MUMMIES, ROBOTS, YOUTUBE, ALIENS, ANTS, DUATHLONS
WHAT COULD YOUR UEA BE ABOUT?

University of East Anglia
WELCOME TO UEA.

WE ARE A PIONEERING BRITISH UNIVERSITY.

WE LEAD THE WAY IN FIELDS AS DIVERSE AS CLIMATE CHANGE, SOCIAL WORK, CREATIVE WRITING, INTERNATIONAL DEVELOPMENT, FOOD SCIENCE AND MUCH MORE.

WE’RE PART OF THE MOST CITED RESEARCH CENTRE OUTSIDE OF OXBRIDGE AND LONDON, AND HAVE WON TWO NOBEL PRIZES.

WE BRING BREAKTHROUGH THINKING INTO THE CLASSROOM TO MAKE BRIGHT FUTURES FOR OUR STUDENTS.

WHAT COULD YOUR UEA BE ABOUT?
MUMMIES’ BODIES TELL HISTORIANS A LOT ABOUT ANCIENT EGYPT. AT UEA WE’RE UNWRAPPING EGYPT’S PAST USING A SURPRISING SOURCE – MUMMIES’ BANDAGES. WHAT SURPRISES WILL YOU UNWRAP?
WWW.UEA.AC.UK/BRILLIANT
WHAT’S MAKING THE ANTARCTIC MELT?
WE’VE PUT ROBOTS INTO THE OCEAN TO UNLOCK THE COMPLEXITIES OF WARM WATER.
WHAT COULD YOUR ROBOT DO?

UNI LIFE

IMAGINE WAKING UP TO BEAUTIFUL COUNTRYSIDE, JUST MINUTES FROM A WORLD-CLASS CITY, ENJOYING OUTSTANDING MUSIC, ART, AND CULTURE ON A WEEKLY BASIS, HAVING THE CHOICE OF 200 CLUBS AND SOCIETIES, OR STARTING YOUR OWN, BREAKING A SWEAT IN ONE OF THE UK’S FINEST SPORTS FACILITIES, BEING INSPIRED BY ARTS AND CULTURE FROM ALL OVER THE WORLD AND PLAYING A PART IN CAMPAIGNS ON THE ISSUES THAT MATTER TO YOU.

NOW YOU’RE GETTING AN IDEA OF WHAT LIFE AT UEA IS LIKE.

DISCOVERING A BIG SMALL CITY

Norwich is the big small city where old meets new, nature meets technology and local and global culture collide.

Top, The Norwich Lanes, winner of the Great British High Street of the Year Award 2014
Middle, Norfolk and Norwich Millennium Library, the most popular in the UK, sits opposite St Peter Mancroft Church
Bottom, Norfolk is a unique county with some truly stunning locations. The Norfolk Broads are one of Britain’s most famous wetlands

While our University campus is situated in 200 hectares of natural parkland, the bustle of Norwich is but a stone’s throw away. Ours isn’t just a beautiful city, it also boasts a cutting-edge arts scene and is steeped in literary excellence. Here, you’ll find a historic castle and ancient cobbled streets alongside award-winning shopping, theatre, arts and entertainment.

“I THINK IT’S THE BEST OF BOTH WORLDS. IT’S LIVELY LIKE A CITY SHOULD BE AND YET IDYLIC LIKE A PICTURE POSTCARD”
JEN BARWELL, MB BS MEDICINE GRADUATE
Norwich buzzes with live music, comedy, arts and culture. Be inspired by art house cinema, touring west end and international theatre productions and the thriving literary scene.

See outstanding art from around the world for free on campus at the Sainsbury Centre for Visual Arts, our uniquely inspirational museum that’s housed in a Norman Foster building and contains the renowned Robert and Lisa Sainsbury Collection. www.scva.ac.uk

Every year, the University’s Arthur Miller Centre for American Studies and the Centre for Creative and Performing Arts each host an annual literary festival. At these festivals you will be able to attend readings and talks with well-known writers such as Jackie Kay, Edmund de Waal, Sebastian Faulks, Will Self, Jonathan Franzen, Carol Ann Duffy, Simon Armitage, Eimear McBride and Jo Shapcott. www.uea.ac.uk/litfest

Whether beating your personal best means learning to swim or competing for your country, you will love our £30 million Sportspark facility. It’s one of the finest sports complexes in Britain and is unrivalled by any British university.

You will also be able to access a wide range of sporting societies for sports you may already love, want to try and others you may not even have heard of.

Take advantage of the Olympic-sized swimming pool, badminton, squash, basket and volleyball courts, indoor arena, floodlit hockey and football pitches, the five-a-side Soccerpark, the fitness centre with state-of-the-art cardiovascular equipment and weight machines, martial arts and dance studios, gymnastics and trampolining centre and indoor climbing wall. With numerous classes and societies to choose from, keeping active and pursuing sporting excellence is easy at UEA.

www.sportspark.co.uk
www.ueastudent.com/sport

Opposite:
Top, Ella Eyre performing at our city music venue the Waterfront
Bottom, Students at the Sainsbury Centre for Visual Arts
This page:
Top, Our state-of-the-art climbing wall
Middle, The Olympic-sized swimming pool
Bottom, Norwich 100/50/25 mile bike ride

Norwich is a UNESCO City of Literature and UEA is steeped in literary excellence. Since the novelists Malcolm Bradbury and Angus Wilson started the MA in Creative Writing in 1970, many famous writers have taught or studied at the University. These include former Poet Laureate Andrew Motion, Ian McEwan, Kazuo Ishiguro, Rose Tremain, Angela Carter, Ali Smith, Tracy Chevalier, Anne Enright, Naomi Alderman and Tash Aw.

You will be surrounded by some of the UK’s most beautiful countryside. Explore the nearby Norfolk coastline with its stunning beaches and world famous bird reserves. Enjoy country walks, medieval villages, bustling market towns, and stately homes. Go walking, cycling or sailing on the Norfolk Broads, an incredible National Park. Between the bustling city of Norwich and the big skies of Norfolk, there are so many places to be inspired by during your time at UEA.

ARTS AND CULTURE

FINDING INSPIRATION

What could your UEA be about?
What could your UEA be about?
FINDING YOUR VOICE

Whether you are passionate about climate change, drama, photography, music, media, sports or something else, with over 200 clubs and societies, you’re sure to find your niche at UEA. And if there isn’t a group to suit you, the Student Union will help you set up a new one. Taking part in a club or society is a great way to meet new people, indulge a passion and take a break from your studies. Plus it’s great preparation for your future career. Find out more about societies at UEA at www.ueastudent.com/societies

Our Music Centre is a great place to literally find your voice at UEA. Whether you are a musician or a music enthusiast, whatever your tastes or ability level, this dedicated facility has something for you. There, you can take advantage of practice and rehearsal space, or join our Symphony Orchestra, one of our choirs or the student-led Music Society’s numerous ensembles.

www.uea.ac.uk/music-centre

Joining the UEA Student Union is a great way to really be heard and lend your voice to the issues that matter to you on campus and beyond. As well as running shops, bars and a nightclub, the Union represents student interests to the University, locally and nationally, and runs campaigns aimed at positive change.

www.ueastudent.com

“GOING TO UNIVERSITY IS AS MUCH ABOUT MEETING NEW PEOPLE AS IT IS ABOUT LEARNING. I MET PEOPLE WHO HAVE BEEN CENTRAL TO WHAT I HAVE DONE SINCE, INCLUDING PAUL WHITEHOUSE, HARRY ENFIELD AND VIC REEVES”

CHARLIE HIGSON, COMEDIAN, WRITER AND SCRIPTWRITER, UEA GRADUATE

60+ GIGS A YEAR

Our on-campus live music venue, the LCR, hosts more than 60 gigs a year. Recent acts have included Tom Odell, Bastille, Sub Focus, Haim, Ed Sheeran, Professor Green and Coldplay.

You can also enjoy weekly club nights, balls, fashion shows as well as gigs at the Waterfront, one of Norwich’s best-loved nightclubs and alternative music venues, which is also run by the Union. See what’s coming up at www.ueastudent.com/events

In Norwich you’ll also find a thriving nightlife scene including clubs, bars, music and comedy venues and 100s of pubs. For a taste of what’s on offer, head to Riverside, Tombland and the Prince of Wales Road. In fact, an evening in Norwich is a great way to finish off a visit to one of our Open Days (see page 47).

“NORWICH HAS A BRILLIANT LIVE MUSIC SCENE. PLENTY OF RADIO STATIONS TOO, WHICH I PESTERED FOR WORK EXPERIENCE”

GREG JAMES, RADIO 1 DJ AND UEA DRAMA GRADUATE

“Norwich has a brilliant live music scene. Plenty of radio stations too, which I pestered for work experience”

Greg James, Radio 1 DJ and UEA Drama Graduate

What could your UEA be about?

UEA isn’t just an inspiring place to study, it’s also a great place to live. Just like our campus, student accommodation at UEA is designed to help you make the most of your time here.

UEA is a safe, friendly, comfortable and fun place to live, and all students are guaranteed a room on campus in their first year (subject to restrictions and conditions). A range of shops, several bars, a collection of eateries, the Sportspark, the Drama Studio, the Library, the Sainsbury Centre for Visual Arts and the LCR live music venue are all within a few minutes walk.

Our accommodation includes some award-winning architecture, including Norfolk and Suffolk Terraces, which have been placed in the top 10 examples of university architecture in the country by The Architect’s Journal.

We offer specially adapted rooms for wheelchair users, with the option of other modifications if you have restricted mobility or need personal support. UEA’s accommodation buildings also house Senior Residents who are there to support residents with any worries or concerns they have about their living arrangements.

Accommodation at UEA benefits from:

- 3,800 fully furnished rooms, all with free internet access.
- Some of the lowest living costs of all the top 20 universities.
- Affordable rents ranging from £68.95 a week for a shared twin room to £128.38 a week for an en suite campus room.
- Situated in 200 hectares of natural parkland.
- Twenty minutes bus ride to Norwich city centre.
- Under two hours by train to London from Norwich, leaving every half an hour.
- Norwich International Airport is just 15 minutes from the city centre.
- National Express and Megabus services run directly from campus to destinations all over the UK and Europe.

www.uea.ac.uk/accom
MASTERYNG YOUR SUBJECT

REACH YOUR ACADEMIC POTENTIAL WITH INNOVATIVE RESEARCH-LED TEACHING, FLEXIBLE DEGREE PROGRAMMES AND CUTTING-EDGE FACILITIES. THROUGH A MIX OF LECTURES, SEMINARS AND PRACTICAL EXPERIENCE YOU WILL GAIN IN-DEPTH KNOWLEDGE OF YOUR SUBJECT.

NOT ONLY THAT, YOU’LL ALSO DEVELOP ANALYTICAL, PRESENTATION, TEAMWORK AND COMMUNICATION SKILLS THAT ARE SO ESSENTIAL FOR SUCCESS AFTER GRADUATION.

LEARNING BY DOING

At UEA you won’t just learn about what other people have done, thought or said. You will learn by doing. That’s because we believe you learn best by trying things out for yourself and experiencing the challenges of your subject first hand.

At UEA you get to take control of your learning in a variety of ways. Many of our courses include hands-on classes or modules where you get to put what you’ve learnt in lectures into practice on projects or even real-world research.

We don’t just want you to listen to what you’re taught; we also encourage students to engage in debates in seminars and to challenge current thinking with new ideas. Learning at university doesn’t end in the classroom. Our students have used their time to start their own businesses, and to play a part in numerous campus initiatives such as providing legal advice, teaching and mentoring at schools, working with charities, broadcasting, theatre, and journalism.

In and out of lectures, you’ll face multiple opportunities to put modern practice and new ideas to the test with your lecturers and peers.

“WE WANT OUR STUDENTS TO MAKE JUDGEMENTS FOR THEMSELVES. WE ENCOURAGE INDEPENDENT THINKERS”

PROF JENNI BARCLAY, SCHOOL OF ENVIRONMENTAL SCIENCES

Work placements and internships are a fantastic way to improve your skills, put your knowledge into practice, gain real-world experience and build valuable contacts. They can also be a vital step towards a graduate role in your chosen career. We have a huge network of potential employers, locally, nationally and globally and we’ll help you find the right placement for you, whether that’s in Norwich or on the other side of the world.
STUDYING WITH WORLD EXPERTS

At UEA you will learn from world experts who are leading the way in their fields. Here, our staff are just as dedicated to you and your studies as they are to their own research.

This means your studies are informed by the latest thinking and most up-to-date research. It also means that as well as gaining a solid grounding in your area, you will graduate with in-depth knowledge of the aspects of your subject that are still emerging today. We believe our research-led teaching is just one of the reasons we score so highly for student satisfaction.

“I teach a module on comedy and bring lots of industry professionals, whom we do research with – into class, such as the television comedy writers, producers and directors I’m doing a project with (www.makemelaugh.org.uk). The project explores creativity in the British television comedy industry and allows students to get a real insight into those people’s working processes and ideas, by bringing materials from my research into class.” Dr Brett Mills, Senior Lecturer, School of Art, Media and American Studies

“ALL THE TUTORS ARE OUTSTANDING AND ALWAYS AVAILABLE TO HELP OUT” 
DEBORAH ANTOINE, BSC ACCOUNTING AND FINANCE GRADUATE

STUDY ABROAD

Not only can you choose what to study, but also where to study. Lots of our degrees include the chance to study abroad. When you study abroad you gain a unique perspective on your chosen subject, learn about a different culture and have an unforgettable experience to boot. Not only that, it can give you the edge when it comes to your future career.

Choose from over 100 universities and colleges throughout North America, Latin America, Asia, and Australasia. The University is also an active participant in the European Commission’s Erasmus+ programme with links at more than 90 partner institutions in countries such as: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Lithuania, the Netherlands, Norway, Poland, Slovakia, Slovenia, Spain, Sweden, Switzerland and Turkey. 

www.uea.ac.uk/studyabroad

Make sure your degree is as unique as you are, with our flexible degree programmes. Through a mix of compulsory and optional modules, you’ll gain a thorough grounding in your subject, before tailoring your studies to suit your interests and your ambitions.

Our different Schools of Study collaborate closely with each other in teaching and research so your studies can cross traditional subject boundaries. You can also choose to complement your studies with language classes, sometimes as part of your degree and sometimes for a small fee. Plus small class sizes and personal tuition mean you develop a rapport with your lecturers and benefit from teaching that’s personalised to you.

To help you get the most from your studies, you will be given your own personal adviser. They will monitor your progress, give you feedback and guide you through your course to graduation.

STUDYING WHAT YOU WANT, WHERE YOU WANT, HOW YOU WANT
**FLEXIBLE LEARNING**

**STUDYING THE WAY YOU WANT**

**FULFILLING YOUR POTENTIAL**

Whenever, wherever and however you learn best, the library is designed to meet your needs. This state-of-the-art facility is open and staffed seven days a week and is open 24 hours a day, 365 days a year.

**LEARNING RESOURCES**

What could your UEA be about?

MATURE STUDENTS

We welcome students of all ages and backgrounds and operate a flexible admissions policy, which takes into account your life and work experiences. We are always pleased to advise you on the most suitable way forward if you do not have standard qualifications. Typically an Access qualification or an Open University foundation course normally satisfies the general entrance requirement, but the Admissions Officer of your proposed School of Study can advise you further. You may be called for an interview or be asked to submit an extended essay on a suitable topic. You may be advised to undertake further study before beginning your degree.

