Earth, human society and environmental processes. Gain experience using the principles of geology and physical geography to explore areas such as Earth cycles, fossil fuels, geochemistry, earthquakes, volcanoes, geomorphology and hydrogeology. Field work will form an essential part of your training. As your studies progress you will explore relationships between the dynamic Earth and other disciplines in geography and across the environmental sciences, an opportunity not usually available in traditional geology departments.

BSc Environmental Sciences (with Education) to be confirmed
UCAS code F9X1
A level (typical offer): AAB, including Geography, Geology, Mathematics, Economics, Biology, Chemistry, Environmental Science or Physics
International baccalaureate: 32, with two HL subjects at 5, including Geography, Mathematics, Economics, Biology, Chemistry or Physics
Length of course: 3 years

BSc Environmental Sciences and International Development
UCAS code F630
A level (typical offer): ABB, including Geography, Geology, Mathematics, Economics, Biology, Chemistry, Environmental Science or Physics
International baccalaureate: 32, with two HL subjects at 5, including Geography, Mathematics, Economics, Biology, Chemistry or Physics
Length of course: 3 years

BSc Geology with Geography
UCAS code F645
A level (typical offer): ABB, including Geography, Geology, Mathematics, Economics, Biology, Chemistry, Environmental Science or Physics
International baccalaureate: 32, with two HL subjects at 5, including Geography, Mathematics, Economics, Biology, Chemistry or Physics
Length of course: 3 years

MSci Geology
UCAS code F650
A level (typical offer): ABB, including Geography, Geology, Mathematics, Economics, Biology, Chemistry, Environmental Science or Physics
International baccalaureate: 32, with two HL subjects at 5, including Geography, Mathematics, Economics, Biology, Chemistry or Physics
Length of course: 4 years

Please note we cannot guarantee any places for students not enrolled on courses by the time a course is confirmed. The University’s Academic Regulations provide that students may be moved to another course or possibly excluded if they do not meet academic requirements.
**ENVIRONMENTAL SCIENCES**

**MSci Geology with Geography**
UCAS code: F814

With a Year Abroad
UCAS code: F814A

A level (typical offer): AAB, including Geography, Mathematics, Geology, Biology, Chemistry or Physics. International baccalaureate: 33, including Mathematics.

Length of course: 4 years

Refine and develop your skills in geology and the Earth sciences. This four-year programme follows the BSc structure for the first three years (with the third year studying abroad if you take the Year Abroad option) and culminates with a fourth year of Master’s modules. You will undertake a substantial piece of independent research on a topic of your choosing. You will also study advanced-level modules, choosing from topics such as isotope geochemistry, geosciences field work and climate geoengineering.

Specific pathways through our BSc and MSci Geology with Geography degrees are accredited by the Geological Society of London, making it easier for you to qualify as a Chartered Geologist after graduation.

**MSci Geophysics**
UCAS code: F660

With a Year Abroad
UCAS code: F660A

A level (typical offer): AAB, including Mathematics. International baccalaureate: 32, including HL Mathematics at 5 and one other HL subject at 5. Length of course: 4 years

Understand why and how natural phenomena occur. Learn to apply the powerful techniques of mathematics and physics to understand events such as earthquakes, volcanic eruptions and extreme weather. Approximately one third of your degree will be spent studying mathematical techniques and gaining the skills necessary to analyse the physical environment. Field work will form an important part of your training and may include seismic and gravity investigations, magnetic and electrical measurements, or ground-penetrating radar surveys. Our degree is more comprehensive than traditional geophysics degrees, providing geological, atmospheric and marine pathways or any combination of your choosing.

After refining your skills, and choosing the right path for you, you will complete an independent research project, supervised by a member of the faculty active in geophysical research.

**MSci Meteorology and Oceanography**
UCAS code: F197

With a Year Abroad
UCAS code: F197A

A level (typical offer): AAB, including Mathematics. International baccalaureate: 32, including HL Mathematics at 5 and one other HL subject at 5. Length of course: 4 years

Study the atmosphere and oceans and how their interactions shape our understanding of the weather, the climate and their variability. You will spend approximately one third of your degree studying mathematical techniques and gaining the skills needed to analyse and model the atmosphere and oceans. These transferable skills will be invaluable in your future career.

Field work options allow you to investigate ocean processes in shelf seas and track balloons to determine local air flow. You will undertake a final-year independent research project on a topic that matches your interests.

**BSc Meteorology and Oceanography**
UCAS code: F199

With a Year Abroad
UCAS code: F199A

A level (typical offer): AAB, including Geography, Geology, Mathematics, Economics, Biology, Chemistry or Physics. International baccalaureate: 32, including HL Mathematics at 5 and one other HL subject at S. Length of course: 3 years

Gain a holistic perspective on climate change, combining both the natural science of the climate system with the social sciences of addressing and adapting to the impacts of climate change.

You will learn about the links between society, environment and climate change, focusing on the physical, geographical, political and social aspects of how and why the climate is changing. Through your course, you will take modules on the science and policy of climate change, on energy, climate and human behaviour, and on environmental politics and policy.

In your final year you will undertake an independent research project under the supervision of a member of faculty active in climate change research.

**BSc Climate Change**
UCAS code: F790

With a Year in Industry
UCAS code: F791

A level (typical offer): AAB, including Geography, Geology, Mathematics, Economics, Biology, Chemistry or Physics. International baccalaureate: 32, including two HL subjects at S. Length of course: 4 years

**MSci Climate Change**
UCAS code: F914

With a Year in Industry
UCAS code: F915

A level (typical offer): AAB, including Geography, Geology, Mathematics, Economics, Biology, Chemistry or Physics. International baccalaureate: 32, including two HL subjects at S. Length of course: 4 years

Improve your graduate prospects with an additional year in industry. You will spend your third year acquiring valuable work experience in your chosen field before returning to UEA for your final year. You will put what you have learned into practice, transforming theory into reality. You will also gain first-hand knowledge of your chosen field and generate crucial employer contacts to prepare you for a competitive job market.

When securing your placement, you will benefit from our well-established commercial connections throughout the UK and beyond. In recent years our students have worked for small, mid-size and multinational enterprises in a diverse range of fields, including environmental consultancies, weather forecasting services, and governmental (local and national) and non-governmental organisations, including volcano observatories, geological surveys and conservation groups.
Environmental Sciences with a Foundation Year
UCAS code: 8F90
Requirements: See our website for specific entry criteria. Grade C or 4 or above in GCSE English Language and Mathematics.
Length of course: 4 years

MSci DEGREES WITH A YEAR ABROAD
Enhance your studies with a year abroad. You will spend the third year of your studies at an exchange university in the United States, Canada, Australia, New Zealand or Europe. Then you will return to UEA to complete a fourth year of Master’s-level modules. This is a fantastic opportunity to experience another culture at the same time as broadening your academic and personal horizons. You could study in departments that allow you to explore different aspects of your subject. The chance to examine other countries in the context of your chosen subject is particularly useful in strengthening your employment prospects. For more information see page 21.

Environmental Sciences with a Foundation Year
The foundation year provides a broad and solid base in the essential science subjects you need to progress to the School of Environmental Sciences’ degree course that best fits your interests and career ambitions. This course will benefit those wishing to gain skills, knowledge and confidence as an exciting and rigorous preparation for our BSc and MSci Environmental Sciences courses. Throughout your time on the programme you will have the guidance of an adviser from the School of Environmental Sciences.

WHERE NEXT?
A growing and diverse range of careers will be open to you when you graduate from one of our degrees. You could go on to work in environmental management, geophysical exploration, hazard prediction and management, environmental consultancy and planning, conservation, or contribute to shaping environmental policy at local or government level. You might work in the UK or abroad, and with small or large organisations. Or you may want to take advantage of the support offered by UEA’s Enterprise Centre to set up your own business. Alternatively, you might be so inspired by your time at UEA and your lecturers’ research that you choose to continue your studies with a PhD or MSc.

We make career development and employability an important part of your degree. We will help you choose the right path for you, and support you in getting your career off to the best start. You will benefit from one-to-one guidance from the Careers Service and your academic adviser, and the chance to develop a highly valued range of skills, including training in scientific communication. You will have opportunities to meet potential employers for work experience and graduate-level employment.

ABOUT US
The School is a world leader in environmental science research. It is home to the world-famous Climatic Research Unit and Tyndall Centre for Climate Change Research, as well as many other important research groups. In the Research Excellence Framework we were ranked first in the UK for the impact of our world-leading research (REF2014).

Teaching at the School of Environmental Sciences covers a broad range of disciplines, with lecturers who are at the forefront of their subjects. Our modules are taught through lectures, seminars, practical classes and field work, and you will be assessed through a combination of coursework and examinations. You will be allocated an academic adviser, who will offer academic support and advice throughout your studies.

**BA Film and Television Studies**

UCAS code: W610

**A level (typical offer):** AAB

**International baccalaureate:** 33

**Length of course:** 3 years

**Study abroad:** Optional semester

Learn from scholars with a reputation for world-leading research in film and television studies in a pioneering centre for the subject.

**ABOUT YOU**

You will be working towards three A levels (or equivalent). For Film Studies and English Literature, one of these should be English Literature, or English Language and Literature. You do not need to have studied film studies or media studies previously.

You will be excited about shaping your degree around your interests and career goals. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

**ABOUT THE COURSES**

**BA Film and Television Studies**

Explore the history, theory and practices of film and television. Discover how they have developed as distinct but intersecting industries, art forms and areas of academic study.

- From silent cinema experiments like Méliès’ A Trip to the Moon to multiplatform franchises such as the ever-expanding Star Wars empire, you will engage with a range of film and television texts, and examine what they can tell us about the cultural and creative contexts in which they were produced and consumed.

You will study a range of core modules, complemented by a wide variety of specialist modules on a global range of cinema and television. Some focus on particular film-makers, such as Stanley Kubrick, or the cinema industries of different countries, such as Britain or Japan. Others deal with film and television genres such as comedy or science fiction, or critical issues such as gender in film and television.

Throughout your studies you will explore theories and ideas in essays, projects and presentations. In your second and third years you will also have opportunities to gain some practical experience in making fictional, experimental or documentary films, or working in a television studio. In your final year you will research and produce a dissertation, with guidance and support from expert staff.

**BA Film and Television Studies with a Foundation Year**

Gain the skills, knowledge and confidence you need to progress to the degree programme in Film and Television Studies following successful completion of the foundation year. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. Your modules are taught via lectures, presentations, seminars and study groups, and incorporate a variety of assessment methods to prepare you for the different types of activities you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as essay writing, research, preparing and giving presentations, and understanding and evaluating scholarly arguments.

**BA Film Studies and English Literature**

Study cutting-edge approaches to film and English literature within both Film, Television and Media Studies and the School of Literature, Drama and Creative Writing, two of the most highly regarded university departments in these closely linked fields. Learn about film, drama, writing and the relationship between them, through modules that will give you the critical tools to analyse and understand them fully.

In the film studies component of your course, there will be a strong emphasis on history, from silent cinema to contemporary Hollywood. You will study issues of adaption across and between media as well as approaches to screenwriting, the audiences for film, and the studio system. In the English literature component of your course you will benefit from a wide range of modules, drawing on expertise in literature, history, creative writing and drama. You will benefit from a number of modules that have been designed to bring the disciplines of film studies and English literature together in productive dialogue, for example Shakespeare on stage to screen. You will also have the opportunity to produce films, or work in a television studio, through creative practice modules.

**BA History and Film Studies**

This pioneering interdisciplinary degree unites the teaching expertise and world-leading research of both Film, Television and Media Studies and the School of History, one of the largest and most respected history departments in the country. Learn about the history and theory of film and television, as well as the ways in which these media have represented, recorded and reconstructed history. Throughout your studies you will choose from a range of film studies and history options, including specially designed modules on documentary history, theory and practice; propaganda and European history on film; historical representation and memory; and the practice and ethics of archival research. You will be taught by experts from the disciplines of history and film, television and media studies, including film archivists and practitioners with years of experience in their fields. You will be able to explore topics through projects, essays or by making your own documentaries in our fully-equipped television studio, using footage you have sourced from our extensive archives.

This unique degree experience will provide you with a great foundation for a range of related careers, such as work in the heritage industry, film and television documentary making, writing and researching for historical programming, journalism, marketing, education or archiving.

**STUDY ABROAD**

Whichever of our film and television courses you choose, you will have the chance to spend a semester abroad studying in a European university. Alternatively, you could study abroad at one of our partner universities in the United States, Canada, New Zealand, Australia, Japan and Hong Kong. For more information see page 21.
WHERE NEXT?
When you graduate you will be ready to start your chosen career. Our graduates enter a wide range of related occupations, from film production and editing to marketing, media and journalism. To help you choose the right path, our Careers Service produces an annual events programme, which lets you explore a range of careers in the arts and humanities. You will have the chance to hear alumni speakers from the BBC, Channel 4, national and regional newspapers and magazines, film productions and post-production companies. At our annual Working with Words conference you can hear more than 40 alumni share their stories and showcase a range of writing and communication careers, from scriptwriting and editing to digital marketing and corporate communications.

ABOUT US
Our research and teaching is focused upon the relationships between film, television and other media, and the creative and cultural contexts in which they are produced and consumed. We are recognised as a leading centre for the study of British, Hollywood and Asian cinemas, popular film and television genres, and feminist approaches to media. We are home to the extensive East Anglian Film Archive, a unique resource which you can make use of during your time at UEA. We also have close links with the British Film Institute in London.

More than 80% of our research was rated world-leading or internationally excellent in the most recent Research Excellence Framework (REF2014).

“Studying at UEA was one of the most enjoyable and significant formative experiences of my life. It provided me with an academic background in literature and film which was a vital stepping stone for my career in the British film industry.”

– Adrian Wootton, Chief Executive of Film London, Previously Director London Film Festival

After freelancing for MAKE@UEA, UEA graduate Desiree Peters landed an internship with the BBC, earning her first ever children’s TV credit. From paid runner, to the Head of Drama’s PA, Desiree’s now a Production Management Assistant for CBeebies and CBBC.

HOW WILL YOU GET YOUR FIRST BREAK?
www.uea.ac.uk/brilliant
Study geography at UEA and discover the interactions between society and the environment in the context of today's global challenges. You will explore many key issues related to the management of resources, natural hazards, health and migration, climate change and poverty.

**ABOUT YOU**
You will have ambitions to address the adverse effects of human challenges such as inequality, and environmental challenges such as climate change, by learning more about the interaction of society and the environment. You will be excited about field work, contributing to seminars and working with teams of other students.

**THE COURSES**

**BSc Geography**
Study both human and physical geography, focusing on the interactions between the natural environment and human society. A range of fascinating options will allow you to tailor your degree to your own interests and career aspirations.

During your first year you will study geographical concepts and take classes on global environmental challenges, the Earth as a dynamic planet and a field course. Optional modules consider the interplay between sustainable development and biodiversity, or the crucial chemical and physical processes that shape the Earth.

As you progress through the course you will continue developing your skills as a geographer across a range of specialisms, including geographical information systems. You will be able to choose optional modules such as geomorphology, soils, biogeography, climate change and natural hazards. In your final year, your independent research project will allow you to explore a topic you particularly enjoy in much greater detail.

**BA Geography**
The emphasis is on human geography, tackling some of humanity’s most pressing problems. As the world changes – through technology, politics, culture or climate – our understanding of it must change too, as must our ways of living prosperously and responsibly within it. This degree focuses on the geographical dimensions of societal change through the study of communities, cultures and their environment.

