Sorting and Sequencing

Chronology: Putting things in time order

Sort the information in the 24 boxes into categories (different sorts of information) and then make a guess as to the order in time that they happened or were invented. Put the ones that came first (furthest from the present day) at the top of the box, and the most recent (nearest the present day) at the bottom. Think of a name for each "category" or sort of information.

Atomic	Queen	The Tank	Throwing	Romans	1066 A.D.
Bomb	Victoria on		stones	invade	
	the throne			Britain	
Horse and	1837 A.D.	1914 A.D.	Canal Boat	Motor Car	Rifle
Cart					
1992 A.D.	55 B.C.	Sword	John	Battle of	World War
			Major is	Hastings	One starts
			Prime		
			Minister		
Great Fire	Railways	Aeroplanes	Space	Machine	1666 A.D.
of London			shuttle	Gun