[www.uea.ac.uk/return](http://www.uea.ac.uk/return)

PART-TIME STUDY

We offer part-time degree programmes in a number of subject areas, allowing students with outside commitments to complete their studies over a longer period of time, typically five to seven years. All applications are judged on their individual merits, in the same way as applications for full-time degree programmes. Your application for a part-time degree should be made directly to the School of Study and not through the UCAS system.

Subject areas in which part-time degrees are available at the time of writing are listed below.

American Studies, page 62
Art History, page 66
Biochemistry, page 70
Biology, page 72
Ecology, page 90
English, page 102
History, page 118
Philosophy, page 162

Please contact the appropriate School/Department directly for further information about studying these subjects part-time.

**OUR PARTNER INSTITUTIONS**

We work with a number of institutions to widen access to higher education and to provide a range of high-quality courses that lead to an award from the University of East Anglia. Each institution has its own prospectus giving detailed descriptions of the courses it offers and should be contacted directly for further information.

**THE LIBRARY IS ABSOLUTELY FANTASTIC; WITH THOUSANDS OF RESOURCES AT YOUR DISPOSAL IT IS EASY TO FIND USEFUL WORK TO AID YOU IN YOUR STUDIES”**

LOUIS PRESTON, PHILOSOPHY AND HISTORY GRADUATE

**Study at UEA and you will benefit from:**

- Over 1,400 work spaces and over 270 computers in the library.
- Over 800,000 volumes of books and journals.
- Over 16,000 new titles that are added to library stock annually.
- Extensive collections of specialist materials including government publications, DVDs, music scores and periodicals.
- Online library catalogue and search tools that can be accessed anywhere in the world.
- A wide range of subscribed e-resources such as online databases and journals.
- Library and IT helpdesk open seven days a week during term time.
- Bookable study pods and group study rooms with IT and AV equipment.
- Assistive technology and specially equipped workstations for students with visual impairments or mobility difficulties.
- Free wireless network throughout the library.
- High-speed wired and wireless network throughout the University.
- Connect to the University network from anywhere in the world.

UEA IS A WORLD-LEADING RESEARCH UNIVERSITY WHERE YOU WILL BE EXPOSED TO THE LATEST KNOWLEDGE AND THINKING. OUR RESEARCH STAFF ARE JUST AS DEDICATED TO TEACHING AS THEY ARE TO RESEARCH, SO YOU REALLY WILL GET TO WORK CLOSELY WITH THE VERY PEOPLE WHO ARE CONDUCTING CUTTING-EDGE RESEARCH IN YOUR FIELD.

From the latest developments in global warming and renewable energy and radical ways to treat arthritis, from new approaches in international development to breakthroughs in how we test for drugs, prevent alcohol abuse and protect crops without pesticides, our research is defined by unconventional, brilliant thinking. We ask challenging questions, and work to affect real change in the world. We often take an interdisciplinary approach, making the most of partnerships between different departments and with other research institutions. We publish research with international reach, and we aren’t afraid to tackle problems in surprising new ways. At UEA, we see our research as an important way to make a substantial impact on the big challenges facing society.

We were placed in the world top 80 for research impact by the Times Higher Education in 2014. We ranked overall in the world’s top 100 universities for research excellence in the 2014 Leiden Ranking, with high placings for Life and Earth Sciences ranked third in the UK. And Social Sciences ranked fifth in the UK.

WE ARE PROUD TO BE PART OF THE NORWICH RESEARCH PARK, THE MOST CITED RESEARCH CENTRE OUTSIDE OF OXFORD AND LONDON
IN THE 2014 RESEARCH EXCELLENCE FRAMEWORK (REF) - THE NEW SYSTEM FOR ASSESSING THE QUALITY OF RESEARCH IN UK HIGHER EDUCATION INSTITUTIONS – WE SCORED 10TH IN THE UK FOR QUALITY OF RESEARCH OUTPUT.

EIGHTY TWO PER CENT OF OUR RESEARCH WAS CLASSIFIED AS ‘WORLD-LEADING’ OR ‘INTERNATIONALLY EXCELLENT’.

As a UEA student you could be part of history in the making. Through our partnership with the Norwich Research Park, you could play a role in world-changing research in science and technology.

Norwich Research Park is internationally renowned for its research excellence and is one of Europe’s leading centres for research and development in the areas of plants, microbes, food, health, the environment and computing.

The Park’s partners include the John Innes Centre, the Institute of Food Research, The Sainsbury Laboratory, The Genome Analysis Centre and the Norfolk and Norwich University Hospital’s NHS Foundation Trust. The Park is also home to a number of science and technology based businesses. Together, they provide a wealth of opportunities for research and employment for UEA students and graduates.

Currently our students and graduates are involved with major research projects tackling sustainable agriculture, food security and prevention and treatment of major diseases.

“UEA WAS VERY IMPORTANT TO ME AT A CRUCIAL TIME IN MY RESEARCH LIFE. I RECEIVED BRILLIANT TRAINING AS A RESEARCH STUDENT, WHICH HAS STOOD ME IN GOOD STEAD FOR THE REST OF MY CAREER. AND, OF COURSE, I REALLY ENJOYED MYSELF”

PROF SIR PAUL NURSE KBE FRS, SCIENTIST, PRESIDENT OF THE ROYAL SOCIETY AND 2001 NOBEL PRIZE WINNER
INTERNATIONAL STUDENTS

WE HAVE MORE THAN 3,500 INTERNATIONAL STUDENTS FROM OVER 80 COUNTRIES. AT UEA YOU ARE NOT JUST A NUMBER, YOU ARE AN INDIVIDUAL.

INTERNATIONAL STUDENTS ARE IMPORTANT TO US. WE NURTURE YOU AND ENSURE YOU HAVE EVERYTHING YOU NEED TO THRIVE BOTH IN YOUR STUDIES AND AFTER YOU GRADUATE.

A WELCOMING COMMUNITY

At UEA, our international students are a vital part of our vibrant community. So we do everything we can to help you settle in, make friends, get to know your new country and excel in your studies and future career.

For us, it’s not enough that you get world-class teaching at a respected British university in a beautiful environment. You also deserve courses, support and facilities that are specially tailored to your needs. Our international students benefit from world-class teaching, in an inspiring and supportive environment tailored to their needs.

You’ll be guaranteed campus accommodation in your first year. Our friendly campus is situated in 200 hectares of stunning English countryside and Norwich, voted one of the world’s best small cities, is right on our doorstep.

Before you arrive a helpful Pre-Departure Guide for International Students will give you information and advice to prepare you for studying in the UK. You’ll receive guidance on everything from preparing to travel, to health care, to immigration regulations.

MEET US

International Office staff are available to help you with any queries you might have about studying at UEA. We regularly attend education events overseas and if you can’t meet us in person please contact us or one of our International Student Ambassadors who will be happy to help. This team of student ambassadors from over 30 different countries is dedicated to helping you through the process of course selection, application and enrolment. They have dedicated webpages, Facebook sites and email addresses. www.uea.ac.uk/international

JOINING A GLOBAL UNIVERSITY

What could your UEA be about?
ENTRY REQUIREMENTS
Typical entry requirements for our courses are expressed in terms of A levels and International Baccalaureate Diploma points on the course pages. However we also recognise qualifications from many countries and organisations for direct entry to our degree programmes. We can advise whether you will need to take an INTO UEA programme prior to your degree course. See page 37.

When you join us, you’ll attend a special orientation programme where you can meet other UEA students and find out more about living and studying in Britain. Throughout the academic year you’ll get to attend fun social events, and will be supported by a dedicated International Student Advisory Team. You’ll also have the chance to join the International Students Society and many smaller societies for students from different countries.

STUDying IN THE UK

YOUR Visa
International students (non-EEA) in the UK need to meet a range of visa and language requirements. International applicants to UEA will have the support of a dedicated team providing advice and support throughout the applications and visa processes.

Non-EEA students coming to the UK for six months or more must apply for a Tier 4 (General) student visa in their home country before travelling to the UK.

You must be able to show that you meet the UKVI financial regulations when you apply for your visa. You also need to meet the UKVI’s minimum requirement for English language. If your studies are being certified the amount of your scholarship. See our webpages:

www.gov.uk/tier-4-general-visa
www.uea.ac.uk/international

“The International Foundation Programme was the starting point for my academic career at UEA. During this time I had the opportunity to learn in a multicultural environment and to gain a deeper understanding of international business. The programme helped me to develop important skills such as time management, communication, and teamwork.”

—JOSEF NOGAL

“THERE ARE MANY SMALLER SOCIETIES FOR STUDENTS FROM DIFFERENT COUNTRIES, AS WELL AS THE INTERNATIONAL STUDENTS SOCIETY AND THE INTERNATIONAL STUDENT ADVISORY TEAM. YOU’LL ALSO HAVE THE CHANCE TO JOIN THE INTERNATIONAL STUDENTS SOCIETY.”

I JOINED THE INTERNATIONAL STUDENT SOCIETY IN MY FIRST YEAR, AND I JUST LOVED IT
PIETRO D’ARCANO, PHILOSOPHY, POLITICS AND ECONOMICS GRADUATE

“WHEN I FIRST CAME HERE THE STAFF HELPED ME TO ADAPT TO LIFE IN THE UK. AT THAT TIME MY ENGLISH WASN’T VERY GOOD, BUT WITH THE HELP OF MY TEACHERS AND FRIENDS I IMPROVED A LOT.”
TRAN NGOC NHAT TUAN, INTO FOUNDATION SCIENCE PROGRAMME
NOW STUDYING PHARMACY AT UEA

PREPARING FOR YOUR DEGREE

If you are an international student but you don’t yet meet the entry requirements for a degree, INTO UEA could be for you. INTO UEA, the result of a joint venture between UEA and INTO University Partnerships, offers a range of innovative academic preparation and English language courses.

INTO UEA students benefit from a purpose-built international study centre on campus at UEA. The centre provides an inspiring and nurturing living and learning environment, with space for 700 students and access to the latest learning technologies.

INTO provides comfortable, modern accommodation. Students are taught by experienced teachers and also benefit from a dedicated Student Services team.

“RECOGNISE QUALIFICATIONS FROM MANY COUNTRIES.”

“TYPICAL ENTRY REQUIREMENTS FOR OUR COURSES ARE EXPRESSED IN TERMS OF A LEVELS AND INTERNATIONAL BACCALAUREATE DIPLOMA POINTS ON THE COURSE PAGES.”

INTO UEA COURSES INCLUDE:

INTERNATIONAL FOUNDATION
Gain the skills, knowledge and confidence you need to study at degree level in the UK. This course has been specially created to prepare you for direct entry to the first year of an undergraduate degree. Choose from four groups of specialist pathways in business, economics, society and culture; humanities and law; mathematics and actuarial sciences; and the sciences. The programme combines academic study, intensive English language preparation, study skills and cultural orientation. On successful completion of the International Foundation (subject to meeting the specified course requirements) you are guaranteed a place on a wide range of undergraduate degree courses at UEA.

NEWTON A LEVEL PROGRAMME
A unique opportunity to study A levels on a leading university campus. If you are a high achieving student with ambitions to study medicine, the sciences, engineering, mathematics or economics, the Newton Programme will help you to achieve your educational goals and go on to undergraduate study at a top world-class university. For further details please contact

newton@uea.ac.uk

International applicants to UEA will take an INTO UEA programme prior to entry to the UK. UK for six months or more must apply for a Tier 4 (General) student visa in their home country before travelling to the UK.

You must be able to show that you meet the UKVI financial regulations when you apply for your visa. You also need to meet the UKVI’s minimum requirement for English language. If your studies are being certified the amount of your scholarship. See our webpages:

www.gov.uk/tier-4-general-visa
www.uea.ac.uk/international

ENGLISH FOR UNIVERSITY STUDY AND PRE-SESSIONAL ENGLISH COURSES
Improve your English language level ready for entry onto an INTO academic preparation programme, or directly onto a UEA degree course with these year-round and summer programmes. Whatever your current English language level, we offer a range of courses designed to give you the academic English skills you need to excel at university.

Find out more and download our latest brochure from www.intohigher.com/uea

INTERNATIONAL YEAR ONE
Increase your academic knowledge, improve your English language skills and develop the necessary study skills for entry to year two of an undergraduate degree in business, finance and economics-related subjects. On successful completion of this programme (subject to meeting the minimum entry requirements specified by the relevant School of Study) you will automatically progress to the second year of an undergraduate degree course at Norwich Business School or the School of Economics at UEA.

“IF YOU ARE AN INTERNATIONAL STUDENT BUT YOU DON’T YET MEET THE ENTRY REQUIREMENTS FOR A DEGREE, INTO UEA COULD BE FOR YOU.”

“INTO UEA, THE RESULT OF A JOINT VENTURE BETWEEN UEA AND INTO UNIVERSITY PARTNERSHIPS, OFFERS A RANGE OF INNOVATIVE ACADEMIC PREPARATION AND ENGLISH LANGUAGE COURSES.”

FEELING SUPPORTED

WE OFFER A RANGE OF SUPPORT SERVICES TO ENSURE THAT IF YOU HAVE ANY WORRIES, BIG OR SMALL, YOU CAN FACE THEM HEAD ON. THAT WAY YOU CAN GET BACK TO DOING WHAT YOU DO BEST – STUDYING HARD, ENJOYING YOURSELF AND PREPARING FOR A SUCCESSFUL CAREER IN YOUR CHOSEN FIELD.

LOOKING AFTER YOURSELF

Going to university can bring lots of new challenges. At UEA we will empower you to overcome those challenges. That means you will not only fulfil your potential while you’re here, you’ll also graduate ready to take on the world.

At UEA we take care to look after all aspects of your wellbeing. Our on-campus Medical Centre provides GP services, specialist clinics and visiting practitioners. We also have an on-campus Dean of Students’ Office, NHS dental practice, and a Boots pharmacy too.

Our special advisers support students with disabilities and specific learning difficulties. Our campus also includes an on-site nursery for student parents.

The UEA Wellbeing Service offers confidential help and support to those with disabilities, mental health issues or personal difficulties.

Financial Advisers can help you navigate financial emergencies, manage hardship fund applications and offer budgeting advice.

The University Multifaith Centre offers a place for quiet reflection, prayer and worship for all faiths.

ACHIEVING YOUR POTENTIAL
Become the best student you can with help from our Learning Enhancement Team. Take advantage of free and confidential tutorials, workshops and a wide range of study guide materials, including specialist study support for international students and students with specific learning difficulties.

What could your UEA be about?
YOUR CAREER

University should be about so much more than just getting a degree. At UEA you’ll also discover where you want to go next and exactly how to get there. We will help you scope out your future direction, hone your post-graduation ambitions, try out different careers, build contacts and leave ready to take your pick of the world’s best employers and most interesting, fulfilling careers. We’ll even teach you how to set up your own business.

Finding your calling

UEA is committed to opening doors for our graduates. The first step we take is to help you work out what you want to achieve in the world of work. We will help you discover your ambitions through special careers events, carefully designed to introduce you to different sectors and organisations all over the world.