You will study contemporary global challenges at local, national and international levels of analysis. These include themes like globalisation, climate change policy, energy transitions and urbanisation. These topics are part of a varied and flexible degree programme that can be shaped to your own particular interests.

During the course you will enhance your knowledge and understanding of key geographical issues. You will develop a range of skills relevant to working in project design and management, geographical information systems, and research. You will also have the chance to undertake field courses in the UK or abroad in, for example, Kenya or Spain.

**BSc/BA Geography with a Year in Industry**
Improve your graduate prospects with an additional year in industry. On this pathway you will spend your third year acquiring valuable work experience in your chosen field before returning to UEA for your final year. You will put what you have learned into practice, transforming theory into reality. You will also gain first-hand knowledge of your chosen field and generate crucial employer contacts to prepare you for a competitive job market.

**BSc Geography (with Education)**

This degree is an opportunity to study geography whilst preparing for a rewarding career in teaching. Together with course modules from the BSc Geography pathway, you will undertake two compulsory teaching practice modules, which will include a guaranteed school placement at the end of your first year. You will receive additional teaching experience through fortnightly classroom observation placements, as well as in seminars and workshops delivered by our School of Education and Lifelong Learning – one of the top teacher training institutions in England. You will also have the opportunity to undertake other education modules. This exposure to education and the understanding you will gain will put you in a great position to progress to UEA’s PGCE (Initial Teacher Training) course.

**BA Geography and International Development**
Become a specialist in human geography and learn to apply this to the study of major issues in international development, including poverty and inequality, food security, environmental degradation, economic globalisation, health and migration.

Develop your academic rigour and technical skills while also ensuring strong employability, through field experience, practical skills training, IT skills including geographical information systems (GIS), and excellent work placement opportunities.

Gain experience of field work through an intensive field course in a choice of locations, for example the UK, Chile and India. Learn and use a range of geographical research methods to explore topics such as urban regeneration and restructuring, migration and urbanisation, and human-environmental interactions in the context of globalisation.

---

Our geography courses are in the top 15 in the UK, according to the Times and Sunday Times Good University Guide 2017; we also receive great feedback from our students, with a score of 92% in student satisfaction in the 2016 National Student Survey.

BA Geography and International Development with Overseas Experience
Enhance your studies with a work placement in the UK or overseas for three to four months. You could follow in the footsteps of recent students who have worked on a rainforest protection and livelihoods project in Peru, in water basin management in Tanzania, for community organisations and for public agencies.

BA Geography and International Development with a Year Abroad
Alternatively, spend a year studying abroad at an overseas university. This is an exciting opportunity to immerse yourself in the culture of a different country, gaining unique experiences, valuable skills and useful contacts. You will spend your third year studying at one of our partner universities before returning to UEA for your final year. See page 21.

WHERE NEXT?
Career development and employability are an important part of your studies. Throughout your time at UEA you will benefit from one-to-one guidance from the Careers Service and your academic adviser, and the chance to develop a highly-valued range of skills. You will also have lots of opportunities to meet potential employers. You will graduate ready to work for national and international agencies, the private sector or government in the areas of environmental and resource management, climate change, economic and social development or planning or policy making. Or you might choose to join our many graduates who have gone on to pursue a higher degree, such as an MA/MSc or PhD.

ABOUT US
Our Schools of Environmental Sciences and International Development are internationally renowned for their research. We are also home to the Climatic Research Unit; the Tyndall Centre for Climate Change Research; International Development UEA; and the Water Security Research Centre, as well as important research groups in the areas of Science, Society and Sustainability; Global Environmental Justice; and Globalisation and Corporate Social Responsibility.

“My course has broadened my conception of the world and I think I appreciate wider issues of equity, governance and resource use more.”
- Ella Gilbert, Graduate

You will have access to our Virtual Reality theatre, one of the few purpose-built VR facilities for environmental sciences and geography in the UK.
Study in a superb and dynamic history department, where you will be taught by leading experts in their fields, utilising the latest research and discoveries and writing pioneering books. You can choose from a broad selection of fascinating modules on a diverse range of periods and themes, thereby tailoring your degree to your own interests and ambitions. This is your intellectual journey: you choose the modules. We have created a degree that gives you the flexibility of choice and breadth of options to make the most of this journey. So apply to read History at UEA and begin your journey into the historical past.

ABOUT YOU
You will be working towards three A levels (or equivalent). You will be looking forward to participating actively in seminars, and may already believe – as we do – that there is no better vocation than the study of human experience through time. You will be excited about shaping your degree around your own study interests and career goals. As with all our courses, we welcome students with non-traditional qualifications and life experiences, including mature students.

ABOUT THE COURSES
Each of our modules offers you the opportunity to engage directly and effectively with the core dynamics and sources of your chosen historical period or theme. Read the first ever work written by a Christian woman (from the third century); examine a contemporary engraving of a mass execution inflicted during the 1630s; or think about the social and political power of music written during the 1960s.

All of this is done through specialist study undertaken in small-group seminars – our main teaching method. But there will also be opportunities to learn through lectures, your own study, and regular one-to-one meetings with a member of academic staff. You will be given guidance on your work and constructive feedback to help you improve. The quality of this learning experience is what makes the School of History such a brilliant, and popular, place to study.

BA History
Join our main programme and you can choose from any of our history modules as your course progresses. This degree is a great choice if you are interested in taking a broad perspective in your historical studies or if you are simply keen to discover and explore new, exciting periods of history and historical themes.

During your first year you will acquire a solid foundation in the main periods of British and European history, from the high Middle Ages to the 20th century. You also receive an introduction to more specialised historical themes, such as witchcraft in early modern Europe. You will also have the opportunity to reflect on how historians write about and research history.

In your second year you can choose from a remarkable range of available modules. This means that you can examine periods and themes that you want to study, whether it is the political and social drama of the Wars of the Roses, the nature of exploration and exploitation in the early modern Americas, or the collapse of nation-states in the 20th century. The choice is yours.

In your final year you will move on to more intense ‘special subject’ modules. Here you will work and research in small groups on a specialised topic close to the research expertise of a member of our faculty. Many special subject modules offer extended and exciting field trips. In addition you will study two advanced modules, one of which can be a dissertation on a historical topic of your choosing.

BA History with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the degree programme in History following successful completion of the Foundation year. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. Your modules are taught via lectures, presentations, seminars and study groups, and incorporate a variety of assessment methods to prepare you for the different types of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as essay writing, research, preparing and giving presentations, and understanding and evaluating scholarly arguments.

BA Modern History
Specialise in the history of Britain, Europe and the Americas from around 1750 to the present day. Your first year introduces you to a real variety of periods, themes, debates and methods. You gain a grounding in early modern and modern history, explore the treatment of witchcraft, magic and belief in early-modern times and explore the vexed political and social history of twentieth-century Europe. And you also engage in the vigorous debates which form part of historical argument, getting to grips with some of the most fiercely-fought controversies to beset our discipline.

As you progress you will continue to specialise in the modern era, including options in American history. Or you may decide to broaden the periods you wish to study. You are then free to select from a wide range of advanced modules, from History or another department. You will also have the opportunity to complete a dissertation on a topic of your choice.

BA History and Politics
Combine your study of history with the theory and practice of politics from the 16th century onwards. In the first year you will gain a grounding in the essentials of historical and political study. On the history side you explore the history of the twentieth century from a number of intriguing angles, whilst also exploring more methodological aspects of the study of history and getting to grips with some of the most fiercely-fought controversies to beset our discipline. Meanwhile, you also take politics modules which introduce you to some of the core concepts in global politics, and some of the key theoretical methods for engaging with them.
BA History and Politics (continued)

In your second and third years you determine how much of your studies you devote to history and to politics. Having gained a grounding in each subject, you can build on that with options that suit your interests and career goals.

You may choose from topics such as Britain and Europe; international security; terrorism and counter-terrorism; democratic theory; power and society; Russian politics; America in the world; the history of US foreign relations; the European Union’s future as an international actor; international organisations; as well as other politics and history modules.

You can even choose to specialise in a particular country or region, for example by combining study of the history of Nazism with that of contemporary Germany, Russian politics with the history of Stalinism, or British history with international relations.

In the third year you will take a ‘special subject’ in modern history and a further module in politics. You will then complete a further advanced module in either politics or history; topics currently include Russia in revolution; Chamberlain, Churchill and appeasement; and youth in modern Europe.

STUDY ABROAD

Whichever of our courses you choose, you will have the chance to spend a semester abroad studying at one of our partner universities. For more information see page 21.

WHERE NEXT?

Graduate from your degree with highly developed skills of written and verbal communication, source analysis, time management, collaboration and creative thinking – all qualities which employers value highly.

Our graduates go into many different careers. You could follow their footsteps by going into law, finance or teaching, the Civil Service or local government and administration, or into the heritage and tourism sector. Alternatively, you could continue your studies with a postgraduate degree.

To get your career off to the best start, our Careers Service produces an annual programme of events focused on the arts and humanities. This includes alumni-led presentations and workshops across a range of sectors, including charities, politics and government, writing and communications, and museums and heritage.

ABOUT US

You will be taught by academics who are all active researchers, publishing books related to the subjects they teach. With some of the country’s finest teaching staff, we have one of the highest concentrations of eminent historians outside Oxford, Cambridge and London. More than 75% of research in the School of History was rated world-leading or internationally excellent in the Research Excellence Framework (REF2014).
Join students from the UK and more than 50 other countries in a friendly, thriving and cosmopolitan international development department. We are globally renowned for our teaching, research and training in international development. All courses are available with the option of three to four months’ overseas work experience or a full year abroad.

About you
You will be working towards three A levels or alternative equivalent qualifications such as the International Baccalaureate. You may be a school leaver or be returning to study after working or a period of travel. As with all our courses, we welcome students with non-traditional qualifications and experience. We also welcome international applicants and mature students. You will have a keen interest in international development and global issues.

Many of our students have travelled, but not all, and others have been involved in local or school groups concerned with community development, environmental issues or charitable work. We would love to meet you at one of our Open Days, where you can learn more about the subject, career prospects, and meet current students and staff.

About the courses
Whichever international development degree you choose, you will learn through lectures, small-group work in seminars, participatory workshops and field trips. In addition to a selection of compulsory modules, you will also be able to choose modules from a wide range, according to your own personal interests. As well as academic skills and knowledge, the School of International Development provides opportunities for practical and professional skills training in topics ranging from project management to film-making.

In your final year you will write a dissertation on a development topic of your choice, supervised by a member of staff who has expertise in your area of research.

Overseas work experience and study abroad
Approximately half of our undergraduates decide to spend three to four months overseas on the Development Work Experience module in their third year, working on a development project. If you opt to spend the additional full year abroad you will spend your third year studying at one of our partner universities before returning to UEA for your final year. Both options will provide you with valuable insights and practical experience in a different country, and a chance to develop personal skills that are welcomed by employers. Destinations span Africa, Latin America, North America, Europe and Australasia. For more information see page 21.

BA International Development
Study the social, political and economic dimensions of international development. You will tackle a diverse range of topics, covering issues such as poverty, gender inequality, conflict and economic growth. You will also have the opportunity to study natural resources, examining the sustainability and governance of soils, water, food production, fisheries and more. The programme enables you to develop a thorough understanding of contemporary issues in international development and of academic disciplines relevant to the study of development, such as anthropology, politics, economics and geography. You will also have the chance to develop a range of skills valued by employers, including the ability to analyse data, prepare reports, give presentations clearly and confidently, and work as part of a team. Our flexible approach to learning enables you to explore your interests and strengths, so that you graduate with a world-class degree in international development.

BA International Development with Anthropology
Combine an interest in culture and society with international development. You will study how people live, understand and interact within particular environments. You will also examine how international development is affected by different cultures and how it affects social transformation. You will explore all aspects of cultural diversity, including different economies, types of social organisation, kinship, marriage and descent patterns, and ritual and belief systems. You will also discover the local impacts of the different aspects of international development, including economic growth, and both social and cultural transformation.

BA International Development with Politics
Study political science and interdisciplinary approaches to international development. Gain an understanding of why patterns of development vary between and within countries, and how key actors shape the development process. Your core modules will encompass a range of topics, including the politics of poverty and inequality, democracy and democratisation, the causes and consequences of conflict, and the relationship between state and society. You will also study the practices of a range of actors, from governments to international development agencies and NGOs to social movements. In addition, you will be able to tailor your degree to suit your interests and career ambitions by choosing from a range of interdisciplinary and single-disciplinary modules.

BA International Development with Economics
Study international development within the context of microeconomics, macroeconomics and quantitative empirical analysis. Economics graduates are in demand by employers and among the best paid nationally and internationally. By the time you finish your degree, you will have an understanding of economic development and its links with poverty and inequality. You will be familiar with key theories, as well as empirical evidence on trade, investment and economic growth. You will be able to evaluate evidence produced through the use of experimental economics to study human behaviour. And you will have the necessary skills to link economic variables to the broader sociopolitical processes and environmental challenges affecting different regions in the world.

BA Media and International Development
This unique degree programme lets you immerse yourself in the worlds of media, communication and international development, exploring the complex relationships between them.

How do charities and other development organisations communicate about famine, poverty and developing countries, and what effect does this have on public attitudes? Why do only some humanitarian crises make it onto our TV screens and what effect does this have on government policy? How important is press freedom and freedom of speech in promoting democracy and economic growth? What is the impact of social media in developing countries – do Facebook and Twitter facilitate citizens’ engagement with politics or do they actually undermine genuine political participation? These are just some of the key questions and problems that you will explore. You will also benefit from our strong focus on employability skills, media production and analysis, such as project design and management skills.

BSc International Development and the Environment
On this degree you will study international development in relation to the full range of environment and natural resource issues that are increasingly central to poverty alleviation, food security, human wellbeing and sustainability. You will study the research methods and techniques, both quantitative and qualitative, used to analyse environment and development questions.

This degree is flexible in terms of study options. You can study other subject areas if you wish (for example, social anthropology, geography or economics) and select from a choice of modules focusing on particular issues or regions. These include education and development, gender and development, South Asian development, Latin American development and Sub-Saharan African development. The programme also involves field visits and a field course for guided independent research. You will visit either Scotland or Ireland to explore topics such as human-environment conflicts and conservation, using standard techniques as well as participatory or rapid rural assessments.

WHERE NEXT?
You will graduate with the specialist and practical skills needed for a successful career in the UK or overseas. Many of our graduates decide to work in development, including working with the United Nations, governments, charities and NGOs. Others use their academic and transferable skills to establish careers in business, the voluntary and public sector, community development, environment and media.

ABOUT US
At the School of International Development, our research is internationally renowned. We are home to three research groups: Social Development; Economic Development; and Environmental Change and Sustainable Development.

You will be taught by academic staff who are actively involved in research across the globe, working with many national and international development agencies. Our research commitments keep our lecturers in touch with teaching and development issues at grassroots level and ensures you benefit from the very latest thinking.

Unethical fashion practices can leave whole communities without clean water. UEA International Development graduate Jonathan Mitchell is taking them down, one t-shirt at a time.

HOW WILL YOU MAKE A DIFFERENCE?
www.uea.ac.uk/brilliant
Study international relations and gain a real understanding of vital issues within world politics, including the refugee crisis, international organisations and the global economy, the so-called Islamic State, American foreign policy, and the rise of China and Russia as great powers.

ABOUT YOU
As well as working towards the required academic qualifications, you will have a passion for the subject, which you will be able to demonstrate through your reference and personal experience.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students. All international relations students are offered the valuable opportunity to study a modern language alongside their degree.

ABOUT THE COURSES
BA International Relations
Gain a solid grounding in different theories of international relations and how these can be applied to understand, explain and change real-world situations. Develop important analytical and research skills, broaden your knowledge, and graduate with a sophisticated understanding of contemporary global politics.