You’ll have access to a dedicated, campus-based team of subject specific careers advisers. Throughout your degree, you can meet people from industry at networking events, and try out different careers for yourself through countless internship and work placement opportunities.

www.uea.ac.uk/careers

“My time at UEA was a big step in my career as a writer. It forced me to take writing seriously, and to change the direction of my life. Without it I would probably still be working 9-5 in an office”

Tracy Chevalier, Novelist and UEA graduate
YOUR PICK OF EMPLOYERS

Our degrees are developed in collaboration with top employers to ensure you graduate with the skills they are looking for.

You could go on to join the large numbers of UEA graduates already working at top-flight employers. These have included world-class employers such as the BBC, Apple, Christian Aid, NATO, United Nations, Virgin, British Airways, IBM, the UK government, the European Parliament, Ford Motor Company, Morgan Stanley, GlaxoSmithKline, HarperCollins Publishing, the Royal Navy and more.

You will graduate career ready thanks to:
- Our dedicated careers base, CareerCentral
- Specialist careers advice from your School of Study
- CV writing and interview skills workshops
- Networking and panel events with potential employers
- Annual recruitment and opportunities fairs
- A dedicated vacancy service for part-time jobs, graduate level work, work experience and volunteering roles
- A wide range of student and postgraduate internships and work placements in the local area, the UK and all over the world
- Springboard, our campus-based programme offering paid internships
- Access to the UEA summer internship programme, offering placements in the summer holidays
- The UEA mentoring programme.

“EVERY DAY I USE SKILLS THAT WERE DEVELOPED AND NURTURED AT UEA”
BECKY BARBER, ASSOCIATE PRODUCER AT OLD VIC PRODUCTIONS AND UEA DRAMA GRADUATE

“THE CAREERS SERVICE HELPED ME ADAPT AND IMPROVE MY CV, THE CAREERS LIBRARY WAS REALLY USEFUL FOR RESEARCHING POTENTIAL CAREERS, AND THE MATHS SPECIALIST GAVE ME BRILLIANT ADVICE”
MARIA MARSH, MATHEMATICS GRADUATE, NOW WORKING FOR PwC
**STARTING A BUSINESS**

UEA isn’t just committed to helping you find work when you graduate, we are also passionate about helping you do the work you love by starting your own business.

Throughout your time at UEA, you will face multiple opportunities to pursue your passions, develop new skills, and interact with established companies you admire. As you explore and develop, your ambitions will become clearer and more defined, and entrepreneurship may become the career route for you. We’re already investing in the resources necessary to help make these entrepreneurial ambitions a reality.

**THE ENTERPRISE CENTRE**

In 2015 UEA will open its Enterprise Centre, a dedicated start-up incubator and home to a burgeoning on-campus start-up community. The Enterprise Centre will house brand new teaching and learning rooms (including a 300 seat lecture theatre) as well as Enterprise Central, a hub of support for students who want to start their own business.

The Centre will act as a dedicated space for aspiring student entrepreneurs to grow and develop their business ideas. There, you’ll be able to meet like-minded peers, collaborate and innovate with them, and start to bring your business ideas to fruition. Students will have access to the services and support they need to become fully fledged entrepreneurs, including one-to-one business coaching, mentors, skills workshops, grants and funding, competitions and more.

The Centre will be a sustainable home for future start-ups, based on a flagship low carbon building design which meets the highest standards for energy use and sustainability. Innovation in design, build and post-occupancy have been considered throughout the consultation and design process to ensure the building achieves Passivhaus standards, a prestigious mark of sustainability and efficiency.

From idea to launch, the Enterprise Centre will support students every step of the way towards starting a business. As start-ups are founded, students can even run their businesses out of the Centre. There are a range of tenancy options on offer to meet changing needs as a business grows, from virtual tenancy, to hot-desking, to co-working and office suites.

**FURTHERING YOUR STUDIES**

A significant number of our undergraduates stay in Norwich to continue their studies at higher degree level. Alternatively, you could stay on to take the Postgraduate Certificate in Education (PGCE) programmes at our School of Education and Lifelong Learning – one of the top teacher training institutions in the United Kingdom. www.uea.ac.uk/edu/pgce

“THANKS TO THE EXCELLENT PGCE COURSE, THE INSPIRATIONAL SUPPORT AND EXPERTISE, I AM NOW TOTALY CONFIDENT IN STARTING THIS NEW AND EXCITING CAREER”

NICOLA VARCHETTA, PGCE GRADUATE
NEXT STEPS

It’s really important that you choose the right course at the right university for you. UEA goes the extra mile to support applicants all the way through the decision making process. From our eye opening Open Days, to helping you finance your studies, to our thoughtful approach to admissions, UEA helps make your big decision easier.

EXPERIENCE UEA

Going to university is an exciting new stage in your life. It can be very different from your past experiences, and in lots of important and interesting ways UEA is also quite different from other universities.

That’s why we recommend getting a taste of UEA life at one of our Open Days. You’ll find out more about UEA’s unique approach and culture, and also get an idea of the subjects and courses that could be right for you.

Our students and graduates often tell us that they found their Open Day visit incredibly helpful, so if you’re even slightly curious about UEA, it’s well worth coming along. As a university we always strive to go above and beyond and our Open Day programme is no different.

“I visited UEA and fell in love with the atmosphere, the friendly students, the staff and the beautiful campus”

Jafar Ojra, Phd Graduate
YOUR OPEN DAY SCHEDULE

Your Open Day will be carefully designed to give you a taste of the whole UEA experience, from studies to extracurricular activities to graduation and beyond. Over the course of the day, you will have the chance to find out about student life by speaking to current students. You’ll also get to see for yourself where you will learn, study, play, socialise, eat and shop if you decide to join us.

Your day will include a tour of the campus, and the chance to explore the library, the shops, bars and eateries we have on site. You’ll get to see our live music venue, the LCR, and our £30 million Sportspark facility. You will also be able to look around our lecture theatres and seminar rooms and check out our learning and IT facilities.

Over the day, you’ll get a feel for both the University as a whole and for the different Schools of Study. You’ll learn about the courses we offer, and talk to lecturers about course content and our innovative teaching methods. You’ll also have the chance to visit our award-winning student accommodation and see where you might live if you come to study with us.

Open Days give you a complete overview of student life, including an understanding of how you will finance your studies and make the most of your time here. We’ll even start to help you discover the huge number of graduate careers that could be open to you when you graduate.

If you have any questions, concerns or comments about life at UEA there will be students, lecturers and other staff on hand all day to give you the information you need.

After our Open Days you will also have plenty of time to explore the surrounding countryside and the city of Norwich.

Register for your free Open Day place at www.uea.ac.uk/openday

WANT TO VISIT ANOTHER TIME?

Don’t worry if you can’t attend an Open Day or Applicant Day. Simply get in touch to find out alternative ways to visit UEA. Staff are helpful and approachable and are happy to give you or your parents any information or advice you need.

To ask a question about visiting UEA, contact recruitmentevents@uea.ac.uk

What could your UEA be about?

OPEN DAYS

TASTER EVENTS

Get a real life taste of learning at UEA by attending one of our taster events. Choose from subject tasters, a lecture series and residential summer schools designed for students in Year 12 throughout the year.

www.uea.ac.uk/universitytasters

INFORMATION FOR SCHOOL VISITS

Our Higher Education Advisers are on hand to help school and college students as they identify and pursue their university ambitions. We can provide information to careers advisers and teachers or arrange visits for school groups, individual teachers and tutors.

Our advisers are also available to visit schools, leading talks and workshops to help students choose the right path for them.

Popular talks at schools around the country have included:

- Personal Statements: Securing Five Offers
- Getting it Right First Time
- What’s the Point (The Benefits of Going to University)
- Insiders Guide: The Truth About Student Finance
- Behind the Scenes: Life at University.

A SMART INVESTMENT

GETTING VALUE
At UEA we think it's important that everyone has the chance to study, regardless of their financial background. That's why we work hard to keep costs down and to make sure your degree is worth every penny. On average graduates earn an extra £200,000 over their working lives compared to those with just A levels. To make sure your degree represents good value for money and that you get an excellent return on your investment we make it a priority that you graduate career-ready.

To make it as easy as possible for you to finance your degree, we can give you financial advice and support. We can also help you find paid part-time work, internships and professional placements and help you access a wide variety of bursaries and scholarships.

WHAT DOES IT COST TO STUDY AT UEA?
Student costs are made up of a combination of fees, living costs, rent and money spent on course materials. Because you don’t pay fees up front, your largest expense is likely to be living costs. All UK students can apply for living cost support, which provides at least £3,500 per year to live on and much more for some students.

UEA’s tuition fees for UK/EU students in 2016 will be around £9,000, depending on inflation. A Tuition Fee Loan is available which, combined with the support you get for living costs, you only start repaying when you graduate. This means you won’t have to pay anything before arriving here, and you won’t have to worry about paying anything back until you are earning a good salary. It also means most students won’t have to repay the full amount they borrow, meaning it will cost you a lot less than you thought to go to university.

Taking a loan out might seem nerve-wracking, but with a Student Loan the government takes all the risk – a Student Loan won’t affect your credit rating and will not be a detriment to you obtaining finance in the future. You only start repaying when you earn over £21,000 a year and the amount you repay each month only goes up as your earnings increase. For example, if you earn £24,000 a year your repayment would be around £23 a month: similar to a smartphone contract. We think that’s good value for a world-class education. Work out how much support you could apply for here: studentcalculator.org

Students studying Occupational Therapy, Physiotherapy, Speech and Language Therapy, Operating Department Practice, Nursing or Midwifery may be eligible for NHS support. For more information visit www.nhsbsas.nhs.uk/students

And for student loan mythbusting see www.moneysavingexpert.com/students/student-loans-tuition-fees-changes

HOW WE HELP KEEP LIVING COSTS DOWN
Living in Norwich is relatively low cost and with a campus full of state-of-the-art facilities it has everything you need. At UEA we’re committed to keeping living costs down which is why you can expect free internet access on campus, affordable shops and competitive rent rates. We also have an employability service to help you find meaningful employment, flexible work opportunities on campus in the shops, bars and offices, along with various internships and placements with graduate employers.

BURSARIES, SCHOLARSHIPS AND PRIZES
We offer a range of bursaries (for students from under represented backgrounds), scholarships and prizes (for high achieving students) and other awards to support your studies.

Find out more about financing your studies
- UK students can find out more about loans and grants at www.gov.uk/student-finance
- EU students should email EU_team@slc.co.uk or phone +44 (0) 141 243 3570
- Students from Northern Ireland can find out more at Student Finance Northern Ireland www.studentfinanceni.co.uk
- Students from Scotland can find out more at Student Awards Agency for Scotland www.saas.gov.uk
- Students from Wales can find out more at Student Finance Wales www.studentfinancewales.co.uk
- International students can find out more at www.uea.ac.uk/international

WHAT YOU GET BACK
We ensure you get the maximum back for the time and money you invest in your studies. Throughout your degree we use innovative methods to equip you to graduate with the skills, experience, contacts and, most importantly, the confidence you need to succeed in your chosen field. We believe it’s one of the reasons we score so highly in all student satisfaction surveys.

YOUR APPLICATION

APPLYING TO UEA

Should you decide to apply to UEA, you can make an application to study with us through the standard Universities and Colleges Admissions Service (UCAS) process. UCAS charges a small fee for this service.

For more information go to www.ucas.com

When your application is received by UCAS you will be issued a unique UCAS personal ID number. Please ensure that you quote this number in any correspondence with the University or UCAS.

Please contact the Admissions Office if you are in any doubt as to the suitability of your qualifications.

ENTRY REQUIREMENTS, TYPICAL OFFERS AND PERSONAL STATEMENTS

We have indicated ‘typical’ offers for most courses in the course descriptions on pages 56-177.

In addition to the minimum general entry requirements outlined, there may be additional subject requirements specific to your degree.

We welcome applications from students with a range of qualifications such as Access, BTEC, Open University, professional qualifications, and more. Find out more about the sorts of qualifications we consider at www.uea.ac.uk/ug/entry

Across all our courses, you will also need to meet one of the below requirements:
- Grade C or above in both GCSE Mathematics and English Language and five GCSE/GCSE passes, including two GCE A levels or an EDEXCEL BTEC National Diploma with merit grades
- A pass in the International or European Baccalaureate Diploma
- A pass in an Access Course
- Four passes in the SCE higher grade examinations
- Irish Leaving Certificate with a grade C pass in five higher subjects, including English, taken in one sitting
- A pass in an Open University Foundation Course
- A degree from a recognised university.

As part of your application, you’ll also need to write a personal statement. This is your chance to tell us about any key skills or relevant experience you have. It’s also where you can show us why you’re right for the course, why you want to study at UEA and any past degree ambitions you might have. For advice on writing your personal statement, go to www.uea.ac.uk/ug/apply

WHAT HAPPENS NEXT

Upon completion your application form will go to our Admissions Office. There, our staff will carefully consider each application and reach a decision on whether to make you an offer or to invite you to an interview or audition.

It may take a while to receive a response to your application. UEA is planning to admit around 3,300 undergraduates in 2016. Each application is treated on its own merits, and we take the time to carefully consider each UCAS form to reach an informed decision.

We consider candidates as individuals and accept students from a very wide range of educational and professional backgrounds.

We will take into account:
- Past and future achievement in examinations (ie GCSE, A level, BTEC, Extended Project Qualification)
- Demonstrated academic interest in your chosen subject
- Personal interests and extra-curricular activities
- Confidential references.

The majority of candidates will not be called for an interview, but if you are, don’t panic. Interviews are sometimes a standard part of the application process, and are excellent opportunities for you to find out more about us while we get to know you.

YOUR OFFER

Unless you have already received your examination results, you will probably receive a conditional offer. This is determined by your individual circumstances and the demand for the course. Achievement of the grades stipulated in a conditional offer will guarantee acceptance at UEA.

UCAS EXTRA, CLEARING AND ADJUSTMENT

If your initial application is unsuccessful or your grades are better than expected, and depending on your chosen course, you may get another chance to join UEA through the UCAS Extra scheme from February and the Clearing and Adjustment scheme in August. To find out more about clearing or to contact our hotline please visit our webpages during the clearing period www.uea.ac.uk

DEFERRED ENTRY AND A YEAR OUT

Taking a year out between school and university to travel, volunteer or gain work experience can really benefit your future. At UEA we welcome applications for deferred entry. If you are applying for deferred entry, please make sure to tell us how you are going to spend your gap year in your personal statement. To find out more contact the Admissions Office on +44 (0)1603 591515 or email admissions@uea.ac.uk

For a complete list, please visit www.uea.ac.uk/lang-require

INTERNATIONAL APPLICANTS

We welcome international students as a vital part of our diverse community. We accept a large number of international qualifications, and as with applications from the UK, each application is carefully assessed on an individual basis.

To join UEA, international applicants will need to prove proficiency in the English language, usually through:
- International English Language Testing System (IELTS) test: overall band score of 6.0 with no less than 5.5 in any component
- GCSE or GCE Ordinary level English language: grade C or above
- Cambridge English exams (First, Advanced, Proficiency) with a minimum score of 169
- A minimum overall score in the Pearson Academic English Test of 55, with 51 in each component.

For more information about the requirements for direct entry to UEA may be eligible for the INTO University of East Anglia International Foundation or International Year One programmes: see page 37 for more information.

To find out more about studying as an international student turn to page 34.

University applications: important information

The UCAS code name and number for UEA is EANGL E14.

Titles and UCAS codes for our courses are listed on pages 56-177.

For entry in September 2016, your application should be sent to UCAS after 1 September 2015.

If you are applying to study medicine or including Oxford and Cambridge in your application your application should be sent by 15 October 2015.

For all other candidates your application deadline is 15 January 2016.

Any questions about the application process should be made by telephoning UCAS on +44 (0) 371 468 0468 or emailing enquiries@ucas.ac.uk

Good luck!
OUR COURSES

At UEA our courses aren’t just about getting a degree. Studying at UEA means daily opportunities to investigate, discover and challenge the world around you through the lens of your chosen subject. Combining critical thinking and creative practice, attentive lecturers will excite and encourage you to apply what you learn in the classroom to the world around you.

“Students appear to like the scale of this relatively small campus university, as well as the quality of its courses”
The Times Good University Guide 2015
Learn from experts whose teaching is informed by both research and real-world business experience. This means you benefit from insights into the latest business issues and debates faced by employers.

**BSc Accounting and Finance**

**UCAS code:** N400

**ABOUT YOU**

You do not need to have previously studied business to join our programmes; everyone is welcome. You will be considered for a place on your individual merits. We are passionate about business and look to recruit students who share our enthusiasm.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

**ABOUT THE COURSES**

At Norwich Business School you are able to tailor your degree to match your career ambitions in a supportive and stimulating learning environment. All of our business degree courses build on a common set of modules studied in the first year. Whichever degree you choose you will begin by gaining a grounding in all core business disciplines, including financial and management accounting, organisational behaviour, economics for business, the principles of marketing, and how to develop your business skills.

Then as you progress through your chosen degree, you will be able to specialise and tailor your studies to areas that you find particularly interesting and relevant for your future career development. This innovative structure provides you with the flexibility to transfer to a different degree offered by Norwich Business School prior to beginning your second year should your interests change.

You can gain certain examination exemptions from the Institute of Chartered Accountants in England and Wales, the Association of Chartered Certified Accountants, and the Chartered Institute of Management Accountants. We work very closely with these professional bodies and our degrees are structured to maximise the number of exemptions gained.

**BSc Accounting and Finance**

In addition to the accountancy profession, this course provides an excellent Foundation if you plan to follow a career in commerce, industry or financial services such as banking, fund management or insurance.

After gaining a grounding in core business disciplines, you will learn the theory and practice of financial accounting and reporting. You will then develop your understanding of business finance and accountancy, as well as contract and company law.

As you progress, you will focus on more advanced modules designed to prepare you for your future. You can study Advanced Financial Accounting, Advanced Management Accounting, Audit and Accountability, Personal and Corporate Taxation and Advanced Finance. In your second and final years, you will also have the opportunity to choose optional modules according to your personal interests and career aspirations.

**A level (typical offer):** ABR, excluding General Studies

**International baccalaureate:** 32

**Length of course:** 3 years

---

**BSc Accounting and Management**

Study to be a management accountant. This degree is designed for students looking to study a professionally accredited undergraduate course in accounting, alongside the theory and practice of management.

After gaining a grounding in core business disciplines, you will focus on progressing your management, teamwork and personal development skills, and learn the theory and practice of financial and management accounting, reporting and decision making. You will also develop your understanding of human resource management, operations strategy and management.

As you progress, you will focus on more advanced modules, preparing you for your future. You will study Advanced Management Accounting, as well as Strategic Management. You will also have the opportunity to tailor your degree by choosing from a range of exciting optional modules according to your personal interests and career aspirations.

**BSc Business Finance and Management**

Prepare for a career in the financial services industry and learn about the financial aspects of all organisations. You will study the key principles of business finance, financial management, financial modelling and the operation of financial markets alongside other core management disciplines.

You will start with a grounding in all core business disciplines, before progressing to take modules related to your specialism. These include Introduction to Financial Management Accounting, Organisational Behaviour and Economics for Business. Through your studies you will gain a solid understanding of the principles of marketing as well as developing your business skills.

As you progress, you will specialise further through modules in Business Finance, International Business and Quantitative Methods used for analysing and solving problems, and you will continue to develop your management skills.

In your final year, you will take more advanced modules and develop a solid understanding of modern finance theory and practice. You will learn the critical issues in making and analysing investment decisions. You will also explore financial intermediation and banking in an international context with emphasis placed on assessing performance, evolution and regulation of banks and related institutions. And you will develop the skills needed to analyse financial models using real datasets including models of valuation, capital appraisal, portfolio choice and risk management.

You will also have the opportunity to choose other optional modules according to your personal interests and career aspirations.
WHERE NEXT?

Our employability record is very strong. Only six months after graduation, more than 90 per cent of our recent graduates were in employment or higher education and over 70 per cent in professional and managerial jobs.

Employability is incorporated into every aspect of our curriculum. Norwich Business School works with the University’s Careers Service to provide a School specific Employability Week in the first semester every year. The week is open to all students and provides you with access to graduate recruiters from across multiple sectors such as IT, global finance and consulting. Representatives from professional bodies, companies and organisations are invited to share their experiences and knowledge with our students and give their advice on how to start a chosen career. Events include a mock assessment centre run by a global recruiter, sessions on developing interview skills, CVs, selling yourself and CV-improving volunteering opportunities.

We also work with local and national employers to embed employability within the curriculum. This takes the form of anything from guest lectures to authentic assessment of work-based problems. We have also introduced a number of employability prizes where employers also provide opportunities to compete for cash prizes by encouraging students to present business briefs within a boardroom context.

Some of our graduates choose to take up professional training with accountancy firms including EY, PwC and Lovewell Blake. Others go on to successful careers in banking, investment and insurance industries including Credit Suisse, Marsh and Barclays. Our degree courses also prepare graduates for working in the finance function of businesses.

Graduate Trainee Management Scheme

After graduation you can apply for a paid nine-month initial graduate trainee placement as part of our innovative Graduate Trainee Management Scheme. Created in partnership between us and local employers, this features a number of exciting placements that are ring fenced for our graduates. The scheme works akin to a sandwich placement scheme, but rather than undertaking work experience in a third year of a four-year degree, you can complete your placement after graduation. In many cases this leads to permanent employment after the initial nine months. Our Graduate Trainee Management Scheme is available to students who meet a certain level of academic requirement during their studies and who are eligible to work in the UK.

IN THE 2014 NATIONAL STUDENT SURVEY WE RANKED THIRD FOR TEACHING AND JOINT THIRD FOR OVERALL SATISFACTION IN BUSINESS STUDIES OUT OF ALL ENGLISH MAINSTREAM UNIVERSITIES, WITH A 96 PER CENT SATISFACTION SCORE
ACTUARIAL SCIENCES

Prepare for a stimulating and influential career, engage with real-world business problems and be taught by professional actuaries thanks to our strong industrial links with global insurance giant, Aviva.

ABOUT YOU
Already a strong mathematician, you will be working towards the highest A level or equivalent in mathematics. You will be curious about a profession which deals with the financial impact of risk and uncertainty, and evaluates the likely impact of future events, using strong communication and teamwork skills.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

BSc Actuarial Sciences
The course combines depth of study with an excellent preparation towards becoming an actuary. It will develop your appreciation of recent actuarial developments and practice, and of the links between the theory of the subjects and their practical application in industry. The first two years are devoted to learning mathematical skills in the School of Mathematics; computing, statistical and practical actuarial skills in the School of Computing Sciences and business and management skills in Norwich Business School.

Professional development continues into the final year with a module partly presented by actuaries from Aviva.

BSc Actuarial Sciences with a Year in Industry
Students opting for this degree programme spend their third year in a business/commercial environment, working alongside actuaries so that they gain awareness of the application of technical concepts in the workplace.

This version of the degree is strongly recommended, as our industrial links with global insurance giant, Aviva.

One of our closest collaborations is with Aviva, one of the largest insurance companies in the world, who participate in teaching and provide placements.

This opportunity allows you to learn more about the work of actuaries and potential career paths as well as apply your knowledge.

BSc Business Information Systems

Due to high demand for graduates with IT qualifications and experience, including mature students.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT US
These multidisciplinary courses draw on the expertise across the Schools of Computing Sciences, Mathematics, Economics and Norwich Business School.

As much of our work is concerned with real-world applications, we also have excellent links with industry both for our teaching and research.

One of our closest collaborations is with Aviva, one of the largest insurance companies in the world, who participate in teaching and provide placements.

This opportunity allows you to learn more about the work of actuaries and potential career paths as well as apply your knowledge.

WHERE NEXT?
On successful completion of the BSc Actuarial Sciences and BSc Actuarial Sciences with a Year in Industry, subject to academic performance, you may earn exemptions from the first eight (CT1-CT8) of the professional actuarial examinations set by the Institute and Faculty of Actuaries.

That means that if you graduate with a good class degree you can expect to be fully qualified within two or three years with the potential to earn a salary as a fully qualified actuary. Our graduates go on to pursue stimulating and influential careers in a wide range of sectors, including business, insurance, pensions, banking, accounting and other financial services.

We work with the University’s Careers Service to offer support to students at every stage of their course, from choosing a career through to applying for graduate jobs.

One of our closest collaborations is with Aviva, one of the largest insurance companies in the world, who participate in teaching and provide placements.

This opportunity allows you to learn more about the work of actuaries and potential career paths as well as apply your knowledge.
Join the UK’s leading American studies course and gain invaluable academic and cultural experience by spending a year in an American or Canadian university. Choose to study abroad from our list of over 40 exchange partners in the USA and Canada. Additionally, opt to spend one semester in Australia, New Zealand or Hong Kong.

**BA American Studies**

UCAS code: T701 and T700

A level (typical offer): AAB, preferably including English and/or History.

Length of course: 3 years full time or 5-7 years part time (T701); 4 years (T700)

Study abroad: No for T701, Yes for T700

- **Typical offer grades** are for guidance only. Find out more at [www.uea.ac.uk/enu/courses](http://www.uea.ac.uk/enu/courses)

**About You**

You will be working towards three A levels (or equivalent) including English Literature and/or History.

You will be excited about a course that’s engaging, world-leading and could include a year studying abroad. You will be open to learning from new cultural experiences in your studies and future career.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

**About the Courses**

You will learn through participation in lectures, smaller seminars and tutorials as well as public ‘discussion cafes’, internet blogging and filmed ‘visual essays’. You will also have the opportunity to spend a year studying abroad – an option that’s proved as popular with future employers as it has with students themselves. For more information see page 27.

**BA American Studies**

Engage with diverse forms of cultural expression as you study American history, literature, politics and film. You will study literary texts, political and historical documents, bestsellers, music, movies, photography, popular culture and material culture.

After a grounding in core modules in American studies, you will begin to shape your own degree by choosing from a wide range of topics such as: The Beats and the Limits of Writing; Civil Rights History; Adolescence in American Culture; American Music; Looking at Pictures; Photography and Visual Culture in the USA; and Native American Writing and Film.

In your final year, you will take advanced seminars in subjects such as: American Violence; American Drama; The American Body; and The New American Century. You may also take a year-long ‘special subject’ module in American history focusing on topics such as: American Slavery; the Civil Rights Movement; Native American History; or the Cold War and American Society.

Finally, you will write a research dissertation on a topic of your choice, supervised by a member of faculty in the Department of American Studies.

**BA American Studies with a Foundation Year**

UCAS code: T70A

A level (typical offer): CCC

International baccalaureate: 33, including HL English at grade 5 or above

Length of course: 4 years

Option to study abroad: Yes

**BA American and English Literature**

UCAS code: T7Q3

A level (typical offer): AAB, including English Literature

International baccalaureate: 33, including HL English at grade 5 or above

Length of course: 4 years

Study abroad: Yes

**BA American Literature with Creative Writing**

UCAS code: T7W8

A level (typical offer): AAB, including English Literature

International baccalaureate: 33, including HL English at grade 5 or above

Length of course: 4 years

Study abroad: Yes

**BA American Studies with a Foundation Year**

Gain the skills, knowledge and confidence you need to progress to the degree programme. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to achieve your goals. All modules are taught via lectures, presentations, seminars and study groups and incorporate a variety of assessment methods, preparing you for the different type of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as: essay writing; research; preparing and giving presentations; and understanding and evaluating scholarly arguments.

**BA American and English Literature**

Study the works of American writers whilst also expanding your knowledge of English literature.

In your first year you will gain a good grounding by studying the central texts of American and English literature. You will go on to shape your own degree by choosing from a wide range of seminars on American topics such as: The Beats and the Limits of Writing, American Drama 1945-1970; and Twentieth-Century Poetry alongside English topics such as Shakespeare and Modernism.

In your final year, you will progress to advanced seminars in subjects such as: The Literary 1960s; American Gothic; and Post-Colonial Theory and Writing. You will also write a research dissertation on a topic of your choice, guided by your UEA supervisor.

**BA American Literature with Creative Writing**

Study the literature of the United States whilst developing your talent as a creative writer.

UEA’s creative writing courses are world renowned and have produced some of the finest writers of the last 30 years. Our American studies course is also one of the UK’s leading programmes. On this degree you will benefit from teaching from both departments.

Alongside studies of American literature, in your first year you will increase your ability to initiate and develop new creative material through technical exercises, group discussion and the exploration of strategies for drafting and re-drafting new work. In your second year, modules cover the writing of poetry, fiction and drama, and the advanced final year module is a foretaste of the MA in Creative Writing.
BA American History
Focus your studies on the history of the United States and its people, its emergence as a world superpower and its influence on global culture.

Track the American story from Native American history, the Revolution and the world of enslaved communities in the Old South, through to the struggles of black Civil Rights activists and the crucial decisions of Presidents who, by the atomic age of the Cold War, held the fate of humanity in their hands.

As your studies progress you will be able to tailor your course to your interests, taking an in-depth look at your choice of major topics such as the CIA, the Supreme Court, the Civil Rights movement, the American city, and gender and popular culture in America. During your final year, you can also take a long ‘special subject’ module in American history for which you can specialise in topics such as: American Slavery, Native American History, or the Cold War and American Society.

You will also write a research dissertation on a topic of your choice, supervised by a member of faculty in the Department of American Studies.

You will graduate with a unique understanding of how the world we live in today has been shaped by this young nation, the United States.

BA American Studies, BA American and English Literature, BA American Literature with Creative Writing or BA American History with a Year Abroad
All of these courses are offered as four-year programmes in which you have the option to spend your third year in the United States or Canada, with the possibility of a second semester in Australia or New Zealand. You then return to UEA for your final year.

We currently have exchanges with over 40 North American universities, more than any other UK university. You will be able to choose from institutions in California, Vancouver, Philadelphia, Washington DC, New York State and more.

Whilst abroad you will be able to choose from the range of modules on offer at your host university, pursue research for your final-year dissertation, and fully experience life in North America. For more information see page 27.

WHERE NEXT?
You will graduate ready for a career in a broad range of sectors, including journalism, the media, management training, teaching, the Civil Service, film production, advertising and publishing.

Or you could choose to follow the large number of our graduates who go on to study at postgraduate level.

ABOUT US
The Department of American Studies at UEA is a pioneering centre for teaching and research in the history, literature and culture of the United States of America. We have led the way for over 50 years and we continue to be at the forefront of American studies, questioning and re-defining the boundaries of the subject.

American Studies has come fifth in the UK with over 70 per cent of its research rated ‘world-leading’ or ‘internationally excellent’ (Research Excellence Framework 2014).