In your first year you will build your understanding of international relations, through modules such as global politics. This will help you gain the study and employability skills you’ll need during your time at university and after graduation, as well as introducing you to key concepts and debates. You will also have the opportunity to learn a foreign language, and to attend lectures, screenings and events from outside your degree programme.

You will go on to select from a wide range of exciting options, allowing you to specialise in areas that interest you. Topics include global political economy; introduction to the European Union; international security; international politics since 1945, Britain and Europe; international organisation and global governance; politics in the USA; and gender and power.

In your final year you will complete individual research and project work. This can include writing a dissertation on a topic of your choice. Other third-year modules build on your earlier studies and include topics such as power over the Pacific; ethics in international relations; shifting powers: Africa in the 21st century; the clash of fundamentalisms; European studies (with Brussels internship); terrorism and counter-terrorism; and capitalism and its critics.

BA International Relations and Politics
On this course you will not only consider all the important questions of international relations, you will focus on the links between domestic and foreign policy. You will also have the opportunity to learn a foreign language, and to attend lectures, screenings and events from outside your degree programme.

You will gain a strong grounding in international relations and politics in your first year. Then, in your second year, you will specialise by choosing modules from a wide range of topics, including international security; international politics since 1945; politics in the USA; global political economy; comparative politics; power and society; introduction to the European Union; Britain and Europe; gender and power; and politics and media.

In your final year you will undertake more independent research and project work. This may include writing a dissertation on a topic of your choice, working with a supervisor with expertise in that area. Other third-year topics include ethics in international relations; European studies (with Brussels internship); terrorism and counter-terrorism; multiculturalism; capitalism and its critics; and international media and communication.

BA International Relations and Modern History
Looking at the contemporary world, two things are apparent. The first is that our world is increasingly shaped by international politics and the global connections between people and nations. The second is that the current state of our world is the product of events and processes that have occurred over time.

This degree, taught jointly between the School of Politics, Philosophy, Language and Communication Studies, and the School of History, is designed for students who are interested in exploring and understanding international relations in a historical context. During your first year you will gain a good grounding in the core elements of political theory, international relations, government and modern history. In the second year you will specialise in those areas that interest you most. You will be able to choose from a wide range of topics from our two Schools. These include the rise and fall of British power; modern Germany, 1914–1990; imperial Russian and Soviet history, 1861–1945; history of modern Italy; Napoleon to Stalin: the struggle for mastery in Europe; politics in the USA; America in the World: the history of US foreign relations; and international politics since 1945.

In your final year you will place more emphasis on individual research and project work. You can also study a foreign language as part of your degree if you wish, and you are encouraged to consider the possibility of spending a semester abroad in your second year. For more information see page 21.

BA International Relations and Modern Language (French, Spanish or Japanese)
Study international relations in depth while also learning a foreign language to graduate level. Gain invaluable experience by spending a year abroad in a country where your chosen study language is spoken.

Studying a modern language will broaden your horizons, improve your knowledge of different countries and cultures, and give you a much better chance of working abroad in the future. It also means you can read foreign-language texts and conduct interviews with non-English speakers. And that means you can conduct original, primary research while at university and beyond.

Your year abroad will improve your linguistic ability and your confidence. You can choose to study at one of our exchange universities, taking classes in your chosen study language. Or you can take a work placement, for part or all of the year, working in a business, public service or third-sector organisation.

Some placements attract funding, and a small contribution towards travel and accommodation may be available. For more information see page 21.
STUDY ABROAD

Wherever of our courses you choose, you will have the chance to spend a semester abroad studying at one of our partner universities. For more information see page 21.

WHERE NEXT?

Your International Relations degree will equip you for working in international and non-governmental organisations, the civil and diplomatic service, European institutions and businesses, the media and the military. Alternatively you might go on to postgraduate study or professional careers such as teaching.

To help you make the transition from student to working life our Careers Service organises a range of popular events, such as Working in Politics and Government, Working in Charities and NGOs, and Working in Westminster and Whitehall. Here you will have the chance to make valuable contacts and get advice and insights from successful alumni. You will also have the opportunity to take part in work sharing ‘tasters’ and parliamentary internships.

ABOUT US

You will be taught by an enthusiastic and committed group of staff who are all active researchers in the field, publishing in international academic contexts. Our research focuses on US foreign policy; conflict and security; terrorism; religious fundamentalism; comparative European politics and European integration; international politics in Asia and Africa; the global political economy; migration; human rights; environmental governance; and international organisations.

As an international relations student, you will be invited to take part in the School’s various series of visiting and guest speakers, where academics, politicians and other practitioners give talks on all aspects of politics and international relations. Recent speakers have included the Rt Hon Charles Clarke, Baroness Shirley Williams, Vince Cable, Professor Anthony Giddens and Sir Stephen Wall.

“The major skills I learnt at UEA were around networking, debating, organisation and teamwork. Due to my line of work the ability to successfully build networks and meaningful relationships with people has truly been the compounding factor in my career success. UEA’s immensely social nature allowed me to develop and hone my skills in these areas.”

– Robert Truman, International Relations and Politics Graduate now working as Business Development Executive, Avanade Financial Services, US

Insight and expert political analysis combine in Eastminster, UEA’s global politics blog based in one of the UK’s leading departments. Promoting international debate, politicians and practitioners, students and activists make their voices heard through perspectives, podcasts and opinion pieces. Bridging the gap between the latest research and real-world politics.

Law

LLB Law
UCAS code M100
A level (typical offer): AAA
International baccalaureate: 34
Length of course: 3 years

Further information on the study of law: Professional regulators in the legal sector are currently conducting an extensive consultation about legal education and training. This includes a review about the routes and qualifications for becoming a solicitor or barrister. Some of the considerations include changing or ending existing routes, and opening new ones. The current routes of a qualifying law degree or GDL, and the BPTC, to become a barrister will remain in place until summer 2017. The current route of a qualifying law degree or GDL and LPC will remain in place until summer 2019. The Solicitors Regulation Authority and the Bar Standards Board will make announcements in due course after their consultations and reviews. These decisions will then inform the different routes to qualification as a solicitor or barrister.

Minimum offer grades are for guidance only. Find out more at www.uea.ac.uk/law/courses

Study at a top law school that makes a difference to its students and the wider world. Benefit from excellent teaching and first-class pastoral support. Enjoy Earlham Hall, in which we have invested £8 million to create a unique home for the Law School and its students. Participate in valuable, unique opportunities to build your skills, confidence and professional CV. Let us equip you to thrive in your future career.

ABOUT YOU
You will be working towards three good A levels (or equivalent) and be interested in the law and the way it shapes our lives. You will be an original and creative individual, articulate and determined to achieve your full potential. You may want to practise law or develop transferable skills for success in another career, whether in the world of business, finance, government or the charitable sector. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
LLB Law
You will study the subjects necessary to progress towards qualification for legal practice. These include Constitutional and Administrative Law, Criminal Law, Contract, Tort, Trusts, Land Law and EU Law. You will also develop important legal skills such as legal reasoning, research and writing – as well as key transferable skills such as negotiation and team working – by taking Law in Practice, Legal Method, Skills and Reasoning, and the English Legal Process. In your second year you will begin tailoring your degree by choosing modules that suit your interests. In your third year you will choose all of your subjects from a wide range of options, including Company Law, Competition Law, Employment Law, Family Law, International Humanitarian and Refugee Law, International Trade Law, Internet Law, Law and Medicine, and Miscarriages of Justice. You can also choose to write a dissertation under the direction of a member of faculty.

You will have many opportunities to build your skills, confidence and professional CV by engaging in an extensive range of extra-curricular activities. You could:
- Benefit from one of more than 50 internships arranged each year in law firms and other organisations
- Be one of up to 30 UEA students each year who ‘marshal’ for judges by spending a day on the bench with a judge during a trial
- Benefit from our alumni mentoring scheme, where UEA Law School graduates offer career mentoring to individual students
- Connect with employers at the UEA Law Fair or at the many talks given by visitors from law firms, the Bar, business and government

- Make a difference to society and gain valuable experience by working for the public good (pro bono). You could work explaining the law, giving advice or representing people in tribunals under appropriate supervision. Every year at least 200 UEA students undertake pro bono work. In less than three years our students have recovered no less than £1.5 million for welfare claimants in the appeal tribunal. This outstanding work, undertaken while working with the Norfolk Community Law Service, one of our pro bono partners, won the prestigious LawWorks Pro Bono Partnership Award in 2014, a top national award.

You can also have fun, build your profile and hone valuable skills by engaging in UEA Law Society activities. As well as social events, these include junior and senior mooting contests (trials of points of law), where the finals are held in real courts and judged by real judges or barristers. The Law Society also holds negotiation, client interviewing, mediation and legal triathlon competitions, the finals of which are hosted by law firms. In 2016, the UEA Law Society won the LawCareers.Net Award for ‘Best Pro Bono’ activities.
LLB Law with European Legal Systems
Study law in its European context. You will study the modules needed to progress towards qualification as a lawyer in England and spend a year abroad as an exchange student at one of the following universities: Leiden, Maastricht and Groningen (Netherlands); Leuven (Belgium); Lund and Uppsala (Sweden); Aarhus (Denmark); Prague (Czech Republic); Thessaloniki (Greece); Vilnius (Lithuania); LIUSS, Rome (Italy); Lucerne (Switzerland); Ankara (Turkey); Ljubljana (Slovenia) and Comenius, Bratislava (Slovakia). All these universities offer law courses taught in English.

If you have a French or Spanish A level (or equivalent) you can follow a modified programme to include French or Spanish-language tuition at UEA to prepare for a year in France (Bordeaux, Lorraine, Lyon III, Tours, Rennes I, Strasbourg) or Spain (Deusto Bilbao, Salamanca). Students fluent in German may study at universities in Berlin, Hamburg, Marburg and Trier (Germany) or Salzburg (Austria). For more information see page 21.

LLB Law with American Law
Study law with a transatlantic dimension. At UEA you will cover the modules needed to progress towards qualification as a lawyer in England and also aspects of American law: the US legal system and the US Constitution. You will spend a year in America at Cumberland Law School (Alabama), South Texas College of Law (Houston) or Stetson University College of Law (Florida). For more information see page 21.

WHERE NEXT?
Take the professional stage of qualification to practise as a barrister or solicitor. Alternatively, use your transferable skills in business, banking, accountancy, the civil or diplomatic service, the charitable sector, teaching or academia. Many of our graduates have gone on to build careers in leading firms in London and internationally, such as Clifford Chance, Linklaters, Freshfields, Clyde & Co, Herbert Smith, Baker & McKenzie and Eversheds, and at a wide variety of other firms of all sizes and types. Others work as in-house counsel in limited companies, public authorities and the Government Legal Service. We also have a significant number of alumni who are barristers, including several Queen’s Counsel.

ABOUT US
As a top Law School, we make a difference to our students by providing excellent courses, a superb collegiate environment at Earlham Hall and an unparalleled range of opportunities. We make a real contribution to the world through our influential research in a wide range of fields, including commercial law, competition law, the law of public protest, internet and media law, law and medicine, and the law of government commerce. We are proud that our students are able to make changes in society through their pro bono work.

The Research Excellence Framework (REF2014) ranks UEA’s Law School 21st in the country and ahead of most of our competitors (Times Higher Education). More than 70% of our research was judged to be world-leading or internationally excellent.

Seeking justice on and off the pitch, UEA Law graduate and highly experienced criminal barrister Wayne Barnes also happens to be the youngest ever and most capped professional English rugby referee of all time. A game changer in two fields, we recognised Barnes’ unique accomplishments with an Honorary Doctorate.

HOW WILL YOU GET AHEAD OF THE FIELD?
www.uea.ac.uk/brilliant

RANKED IN THE UK
TOP 10 LAW SCHOOLS
- The Guardian University Guide 2017
Study mathematics in a flourishing department, committed to excellence in teaching and research. Our undergraduate courses are renowned for their high-quality teaching, which draws on the varied expertise of our academic staff: from algebra, logic and number theory to fluid mechanics and mathematical biology. We favour small-group teaching, giving you more contact with both your tutors and your peers.

ABOUT YOU
You will already be passionate about the study of mathematics, attracted to its beauty and structure or perhaps its vast applications and implications in all aspects of life. Your academic achievements so far will reflect this. You may be studying Further Mathematics at A level, but this is not essential. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

**BSc Mathematics**
First you will establish a strong foundation in a wide range of mathematics topics, such as calculus, linear algebra, probability and mathematical modelling. Some of the material you study will follow on naturally from A level courses, while other topics, such as analysis, are completely new and conceptually challenging. In your second year you will go on to study abstract algebra and differential equations in depth, alongside complex analysis and fluid mechanics. You will also have the chance to tailor your studies and begin to specialise in pure or applied mathematics. If you could mix your topics with a range of modules such as statistics or environmental modelling. There is also the opportunity to broaden your studies beyond mathematics.

As your studies progress, you will have the flexibility to choose from a substantial range of fascinating and challenging options. These currently include Fluid Dynamics, Mathematical Biology; Dynamical Meteorology; Statistical Mechanics; Learning and Teaching of Mathematics; Financial Mathematics; History of Mathematics; Cryptography; Galois Theory; Topology; Mathematical Logic; Mathematical Modelling; and Advanced Statistics. You will have the opportunity to complete an individual project. This allows you to study a topic of your choice in depth, with the careful guidance of a faculty member. Recent topics have included knot theory, tsunami propagation, surreal numbers and infinite graphs. Alongside many other opportunities during your degree, your project is an ideal opportunity to develop key employability skills with independent, self-directed study and research.

Due to our flexible degree structure, it may be possible for you to transfer between any of our degree programmes, including the four-year integrated Master of Mathematics (MMath), subject to strong academic performance.

**BSc Mathematics with a Year in Industry**
Combine the development of your interests in mathematics and statistics with a year spent building experience in a professional setting.

Spend your third year of study on an industrial placement, gaining invaluable experience and applying and developing your skills and expertise. Throughout the placement you will keep in close contact with an assigned mentor at UEA who will visit you during the year, and you will also have an industrial supervisor to support you for the duration.

**BSc Mathematics (with Education) to be confirmed**
This degree programme is an opportunity to study mathematics, whilst preparing for a rewarding career in teaching. As well as the course modules outlined in the BSc Mathematics degree, you will undertake two compulsory teaching practice modules, which will include a guaranteed school placement at the end of your first year. You will receive additional teaching experience through fortnightly classroom observation placements, as well as in seminars and workshops delivered by our School of Education and Lifelong Learning – one of the top teacher training institutions in England, with more than 30 years’ experience. During your time on the course you will also have the opportunity to undertake other education modules. This exposure to education and the understanding you will gain will put you in a great position to progress to the UEA PGCE (Initial Teacher Training) course when you graduate.

**MMath Master of Mathematics**
Prepare for a career as a mathematician on this prestigious four-year Master of Mathematics programme.

After three years closely following the BSc programme, you will, alongside several advanced-level lecture courses, spend one third of your final year on an individually supervised research project. You can choose from a broad range of topics, ensuring your project is tailored to your own interests. Recent project topics have included the acoustics of stringed instruments, the stability of kayaks, Ramsey Theory, Gödel’s incompleteness theorem, and the Black-Scholes equation.

**MMath Master of Mathematics with a Year Abroad**
Prepare for a career as a mathematician on this prestigious four-year Master of Mathematics programme.

After three years closely following the BSc programme, you will, alongside several advanced-level lecture courses, spend one third of your final year on an individually supervised research project. You can choose from a broad range of topics, ensuring your project is tailored to your own interests. Recent project topics have included the acoustics of stringed instruments, the stability of kayaks, Ramsey Theory, Gödel’s incompleteness theorem, and the Black-Scholes equation.

**BSc Mathematics with Business**
Study mathematical concepts and advanced techniques, and their application in the business world. This course is offered in association with Norwich Business School, which has a first-class reputation for teaching and for the development of professional business skills. (Continued over page.)
**Mathematics**

**BSc Mathematics with a Foundation Year**
UCAS code G10F
Requirements: See our website for specific entry criteria. Grade C or 4 or above in GCSE English Language and Mathematics.
Length of course: 4 years
You might also be interested in:

**BSc Mathematics with Business (continued)**
Over the three-year programme you will combine your passion for mathematics with a grounding in core business disciplines. This will open up a wide range of possible careers. You will cover the full range of mathematics options, which will be complemented by various strands of possible study in the business component. These include finance, economics, management and accountancy. Statistics is of particular relevance to business, and there are a range of statistics options available.
You can choose to focus on one area of business study or to experience a wider range of fields. Examples of modules currently offered include Financial Accounting; Principles of Marketing; Operations Strategy and Management; Business Finance; Business and Company Law; and Human Resource Management.

**BSc Mathematics with a Foundation Year**
Study the essential concepts, techniques and knowledge required to gain access to our mathematics degree, without needing to meet our traditional entry requirements.
Your foundation year will be spent covering the fundamental mathematics you need to progress on to our BSc Mathematics. You will be able to complement your mathematical studies with your choice of additional material from across biology, chemistry, computing and physics.

**WHERE NEXT?**
You could choose to enter a profession traditionally associated with mathematics, such as accountancy, banking and finance, statistics and data analysis, and secondary or higher education.
Or you could follow other UEA mathematics graduates into roles in which logical thought and problem-solving are important. These include engineering, information technology, logistics and distribution, central or local government, and other business areas. Many of our graduates also choose to continue their studies by going on to a higher degree.
The School of Mathematics works together with UEA’s Careers Service to support you at every stage of your course, from finding paid or voluntary work opportunities and choosing a career, through securing internships, to applying for graduate jobs and further study.

**ABOUT US**
As a student in the School of Mathematics, you will be part of a close-knit undergraduate community with great academic support. Our academics are leading researchers as well as dedicated teachers, and we have a devoted team of staff who will support you to excel.
Our faculty includes leading experts on a broad range of mathematical topics, such as algebra and combinatorics, fluid mechanics and environmental modelling, logic and mathematical biology. This research invigorates our teaching – our final-year modules draw on our lecturers’ own research, so that you’re always learning at the forefront of the field.

Out of this world

Our mathematicians have shown how crucial oceans are for sustaining life on distant planets, bringing us one step closer to finding somewhere aliens could call home.

**HOW WILL YOU SEARCH FOR ALIEN LIFE?**
www.uea.ac.uk/brilliant
Study media and culture within an academic environment that combines theory, creative practice, politics and history. Learn to understand the art and business of media production, and the diverse ways in which it impacts on the world around us. Understand the creative and cultural contexts of media production. See how the media shapes the way we think and act in contemporary societies. Learn how the media interacts with social, economic and political structures.

ABOUT YOU
You will be working towards three A levels (or equivalent). You will have an interest in media but won’t necessarily have studied it before. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
Whether you’re interested in the ways in which issues of race, gender and sexuality are represented, the changing forms of media and their cultural impact, how the media affects the outcome of elections, or the relationship between politics and popular culture, we have the right course for you. And if you’re keen to learn how journalism and the creative industries work, there are opportunities for you to find out.

BA Media Studies
Study how media texts and their audiences operate in contemporary society. Explore the role of the media in relation to questions of identity, representation and audiences. Gain experience with a range of approaches to analysing forms of media, the industries that produce them and the audiences that consume them. Study within an academic degree programme that includes media production modules designed to develop your understanding and practical skills at all stages of the creative process. Alongside theoretical work, you will have the opportunity to develop and pitch your ideas, and write and produce fictional and factual work across a range of media formats.

In your first year, introductory modules will cover issues such as the relationships between media and society, the nature of the media industries and the specifics of working within them. In your second and third years, you will cover a variety of media and media practices through specialist modules, which might include magazine journalism, youth media and documentary production. You will also explore the ways in which the world has been shaped by media. In your final year you will research a dissertation topic, while working on a longer creative practice project – all with the guidance and support of our expert staff.

BA Society, Culture and Media
Study how media and culture affect the distribution and exercise of power in modern societies. Engage with debates about the media’s influence over attitudes and behaviour. Explore the extent to which culture is a form of social control or popular protest. Argue about the appropriate role of the media in a democracy. On this course, you will receive training in research methods and have opportunities to develop practical skills in media production. You may also, if you wish, study a language as part of your degree or as an extracurricular course.

In your first year you will be introduced to debates about the power of the media, techniques for analysing cultural texts, and the main themes in social and political thought. In your second and third years you will be able to explore topics such as gender and power, media and identity, the practice of journalism, the globalisation of media and culture, political communication and consumer culture. You will also learn social research techniques, and might choose to write a dissertation exploring a topic of your choice in depth. In your final year you will also be offered the opportunity to apply for a limited number of work placements and internships. Here you will have the chance to gain hands-on experience of what it means to work in local, national or indeed international politics. Past students have carried out research projects for think tanks and Members of Parliament. There are also opportunities for work shadowing and short placements in the media industry.

STUDY ABROAD
Whichever of our courses you choose, you will have the chance to spend a semester abroad studying at one of our partner universities. For more information see page 21.

WHERE NEXT?
The analytical, critical and creative skills that you will develop during your degree are invaluable to employers. Recent graduates have gone on to work in the media and cultural industries, as well as politics, social services, the leisure industry and charities. Others have become lawyers, journalists, teachers and researchers. Many go on to further study for professional and vocational qualifications and higher degrees.

To help get your career off to the best start, our Careers Service produces an annual events programme. This has drawn alumni speakers from the BBC, Channel 4, national and regional newspapers and magazines, film productions and post-production companies, and allows you to explore a range of careers in the arts and humanities.

As part of this programme UEa offers its annual Writing with Words conference, where more than 40 alumni return to share their stories and showcase a range of career possibilities linked with writing and communication. This has included journalism, fiction and non-fiction writing, editing, digital marketing and corporate communications.

ABOUT US
You will be taught by staff who are undertaking cutting-edge research in areas such as media history; audiences and cultural consumption; media genres; feminist media studies; creativity; the cultural industries; new media; fandom and celebrity; popular music; cultural politics; media policy; political campaigning; social identity; critical theory; political communications; intercultural communications; language and rhetorical analysis; and journalism studies. As a media and culture studies student you will be part of our active research community. You will be invited to attend research seminars, lectures and masterclasses by visiting scholars and practitioners.
Join Norwich Medical School and prepare for your future as a highly competent and confident doctor. We are ranked the top UK undergraduate medical school for ‘best prepared’ junior doctors – 89.6% of our graduates confirmed that they were adequately prepared for their first foundation post*.

*General Medical Council’s National Training Survey 2016.

ABOUT YOU
You will be passionate about becoming a doctor and able to meet/exceed our entrance requirements for the highly competitive MB BS Medicine degree, or you are a talented student who meets the criteria for our much-praised MB BS with a Foundation Year. You are looking for an integrated approach to studying medicine, in a friendly, student-centred medical school.

ABOUT THE COURSES
Our Foundation Medicine and MB BS courses are carefully designed to develop doctors who are knowledgeable scholars and scientists. We pride ourselves on creating a supportive, nurturing environment where you can reach your potential. Our graduates are skilled medical practitioners and ethical professionals, ready to use their skills and knowledge to improve the health of all those in their care.

You will be part of an exceptional group of medical students, studying to become a doctor at one of the most highly regarded universities in the UK. Patients will be at the core of your work and study throughout the course. With early exposure to clinical practice, you develop the necessary knowledge and skills to become a highly competent practitioner, able to address the complex needs of patients in the 21st century.

You will benefit from our team of respected, highly experienced teaching and research academics, who will support your learning. You will also have access to the award-winning Bob Champion Research and Education Building, which houses a state-of-the-art clinical skills area, meaning you will benefit academically and clinically from the expertise of this world-class facility.

As a student at UEA, we put you at the heart of what we do, in a warm and caring learning environment. With consistently high scores for student satisfaction, preparedness for practice and employability, we will give you the best start towards achieving your ambition of becoming a leading doctor in your chosen field.

MB BS Medicine
This course is organised into modules based on body systems. You will study the underpinning biological, social and clinical sciences alongside experiencing their application in hospital and general practice placements. Each week, working in small groups in both university and primary care placements, you will apply problem-based learning techniques to virtual scenarios and real patients. In small groups, you will undertake dissections and use specimens and models in order to understand the detailed structure and function of the human body, as well as developing relevant practical and communication skills in both simulated and real healthcare environments. All this learning is supported by a weekly programme of lectures and seminars, and complemented by month long attachments in secondary care, some of which may be residential.

Assessment includes OSCEs (Objective Structured Clinical Examinations), written coursework and presentations, together with end-of-year written exams.

Key features:
- Clinical placements from semester one in hospitals and general practice providing you with patient contact from the start
- Core medical sciences taught alongside clinical practice in cutting-edge facilities
- Develop the professional behaviours necessary to practise as a doctor
- Gain the values and skills needed for the lifelong learning required of modern medical practice
- Develop academic skills through critical appraisal of the social and biological sciences literature, with opportunities for individual audit and research projects
- Support to reach your full potential from small-group tutors, personal advisers, as well as our dedicated in-house team of senior advisers
- Opportunity to take an intercalated Bachelor’s or Master’s degree after the third or fourth year.

MB BS Medicine with a Foundation Year (Widening Access Programme)
This is part of our innovative Widening Access Programme. It is designed to give those who haven’t had the same academic opportunities as others a route into medicine. On this carefully designed course, you will learn the essential study skills and scientific knowledge required to succeed on a medical degree. You will also be introduced to the application of the life and social sciences in healthcare. On successful completion of the foundation year, you will progress to our MB BS course (UCAS code A100).

WHERE NEXT?
On graduating, you can apply for provisional registration with the General Medical Council with a licence to practise. This will become a full licence after a year of satisfactory clinical service in approved positions of employment as a Foundation Programme doctor. All of our provisionally registered graduates can apply to work in our local Foundation Programme, meaning we are on hand to support you during your first year.

We are passionate about helping you become the best doctor you can be. In the General Medical Council’s National Training Survey 2016, we are ranked as the top undergraduate medical school in the UK for ‘best prepared’ junior doctors.

ABOUT US
You will benefit from a large pool of excellent teachers from the University, NHS hospitals and general practice. Our academic staff are actively involved in research as well as teaching. On average more than 85% of our health research has been rated as world-leading or internationally excellent according to the Research Excellence Framework (REF2014).

Our research is focused on answering important health questions such as the basic mechanisms and genetics of disease, as well as clinical trials and clinical guidelines. We are part of the Norwich Research Park, which hosts world-class research institutes including the John Innes Centre, the Earlham Institute, The Institute of Food Research and the Quadram Institute, a food and health research centre opening in 2018.

For additional information, please see our website for our latest video www.uea.ac.uk/medcourses
Looking for job satisfaction? Join one of the best Schools for health sciences in the UK and train to become a midwife. You will learn from esteemed and experienced academics, and study alongside like-minded medicine and health students to prepare you for your future career as a respected and skilled midwife.

ABOUT THE COURSE

BSc Midwifery

Midwifery is a satisfying yet challenging profession that allows you to care for pregnant women and their families before, during and after childbirth. Our programme will provide you with all the clinical knowledge and skills you need to excel as a midwife. You will receive the highest level of education from our supportive and well-respected academics, who will equip you with a solid grounding in the physical and psychological aspects and overall process of pregnancy and birth. Our rigorous course will train you to be able to deliver the highest standards of care to pregnant women and their babies.

You will learn through a combination of fully immersive clinical placements and innovative teaching methods, including lectures, seminars, practical sessions, workshops and independent study. Through our problem-based and inter-professional learning approach, you will work alongside other healthcare students, as well as service users, to gain a full understanding of what it means to be a midwife. The course is designed to ensure that you are well prepared to enter your new profession when you graduate.

BSc Midwifery (Shortened)

If you already hold an NMC registration as an adult nurse, our accelerated route to midwifery could be for you. For more details email admissions@uea.ac.uk.

WHERE NEXT?

Our rigorous and respected programme prepares you for registration with the Nursing and Midwifery Council and subsequently a successful and rewarding career as a registered midwife. Your training at UEA will be highly regarded by NHS Trusts and you can look forward to a lifelong role looking after women and their families at the time of their babies’ birth.

ABOUT US

When you join UEA, you will be part of a supportive community of students, working together to gain first-hand experience and provide outstanding care. We are ranked sixth in the UK for Nursing and Midwifery (The Guardian University Guide 2017) and our academics are at the forefront of nationally recognised, innovative new teaching methods. World-class research underpins our programme, which means that you will be taught the latest theory at the forefront of the field. We also have a great reputation with our partner NHS Trusts, and are proud that our students graduate with excellent career prospects and good honours.
MODERN LANGUAGES

BA Modern Language(s) (with a Year Abroad)
UCAS code 1903

A level (Typical offer): ABR, including grade B in French, Japanese or Spanish for Double Honours applicants
International baccalauréate: 32, including 5 in HL French, Japanese or Spanish for Double Honours applicants
Length of course: 4 years

You can start most of our language degrees from beginner’s level or with a GCSE or equivalent, as well as from A level or equivalent. The course is tailored to meet your level. Students on our single honours three-year programmes will have an A level or equivalent. Contact us if you need assistance with your choices.

Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/lcs/courses

Develop your language competence with a team of native speakers and learn about translation and language and communication issues with experts in those fields. Benefit from interactive teaching and a close-knit community. Take advantage of our large multimedia room, Sanako language laboratory and interpreter training suite.

ABOUT YOU

You will be working towards your academic qualifications and proficiency in your languages. You will also be able to demonstrate your awareness and knowledge of the role of language, translation and intercultural communication in today’s global communication networks. You will have a keen interest in current affairs and cultural matters, keeping abreast of events in both the English and foreign-language media. Intercultural Communication with Business Management students will be ready to embrace the added value that combining a business management degree with the study of intercultural communication and/or communication across modern media brings.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

Study a language with lecturers who are native speakers and benefit from a close-knit community with small classes for high-quality learning. We offer state-of-the-art facilities, dedicated and attentive student support, and creative approaches to learning.

Our degrees are designed to allow you to apply your knowledge and skills to practical and professional contexts, and ensure that you are well equipped for the world of work.

On all our degrees you will have the opportunity to start studying an extra language for a semester or year as a credit or non-credit student, making the most of the range of languages taught in the School (Arabic, British Sign Language, Mandarin Chinese, French, German, Greek, Italian, Japanese, Russian and Spanish).

BA Modern Languages with a Year Abroad

Immerse yourself in the advanced study of French, Spanish or Japanese language, or a combination of two of these. Complement your core language learning with the study of the significance of translation in a globalised world, the way language works in society and the media, or the cultural aspects of the countries of your studied language(s). Alternatively, you could begin studying, or enhance, a subsidiary language.