As a student of American studies, literature or history at UEA, you will be part of a community of scholars whose work is shaped by their ongoing engagement with life and scholarship in the United States.

You will be taught by staff who are world experts in their area and whose research defines the field of American studies today. We have particular strengths in African American and Native American history and literature, in regional and trans-national American cultures, and in literature from Mark Twain to emerging contemporary writing. We range across autobiography, poetry, novels, films, and visual and material culture. Through our work we interrogate categories of race, class, gender, sexuality, age, and explore the burning issues of the contemporary world, from religion to free speech, from the environment to the limits of post-racial democracy.

The Department’s research centre, the Arthur Miller Centre, promotes American studies throughout Europe and organises an annual International Literary Festival. This has bought major writers from around the world to the University, including Arthur Miller, Norman Mailer, Kurt Vonnegut, Joseph Heller, Andrea Levy, Richard Ford, Toni Morrison, Stephen Fry, Germaine Greer, Seamus Heaney, Salman Rushdie, Zadie Smith and Jay McInerney.

UEA SCORED 100 PER CENT OVERALL FOR AMERICAN STUDIES AND MORE THAN 95 PER CENT OF STUDENTS SAID THEY WERE SATISFIED WITH THEIR COURSE, ACCORDING TO THE GUARDIAN UNIVERSITY GUIDE 2015
**ART HISTORY**

Study in a department based in the Sainsbury Centre for Visual Arts on campus, where the facilities include world-class art collections, major exhibitions and a dedicated art library.

**ABOUT YOU**
You will be working towards three A levels (or equivalent). These could be in any subjects but at least one should involve formal essay writing. You should be interested in art, but do not need to have studied the subject previously. We welcome students with non-traditional qualifications and experience, including mature students.

**ABOUT THE COURSES**

**BA History of Art**

**UCAS code**: V150

**A level (typical offer)**: AAB

**International baccalaureate**: 33

**Length of course**: 3 years full time, 5-7 years part time

**Option to study abroad**: Yes

Complement your History of Art degree with a year studying at a university in the United States of America, Canada, Australia or New Zealand. Whilst abroad, you may benefit from any of the modules on offer to you at your host institution, which means this degree offers exceptional flexibility and breadth of art-historical training. For more information see page 27.

**BA History of Art with a Foundation Year**

**UCAS code**: V152

**A level (typical offer)**: CCC

**International baccalaureate**: 28

**Length of course**: 4 years

**Option to study abroad**: Yes

Gain the skills, knowledge and confidence needed to progress on to the degree programme with a foundation year. In your first semester you will take two compulsory modules – Humanities: Techniques and Methods, and Humanities: The Key Concepts. These will introduce you to a wide range of texts, theories and research methods and allow you to explore the various uses of humanities research. You will also take a module introducing you to Media Technologies or humanities; History and Society; Introduction to Visual Cultures and What is Politics? This allows you to tailor your studies to your interests and chosen progression route even before you progress to your degree.

In the second semester you continue to study Humanities: The Key Concepts and will choose two additional modules from the following: Literature and the Humanities; History and Society; Introduction to Visual Cultures and What is Politics? This allows you to tailor your studies to your interests and chosen progression route even before you progress to your degree.

**BA History of Art with Gallery and Museum Studies**

**UCAS code**: V151

**A level (typical offer)**: ABB

**International baccalaureate**: 32

**Length of course**: 3 years full time, 5-7 years part time

**Option to study abroad**: Yes

Gain substantial art-historical expertise, as well as the knowledge required to understand how art and heritage are and have been displayed and curated. You will study the history of art and the ways in which art has been displayed in galleries and museums from the Renaissance through to the present day. While becoming familiarised with major issues and themes, in art history, you will also be introduced to diverse forms of curatorial practice and display, as well as important issues such as exhibition design, audience development and the public role of museums.

Alongside modules on the analysis of visual and material culture, and the history of art, you will be introduced to the history of museums and galleries, and to contemporary gallery theory and practice. Your studies will include modules taught on-site at the Sainsbury Centre for Visual Arts, the Norwich Castle Museum, and museums and galleries in London.

In your final year, you will further explore contemporary curatorial practice. You will also complete a dissertation relating to the history of art and museums – an aspect of the course that has proved a useful preparation for students wishing to progress to postgraduate study.

**BA Archaeology, Anthropology and Art History**

Combine archaeological, anthropological and art historical approaches to art with this innovative degree. You will study a wide range of material, from the prehistoric through to the present day, and from diverse cultures and societies. As well as introductions to archaeology, anthropology and material culture studies, you will be given the opportunity to develop your own interests. You will learn about the art and archaeology of the Ancient Near East, Ancient Egypt, pre-Columbian America and Japan, as well as the art and material culture of African, Asian, European, Pacific, and North and South American societies.

You will explore a wide range of cultures and cultural forms, and consider art as a cross-cultural practice, thereby familiarising yourself with the varied ways in which human creativity has been approached by art historians, anthropologists and archaeologists.

At the Sainsbury Centre for Visual Arts you will have access to a world-famous collection of artworks from Asia, Africa, the Pacific and the Americas, as well as Europe. You will be able to study relevant objects freely and at first-hand, whilst also learning about the processes of collecting that situated such objects in museums.

You will develop your practical skills of archaeological and anthropological field work through participation in excavations and projects, in the UK and overseas (most recently, Cyprus, Cordoba and Peru). You may also take advantage of the Erasmus programme to study at a European university such as Pisa or Berlin. For more information see page 27.

**BA Archaeology, Anthropology and Art History**

**UCAS code**: V35F

**A level (typical offer)**: V354

**Option to study abroad**: Yes

BA Archaeology, Anthropology and Art History with a Year in Australasia or North America

Complement your BA Archaeology, Anthropology and Art History degree with a year abroad at one of our prestigious partner universities in the United States, Canada, Australia or New Zealand. You could spend your third year exploring the contemporary art scene in San Francisco, studying Aboriginal art in Sydney, or visiting Native American museums in Vancouver, while being taught at a university department in one of these cities. You will then return to complete your degree at UEA in your fourth year. For more information see page 27.

BA History and Art History

This degree is therefore provided you with a wide-ranging and rigorous understanding of past lives and cultures, as they have been interpreted by historians and art historians alike.

Modules in art history include many opportunities to study works of art and artefacts first-hand, whether in the Sainsbury Centre for Visual Arts or on trips to London, Cambridge, and other cities in the UK and overseas.

Throughout your course, you will study the two disciplines of history and history of art in parallel, taking modules offered by both departments. In your art-historical studies you will examine art as it has been practised in Europe and North America, as well as Asia, Africa, South America and the Pacific, from the prehistoric period through to the present day. In your historical studies you will engage with European, American and Russian history over a wide-ranging chronological span. As you progress to your second and third years, you have the option to weight your studies slightly towards history or art history.

WHERE NEXT?
You will graduate ready to progress to a career or to further postgraduate study. Over 90 per cent of our graduates are in one or the other within six months of graduating (HESA DLHE Survey).

While many of our graduates also go into careers in areas such as teaching, business and law, others pursue careers directly related to their degree, such as careers in academia, museums, galleries, journalism and publishing, arts administration, archaeology, conservation and the commercial art world.

ABOUT US
You will be taught by staff who are leading researchers in their fields. Additionally, the impact of our research was rated the second highest in the UK in the Times Higher Education (REF 2014) rankings. We focus on four main research areas: the history of art and architecture in Europe and North America; the arts of Africa, Asia, Oceania and South America; the archaeology and anthropology of art; and museum studies and cultural heritage.

The department forms part of the highly respected Sainsbury Institute for Art, which includes the Sainsbury Centre for Visual Arts, the Sainsbury Research Unit for the Arts of Africa, Oceania and the Americas, the Sainsbury Institute for the Study of Japanese Arts and Cultures, and the Institute of World Archaeology.

You might also be interested in

This degree will provide you with knowledge and skills of archival and visual analysis essential to the proper study of the past.

BA Archaeology, Anthropology and Art History with a Year in Australasia or North America

UCAS code VOUK
A level (typical offer): AAB
International baccalauricate: 32
Length of course: 4 years
Option to study abroad: Yes

BA History of Art and Literature

UCAS code V037
A level (typical offer): ABB, including English Literature or combined English Language and Literature
International baccalauricate: 32, including HL English grade 5 or above
Length of course: 3 years
Option to study abroad: Yes

BA History and History of Art

UCAS code V013
A level (typical offer): ABR, History preferred
International baccalauricate: 32, including HL History grade 5 or above
Length of course: 3 years
Option to study abroad: Yes

Typical offer grades are for guidance only.
Find out more at www.uea.ac.uk/art-history/courses

You will work between the Department of Art History and World Art Studies and the School of Literature, Drama and Creative Writing, learning from the internationally-renowned expertise available in both.

This degree combines study of art and architecture with close analysis of literary texts. This enables you to expand your knowledge of these two central forms of human culture and to develop strong skills of visual and verbal analysis.

After building a firm foundation in both subjects in the first year, you can choose to weight your studies slightly towards art or literature during your second and third years. You will learn about key issues and approaches in art history, such as different artistic techniques, the social functions of art and the history of art exhibitions. You will also study the history and theory of literature from Chaucer and Shakespeare through to the present day. Seminar modules offered by both departments will help you to understand the changing relationship between art and literature. You will also benefit from many opportunities to study works of art and artefacts first-hand, in the Sainsbury Centre for Visual Arts or on trips to London, Cambridge, and other cities in the UK and overseas.

In your third year you will complete a 9,000-word dissertation, on the interdisciplinary topic of your choice, with supervision from a faculty member from each department.

BA History and Art History

Gain an in-depth knowledge of both art and history, enabling you to explore these distinct yet deeply interrelated disciplines through simultaneous study in the Department of Art History and World Art Studies, and the School of History.

This degree draws on the substantial resources of two centres that are renowned for excellent teaching in history and art history. You will learn about the changing relationship between art and history. You will also develop the skills of archival and visual analysis essential to the proper study of the past.
**BSc Biochemistry**
UCAS code: C700
A level (typical offer): AAB, including Chemistry and one other Science or Mathematics.
International baccalaureate: 32, including HL Chemistry at 5 and one other HL in Science or Mathematics at 5.
Special requirements: Grade B in GCSE Mathematics.
Length of course: 3 years

**BSc Biochemistry with a Year in Industry**
UCAS code: C720
A level (typical offer): AAB, including Chemistry and one other Science or Mathematics.
International baccalaureate: 33, including HL Chemistry at 6 and one other HL in Science or Mathematics at 6.
Special requirements: Grade B in GCSE Mathematics.
Length of course: 4 years

**MSci Biochemistry**
UCAS code: C701
A level (typical offer): AAB, including Chemistry and one other Science or Mathematics.
International baccalaureate: 33, including HL Chemistry at 6 and one other HL in Science or Mathematics at 6.
Special requirements: Grade B in GCSE Mathematics.
Length of course: 4 years

**MSci Biochemistry with a Year Abroad**
UCAS code: C72A
A level (typical offer): AAB, including Chemistry and one other Science or Mathematics.
International baccalaureate: 33, including HL Chemistry at 6 and one other HL in Science or Mathematics at 6.
Special requirements: Grade B or above in GCSE Mathematics and GCSE grade B in the language of your chosen country, if studying in Europe.
Length of course: 4 years

**ABOUT YOU**
You will have a strong background in chemistry, be enthusiastic about applying this practically to the study of biological mechanisms and excited about the fundamental impact biochemistry has on many areas of contemporary science. To find out how you will thrive here, we invite all suitably qualified applicants to one of our Applicant Days for a tour of the campus and laboratories and to meet staff and current students. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

**ABOUT THE COURSES**

**BSc Biochemistry**
The key feature of these programmes is the flexibility and choice we offer. You can tailor your degree to match your own interests and career aspirations. You will learn the fundamentals of biology and chemistry that underpin the study of biochemistry, then choose from a broad range of modules encompassing cell and molecular biology, medicinal chemistry, genetics, protein engineering and microbial biotechnology.

There are currently more than 25 modules available including: Communication and Transport Across Biological Membranes; Protein Structure and Chemistry; Molecular Plant-Microbe Interactions; Genomes, Genes and Genomics.

In your final year, you’ll have the chance to further develop your laboratory and technical skills with an independent research project in a unique area of science, which can lead to publication.

**BSc Biochemistry with a Year in Industry**
In addition to the above, you’ll also spend a year working in industry, gaining experience that will be highly valued by future employers. We have established research links throughout the UK and beyond, and will help you in identifying and competing for appropriate industrial opportunities. These might be in pharmaceutical companies, biotechnology, hospital or research institute laboratories. During your placement you will be supported by both an industrial supervisor and a mentor from the University.

**MSci Biochemistry and MSci Biochemistry with a Year Abroad**
In addition to your choice of the above courses, you will complete a further year of advanced study. You will undertake a year-long independent research project, as well as having the opportunity to study advanced biochemistry modules at Master’s level. This is the ideal preparation for progressing onto PhD study and a successful research career.

As a student on our year abroad programme you enjoy the experience and career benefits of living and studying abroad in your third year. We currently have exchange agreements with universities in North America, including California, Illinois, Massachusetts, Colorado and Missouri in the US, and in British Columbia, Western Ontario and Calgary in Canada. For more information see page 27.

**WHERE NEXT?**
A degree in biochemistry leads to a broad range of employment and postgraduate opportunities. You may go on to work in forensic science, the brewing and food industries, medical biochemistry, science patenting or teaching.

As well as going into these industries, about a third of our graduates progress to higher degrees, with a number then taking up posts in university, medical or industrial research laboratories. We work together with the University’s Careers Service to offer support to students at every stage of their course, from choosing a career through to applying for graduate jobs and further study.

**ABOUT US**
Our biochemistry degrees are taught jointly by the Schools of Biological Sciences and Chemistry. This dual approach means that for all elements of the course you benefit from subject specific experts who inform our undergraduate teaching.

Our research makes use of a wide array of facilities such as high-field nuclear magnetic resonance spectrometers and X-ray diffractometers, liquid and gas chromatography systems, electron paramagnetic resonance and magnetic circular dichroism spectrometers and fluorescent and electron microscopes.

In the latest Research Excellence Framework (REF 2014) 100 per cent of our biology research environment and impact was judged to be ‘world-leading’ or ‘internationally excellent’ and our chemistry research output was ranked fourth in the UK.

Our record with impressing our students mirrors this strength, and in the 2014 National Student Survey, we were in the top five out of all mainstream English universities for student satisfaction for both chemistry and biology.

Our vision is to support equality of opportunity and to work with our students to achieve this. We have a proactive and robust equality and diversity programme that we continuously monitor and improve. We promote an inclusive environment and outlook and we actively encourage applications from all candidates, regardless of their background.

Please make sure you read all of the information on our website. We are keen to provide equality of opportunity and to ensure all students have equal access to our courses.

**We give you the opportunity to understand life from the molecular level, through cells, tissues and organs, up to populations and ecosystems. Learn from leading research scientists, in their fields of specialist study.**

We are at the front line of understanding the biological sciences, continually working on further discoveries about the world around us. 100 per cent of our biology research is internationally recognised in the latest Research Excellence Framework 2014. Our students support this, ranking us joint first for biology in the UK with 100 per cent satisfaction in the 2014 National Student Survey.