The language-learning element of your degree will involve translation, reading and listening comprehension, oral and written production, précis and paraphrase work, creative writing, debates, the study of different styles and registers, grammar and lexical practice. Since presentation skills are vital in the contemporary work environment, our language work in Japanese, French and Spanish also focuses on developing your vocal and physical projection, improving poise and managing nerves, and your ability to speak from notes, improvise and structure arguments coherently. In addition you will be able to study fascinating subjects in language, culture, communication and translation, such as aspects of popular culture in Japan and Latin America; contemporary Japanese and Spanish society; varieties of French spoken across the world; subtitling and dubbing; translation and media, and the study and practice of interpreting in conference and public service contexts.

You will spend your third year in a country where your honours language is spoken. If you are studying two languages at degree level, you will split your time between two countries where those languages are spoken. During this year you will enhance your experience of the language and culture by studying at a local university, taking up a teaching assistantship or going on a suitable work placement.

We have exchange links with many universities in France and Spain, as well as links with universities in Japan and Latin America, including Uruguay and Chile. If you study Japanese you will spend your time studying at one of our many partner universities across Japan. We visit our partner universities regularly, and whether you are at university, on a paid teaching assistantship or an approved work placement, you may be eligible for a grant if your placement is in Europe. For more information see page 21.

Three-Year Fast Track Option

In place of the year abroad, you will spend the spring semester of your second year at a university in an appropriate country.
BA Modern Language(s) with Management Studies with a Year Abroad

Combine the study of your chosen language with a management course taught in our Norwich Business School. Most people work in or with multilingual multinational companies during their careers, while surveys and reports on employer needs indicate high levels of unmet demand for language skills and notable gaps in language proficiency among the UK workforce. Brexit means that languages are more valuable than ever as UK businesses rebuild international trading links in a new context. When you graduate from this course, your advanced language and intercultural communication skills mean you will have a great deal to offer potential employers.

You will gain a general and discerning knowledge of the purpose of management in business and organisations; insights into the practice of management and its environment, and the ability to use the interrelationship of theory and practice to help solve the key management issues that arise in modern business and organisational life.

In the management studies component of this course you will study how different organisations function and are managed, and you will develop an understanding of organisational behaviour and human resources and their evolution. You will also be taught about principles of marketing and strategic management and be able to specialise in, for example, consumer behaviour, marketing, entrepreneurship or business ethics.

In the language-based component of the course, you will acquire specific expertise in traditional language skills such as reading, writing, speaking and listening, as well as transferable skills such as time management, self-discipline and self-motivation, intercultural awareness, flexibility and resourcefulness, mediation skills, IT literacy and teamwork.

You will also study the skills necessary to give clear and focused presentations – vital in the contemporary work environment. You will learn vocal and physical projection, and how to develop poise and manage nerves, speak from notes, improvise and structure an argument.

You will spend your third year abroad, in the country or countries where your honours language is spoken, before returning to UEA for your final year. During your year abroad you will enhance your experience of the language and culture by studying at a local university, taking on a teaching assistantship or going on a suitable work placement. For more information see page 21.

BA Translation and Interpreting with Modern Language Double Honours (with a Year Abroad)

BA Translation and Interpreting with Modern Language Double Honours (with a Year Abroad)

Combining the study of your chosen language with translation and interpreting will give you more insights into the professional world. You will also have the opportunity to study a range of subjects in language, culture, communication and translation, such as aspects of popular culture in Japan and Latin America, contemporary Japanese and Spanish society, varieties of French spoken across the world, or principles of interpersonal and intercultural communication.

You will spend your third year abroad, in the country or countries where your chosen language is spoken. During this year you will expand your experience of the language and culture by studying at a local university or arranging a suitable work placement. For more information see page 21.

BA Translation, Media and Modern Language(s) with a Year Abroad

Join the only UK course to combine advanced language learning with the study of translation issues and media. You will study French and/or Spanish and/or Japanese language to degree level and choose from a range of specialist modules in translation and media. This means you can broaden your knowledge of media while applying your language and cultural competence, approaching media issues from a variety of perspectives.

You will be introduced to the theory and technique of translating, and questions of style and register in a range of specialised areas, including how text is adapted across languages, and media and genres, multilingual publications and packaging, digital and online texts, film subtitles, and theatre translation. You will also explore how globalisation has affected translation. You will have opportunities to experience professional translation first-hand by working on translation projects for external organisations, and be able to explore contemporary issues in the field of media by studying, for example, how globalisation has shaped communication across different forms of media.

You will spend your third year in a country where your honours language is spoken. If you are studying two languages at degree level, you will split your time between two countries where those languages are spoken. During your year abroad you will expand your experience of the language and culture by studying at a local university, taking up a teaching assistantship or going on a suitable work placement. For more information see page 21.

Three-Year Fast Track Option

In place of the year abroad, you will spend the spring semester of your second year at a university in an appropriate country.

BA Intercultural Communication with Business Management

In a globalised world, where economies are interdependent, intercultural awareness and an appreciation of the value of communication is crucial. This programme, taught jointly with Norwich Business School, gives you the chance to develop expertise in intercultural communication and business management, and an understanding of how media, politics and translation shape communication. When you graduate, these skills will enable you to operate more effectively in international business.

You will gain insights into how languages are used in society while developing intercultural business skills. Or you may explore what makes an effective communicator in international or multicultural settings through the study of intercultural and interpersonal communication, both in theory and in practice.
BA Intercultural Communication with Business Management (continued)
You will benefit from being taught alongside other UK, EU and international students, which constantly enhances your linguistic and intercultural communication skills. You can also choose to begin, or consolidate your proficiency in, another language by choosing from the wide range of language modules we offer.

BA Intercultural Communication with Business Management with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the degree programme in Intercultural Communication with Business Management, following successful completion of the foundation year. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. Your modules are taught via lectures, presentations, seminars and study groups, and incorporate a variety of assessment methods to prepare you for the different types of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as essay writing, research, preparing and giving presentations, and understanding and evaluating scholarly arguments.

WHERE NEXT?
You will be ready to begin a career in an extensive range of professions, both in the UK and abroad. For example, you could go into human resources, journalism, international banking, or translation and interpreting. UEA’s Language and Communication graduates also work in marketing, health, education, travel and tourism, local government, management and arts administration, to name but a few. When you graduate, your employment prospects will be excellent.

To help get your career off to the best start, we offer a range of career development events, including career-focused workshops, and activities that develop professional skills within the curriculum, such as internships and opportunities to meet and be mentored by our alumni. You can also take part in our international visits programme, visiting organisations and businesses in the UK and abroad.

You will also benefit from our annual Careers Using Languages Fair, where we showcase the range of opportunities available to you. This is a great chance to meet employers and to hear alumni speak about their career paths since graduating. Alternatively, you could also choose to build on your undergraduate work with further study, in particular via our MA in Applied Translation Studies.

ABOUT US
You will be taught by native speakers in the languages you are studying and experts in language and communication studies.

We were ranked fifth in the UK in the most recent Research Excellence Framework, with 74% of our research rated world-leading or internationally excellent (REF2014).
Create a unique degree that crosses conventional boundaries as you tailor your choices from across the sciences. Whichever modules you choose, you will learn at the forefront of your chosen disciplines from our stimulating, research-led teaching programme.

ABOUT YOU
You will be achieving at the highest level in your studies so far. You will be excited about studying sciences in this unique, award-winning environment. You may already have an eye on a future in which you specialise in a particular field, or you may want the freedom to tailor your path as your interests grow and your strengths evolve.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
BSc and MNatSci Natural Sciences
You will study modules from the wide range available in the Faculty of Science. The flexibility of these degrees means that you can choose to specialise, or maintain a broad range of interests if you prefer. In your final year you will complete a supervised research project, which can be a combination of disciplines. If you take the four-year integrated Master’s option, you will be able to study at least two subjects to Master’s level, including chemistry, biology, mathematics, computing, physics and environmental sciences.

BSc Natural Sciences with a Year Abroad
UCAS code CF09
A level (Typical offer): A*AA, including two Sciences or Mathematics
International baccalaureate: 35, including 2 HL Sciences or Mathematics at 6
Length of course: 4 years
Special requirements: GCSE grade B or 5 in the language of teaching in your chosen country, if intending to study in Europe

BSc Natural Sciences with a Year in Industry
UCAS code CGF0
A level (Typical offer): A*AA, including two Sciences or Mathematics
International baccalaureate: 35, including 2 HL Sciences or Mathematics at 6
Length of course: 4 years
Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/natsci/courses

WHERE NEXT?
You will graduate exceptionally well prepared for your future career; having gained skills that are highly valued by employers. The latest figures show that 100% of our graduates who were available to work were in employment or further study within six months of leaving us. Many natural sciences graduates continue to specialise in their chosen scientific fields across a broad range of careers, including forensics, teaching, science journalism and laboratory research. You might also choose to progress to postgraduate study or research – about a third of our students do this.

Natural Sciences works with UEA’s Careers Service to support you at every stage of your course, from finding paid or voluntary work opportunities and choosing a career, through to applying for graduate jobs and further study.

ABOUT US
The Faculty of Science is nationally and internationally renowned for its world-class research. We have strong research links across many related subject areas, including Biological Sciences, Chemistry, Computing Science, Environmental Sciences, Mathematics, Physics, Engineering and Pharmacy. This interdisciplinary approach is extended beyond the Faculty of Science to our partners on the Norwich Research Park, a thriving community of more than 3,000 scientists and 50 businesses, which includes UEA, the John Innes Centre, the Earlham Institute, the Institute of Food Research, Norfolk and Norwich University Hospital and the new £75 million Quadram Institute, opening in 2018.

Be part of an innovative and respected School, ranked sixth in the UK for nursing (The Guardian and The Complete University Guide 2017). You’ll learn from our knowledgeable and motivated lecturers who are there to help you to reach your full potential. You will have early patient contact from the outset, work alongside other healthcare students and have your own personal mentor. You will graduate fully prepared for a career in your chosen field of nursing.

ABOUT YOU
Nursing is a challenging and incredibly rewarding profession. No two days are ever the same. You will be keen to receive the very best education to ensure that you can offer a high standard of care to your patients. Depending upon which path you choose, you could have a varied career or become a specialist within your chosen field. Whatever route you take, our programmes will help you become a leader within your profession and make a real difference to people’s lives.

In order to excel as a fully registered nurse, you will be highly motivated and a team player; capable of working on your own initiative, be adaptable and have a responsible, mature approach.

As a caring, compassionate individual, you will be committed to helping others. Your empathetic and resilient nature will help you communicate difficult and sometimes complex health issues effectively and enable you to support people when they need it most.

ABOUT THE COURSES
All our courses allow you to combine academic study with first-hand clinical experience. You will learn alongside other healthcare students from different fields, working to solve healthcare problems together. This gives you a unique insight into other professional perspectives and allows you to develop teamwork skills that will be vital in your career. You will also be encouraged to work independently, develop a strong professional approach and set high clinical standards to give you the fundamental skills you need to succeed.

Whichever field of nursing you choose, during your first year you will experience a high level of contact time with lecturers. As you become a more confident and independent learner, the time you spend in clinical practice will increase. Our teaching is research-led, allowing you to benefit from the very latest thinking. Our lecturers are experts in their fields who really care about your learning, and will support you to ensure you reach your potential.

Throughout your studies you will experience a variety of assessment methods. These are designed to test your growing ability to put theory into practice. With guidance and support, you will also build a portfolio of evidence demonstrating your progress. Your portfolio will reflect both your theoretical and clinical skills throughout the three-year programme.

BSc Adult Nursing
Adult nursing offers a fulfilling, diverse and challenging career where you can make a positive difference to people’s lives. As a qualified adult nurse, you will care for adult patients experiencing a wide range of acute or long-term health conditions. During this course, you will learn to become a nurse who is caring, determined and has exceptional communication skills.

A wide range of career pathways will be open to you upon graduation. Our qualified nurses are highly sought-after and well-respected professionals; 99% of our graduates were in work or study within six months of graduating (HESA DLHE survey 2014/15).

MSc Adult Nursing
If you already have a degree and relevant experience, our Master’s degree could offer an accelerated route to registration. For more details, visit www.uea.ac.uk/fmh/mscadultnursing.

BSc Mental Health Nursing
Mental health nursing is often complex and challenging but always worthwhile. As many as one in four people are thought to suffer some form of mental health problem and as a specialist nurse your skills will be in high demand. However, dealing with the human mind and behaviour is not an exact science. You will need excellent communication skills, a strong personality and be able to empathise with others to excel in this profession.

You will work as part of a team that includes general practitioners, psychologists, social workers, psychiatrists, occupational therapists, art therapists and healthcare assistants, all working together to support individuals of all ages and from all backgrounds to manage a wide range of complex issues, helping them to live a better, and more fulfilling life.

BSc Children’s Nursing
Children’s nursing is a responsible and hugely valued career. You will care for children and young people and will also be required to provide support to their families. You will need to have strong verbal and non-verbal communication skills and work well as a team member.

As a children’s nurse, you will face many difficult situations where parents will look to you for support. You will need to be dependable and mature, and be able to provide the high level of care required to help young people (and their families) get through some of the most difficult periods in their lives.

You will be taught by respected academics who will encourage you to become the best you can be. As part of your learning, you will have access to the biggest neonatal intensive care unit in East Anglia and work alongside other health and medical students to help prepare you for your future career.
BSc Learning Disabilities Nursing
UCAS code B761
A level (typical offer): BBB
International baccalaureate: 31
GCSE requirements: Five grade A-C or 7-4 GCSEs, including English Language/Literature and Mathematics as a minimum
Length of course: 3 years (September intake)

You might also be interested in
140 BSc Midwifery
178 BSc Social Work
156 Dip HE Operating Department Practice

Learning disability nursing is a very rewarding and varied field of practice. As a learning disability nurse you will play a vital role in improving the health, wellbeing, life chances and expectancy of people with learning disabilities. You will also play a pivotal role in supporting carers within their role and make a real difference to the lives of people with learning disabilities and their families. As a learning disability nurse your emphasis is about empowering individuals and their carers to lead fulfilling and inclusive lives. You will be supporting them to have their physical, psychological and emotional needs addressed within a person-centred way in order to enhance their wellbeing. You will have the opportunity to undertake a variety of roles within a diverse range of environments including clients’ homes, residential services, community learning disability teams, hospital settings, prison, mainstream or special schools. You will support individuals and their carers across a wide spectrum of physical, social and psychological needs, developing long-term relationships with those you support to enable consistency of care.

WHERE NEXT?
Our courses have a reputation for excellence – over 90% of our graduates achieved a good honours and are sought-after healthcare professionals. Thanks to our combination of academic study and hands-on experience, you will graduate ready to apply for professional registration as a qualified nurse with the Nursing and Midwifery Council and be fully prepared to excel in a rewarding, lifelong career.

Our highly regarded programmes can lead you into a variety of roles within the NHS, and help shape a career in the armed forces and charities as well as research and private practice both in the UK and overseas.

We also support many of our graduates to continue their professional development through our postgraduate programmes and post registration courses and study days.

ABOUT US
The School of Health Sciences is led by a team of highly dedicated healthcare professionals. Our research is world class and this underpins our courses and teaching. Through our clinical practice we work in partnership with healthcare providers in the region, collaborating with service users and carers. This ensures you will benefit from a wide range of practice placements, which will help you decide upon the right career path when you graduate.

As a team, everything we do is focused on you, the student. We pride ourselves in making sure that everyone who studies with us performs at their very best, and graduates with the skills, knowledge, confidence and experience they need to go on to become leaders in their chosen field of healthcare.

Our nursing courses are based in a state-of-the-art building adjacent to the main campus on the internationally renowned Norwich Research Park, alongside the Norfolk and Norwich University Hospital.