**BSc Biological Sciences**  
UCAS code C103  
A level (typical offer): AAB, including Biology  
International baccalaureate: 33, including HL Biology at 6 and one other HL subject at 6  
Length of course: 4 years  
**Special requirements:** Grade B in GCSE Mathematics

**BSc Biological Sciences with a Year Abroad**  
UCAS code C10C  
A level (typical offer): AAB, including Biology  
International baccalaureate: 33, including HL Biology at 6 and one other HL subject at 6  
Length of course: 4 years  
**Special requirements:** Grade B in GCSE Mathematics and grade B in the language of your chosen country, if studying in Europe

**ABOUT YOU**  
You will already have a passion for biology, with the required academic results to support this. You will be prepared to engage with our cross-discipline approach to build your future in the biological sciences.

We encourage applications from students with A levels, IB, Access courses, BTECs, or professional qualifications, and will consider a variety of alternatives as equivalent to our stated entry requirements. Our Biology with a Foundation Year programme is a great choice if you do not meet the academic requirements for our other courses.

**ABOUT THE COURSES**  
Biology is a hands-on subject and we place emphasis on practical classes, training in relevant scientific techniques, the testing of ideas by experiment and field work where appropriate. In our teaching laboratories you will have the chance to learn these skills in world-class facilities using state-of-the-art equipment.

Much of our teaching is through lectures, seminars, tutorials and workshop sessions, and you will typically benefit from more than 20 contact hours per week.

**BSc Biological Sciences**  
You will have the chance to explore a broad range of subjects in your first year across all areas of biology, including genetics, biotechnology, evolutionary biology, microbiology and ecology. Then, later, you can tailor your course to your own interests or specialise in cell biology or biology with science communication. Alternatively, subject to satisfactory academic performance, you can transfer onto the MSci Biological Sciences or BSc Molecular Biology and Genetics.

**BSc Biological Sciences with a Year Abroad**  
Enhance your study with a year studying abroad. Choose from:

- Australasia – current exchange partners include: Murdoch University, Perth; Macquarie University, Sydney; and University of Auckland, New Zealand.
- North America – we currently have exchange agreements with US universities in California, Colorado, Florida, Illinois, Kansas, Maine, Missouri and Oregon. We also have exchange partners in Canada, which currently include universities in British Columbia and Ontario.
- Europe – if you choose the European exchange programme, you will take appropriate language modules during the second year, in preparation for a year spent in France, Italy, Germany or Spain. Students studying with our partners in the Netherlands and Sweden will be taught in English. Learning a second language and the experience of living and studying in Europe have proved a valuable asset to our graduates. For more information see page 27.

**BSc Biological Sciences with a Year in Industry**  
UCAS code C104  
A level (typical offer): AAB, including Biology  
International baccalaureate: 33, including HL Biology at 6 and one other HL subject at 6  
Length of course: 4 years  
**Special requirements:** Grade B in GCSE Mathematics

**MSci Biological Sciences**  
UCAS code C106  
A level (typical offer): AAB, including Biology  
International baccalaureate: 33, including HL Biology at 6 and one other HL subject at 6  
Length of course: 4 years  
**Special requirements:** Grade B in GCSE Mathematics

**Biological Sciences with a Foundation Year**  
UCAS code D199  
**Requirements:** See our website for specific entry criteria. Grade C or above in GCSE English Language and Mathematics  
Length of course: 4 years

Please note we cannot guarantee any student a work placement as this decision rests with potential employers. Although students will be expected to source these placements themselves, support is available from the School staff and the Careers Service. If you have not successfully secured a work placement by the end of your second year you will be transferred onto the three-year BSc programme.

**BSc Biological Sciences with a Year in Industry**  
Benefit from our established research links throughout the UK and beyond, as we help you in identifying and competing for exciting industrial opportunities. These might be in large pharmaceutical companies, small biotechnology laboratories, hospitals or research institutes. During your placement you will be supported by an industrial supervisor and a mentor from the University.

This course is accredited by the Society of Biology.

**MSci Biological Sciences**  
Study plant science or microbiology at an advanced level in this four-year programme. Benefit from collaboration with our partners at the world-class research institutes that form the Norwich Research Park. Here, you will become part of and learn from Europe’s largest team of plant and microbial scientists.

**BSc Molecular Biology and Genetics**  
After the enormous advances made in the last few years, this is the perfect time to study molecular biology and genetics.

Choose to study genes in medicine, biotechnology and agriculture and their application in fields such as microbial or plant molecular biology, cellular signalling and evolutionary biology.

**Biological Sciences with a Foundation Year**  
Gain the skills, knowledge and confidence you need to progress to a degree in a range of biological science specialisations.

During your foundation year you will be assigned an adviser from the School of Biological Sciences who will guide you through your course to ensure your progression on to the degree course of your choice.
WHERE NEXT?

Choose a career in fields such as forensic science, the brewing and food industries, the health service and hospital laboratories, science communication, pharmaceutical companies, intellectual property, teaching, agriculture, ecology and environmental consultancy.

Or, join the third of our graduates who progress to higher degrees, often taking up posts in university, medical or industrial research laboratories.

The School of Biological Sciences works together with the University’s Careers Service to offer you support at every stage of your course, from choosing a career through to applying for graduate jobs and further study.

ABOUT US

More than 220 people are actively involved in research within the School. This effort ranges through the biochemical, molecular and cellular levels to ecological interactions and evolutionary processes. Some research focuses on fundamental processes, for instance on protein structure and microbial energetics, and some is applied research, for example, the study of human and plant diseases and conservation biology. We are leaders in a number of these areas of biological research and you’ll have the opportunity to carry out your final year projects within any of these fascinating fields.

We also benefit from an enviable position as an integral partner of the Norwich Research Park, which is also home to the Norfolk and Norwich University Hospital, and four independent world-renowned research institutes – the John Innes Centre, Institute of Food Research, The Sainsbury Laboratory and The Genome Analysis Centre. As well as housing over 40 science and technology based businesses, the Norwich Research Park is one of Europe’s leading centres for research in food, health and the environment, exposing our students to cutting-edge developments in biology.

“MY YEAR ABROAD IN AUSTRALIA WAS ONE OF THE BEST EXPERIENCES OF MY LIFE. THE WHOLE EXPERIENCE WAS INCREDIBLE AND NOT ONLY GAVE ME THE OPPORTUNITY TO STUDY NEW AND EXCITING THINGS BUT ALSO TO DISCOVER A WHOLE NEW CULTURE AND WAY OF LIFE. I WOULD RECOMMEND STUDYING ABROAD TO ANYONE – IT HAS GIVEN ME MEMORIES THAT WILL LAST FOREVER”

LAURA HANTON,
BIOLOGICAL SCIENCES

**About You**
You will already have a passion for the study of biomedicine, working towards the academic results in biology to support this. You will be prepared to take full advantage of our world-leading research park to build your future in the biomedical sciences.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

**About the Course**

**BSc Biomedicine**
Train in a wide range of modern biochemical techniques and the practice of testing ideas by experiment. Take advantage of teaching laboratories offering state-of-the-art equipment and facilities.

As you progress in your studies, you can undertake a substantial independent research project. You will also have the opportunity to specialise with module options. Popular optional modules include: Cancer Biology; Cell Biology and Mechanisms of Disease; Evolution in Health and Disease; Molecular and Cellular Principles of Development; Molecular Enzymology in Biology and Medicine; Genomes, Genes and Genomics.

**Where Next?**
When you graduate, you will have a comprehensive knowledge of the scientific techniques required for basic research and clinical investigation into human health and disease.

You will graduate ready to pursue a wide range of career paths. You might go on to work in industry, management or teacher training, or become one of a third of our graduates who progress to higher degrees, many of whom go on to take posts in universities, medical or industrial research laboratories.

The School of Biological Sciences works together with the University’s Careers Service to offer support to students at every stage of their course, from choosing a career through to applying for graduate jobs and further study.

**About Us**
You will be taught by leading academic researchers, who are experts in their fields of study. Biomedical scientists and consultants from the Norfolk and Norwich University Hospital also contribute to the teaching of clinical aspects of the course.

Alongside their expertise, you have access to the incredible facilities across our affiliated institutions on campus. This includes the Norwich Medical School and our Biomedical Research Centre, which houses research groups investigating some of the toughest medical challenges of the 21st century including cancer, cardiovascular and neurological disease and antibiotic resistance.
**ABOUT YOU**

You do not need to have previously studied business to join our programmes; everyone is welcome. You will be considered for a place on your individual merits. We are passionate about business and look to recruit students who share our enthusiasm. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

**ABOUT THE COURSES**

At Norwich Business School you are able to tailor your degree to match your career ambitions. You will be given the ability to act upon it. You will also gain the positive and proactive attitudes necessary for management in a range of business environments. The BSc Business Management emphasises the development and enhancement of transferable intellectual and study skills that are highly relevant to business and management careers.

**BSc Business Management**

Prepare for a career in management, with the confidence, self-awareness and business knowledge required to work in almost any organisation, or choose to specialise in a particular area, such as human resources or operations. During your degree you will develop a critical capacity for acquiring knowledge and the ability to act upon it. You will also gain the positive and proactive attitudes necessary for management in a range of business environments.

**BSc Marketing and Management**

Prepare for a career in marketing and branding while still gaining a broad understanding of management. This degree is a great choice if you are interested in working in marketing, advertising, market research, brand consultancy or the marketing function in a wide range of industries. You will study the key principles of marketing, marketing strategy and branding, marketing communications, market research and the behavioural aspects of marketing, alongside core management disciplines. Through your studies you will analyse the strategic role of marketing within an organisation and explore the development and management of brands.

Next you will go on to explore the fundamental concepts, theories, techniques and challenges involved in managing an organisation’s integrated marketing communications mix. In your final year, you will complete your marketing training with modules in Market Research, Consumer Behavior and Strategic Management.
CHEMISTRY

Study chemistry in a setting with a multidisciplinary outlook and an innovative teaching programme. From drug discovery and synthetic chemistry to spectroscopy and biophysical chemistry, our research has earned us a global reputation for quality.

ABOUT YOU

You will already have a passion for chemistry and how it shapes the world around us, and be working towards the required academic results to support this. You will have a curiosity about the way chemicals interact at a molecular level and a desire to understand their impact on every aspect of our lives. You will be keen to take full advantage of our interdisciplinary approach in order to build your future in chemistry and related sciences, including chemical physics and forensic chemistry.

As with all our degrees, we also welcome students with non-traditional qualifications and experience, including mature students. You may have already completed two years of the Open University OpenPlus programme, which enables you to apply to join the second year. Our Chemistry with a Foundation Year is a great choice if you do not meet the academic requirements for our other courses.

ABOUT THE COURSES

Whichever of our degrees you choose, you will benefit from substantial laboratory-based teaching with dedicated weekly practical training allowing you to develop your research skills and experience. You will also develop your skills as a chemist through a combination of traditional lectures, innovative large-group teaching, problem-solving workshops, seminars and small group tutorials of four to eight students.

Transfer between BSc and MChem courses is encouraged depending on marks achieved and topics studied.

MChem Chemistry

Gain the academic training required to become a professional chemist. On this programme, accredited by the Royal Society of Chemistry, you will study all aspects of chemistry and develop strong practical, analytical and problem-solving skills.

Through laboratory classes held in our refurbished teaching laboratories, you will develop your practical skills and learn new techniques using sophisticated instrumentation. In the final years of the programme, you will gain an advanced understanding of your chosen specialist areas of chemistry, culminating in an independent research project.

MChem Chemistry with a Year Abroad

Our year abroad exchange programme is long-established and continues to maintain its popularity with our students. The experience of living and studying abroad has proven a valuable asset to our graduates. We currently have exchange agreements with universities in North America, including California, Illinois, Massachusetts, Colorado and Missouri in the US, in British Columbia, Western Ontario and Calgary in Canada. For more information see page 27.

MChem Chemistry with a Year in Industry

Spend your third year on an industrial placement gaining invaluable first-hand experience of chemistry in the working environment. During your placement you will also complete distance-learning assignments. Placements can be taken in the UK or Europe. On completion of your placement you will return to the University for the final year of your degree.

BSc Chemistry

This three-year programme will develop your core knowledge and skills whilst allowing you to choose optional modules in forensic chemistry, mathematics, physics or environmental science.

As you reach the final year of the programme, you will gain an advanced understanding of organic and inorganic compounds and physical chemistry. In your final year you will also undertake a research or literature-based project in your area of interest.

It is possible, depending on academic performance, to transfer to the MChem Chemistry at the end of your first or second year.

This degree is accredited by the Royal Society of Chemistry.

Chemistry with a Foundation Year

Gain a firm foundation ready for studying a degree in a range of chemistry specialisations, without needing our traditional entry requirements. You can discover more about the criteria for this course on our website. During your foundation year, you will be assigned an adviser from the School of Chemistry who will guide you through your course to ensure your progression on to your degree course of choice.

To find out more about the criteria for this course on our website. During your placement you will also complete distance-learning assignments. Placements can be taken in the UK or Europe. On completion of your placement you will return to the University for the final year of your degree.

Please note we cannot guarantee any student a work placement by the end of your second year you are transferrable onto the standard four-year MChem programme.

Find out more at www.uea.ac.uk/che/courses
MChem Forensic and Investigative Chemistry

Prepare for a career as an investigative scientist, whether in the criminal investigation sector or in a wider investigative or troubleshooting role. You will gain skills that are highly sought after in health care, in the pharmaceutical industry, by environmental and food agencies, in the biotechnology industry, and by the numerous forensic science laboratories worldwide.

Building on our excellence and long history of providing industry with top quality chemists, you will gain all the key knowledge of a good chemistry degree and in addition, you will be exposed to the practical work of forensic science.

You will investigate forensic science topics in workshop exercises designed to mirror casework. You will also be encouraged to collect, analyse and interpret a range of chemical and physical evidence, from glass and footwear to metal and soil and then form your own opinions on the value of that evidence.

Become an outstanding student on this course and you will be given the unrivalled opportunity to study forensic science for a semester at the Florida International University in Miami.

MChem or BSc Chemical Physics

A key feature of this course is its interdisciplinary and coherent approach, which brings together chemistry, physics and mathematics. Chemical physics is an exciting and intellectually challenging area and you will be introduced to topics that reflect its full scope, such as the fabrication and properties of nanoparticles, laser systems and their applications, microsensors, computational modelling and photonics.

This degree programme is formally recognised by the Institute of Physics, and the lecturers involved have internationally-recognised expertise in chemical physics. Modules include theoretical, experimental and computational components.

For the MChem option, as well as following the above programme, you will also conduct an independent project alongside postgraduate and postdoctoral researchers in one of our chemical physics groups.

MChem Chemical Physics with a Year Abroad

Enhance your MChem Chemical Physics degree by spending your third year studying abroad before returning to UEA for your final year. Details of our current exchange partners are available under our MChem Chemistry with a Year Abroad course on page 80. On your return to UEA, you will be able to undertake an independent research project in theoretical, experimental or computational chemical physics. For more information see page 27.

WHERE NEXT?

Join the majority of our graduates who enter into full-time employment. Our graduates go on to work in the UK chemical industry, government or local authority establishments, research organisations, hospitals and water authorities.

Alternatively, study for further qualifications (MSc, PhD or PGCE), and become one of the many who choose to remain at the University.