We rank highly (sixth in the country for nursing) on two key influential surveys – The Complete University Guide and The Guardian University Guide 2017.
Join the very best courses in the country for physiotherapy and occupational therapy – we are currently ranked first for Physiotherapy and fifth for Occupational Therapy in The Complete University Guide 2017. You will receive the best possible academic grounding and practical experience, setting you up for a fulfilling career. You will use your skills and knowledge to make a crucial difference to a person’s overall quality of life and independence.

ABOUT YOU
Occupational therapy and physiotherapy are challenging yet incredibly rewarding professions. No two days are ever the same and many career opportunities will be open to you after graduation, in a variety of different settings. You will be keen to receive the very best education to ensure that you can offer a high standard of care to your patients. Depending upon which path you choose, you could have a varied career or become a specialist within your chosen area. Whichever route you take, our programmes will help you become a leader within your profession.

To excel as an occupational therapist or physiotherapist, you will need to be highly motivated and a team player; you will also have to work on your own initiative, be adaptable and have a responsible, mature approach. You will need to be emotionally resilient, as you will face challenges along the way. It is also important to have excellent communication skills and the ability to empathise with people of all ages, backgrounds and abilities. With these skills, you will be able to make a real difference to people’s lives.

ABOUT THE COURSES
You will be taught through a varied range of methods, including lectures, seminars, group work and self-directed learning. Through our highly regarded inter-professional and enquiry-based learning approach, you will work through case material as a basis for applying theory and problem-solving, alongside other healthcare and medical professionals. There is a large practical component to these courses, meaning you acquire skills through supervised practice on your fellow students. You will then be able to apply what you have learned and develop further knowledge and skills on placement, under the guidance of your practice educator.

BSc Occupational Therapy
Occupational therapists work closely with people who have an illness, injury or disability to enable them to reach their maximum potential in all aspects of their lives. You will need to consider the physical, psychological, social and environmental needs of the individuals with whom you are working in order to help them develop the skills and confidence to carry out practical and purposeful activities. As an occupational therapist you could be helping a young person with anorexia, or an elderly person with mobility issues. Our course prepares you with the wide range of skills, knowledge and experience you need to have an exciting and rewarding career.

Over the duration of your studies you will learn a wide range of human sciences that contribute to a person’s well-being, covering the physical, social, psychological, spiritual and environmental needs of your patients. In addition, you will learn the theory behind how occupations make us who we are, assessment techniques and the ways that occupational therapists use activity to allow people to develop their identity. The profession is extremely varied and requires a great deal of creative thinking alongside clinical reasoning.

BSc Physiotherapy
Physiotherapists help people affected by injury, illness or disability through movement, exercise, manual therapy, education and advice. As a qualified physiotherapist, you will help people of all ages manage their health, help patients to manage pain and prevent disease. As part of this profession, you will be able to help improve the quality of people’s lives and assist them in maintaining physical independence as much as possible.

Whether you’re interested in musculoskeletal and sports injuries, treating long-term conditions or acquired injuries, our BSc Physiotherapy programme will provide you with the clinical skills and knowledge you need to become a qualified physiotherapist in your chosen field. You will develop skills in the assessment and treatment of a wide range of problems of impairment, activity and participation. You will learn a wide range of human sciences that contribute to a person’s well-being, covering the physical, social and psychological needs of your patient.

MSc Occupational Therapy and MSc Physiotherapy
If you already have a degree in an appropriate subject, our Master’s degrees offer an accelerated route to registration in the fields of occupational therapy or physiotherapy. For more details, email admissions@uea.ac.uk.

WHERE NEXT?
You will graduate ready to begin a career in your chosen field. Our courses are designed to prepare you for the working environment and to develop your skills of leadership, problem-solving and flexibility. Our graduates are known for being capable candidates who are well-prepared for the modern health and social care services. On graduation, you will be eligible to apply for registration with the Health and Care Professions Council and look forward to a lifelong career as a qualified health professional.

After graduation, there will be a number of different roles available to you within the NHS, private sector, voluntary sectors, industry, research and education. The opportunities are endless. We will support you in developing your portfolio and will work closely with you to get your career off to the best start.

ABOUT US
Throughout your course, you will work with university tutors, practising clinicians, clients and their families/carers in a combination of academic study and practice placements. Our innovative approach to student-centred learning encourages you to achieve at the highest level. Our academics are focused on helping you to get the most out of your experience at UEA. We also have a great reputation with our partner NHS Trusts, and are proud that our students graduate with excellent career prospects and good honours.
Study operating department practice at UEA and you could begin a new career with the NHS in just two years. Gain the relevant clinical skills by training with lecturers who are highly experienced in their fields, and get first-hand experience in operating theatres through high-quality placements.

ABOUT YOU
As well as having the relevant academic qualifications you will be excited about a role that is physically and mentally demanding, but highly rewarding. You will be able to show problem-solving, teamwork and cognitive abilities and you’ll aspire to make a difference to patients undergoing surgery.

ABOUT THE COURSE
Dip HE Operating Department Practice
Operating department practitioners work alongside surgeons, anaesthetists and theatre nurses to deliver a vital role in the management and care of patients undergoing surgical procedures.

The course is a two-year Diploma in Higher Education and is approved by the Health and Care Professions Council. You will spend 60% of the course on clinical placement, enabling you to develop competence in patient care, clinical skills and in the use of technology within the operating theatre environment. Over the two years you will gain competence and confidence in all aspects of peri-operative practice. By the time you graduate you will be able to provide evidence-based patient care to a high standard.

WHERE NEXT?
After completing your Dip HE Operating Department Practice you will be ready to work as part of a hospital theatre team, alongside surgeons, anaesthetists and theatre nurses, in the NHS and the private sector.

ABOUT US
As well as face-to-face learning, you will also learn through inter-professional experiences with medical students, nurses, midwives, pharmacists and allied health professionals across a range of programmes. You will benefit from studying with skilled, friendly, practising academics who are supportive and care about helping you achieve your goals.

You will have a dedicated personal adviser on hand to support you through your studies and to help you to reach your potential, regularly reviewing your progress and learning needs.

At UEA you will benefit from our innovative approach to education, cutting-edge facilities and supportive environment. Our students graduate with excellent career prospects – over 99% of students who graduated from the School of Health Sciences went into work or study within six months (HESA DLHE survey 2014/15). Our courses are designed to get you ready for a lifelong career as a key health professional, following registration with the Health and Care Professions Council.

Looking for a rewarding career in a rapidly expanding and exciting field? Our programme offers the best training available to ensure that you graduate fully prepared for this demanding role. Our enthusiastic, experienced and clinically active lecturers will support you to become the very best paramedic you can be.

ABOUT YOU
To excel as a paramedic, you will need to be highly inquisitive, diplomatic and a person-centred individual with an eye for detail and the ability to problem-solve.

ABOUT THE COURSE
BSc Paramedic Science
Paramedics are the first senior healthcare professionals to arrive at an accident or medical emergency, rapidly assessing a patient’s condition and giving essential treatment as required. On this course, you will learn how to swiftly assess a patient’s condition and make important, life-saving decisions.

In your first year, you will establish a firm foundation for paramedic practice, studying modules relating to critical thinking skills, relevant theoretical knowledge in paramedic practice and developing confidence and skills in critical care. You will develop your research awareness, service improvement and teamwork skills as well as spending half of your studies in clinical placements.

Finally, you will develop enhanced clinical assessment and decision-making skills. You will gain proficiency in practice education, leadership and service improvement. Our final-year programme has been carefully designed to prepare you for the transition into practice as an independent registered paramedic.

This course has been developed collaboratively with the East of England Ambulance Service NHS Trust and throughout the three years of your degree you will be able to apply your developing knowledge and skills across a range of placements with the ambulance trust, alongside other clinical and community settings. The course is endorsed by the College of Paramedics and approved by the Health and Care Professions Council.

WHERE NEXT?
You could go on to work in NHS ambulance services, or you may wish to specialise in critical, urgent or primary care or focus on non-clinical settings. You could work in an emergency department, a walk-in centre or a GIP practice, or continue in higher education as a lecturer or as a clinical researcher.

ABOUT US
As well as face-to-face learning, you will learn through inter-professional experiences with medical students, nurses, midwives, pharmacists and allied health professionals across a range of programmes. You will benefit from studying with skilled, friendly, practising academics who are supportive and care about helping you achieve your goals.
BSc Pharmacology and Drug Discovery
UCAS code 8210
A level (typical offer): ABB, including Chemistry and one other Science or Mathematics
International baccaulaurate: 32, including HL Chemistry at 5 and one other Science or Mathematics at 5
Length of course: 3 years

Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/pha/courses

ABOUT YOU
You will have a strong interest in chemistry and you will be excited about a future in the pharmaceutical industry or research.

As with all our courses, we also welcome students with non-traditional qualifications and experience as well as mature students.

ABOUT THE COURSE
BSc Pharmacology and Drug Discovery
Gain the skills you need to make a difference in the world of drug discovery. First you will gain a strong foundation in cell biology, the chemistry of the life sciences, drug delivery, neurophysiology and pharmacology.

Then you will go on to apply your knowledge to individual systems or diseases of the body. These include the nervous, immune, cardiovascular, renal and gastrointestinal systems. In addition, your modules will cover cancer and infectious diseases, and you will learn how drugs are designed and synthesised, about their mechanisms of action, and the process of progressing drugs from the bench to the clinic.

As you develop your skills as a scientist, you will also take a course in business studies at Norwich Business School. This will provide you with an understanding of the world of management and the key concepts of management practice – vital tools to working in today’s competitive, corporate world.

Visiting lecturers from industry will expose you to real-world challenges and topics in the pharmaceutical industry, helping you to prepare for tomorrow’s jobs market.

In the final year you will exploit your knowledge from the first two years and undertake a final-year project in collaboration with a faculty member active in pharmacological and drug research. This could include tackling current challenges in cancer, infectious diseases, age-related disorders, epigenetics, drug design or drug delivery.

In addition to the final research project, you will have the opportunity to select from advanced modules covering a broad range of topics in biology, drug discovery and pharmacology. You will discover how toxicology and quality control of drugs are performed. Finally, in collaboration with Norwich Business School, you will take a course in project management.

WHERE NEXT?
You will graduate with the skills and knowledge required to work in pharmacology or drug design and development. We ensure that employability is embedded throughout your course, as you acquire both research and business skills. You will benefit from a range of careers workshops and events to help you build your CV and gain interview and presentation skills. You will also gain experience in teamworking and get opportunities to build beneficial links with industry.

ABOUT US
The School of Pharmacy is renowned for the exceptional quality of its research: our research environment was rated 100% world-leading or internationally excellent in the 2014 Research Excellence Framework. Our research in pharmacology and drug discovery focuses on age-related diseases including cancer, cardiovascular disease, inflammatory diseases, ocular diseases and neurodegenerative disorders. This research feeds into our teaching, ensuring you are always informed of the latest developments in the field.
Graduate ready for professional pharmacy practice from one of the most consistently high-ranked pharmacy schools in the National Student Survey. Be part of a pioneering department in innovative teaching methods in pharmacy education. Whether it’s for a career in community, hospital or industrial pharmacy, our graduates are highly successful in securing pre-registration training in some of the most sought-after locations in the UK.

ABOUT YOU
You will have an interest in channelling your love of science into a rewarding healthcare career. You will be working towards the academic entry requirements and share the values of the National Health Service. For all our pharmacy courses you will be required to undertake an enhanced Disclosure and Barring Service screening during your course.

For our Pharmacy with a Foundation Year course, you may be a pharmacy technician holding NVQ level 3 qualifications. You may not have studied science previously or you may have had disadvantages in your secondary education. All applicants for this course are considered on a case-by-case basis and all candidates will be interviewed before being offered a place on the course.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
You will benefit from a range of teaching and assessment methods to prepare you for practice as both a scientist and a practitioner. These include problem-based learning, portfolio-based assessment and practical examinations to assess your ability to practise as a pharmacist.

MPharm Pharmacy
During this integrated course you will develop your skills in chemistry and biology and learn how these are applied to drug design, drug delivery, pharmacology and medicines management with support from leading researchers and practitioners.

To prepare you for multi-professional practice you will also be given a number of opportunities to learn with students from across the medical, nursing and healthcare professions. Throughout the course, you will undertake placements in community and hospital settings.

In your final year you will have the opportunity to work alongside prison-based pharmacists, armed forces pharmacists and senior pharmacy managers. You will also carry out a research project, giving you the chance to gain a greater insight into a specialist subject area. This can also be undertaken at an English-speaking laboratory in a European university: we currently have arrangements with pharmacy schools in Germany, France, Spain and Norway.

MPharm Pharmacy with Placement
Enhance your studies with two integrated six-month periods of pre-registration placement training, one at the beginning of your fourth year and the other at the end of your fifth year. This means you can register as a UK pharmacist as soon as you graduate. This course is particularly suited to international students because you can qualify and register as a pharmacist under a single student visa. The course requires full fees for five years and placements are unsalaried.

Pharmacy with a Foundation Year
Gain the skills and knowledge you need to progress to a pharmacy degree. During your foundation year you will study biology and chemistry, and a specialised Introduction to Pharmacy Skills module. In your first semester you will also study a mathematics module, which will be tailored to your previous experience.

You will be assigned an adviser from the School of Pharmacy who will guide you through your course to aid your progression onto the MPharm Pharmacy degree.

WHERE NEXT?
After completing your MPharm degree you can undertake a 12-month structured pre-registration training period, leading to registration as a pharmacist by the General Pharmaceutical Council. If you take the five-year MPharm Pharmacy with Placement option, you can register as soon as you graduate.

As a pharmacy graduate, you will benefit from excellent career prospects both regionally and nationally. You could go on to work in community practices, hospital pharmacies, primary care or the pharmaceutical industry.

The latest Guardian University Guide 2017 shows that 99% of our students go on to graduate-level jobs or further study within six months of graduation. The School of Pharmacy collaborates with UEA’s Careers Service to offer you support at every stage of your course, from choosing a career through to applying for graduate jobs.

ABOUT US
The School of Pharmacy at UEA was founded by a group of leading pharmacists who wanted to change the way the subject is taught. What resulted is an innovative degree programme that produces graduates with a wealth of real-world experience and has inspired widespread change in pharmacy education.

At UEA we were the first to emphasise professional experience from the first year. We were also the first department to introduce innovative teaching methods such as problem-based learning and to provide extensive careers support. You will be taught by a dedicated team of academic staff and registered practising pharmacists. We are not only pioneers of pharmacy education, we are also at the forefront of pharmacy research. We ranked first for research output among all UK pharmacy schools in the Research Excellence Framework 2014, with 87% of our research deemed world-leading or internationally excellent.
Study philosophy in a vibrant community of teaching and research staff, graduate students and undergraduates. Explore the great questions of life, such as those concerning values, mind, God and the universe.

ABOUT YOU
You are a bright and interested student with an independent mind. You do not need to have studied philosophy before. We welcome students with non-traditional qualifications and experience, including mature students. All philosophy students are offered the valuable opportunity to study a modern language alongside their degree.

ABOUT THE COURSES
Philosophy thrives on discussion. That is why as well as lectures and your own study, you will have the opportunity to debate issues with your lecturers in seminars, workshops and tutorial groups. We use a variety of types of written work and exercises both in teaching and assessment.

BA Philosophy
This course puts you into a dialogue with the great thinkers of the past and present, allowing you to engage with cutting-edge research on questions that go to the heart of human life and understanding of the world. In your first year you will study topics such as philosophical problems; philosophy and other subjects; classic readings in philosophy; reasoning and logic; modern readings in philosophy; and great books. In your second and third years you will be able to tailor your degree to your interests, choosing from a broad selection of specialist topics, from ancient philosophy, to Nietzsche and nihilism, to environmental philosophy. In your final year you also have the opportunity to complete a dissertation on a topic of your choosing, supervised by a member of faculty.