The School of Chemistry works together with the University’s Careers Service to offer support to students at every stage of their course, from choosing a career through to applying for graduate jobs.

ABOUT US

We are a leading centre for chemistry research in the UK, with 98 per cent of our research ranked as ‘world-leading’ or ‘internationally excellent’ in the 2014 Research Excellence Framework. Key research areas include: physical and analytical chemistry; synthetic chemistry; biological and biophysical chemistry; nanoscience; biomedical chemistry and forensic chemistry. During your final year you will be able to carry out a research project within one of the School’s research groups, or elsewhere on the Norwich Research Park.

We’re proud to say that all of our courses are accredited or recognised by highly respected industry bodies. Our MChem is accredited by the Royal Society of Chemistry (RSC) as satisfying the academic requirements for the award of Chartered Chemist (CChem). Our Forensic and Investigative Chemistry degree has gained accreditation from the Chartered Institute of Forensic Sciences. All of our Chemical Physics degrees are recognised by the Institute of Physics.

We believe in offering each student individual care and guidance. In the 2014 National Student Survey, we achieved an overall satisfaction rate of 96 per cent, putting us joint fifth out of all mainstream English universities.

MChem Chemical Physics with a Year in Industry

Gain invaluable experience by spending your third year on an industrial placement getting first-hand experience of chemistry in the working environment. During this placement you will maintain your academic practice through distance learning assignments. You can take a placement in the UK or the rest of Europe. On completion of your placement, you will return to the University for the final year of your degree to undertake an extended research project in chemical physics.

Typical offer grades are for guidance only. Please note we cannot guarantee any student a work placement as this decision rests with potential employers. Although students will be expected to source these placements themselves, support is available from the School staff and the Careers Service. If you have not successfully secured a work placement by the end of your second year you will be transferred onto the standard four-year MChem programme.
Prepare for your career by joining one of the largest and most experienced computing schools in the UK. Benefit from expertly blended teaching, research, facilities, exciting course modules and close links with industry. Tailor your degree to your future career by choosing optional modules that suit your interests and aspirations.

**BSc Computing Science**

UCAS code: G400

- **With a Year in Industry**
  - UCAS code: G401
  - A level (Typical offer): AB, including at least one of Mathematics, Computing, Physics, Electronics or Economics
  - International baccalaureate: 32, including one HL subject from the preferred list at 5 and one other HL subject at 5
  - Special requirements: Grade B in GCSE Mathematics
  - Length of course: 4 years

- **MComp Computing Science**
  - UCAS code: G400
  - A level (Typical offer): ABB, including at least one of Mathematics, Computing, Physics, Electronics or Economics
  - International baccalaureate: 33, including one HL subject from the preferred list at 5 and one other HL subject at 5
  - Special requirements: Grade B in GCSE Mathematics
  - Length of course: 5 years

**About the Courses**

**BSc Computing Science**

Prepare for a career in the rapidly changing technology of computing. You will acquire a strong grounding in the theory of computing science, as well as gaining experience and skills in software engineering and problem solving.

In your first year you will study the core material that underpins computing science. In your second and third years you will structure your degree from a range of subjects following the research expertise in the School, allowing you to study topics that relate to your own interests and career aspirations.

In your third year, you will further expand your knowledge while undertaking a major individual project.

- Topics of study currently include:
  - Advanced Software Engineering
  - Advanced Computer Graphics
  - Advanced Sound and Image Processing
  - Computer Vision
  - Computational Biology
  - Machine Learning
  - Embedded Systems
  - Information Systems
  - Systems Engineering

**BSc Computing Science with a Year Abroad**

UCAS code: G404

- A level (Typical offer): ABB, including Mathematics
- International baccalaureate: 32, including HL Mathematics at 5 and one other HL subject at 5
- Special requirements: Grade B in GCSE Mathematics
- Length of course: 4 years

**MComp Computing Science**

This four-year programme allows you to gain a greater depth of knowledge. It follows the BSc programme structure for the first three years and culminates with a fourth year of Master’s level modules.

You will gain a solid foundation in programming, problem solving, and relevant mathematics and computing theory.

Then you will develop these themes further through core study in programming, software engineering, data structures and algorithms and operating systems and architectures.

In your final year you will undertake a major research or software development project where you will work as part of a team. This can also be in collaboration with research project partners or industry.

**BSc and MComp Computing Science with a Year Abroad**

Spend either your second year (BSc) or third year (MComp) studying computing science overseas at a university in either Australasia or North America. The University currently has exchange agreements with the University of British Columbia, University of Carleton, Curtin University, Deakin University, Griffith University, University of Missouri, Monash University, University of Oregon, San Francisco State University, University of Technology, Sydney and Simon Fraser University. For more information see page 27.

**BEng Computer Systems Engineering**

UCAS code: H667

- With a Year in Industry
- UCAS code: H667M
- A level (Typical offer): ABB, including at least one of Mathematics, Computing, Physics, Electronics or Economics
- International baccalaureate: 32, including one HL subject from the preferred list at 5 and one other HL subject at 5
- Special requirements: Grade B in GCSE Mathematics
- Length of course: 3 years
- Year Abroad: 4 years

**About You**

You are passionate about computing. You may already be thinking about the future, looking for a degree geared to help you to target the diverse computing job market.

You will be studying for at least one A level in Mathematics, Physics, Computing, Electronics, Economics or, especially if you’re thinking of studying on our business-related programmes, a business-related subject. Alternatively, you may be studying a BTEC in science, computing or mathematics-related subject.

We encourage applications from students with A levels, IB, Access courses, BTECs, or professional qualifications, and will consider a variety of alternatives as equivalent to our stated entry requirements. Our BSc Applied Computing Science with a Foundation Year is a great choice if you do not meet the academic requirements for our other courses.

**McComp Computing Science**

UCAS code: G407

- A level (Typical offer): AAB, including at least one of Mathematics, Computing, Physics, Electronics or Economics
- International baccalaureate: 33, including one HL subject at 5 and one other HL subject at 6
- Special requirements: Grade B in GCSE Mathematics
- Length of course: 4 years

**About the Courses**

**BEng Computer Systems Engineering**

Prepare for a career in the field of computer systems engineering. You will gain a solid foundation in programming, problem solving, and relevant mathematics and computing theory.

Then you will develop these themes further through core study in programming, software engineering, data structures and algorithms and operating systems and architectures.

In your final year you will undertake a major research or software development project where you will work as part of a team. This can also be in collaboration with research project partners or industry.

**BSc and MComp Computing Science with a Year Abroad**

Spend either your second year (BSc) or third year (MComp) studying computing science overseas at a university in either Australasia or North America. The University currently has exchange agreements with the University of British Columbia, University of Carleton, Curtin University, Deakin University, Griffith University, University of Missouri, Monash University, University of Oregon, San Francisco State University, University of Technology, Sydney and Simon Fraser University. For more information see page 27.

**BEng Computer Systems Engineering**

This specialist degree has a practical focus with typically 25 per cent more time in the laboratory than a computer science degree. It has a strong emphasis on programming logic devices and embedded systems. Study this hands-on course if you have a real interest in computing systems, from a software as well as a hardware perspective. The degree combines the study of hardware design and computer architecture with more traditional computing science subjects such as high-level programming and software engineering.

You can choose to deepen your knowledge of computing systems or study wider aspects of computing science such as computer graphics or artificial intelligence. You will gain experience of embedded computing devices that are at the heart of many everyday products and computer networks that enable their processing power to be utilised.

Your final year project provides an opportunity for you to put all that you have learnt into practice and showcase the engineering skills you have acquired.
BSc Business Information Systems

Prepare for a career designing and implementing computerised systems in a business environment. Or learn to become a manager with a full knowledge of the potential of information systems.

Study a combination of subjects in computing, information systems, and business through modules from both the School of Computing Sciences and Norwich Business School.

The course has a customised first year that develops your basic skills in business and information systems. In your second and third years you can choose the balance between computing and business that is most suitable for your interests or career plans.

In your final year you will complete a substantial individually supervised research project. Graduates from this programme are highly sought after and most gain related employment in IT or management consultancy, programming or business analysis.

BSc Computing Science, BEng Computer Systems Engineering or BSc Business Information Systems with a Year in Industry

Any of these three degrees can be chosen as a four-year programme, with a year-long placement in industry in the third year. You will gain valuable work experience in a field closely related to your degree. You will return to the University for the fourth year and your year in industry will count towards your degree.

BSc Computer Graphics, Imaging and Multimedia

Combine your interests in computer graphics, video and sound processing and computing science.

In your first year you will benefit from studying core computer science subjects, alongside optional subjects in either computing or in the field of film, television and media. Your second and third years allow you to specialise in areas such as computer graphics, sound and image processing, or related subject areas, such as video, television studio or music processing.

In your final year, you will undertake a substantial individually supervised project that addresses a particular aspect of graphics, imaging and multimedia.
Join a drama department noted for its work on the theory of performance including improvisation, scriptwriting and directing. Benefit from a fully operating theatre studio space. Get introduced to a range of applied and technical theatre skills as well as basic acting, group work and weekly voice/singing classes. And be part of an outstanding programme of readings and lectures by poets, dramatists, novelists and visiting scholars.

ABOUT YOU
You will be working towards three A levels (or equivalent) including one in English Literature and/or Theatre Studies, as well as another arts/humanities subject. You will also be excited by the prospect of studying in and around a fully operating theatre studio space. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
BA Drama
Benefit from a course that combines a strong practical emphasis with the study of the theory and history of drama. From the start of the first year you will be introduced to a range of applied and technical theatre skills such as safe use of the Drama Studio and aspects of lighting, sound, stage management, workshop skills, costume and stage design, as well as basic acting, group work and weekly voice/singing classes. You will also study the theory, history and social significance of drama, and of dramatic literature and aspects of visual and technical design.

Throughout your course you will gain practical experience. Every year you will have the chance to participate in a major practical project as well as undertaking a wide variety of applied drama work. There is also the opportunity for you to study on placement with a professional venue or company. You may opt to transfer your studies to another European university for one or both semesters of the second year, choosing from universities in countries such as Greece, France, Germany and Switzerland. Alternatively, and depending on the availability of places, you could spend a second year semester at an Australian university, such as Macquarie, Sydney.

As well as working in local theatre, radio and TV companies, many students have made use of the internship option to experience professional work abroad (including India, South Africa, Ghana, Tanzania, Canada, New Zealand and Indonesia) as well as European theatre venues.

In your final year you will complete your degree by synthesising the skills you have acquired and taking part in a large production, centred on a complex text.

BA English Literature and Drama
Study the relationships between the practices of writing in all major genres – prose, poetry and drama – and the practices of dramatic production and acting.

In your first year you will explore contexts and conventions as well as interpretative strategies for a selection of ‘key texts’ and genres. This will equip you to take further seminars in these areas as your studies progress. A spring semester module (currently focusing on Post-War British Drama) leads to performance work with staff and WA Theatre directors.

BA Scriptwriting and Performance
UCAS code 99984
A level (typical offer): AAB, including Drama, Theatre Studies or English Literature. A second arts or humanities subject is preferred
International baccalaureate: 33, including HL English at grade 5
Special requirements: Selection is also by interview and audition
Length of course: 3 years
Option to study abroad: Yes

You might also be interested in 104 BA English and American Literature

You will have the opportunity to gain practical experience. You could choose an internship with a professional venue or company. You may also opt to transfer your studies to another European university for one or both semesters of the second year, choosing from universities in countries such as Greece, France, Germany and Switzerland. Alternatively, and depending on the availability of places, you could spend a second year at an Australian university, such as Macquarie, Sydney.

In your final year you will take a module that brings the two subjects together with a study of the concept of genre, and of the adaptation of literature for the stage.

BA Scriptwriting and Performance
Study creative writing for each of the major dramatic media – theatre, cinema, television and radio – combined with practical, critical and historical studies in dramatic literature and performance.

Throughout your course you will be introduced to the specific formats, conventions and techniques of scriptwriting for different forms, and will learn by writing scenes and short scripts, and critiquing each others’ work. Working alongside students on other drama programmes, you will develop your writing skills in the context of many aspects of theatre work, including acting, rehearsal and production methods.

In your second year you will have the option to take a work placement in a drama-producing organisation or environment. You will also be able to take part in production and practical project work.

WHERE NEXT?
Our graduates have an excellent employment record in all aspects of their field and beyond. When you graduate, you will be qualified for a wide range of graduate-entry jobs; and in particular, you will have skills appropriate to work in the arts and media, such as television production, directing and theatre administration. Some graduates go on to gain professional and vocational qualifications, or to study for a higher degree.

ABOUT US
We are noted for our work on the theory of performance including improvisation, scriptwriting and directing. Textual specialists include classical drama, Shakespeare, Indian drama, and Irish political performance. Over 80 per cent of our research has been rated either ‘world-leading’ or ‘internationally excellent’ in the Research Excellence Framework (REF 2014). Postgraduate work focuses on writing for the stage, directing, and performance theory and practice.
ABOUT YOU
You are excited by the possibilities of studying the science of life’s interactions and how it underpins our understanding of the natural world and conservation. You will be working towards an A level or equivalent in biology, and the required grades.

As with all our courses, we also welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

BSc Ecology
Learn the key concepts of ecology and how organisms behave, evolve and interact with their physical and biological environments with world-leading researchers from the Schools of Biological Sciences, Environmental Sciences, International Development and from the Tyndall Centre for Climate Change Research, which is based at the University.

As you progress, you can steer your degree programme towards your chosen specialism. There are currently more than 20 exciting advanced modules including: Community, Ecosystem and Macro-Ecology; Soil Environments and Processes; Evolutionary Biology and Conservation Genetics; Biodiversity Conservation and Human Society; Population Ecology and Management.

You will also have the opportunity to complete a substantial independent final year research project. Past graduates have taken advantage of East Anglia’s wealth of varied habitats, or have ranged further afield to countries such as Brazil, Australia and Madagascar.

BSc Ecology with a Year Abroad
In addition to the above programme, choose to spend one year studying at a university in Australasia, North America or Europe during your third year. You will then return to UEA to complete the final year of your degree.

Australasia – current exchange partners include: Murdoch University, Perth; Macquarie University, Sydney; and University of Auckland, New Zealand.

North America – we currently have exchange agreements with US universities in California, Colorado, Florida, Illinois, Kansas, Maine, Missouri and Oregon. We also have exchange partners in Canada, which currently include universities in British Columbia and Ontario.

Europe – students on the European exchange programme will take appropriate language modules during the second year, in preparation for the third year spent at a university in Europe. Currently students can visit universities in France, Italy, Germany, Spain or Sweden. The acquisition of a second language and the experience of living and studying in Europe have proven to be a valuable asset to our graduates. For more information see page 27.

WHERE NEXT?
You could go on to a career in ecological research, agriculture and horticulture, environmental management and conservation, environmental consultancy, science communication and engagement, or education. About a third of our graduates progress to higher degrees.

ABOUT US
Teaching in the School of Biological Sciences is research-led and this means that you benefit from the teaching expertise of nearly 50 enthusiastic academic staff, who ensure the most recent scientific advances and new ideas are incorporated into all of our courses. This makes for engaging programmes which are extremely well received by our students. In the 2014 National Student Survey, we achieved an overall satisfaction rate of 100 per cent, putting us joint first in the UK for biology.