BA Philosophy and History
By combining the study of philosophy and history you will gain a unique perspective on the world-changing ideas of thinkers from the past and what those thinkers themselves had to say about the importance and value of history. In your first year you will study topics such as classic readings in philosophy; great books; modern readings in philosophy; introduction to Medieval history; and introduction to early modern studies. In your second and third years you will tailor your degree to your interests by choosing your own modules from history and philosophy. You might study moral philosophy alongside the history of human rights, and in your final year you will have the opportunity to write a dissertation on a topic of your choosing, with the guidance of a faculty member.

BA Philosophy and Politics
The study of philosophy and politics has been closely intertwined ever since the days of the ancient Greeks. On this course you will address issues such as the philosophical underpinnings of democracy, the ethics of world politics, and the philosophical basis of utopian political systems. First-year topics include classic readings in philosophy; great books; introduction to contemporary politics; modern readings in philosophy; and social and political theory. As your degree progresses you can tailor it to your interests by choosing modules from across philosophy and politics. You will study political science, and choose from a broad range of modules, on topics such as philosophy of mind, environmental philosophy, democracy and the global political economy. In your final year you will take more advanced modules on specialist subject areas of your choosing, and will have the opportunity to complete a dissertation, researching a topic of your choosing in depth.

This programme includes historical reflection, exploring questions that earlier philosophers have raised and testing the value of their answers. You will also examine cutting-edge work on the questions and theories that are live in philosophy and politics today.

BA English Literature and Philosophy
Again and again, creative writers and philosophers consider the same questions in different ways. This is what makes the combination of English literature and philosophy so fruitful in the attempt to understand ethical and political life, God and the universe, or the nature of thinking and writing themselves. In your first year you will study topics including classic readings in philosophy; modern readings in philosophy; literature in history; reading texts; and either great books or reasoning and logic. In your second and third years you will tailor your degree to your interests by choosing your own modules. The second-year module Literature and Philosophy will bring the two sides of your course together; meanwhile you will choose core literature modules from a list of classic topics, and study theoretical subjects like critical theory or aesthetics. In your final year you will select advanced modules on specialist topics, and will also have the chance to write a dissertation, exploring a subject of your choice in depth.

BA Philosophy with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the degree programme in Philosophy following successful completion of the foundation year. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. Your modules are taught via lectures, presentations, seminars and study groups, and incorporate a variety of assessment methods to prepare you for the different types of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as essay writing, research, preparing and giving presentations, and understanding and evaluating scholarly arguments.

STUDY ABROAD
Whichever of our courses you choose, you will have the chance to spend a semester abroad studying at one of our partner universities. For more information see page 21.

WHERE NEXT?
Through the study of philosophy you will develop many key transferable skills. You will learn how to solve problems, present rigorous arguments, analyse texts and evidence, and make informed judgements. Such skills are highly regarded by employers, opening the door to a wide range of occupations. These include politics, journalism and marketing. Or you might decide, after further study, to go into law, teaching or academic research. Philosophy graduates also make good business leaders because they are well equipped to navigate this increasingly complex world, tackling ethical issues and existential questions. Others are drawn to computer programming, due to their grasp of logic and reasoning.

We will support you in finding the right career direction for you with an annual event that brings together many of our successful alumni; here you can hear about their career paths since leaving university and benefit from their insights and experience.

ABOUT US
Our lecturers are engaged in research in a range of topical areas of philosophy. These include philosophy and literature; ethics; environmental philosophy; philosophy of mind and language; and cutting-edge work at the intersection between philosophy and empirical sciences such as psychology, linguistics and economics. We research a range of periods in the history of philosophy, such as classical philosophy, early modern philosophy, and 20th century philosophy both in the analytic and continental traditions, notably the work of Ludwig Wittgenstein. You will develop working relationships with our research-active staff, whose books and articles are read in universities the world over.

“My tutors are top class in their fields, constantly working on their own studies as well as our education, which means the subject never becomes stagnated as it is constantly developing.”

– Louis Preston, Philosophy and History Graduate
Physical Education

BA Physical Education
UCAS code XC16
BA Physical Education with a Year Abroad
UCAS code XC1A

A level (typical offer): ABB, excluding General Studies
International baccalaureate: 32
Special requirements: GCSE English, Mathematics and a Science at grade C or 4 or above.
Length of course: XC16 (3 years) XC1A (4 years)

Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/edu/courses

STUDY ABROAD
Enhance your studies by spending a year abroad. You will spend your third year abroad at one of our partner universities before returning to UEA for your final year. While you are away you will be encouraged to take modules that relate to your personal interests and future career goals. These may be in physical education or related disciplines. A year abroad is unique, fulfilling experience that will help you develop skills coveted by employers. We have more than 160 partner universities around the world. For more information see page 21.

WHERE NEXT?
You could go on to work in teaching, physical activity and health agencies, the health and fitness industry, sports clubs and for local council recreation departments. This degree will also provide you with the skills and knowledge needed to apply for a PGCE in primary or secondary-school physical education teaching. Alternatively, like many of our graduates, you might decide to continue your studies and undertake other postgraduate courses. These include Master’s degrees covering topics such as physiotherapy, nutrition, sports coaching and performance analysis and business management.

About you
You will be passionate about sport and health and excited by the prospect of a career in physical education, sport, physical activity or in the health sector.
You will be working towards three A levels or alternative equivalent qualifications such as the International Baccalaureate. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

Due to the nature of this degree, you will be required to undertake an Enhanced Disclosure and Barring Service screening.

About the course
BA Physical Education
Study the policy, practice, participation and promotion of physical education, physical activity and sport, both within and beyond the core curriculum. This is a multidisciplinary programme that integrates theory, research and practice. You will be able to tailor your course to your interests, ensuring you graduate ready for a range of careers and postgraduate study opportunities.
We have a high ratio of academic staff to students, and throughout your studies you will benefit from our small-group teaching, which is designed to encourage interaction between lecturers and students. You will be supported by our experienced staff, renowned for their excellence in teaching and research.
You will also be able to gain hands-on experience, applying all you have learned and acquiring additional practical skills. You will spend much of your time in the Sportspark, one of the finest sports complexes in Britain, boasting world-class facilities right here on UEA’s campus.
Core modules will enhance your understanding of physical education and sport research and the factors that influence individuals within physical education, sport and physical activity settings. You can then explore and appraise more complex issues across a range of disciplines, thanks to our flexible module options. You can tailor your choices to suit your interests and career aspirations, whether they are in teaching, coaching, sport development or physical activity and health.

In your final year you will complete a dissertation under the supervision of a research-active member of staff.

About us
The School of Education and Lifelong Learning boasts an active research community. Our teaching is research-led and you will learn from lecturers who are members of the Sport, Health and Education research group. Our expertise focuses on policy and practice-related issues such as motivation, educational transitions, inclusion, pupil voice, health and curriculum development.
UEA is ranked within the UK top 15 in The Times and Sunday Times Good University Guide 2017, and the School of Education and Lifelong Learning is one of the country’s premier centres for teaching and research in professional education and training.

UEA’s Sportspark has some of the best facilities in the country and is the envy of many other universities.

“This course is delivered by an inspiring and supportive department. Students are encouraged to grow academically and professionally. Through a mix of stimulating lectures and motivating practical sessions, I acquired valuable skills such as communication and organisation. More importantly, I grew in confidence and was able to shape my future career.”

– Lucy Rogerson, teacher of Physical Education and a Special Educational Needs and Disabilities Coordinator
We are in a new ‘golden age’ of physics. There has never been a more exciting time to study the subject, or a better reason to study at a university at the cutting-edge of physics teaching and research.

ABOUT YOU
You have a strong desire to extend your background in mathematics and physics to solve some of today’s toughest questions. We welcome students with non-traditional qualifications and experience, including mature students, with the required level of physics and mathematics knowledge. To find out how you will thrive here, we invite all suitably qualified applicants to one of our Applicant Days, for a tour of the campus and our laboratories and to meet staff and students.

ABOUT THE COURSES
BSc Physics
You will study a range of compulsory and optional modules throughout your three years on this course. This will provide you with a solid grounding in the fundamentals of physics while also equipping you with the tools and knowledge to apply these principles, with the freedom to tailor the course to suit your particular interests and goals.

In your first year you will gain the foundation needed to excel at degree-level, developing your knowledge in physics topics and mathematics, while also being introduced to interdisciplinary topics such as acoustics, astrophysics, mechanics and geophysics.

In your second year you will focus on studying intermediate physics topics, laboratory skills, quantum mechanics, and mathematics. You will also be able to choose from a range of optional modules, according to your own interests. These include topics such as Electronics, Renewable Energy, Geophysics, Oceanography, Meteorology and Special Relativity. These modules build your knowledge and skills and prepare you for the advanced, specialist study of the third year.

The final year is relished by our students, as you will get the opportunity to undertake your own unique research project. This allows you to explore the theories and practical proficiencies you have developed through the first two years of study. You will also study compulsory modules in advanced physics and laboratory skills, and choose optional modules such as Electricity and Magnetism, Fluid Dynamics and Climate Systems.

BSc Physics (with Education) to be confirmed
This degree programme is an opportunity for you to study physics, whilst preparing for a rewarding career in teaching. As well as the core modules outlined in the BSc Physics, you will also undertake two compulsory teaching practice modules, which will include a guaranteed school placement at the end of your first year. You will receive additional teaching experience through fortnightly classroom observation placements, as well as in seminars and workshops delivered by our School of Education and Lifelong Learning – one of the top teacher training institutions in England, with more than 30 years’ experience. During your time on the course you will also have the opportunity to undertake other education modules. This exposure to education and the understanding you will gain in a great position to progress to the UEA PGCE (Initial Teacher Training) course when you graduate.

MPhys Physics
Our flagship physics degree offers you the opportunity to complete an integrated Master’s course. This programme is ideal if you are looking for a future in research or academia, as after completion you will be in an excellent position to go on to PhD study.

This programme has similarities with the three-year BSc, but takes your knowledge and understanding a step further during the final two years, as you select from a greater range of advanced optional modules.

Your third year allows you to hone your skills and understanding in compulsory topics such as advanced laboratory skills, as well as to conduct an independent research project. This project allows you to explore and put into practice the theories and practical proficiencies you have developed. Optional modules on offer include Electricity and Magnetism, Science Communications and Climate Systems. Your final year provides you with a fantastic opportunity to carry out an independent research project at Master’s level in an area that interests you. This is undertaken alongside the taught module Advanced Topics in Physics, as well as several optional advanced modules, including Modern Embedded Technology, Quantum Fluids, a Geosciences Field Course and Dynamical Meteorology.

Physics with a Foundation Year
If you don’t yet meet the academic requirements for our other courses, this programme could be for you. On this course you will gain the skills and knowledge you need to progress to degree level study.

WHERE NEXT?
You will graduate with vast opportunities, ranging from academic or research careers to roles in sectors as diverse as nanotechnology, energy, space research, engineering, telecommunications, education, defence, data science, science journalism, finance, medicine and government agencies.

Through your studies you will learn to apply your knowledge by solving problems that impact on all areas of society, from healthcare to digital communications, and from energy solutions to the climate.

We work with UEA’s Careers Service to offer you support at every stage of the course, from choosing a career through to applying for graduate jobs.

ABOUT US
Our programmes draw on our considerable and long-standing history of teaching physics, as well as our research expertise in areas including fluid mechanics, atmospheric physics and climate, chemical physics, oscillations and waves, astrophysics, quantum physics and oceanography.

Our degrees have been granted recognition status by the Institute of Physics; this recognises degrees that are too new to meet all the criteria for accreditation, but satisfy the majority of criteria and contain the appropriate level of core physics content.
Politics is in the fabric of all modern life. At UEA, you can study politics as a single subject, or jointly with media, philosophy or international relations. Whatever you decide, you will have opportunities for travel and placements abroad.

ABOUT YOU
You will be working towards achieving ABB at A level (or equivalent), though this doesn’t necessarily need to include Politics. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students. If you don’t meet the entry requirements, you may wish to apply for BA Politics with a Foundation Year, which will give you all the skills needed to go on to study at degree level. All politics students are offered the opportunity to study a modern language.

ABOUT THE COURSES
Our politics programmes offer a broad introduction to the subject in the first year. You are then able to choose from a wide range of specialist options in your second and final years. This allows you to tailor your degree to your interests and career ambitions.

All of our teaching is research-led. We ask the same questions of our students as we do in our research. This means your teaching is at the cutting-edge of the discipline. Because politics is closely linked with other subjects at the University, much of this work combines the approaches and insights of different disciplines to produce distinct and innovative programmes.

You will learn through lectures, small-group seminars and tutorials. We use a range of teaching methods, including case studies, group work, simulation exercises, debates and more. In your third year you have the opportunity to write a dissertation on an area of your choosing. You will have the chance to improve your skills through work placements, internships, networking masterclasses and work shadowing arrangements in the UK and continental Europe.

BA Politics
Learn from active researchers and practitioners in local and national government, across your choice of a wide range of options. These include the study of political ideas and theories, and national and international political processes and institutions. We also offer options on the politics of Britain, the United States, sub-Saharan Africa, the Middle East and other European countries; on international relations and the EU; on democracy, political ideology and the history of political thought; on mass media, political culture and identity; and popular culture.

In your final year you can apply for one of a number of European and Parliamentary Research Placements, where you will have the chance to research a project for an MP. Alternatively you can do your own research. You’ll also choose some of our more specialised options, which range from the study of rhetoric and political communication to the challenges posed by terrorism and counter-terrorism.

BA Politics with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the degree programme in politics following successful completion of the foundation year. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. Your modules are taught via lectures, presentations, seminars and study groups, and incorporate a variety of assessment methods to prepare you for the different types of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as essay writing, research, preparing and giving presentations, and understanding and evaluating scholarly arguments.

BA Politics and Media Studies
Learn to understand the role of the media in national and international politics. On this innovative course you will study core elements of political science and media studies and have the chance to develop skills in journalism, media production and research methods.

You will learn to investigate and debate the power and influence of both the traditional mass media and new forms of communication. You can explore how media help to inspire social protest and organise social control. You will also cultivate key media skills through a wide range of optional modules, including new media and society, and media and identity.

In your final year you also have the chance to apply for a limited number of work placements and internships. These include the opportunity to work in continental Europe, or local or national government, to carry out a research project for a think tank or Member of Parliament, or to undertake work shadowing and short placements in the media industry.

STUDY ABROAD
Whichever of our courses you choose, you will have the chance to spend a semester abroad studying at one of our partner universities. For more information see page 21.

“Studying politics at UEA was fantastic. The way the course is structured means that you have the flexibility to focus on your particular interests, whilst also being able to experiment with other areas. UEA’s Parliamentary Internship gives the course an extra dimension, and this was something that appealed to me from the very start.”

Jyoti Bohjani, BA Politics Graduate, previously worked in Parliament for former Prime Minister Gordon Brown and is now working for the Labour Group at Greater London Author
WHERE NEXT?

Many of our graduates go on to work in politics and public service, but your politics degree will provide you with transferable skills that are relevant in a wide variety of professions. Recent graduates have gone on to careers in journalism, accountancy, management, advertising and teaching.

To help get your career off to the best start, we will help you to gain experience through work placements, internships and work shadowing arrangements in the UK and continental Europe. Our Careers Service also organises a programme of popular and useful events, such as Working in Politics and Government, Working in Charities and NGOs, and Working in Westminster and Whitehall. Here you can meet successful graduates and benefit from their first-hand experience and advice. These events are also a chance to make valuable contacts.

ABOUT US

You will be taught by lecturers who are active in their fields and close to all new developments locally, nationally and internationally.

Our research focuses on social and political theory, international relations, policy-making, European politics, British politics and governance, and the politics of media and culture. We also research religion and politics, security and terrorism, global cities, celebrity politics, new forms of political activism, political rhetoric, migration, hate speech, electoral systems and South African politics.

According to the Research Excellence Framework, 70% of our research in politics and international relations was rated world-leading or internationally excellent (REF2014).

Take advantage of a range of exciting internship programmes in the UK and overseas, including our parliamentary research placements, which give you hands-on experience of the policy process and parliamentary life by working with an MP on an area of research in which you have a shared interest. Benefit too from our career enhancing Working in Politics and Government day.
The School of Psychology has an outstanding reputation for research and high-quality teaching. Study with us and you will benefit from a range of innovative and dynamic teaching approaches. Whether you have a broad or specific interest within the field of psychology, our range of degree programmes and research-led teaching offers a robust psychological perspective to inspire you.

ABOUT YOU
As well as having the right academic qualifications you will be able to demonstrate your passion and interest in psychology through your reference and personal statement.

As with all our courses we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

BSc Psychology
This robust psychology programme is fully accredited by the British Psychological Society and enriched by interdisciplinary influences. You will learn to understand human behaviour as the result of an interaction between nature and nurture, biology and culture, genes and the environment. You will explore a range of theoretical ideas and research evidence from core specialist areas, including developmental psychology, social psychology, cognitive psychology, biological psychology, neuroscience, psychological psychology and personality psychology.

Your course will bridge conventional disciplinary boundaries, taking theories from the behavioural and social sciences and using them to throw light on real-world, practical situations.

You will learn about both qualitative and quantitative approaches, from discourse analysis and quasi-experimental questionnaire design through to neuroimaging techniques. You will enjoy access to our state-of-the-art laboratory facilities, including a fully-immersive virtual reality suite, electroencephalography (EEG), eye-tracking and motion-tracking equipment.

In your final year you will have the opportunity to demonstrate all you have learned by designing and implementing an individual research project in areas of your interest.

BSc Social Psychology
This programme, fully accredited by the British Psychological Society, allows you to focus on topics related to social psychology. These include forensic psychology, substance use, family life and societal prejudice.

Throughout your degree you will study a range of theoretical ideas and develop expert research skills. In your final year you will also design and implement an individual research project, related to a social psychological topic. Past students have chosen areas such as substance/alcohol use, implicit cognition, conspiracy theories, stereotyping and prejudice, and perceptions of ex-offenders.

This course is ideal for students interested in business, entrepreneurship or the healthcare sector. It is also an excellent choice if you plan to go on to postgraduate study in social psychology, forensic psychology, clinical psychology, or marketing and management.

BSc Cognitive Psychology
On this British Psychological Society-accredited course you will gain a strong grounding in key theories and research methods of cognitive psychology. You will also have the chance to study Psychology and Risk; Psychology of Language, Mind, Brain and Personality; Brain and Behaviour; and Social and Affective Neuroscience. Advanced option topics will cover areas such as neuroscience, biological psychology, linguistics, and Functional Magnetic Resonance Imaging (fMRI) and EEG research techniques.

In your final year, you will design and implement an individual research project which is related to cognitive psychology. Past students have researched areas such as autism, face perception, visual perception and attention, and brain activity in relation to social and non-social stimuli.

This course is ideal if you are interested in a career in data science, mental and physical rehabilitation, neuroscience, clinical psychology or computer science. It will also provide you with a firm base for further postgraduate study in cognitive psychology, if you choose that path.

BSc Developmental Psychology
Accredited by the British Psychological Society, this degree combines a strong core of psychology with developmental perspectives on cognition and behaviour.

Like our other programmes, the degree is underpinned by teaching in core psychology areas. Through advanced optional choices which focus on how children develop both cognitively and socially, the BSc Developmental Psychology allows you to focus on the developmental science subfield of psychology.

We place an emphasis on the exploration of normative and atypical cognitive development, meaning you'll cover issues such as autism spectrum disorder, ADHD, Williams Syndrome, giftedness and developmental psychopathology.

This course is ideal if you are interested in a career in areas such as child and adolescent psychology, educational psychology, teaching, child health and welfare, and parenting and family support services. The theoretical and research components of the degree will also give you a strong foundation for progressing to postgraduate study in developmental science.
MSci Applied Psychology with Low Intensity CBT to be confirmed

This programme offers a core psychology undergraduate experience alongside additional training that will enable you to work as a Psychological Wellbeing Practitioner (PWP). You will study a range of theoretical ideas and develop expert research skills. In the third year you will carry out an empirical project oriented around mental health. Placement in a clinical environment is a key aspect of your fourth year experience.

STUDY ABROAD

Enhance your studies by spending a year abroad. All of our psychology degrees have a variant that includes spending your third year abroad before returning to UEA for your final year.

While you’re away you will be encouraged to take modules that relate to your personal interests and career goals. These might be in psychology or in other disciplines. A year abroad is a unique, fulfilling experience that will help you develop skills coveted by employers.

You can choose from a host of partner universities in Europe, North America and Australasia, including the University of California; University of Notre Dame; University of Hawaii at Manoa; Temple University and Vrije University Amsterdam. For more information see page 21.

YEAR IN INDUSTRY to be confirmed

In addition to the opportunities we offer to undertake paid internships and other work experience, you may also opt to spend your third year in industry before returning to UEA to complete your final year. During your year in industry you will gain valuable work experience in a field closely related to your degree.

WHERE NEXT?

Graduate with the skills, knowledge and confidence you need for a range of psychology-focused careers, such as educational psychology and clinical psychology, human resources, teaching, media, communications, marketing and management, healthcare, criminal justice and social welfare. The theoretical and research components of your degree will also provide you with a strong foundation for going on to postgraduate study, if you wish.

Psychology as a discipline provides training in a range of key skills that are highly prized by employers today. We have an excellent employment record: more than 96% of our graduates were in work or further study after six months (DLHE return of 2014/15 leavers).

Employability skills and entrepreneurial training are embedded in both our curriculum and our extra-curricular activities. Throughout your degree you will meet and work with respected psychologists and business leaders in a variety of settings.

You will also benefit from a range of additional training opportunities running in parallel with your degree programme. These are carefully designed to help maximise what you have to offer future employers. They include paid placement and internship opportunities, a business training residential event, and a range of career planning support mechanisms.

All our degree courses are accredited by the British Psychological Society (BPS). This not only means they are respected by employers – it will also put you at an advantage if you choose to progress onto postgraduate study in order to become a psychologist.

ABOUT US

Our teaching is research-led, allowing you to share in the creative excitement of scientific discovery. You will be taught by researchers who lead their fields, working in areas such as cognitive and social neuroscience, attachment and relationships, cognitive development, developmental psychopathology, addiction, language disorders, perception and action, mental health, social identity, social groups and behavioural change.

In the latest Research Excellence Framework, 100% of our research was rated to be of international quality, with more than 80% judged to be world-leading or internationally excellent (REF2014).
Train for a rewarding career in social work. Social work education at UEA has long been very highly regarded.

Our Social Work degree is accredited by the Health and Care Professions Council (HCPC). On completion of the degree you will be eligible to apply to register as a social worker with the HCPC.

ABOUT YOU
Your interpersonal skills will be as important as your educational background. Your application should reflect your potential in both these areas. We encourage you to gain practical experience to support your application. This could be voluntary or paid work and could include work in schools, or residential or home care. It could be other work with children, families or vulnerable adults who need additional help or support.

You will be required to undertake an Enhanced Disclosure and Barring Service screening, provide two satisfactory references and tell us about any major health issues that might affect your study to become a social worker. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSE
BA Social Work
Social workers support the most vulnerable members of our society, helping them to overcome the challenges they face and achieve their full potential. As a social worker you need to be skilled at building positive relationships with a wide range of children, adults and their families in the community. You will be an active advocate for the people you work with, but you will also help people take control of their own lives, often in difficult circumstances. Social work is intellectually, ethically and personally challenging.

Our programme is designed to help you develop your skills in all these areas. It is both academically rigorous and supportive. It will ensure you graduate ready to face the challenges your future career will bring.

Throughout the course you will have the opportunity to immerse yourself in social work theory, research, policy and practice. Our aim is that you understand the social policy and legal context of social work, especially regarding children and families, mental health, disability and older people. Through your studies and through social work placements you will develop skills in working with individuals, families, social work teams and other professionals.

Your learning will focus on strengthening the links between theory and practice, working with service users and refining skills for effective intervention in people’s lives.

Your modules will include Early Childhood Development and Child Observation; Social Sciences for Social Work; Social Work Practice; Working with Diversity; Human Growth and Behaviour; Social Work Law; Social Work Skills; Social Work with Children and Families; Social Work with Adults; Social Work and Mental Health; and Social Work and Disability.

In your first year you will undertake a short shadowing placement, followed by substantial practice placements in your second and third years. In your final year you will undertake a dissertation on a topic of special interest to you and sit your final exam.

You will graduate as a highly trained professional, equipped with the knowledge and skills to become a confident and competent social worker. The demands are high but so is the satisfaction of knowing that your knowledge and skills are being used to the full in the interests of other people and the community.

WHERE NEXT?
You will graduate with excellent employment prospects. Throughout your degree we will focus on preparing you for your future career, and in your final year you will be supported in finding employment as a qualified social worker. Our most recent figures show that 100% of our graduates are in work or further study within six months of graduation. Many of our graduates take up posts in local authorities, working with children and families, young offenders or adult services. Others go on to work with voluntary or independent organisations who, for example, provide foster care placements, family support or specialist services to people with disabilities or mental health difficulties.

Throughout your career you can expect to work with a wide range of other professionals, including teachers, health visitors, the police, doctors, psychiatrists and community nurses.

ABOUT US
Many of your lecturers will be actively involved in research. All are experienced social workers. They share and use their experience and knowledge in their teaching and tutorial roles. All staff are members of our internationally renowned Centre for Research on Children and Families. Current research topics of department staff include adoption, fostering and residential care; child protection; children’s participation; court proceedings involving children; youth offending; and child sexual exploitation.

The results of the Research Excellence Framework rank UEA’s School of Social Work fourth in the country for overall research, with 90% of our research judged to be world-leading or internationally excellent (REF2014). The School of Social Work has an international reputation as one of the top centres of social work education and research in the UK. We are ranked in the top five social work departments in the UK (Times Good University Guide 2017) and ranked first for social work learning resources in the National Student Survey 2016.
Study speech and language therapy at UEA and become a highly competent therapist within three years. You will benefit from excellent clinical placements and dedicated academic staff who will ensure your knowledge and skills reflect the latest developments in theory and practice.

ABOUT YOU
You are an empathetic and resilient person who is able to cope with a fast-moving course and work with clients whose personal circumstances and emotional needs may be complex. You will be a skilled communicator, a flexible learner and have an understanding of the professional values required in the field. Importantly, you are also motivated to make a difference in people’s lives and wish to make a real contribution to the profession.

ABOUT THE COURSE
BSc Speech and Language Therapy
Study speech and language therapy (SLT) and learn how to make an impact on the estimated 2.5 million people in the UK who have a variety of needs in relation to speech, language, communication and/or swallowing. Speech and language therapy aims to maximise people’s communication potential and improve their quality of life. Working in an inter-professional environment, qualified SLTs assess, diagnose and provide intervention to people of all ages who have these kinds of difficulties.

Our three-year course was the first speech and language therapy degree in the UK to fully integrate the clinical and theoretical aspects of the discipline through a problem-based learning curriculum. This means that all the teaching you receive on this course reflects up-to-date, real-world practice, ensuring you graduate with all the skills necessary to begin your career as a therapist.

In line with the wider profession, we promote evidence-based practice throughout your three years of study. You will study a wide range of core subjects and learn to apply this knowledge in clinical practice. You will start as a ‘Conversation Partner’ in the first year, learning about your own communication skills. In your second year you will move to the role of ‘Therapy Facilitator’, as you begin to apply your knowledge and skills in planning intervention. In your final year you will move into the pre-registration phase and take increasing responsibility for working with clients.

WHERE NEXT?
From your first day onwards, your skills will be developed through real-world problem-solving, clinical experience and academic achievement, with the needs of specific client groups in mind. The course is highly intensive and ensures you graduate with the skills, confidence and knowledge you need to start a long and rewarding career.

ABOUT US
We offer a variety of innovative teaching methods, including lectures, seminars, practical sessions, workshops and independent study, and use a problem-based learning approach so that you’re fully prepared to enter your new profession when you graduate. You will have the opportunity to enrich your learning experience further by attending masterclasses from visiting professionals and service users. We also offer eight-week block placements, which allow you to fully immerse yourself in the clinical environment. Our specialist facilities include a dedicated Communications Laboratory – video and sound files are used extensively in phonetics as well as in speech and language therapy sessions.

BY AIR
Norwich International Airport has regular flights to and from Aberdeen, Edinburgh, Manchester and Exeter, and international connections to 200 cities worldwide through regular direct flights to and from Schiphol Airport in Amsterdam. The easiest way to reach the University from the airport is by taxi.

Flight enquiries:
+44 (0) 1603 411923
www.norwichairport.co.uk

BY BUS AND COACH
National Express coaches run from all major cities in Great Britain to the Surrey Street Bus Station in the city centre. They also run from the UEA campus to Heathrow, Stansted and Gatwick airports. Buses 25 and 26 run regularly from Castle Meadow in the city centre to the University campus. We are also served by Megabus who operate a regular service to London.

BY TRAIN
Norwich is less than two hours from London by train and there is an InterCity link with the Midlands, the north of England and Scotland via Peterborough. Trains run from London Liverpool Street approximately every half an hour. You can reach the University from the station by taxi, which takes approximately 15 minutes. There are regular buses direct to the University from the station forecourt – numbers 25 and 26.

Rail enquiries:
+44 (0) 345 748 4950

**DISCLAIMER**
We have taken great care in compiling the information contained in this prospectus, which we believe to be accurate at the time of going to press. However, the provision of courses, facilities and other arrangements described in the prospectus are regularly reviewed and may, with good reason, be subject to change without notice. We recommend that you check the University’s website www.uea.ac.uk before making an application for the most up-to-date information. Applicants for undergraduate programmes will be notified immediately of any material changes likely to have a bearing on their application, such as cancellation of, or major modification to, degree programmes or modules offered; changes to the delivery or location of courses, changes to accommodation provision, changes to entry requirements; or changes to fees and charges to be levied by the University.

Should industrial action or other circumstances beyond the control of the University occur, and this interferes with the University’s ability to deliver programmes or other services in accordance with the descriptions provided, the University will use all reasonable endeavours to minimise disruption as far as is practicable to do so. Provided the University complies with its obligations set out above, it shall not be liable to students or applicants, for any loss, costs, charges or expenses arising out of the information set out in this prospectus, changes to that information or any disruption or interference of the type described above.

The University of East Anglia operates an Equal Opportunities admissions policy. It aims to ensure that no applicant will receive less favourable treatment on the grounds of sex, age, marital status, race, colour, nationality, ethnic origin, sexual orientation, or political or religious belief.

The University welcomes applications from candidates with disabilities.

Information contained in this prospectus may also be made available in other formats, to ensure access for everyone. Please call +44 (0) 1603 593753 to discuss.

**ETHICAL INVESTMENT POLICY**
The University of East Anglia operates an Ethical Investment Policy.