Lecturers from our affiliated internationally renowned institutes, such as the British Trust for Ornithology, contribute to our specialist teaching and the Centre for Ecology, Evolution and Conservation (CEEC) at UEA organises regular seminars and workshops from world-leading scientists.

ECOLOGY
Learn from world-leading academics in topics ranging from the molecular genetics of populations, plant science and animal behaviour, to environmental management and environmental aspects of economics and politics.

BSc Ecology
UCAS code C180
A level (typical offer): ABR, including Biology
International baccalaureate: 32, including HL Biology at 5 and one other HL subject at 5
Special requirements: Grade B in GCSE Mathematics
Length of course: 3 years full time, 6 years part time

BSc Ecology with a Year Abroad
UCAS code C18A
A level (typical offer): AAB, including A level Biology
International baccalaureate: 33, including HL Biology at 6 and one other HL subject at 6
Special requirements: Grade B in GCSE Mathematics and GCSE grade B in the language of your chosen country, if studying in Europe
Length of course: 4 years

Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/bio/courses

EcoLoGy
Learn from world-leading academics in topics ranging from the molecular genetics of populations, plant science and animal behaviour, to environmental management and environmental aspects of economics and politics.
ECONOMICS

ABOUT YOU
Aside from the required academic grades, it is important that you are willing to invest in learning economic modelling techniques and in statistical analysis, as these are key tools used to analyse the economy. They are also in heavy demand by employers.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

BSc Economics
This degree will suit anyone interested in the finance side of business and management. You will continue to build on your economic modelling and statistical skills, and have the opportunity to apply and develop these techniques throughout your degree.

As you progress, you will be able to choose modules from a broad curriculum of economic and business disciplines according to your own personal interests and career aspirations.

BA Philosophy, Politics and Economics
You will learn to analyse a given economic, political or social problem using not only economic tools and concepts but also those from political science and philosophy. By mastering these skills, you will be able to present more comprehensive and satisfactory predictions and recommendations.

BA Economics with Accountancy
This degree is relevant to those seeking a solid training in economic analysis and who wish to pursue an accounting career in business or management. Your studies will incorporate core modules from the School of Economics and Norwich Business School. You will take the same economic core as the BSc Economics, whilst specialising in financial accounting, information systems for management and management accounting.

In addition to compulsory introductory modules in economics and business, you will strengthen your understanding of the macro and micro-economy. You will continue to build on your economic modelling and statistical skills, and have the opportunity to apply and develop these techniques throughout your degree.

In your final year, you will take two compulsory modules: Advanced Economics and The Economics of Corporate Finance and Financial Markets. You will also have the option to choose modules from a broad curriculum of economics and business disciplines according to your own personal interests.

BSc Business Finance and Economics
This degree combines insights from economic science with a focus on business. You will develop your understanding of the economic context in which modern business operates. You will also acquire the skills to create business strategies in a competitive environment.

Throughout core modules in the School of Economics and in Norwich Business School, you will focus on strengthening your understanding of the macro and micro-economy, build on your economic modelling and statistical skills, and gain an understanding of the importance of business strategies and the significance of increasing globalisation.

Study economics in a lively, friendly, research-orientated department, committed to excellence in teaching. We provide academic rigour with outstanding academic support as evidenced by the consistently strong performance of economics courses at UEA in the National Student Survey.

You will develop your powers of analysis and reason – the ultimate transferable skills and those perhaps most sought after by graduate employers.
BSc Politics and Economics

Gain a thorough and high-level training in economics with an emphasis on political science. Many real social problems require both economic and political analysis, and mastering both enables you to present more comprehensive and satisfactory predictions and recommendations. Such skills are in heavy demand by employers.

In your first year you will take a year-long module in Introductory Economics, Mathematics and Statistics. You will cover key concepts in macroeconomics and microeconomics as well as learning economic modelling and statistical techniques. You will also take compulsory modules from the Department of Political, Social and International Studies: Social and Political Theory and Introduction to Contemporary Politics.

In your second year you will build on your understanding of the macro and micro-economy and your statistical skills, while learning how to apply your new knowledge in a module designed to enhance your employability. In addition you will choose two further modules from the Department of Political, Social and International Studies, which build on the foundations learnt in your first year.

Finally in your third year you will continue to tailor your degree to your interests by choosing from a range of modules from the School of Economics and the Department of Political, Social and International Studies.

WHERE NEXT?
You will be well placed to choose from a wide range of career opportunities, including business, consulting, banking, politics, insurance, working in the Civil Service, business economics, personnel, accountancy, marketing, investment and financial risk analysis, and international organisations.

Economics graduates are also amongst the best paid: the HESA survey shows that economics sits just behind medical and engineering degrees at the top of the graduate salaries table.

As well as excellent teaching, we invest in the employability of our students through substantial internships, and opportunities to secure prizes and bursaries as student editors for the Norwich Economic Papers. We also run a series of weekly lectures on Contemporary Economic Issues with talks by senior faculty, visiting experts, alumni and special sessions on your employability development. This means you graduate well placed to pursue a career in the area of your choice.

ECONOMICS

ABOUT US
We have an international reputation in many key areas from economic theory to more applied subjects. Examples of our work include research on experimental economics, competition economics, environmental policy, conflict, contests and co-operative behaviour, finance and financial markets, labour market studies in the areas of education, family and welfare, and cultural and creative industries.

The results of the Research Excellence Framework (REF 2014) rank the School of Economics eighth amongst economics departments for research outputs (Times Higher Education). Eighty seven per cent of our School’s research is scored as either ‘world-leading’ or ‘internationally excellent’ compared with an average score of 77 per cent across all other Economics departments.
Study education at one of the UK’s premier centres for teaching and research in professional education and training. The School of Education and Lifelong Learning is consistently ranked as a top university education department, with both The Guardian, The Times and The Sunday Times Good University Guides placing it in the top 10 in 2015.

About You
You will be working towards three A levels or alternative equivalent qualifications such as the International Baccalaureate. You will have an inherent interest in learning about education in schools, questioning different educational approaches and contexts to learning and gaining an understanding of how we develop as lifelong learners.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

Due to the nature of this degree, you will be required to undertake an Enhanced Disclosure and Barring Service screening.

About the Course
BA Education
This degree offers you the opportunity to effectively engage with cutting-edge issues in educational policy, pedagogy and practice with reference to a range of national and international settings. You will benefit from research-led teaching and a high academic staff to student ratio.

You will gain the knowledge, understanding and expertise you need to understand education within schooling, different approaches and contexts to learning and how we develop as lifelong learners. Outside of the classroom, you will study the role of education within societies and cultures and the interplay between education, childhood, adolescence and lifelong learning.

You will also study the ways in which people learn with reference to a wide range of educational institutions in and beyond the UK. Modules introduce you to education as an academic discipline, international education and learning and teaching in the digital world. Underpinned by the history, philosophy, psychology and sociology of education, these modules will help you to build the basic knowledge you need as your studies progress.

You will develop an understanding of the links between the theoretical approaches and real life examples by combining study at the University with substantial placement experience. This will enable you to develop an in-depth appreciation of the breadth and scope of education as a subject. In your final year you will complete a research project under the supervision of a lecturer who is actively engaged in research in the Dissertation module.

There is the possibility that suitably qualified students will have the option of an additional year (the third year) studying at a university in North America or Europe.

Throughout your studies key skills learning is integrated to ensure that you have the opportunity to develop the transferable skills valued by employers; these skills, which include teamwork, communication, presentation and problem solving, will enhance your self-confidence and employability.

Where Next?
The multi-disciplinary nature of this degree ensures you will enter the workplace as a skilled and confident graduate and an advocate for education. Our graduates are successful in securing employment across a range of sectors, including: educational management and administration; youth, community or charity work; museum and gallery education; and supporting learning across educational institutions.

You will also graduate with the skills and knowledge necessary to progress to a PGCE in primary school teaching. In addition, many of our graduates decide to continue their studies and undertake other postgraduate courses including Master’s degrees.

About Us
Our educational research is internationally recognised, with the potential to inspire educational policy makers and the next generation of educational leaders alike. Our expertise is particularly influential in the following areas: Cultural Studies in Education; Higher Education and Society; Literacy and Development; Mathematics Education; and Physical Education Pedagogy.
ENGINEERING

Get ready to join the rapidly changing and vibrant engineering industry. Study interdisciplinary courses which include site visits, lectures from industry speakers and practical project work, as well as placements and an optional year in industry.

BEng Engineering
UCAS code H100
A level (typical offer): ABB, including Mathematics and a Science subject
International baccalaureate: 32, including HL Mathematics at 5 and one HL Science subject at 6
Special Requirements: Grade B in GCSE Mathematics
Length of course: 4 years

Special Requirements: Grade B in GCSE Mathematics
Length of course: 4 years

ABOUT YOU

As well as having the required A levels or equivalent, you will already be showing an interest in a future in engineering.

Depending on your previous experience and qualifications, you may be able to join a degree at the second year. To find out more contact admissions@uea.ac.uk

As with all our courses, we also welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

For each of our degrees, in your first year, you will gain a solid grounding in engineering, mathematics and working practices. You will develop skills and knowledge that are common across all different engineering specialisms and you will get the support you need to choose a specialism of your own. Taster modules will introduce you to energy, mechanical, civil and electrical engineering. From your second year on, you will gain further expertise and experience in your chosen field.

Throughout your degree, through case studies and practical experience, you will also learn about professional and ethical engineering practice. That means that when you graduate you will not only have important technical skills, you will also be a responsible, professional engineer ready to apply your knowledge to the real world.

BEng Engineering

Having gained an invaluable grounding in mathematics and engineering in your first year, in your second year you will go on to develop your learning by following a path in general, mechanical or electronic and electrical engineering.

In your final year you will put your knowledge into action with an in-depth individual project based on your engineering interests. This could be an experimental research project, a practical construction, a circuit assembly or programmable controller and many more. These projects are important in defining your pathway towards a specific career. You could even draw on the industry contacts you’ve made throughout the course and link your study to a real world engineering problem.

Project management skills are embedded in this course, and you will also gain an understanding of commercial risks and opportunities.

This degree is fully supported by the New Anglia Advanced Manufacturing and Engineering network (NAAME) and Hethel Innovation Group which gives you access to a wide range of leading mechanical, electronic and automotive companies.

BEng Energy Engineering

This four-year degree gives you the opportunity to continue studying for another year and gain a Master’s level qualification. This course, developed in partnership with the East of England Energy Group, industry and employers, gives you the chance to put all you’ve learned into practice with a major team-based project. You will create a conceptual and detailed design of a piece of energy infrastructure, such as a district heating system linked to a CHP plant. You will work in mixed-discipline teams on your concepts and then take the design of a specific element of your scheme through to detailed calculations and drawings.

BEng Energy Engineering with a Year in Industry

Spend your third year working with a company related to your chosen discipline, before returning to complete your degree in the fourth year. All engineering students are welcome to transfer to this Year in Industry option, whether you are studying engineering, energy engineering or energy engineering with environmental management. A year in industry is a great way to hone your skills, gain real-world experience and make contacts, and has proven as popular with students as it has with employers.

MEng Engineering

This four-year programme allows you to begin your journey towards becoming a chartered engineer. After graduating you will also be ideally placed to go on to gain the real-world experience needed to achieve chartered engineer status.

On this course you will complete the team-based design project required for Engineering Council accreditation. This will be a real-world design to meet a current problem. You could design a piece of equipment for anything from an aircraft operator, to a small-scale manufacturer. You will work on your concepts in mixed-discipline teams and then take the design of your chosen element of your scheme through to detailed calculations, drawings and often a model. You will also have the option to complete two credit-bearing periods of industrial experience.

MEng Energy Engineering

This degree has been developed in partnership with the East of England Energy Group, industry and employers. You will study engineering, applied mathematics, energy resource and project management with a focus on energy supply. You will gain a grounding in engineering mathematics and principles and apply this in design projects, supported by a broad introduction to energy from practising engineers.

As you progress, you will come to complete a large individual project, led by your own interests. For example, investigating the impact of a tidal barrage in a particular location; evaluating techniques for large-scale electricity storage; prediction of the long-term impact of electric cars on the National Grid. On completion you will become one of the highly sought after, high-calibre graduates in the field of energy engineering.

MEng Energy Engineering

This four-year degree gives you the opportunity to continue studying for another year and gain a Master’s level qualification. This course, developed in partnership with the East of England Energy Group, industry and employers, gives you the chance to put all you’ve learned into practice with a major team-based project. You will create a conceptual and detailed design of a piece of energy infrastructure, such as a district heating system linked to a CHP plant. You will work in mixed-discipline teams on your concepts and then take the design of a specific element of your scheme through to detailed calculations and drawings.

BEng Energy Engineering with Environmental Management

This is an innovative and flexible degree with great breadth and depth of study. It is also the first step to achieving chartered engineer status.

Having gained an invaluable grounding in mathematics and engineering in your first year, you will go on to develop your learning through the study of specific energy engineering topics. You will also undertake a major individual engineering project. Current modules include: Nuclear and Solar Energy; Fossil Fuels; Electricity Generation and Distribution; Engineering Project; Natural Resources and Environmental Economics; The Carbon Cycle and Climate Change.

As a graduate, your combination of energy and environmental awareness will be in demand from employers. All businesses are concerned about the cost of energy and companies want to deal with this in a way that doesn’t jeopardise their environmental credentials.

Where Next?
You will graduate with excellent career prospects for working within a thriving engineering industry. Not only are qualified engineers highly sought after, employability and transferable skills are embedded in our courses from the start and enhanced by a number of honorary lecturers from industry who help you to gradually develop commercial awareness. You will also have had many opportunities to develop industry contacts.

You will have the advantage of our close collaboration with engineering partners. For example we have close ties with the Hethel Innovation Group who are a link to a multitude of mechanical, composite materials, automotive, control systems and food tech enterprises.

You will also benefit from graduating in a region well known for its engineering and specifically energy engineering industry. East Anglia’s energy economy is expected to rise from £50 billion to over £75 billion in the next 20 years.

About Us
The Faculty of Science houses an impressive range of engineering expertise. We are internationally renowned for our research and teaching in many relevant fields, including low carbon innovation, energy efficiency, applied mathematics, computer systems engineering, energy materials, carbon composites, structural optimisation, energy finance and environmental assessment. Our academic staff produce international scientific research, enhancing the quality of our degrees by ensuring that staff are experts in their fields and that course content is up-to-date. In addition, our Industrial Advisory Board is made up of Directors from a range of leading engineering companies who ensure that our graduates emerge with the skills and expertise needed for modern industry.
Study English in England’s only UNESCO City of Literature: the perfect venue for your degree. You will be taught by experts on all periods of writing, from the medieval to the present. Our staff are actively engaged in writing books and articles on their subjects, and many are also poets, novelists, biographers or literary translators. In its research and its teaching, the School lives on the boundaries between the historical, the critical and the creative.

ENGLISH

BA English Literature
UCAS code: C2A0
A level (typical offer): AAB, including English Literature or combined English Language and Literature
International baccalaureate: 33, including HL English at grade 5 or above
Length of course: 3 years full time,
5.7 years part time
Option to study abroad: Yes

BA English Literature with a Foundation Year
UCAS code: C2A9
A level (typical offer): CCC, including English Literature or combined English Language and Literature
International baccalaureate: 28
Length of course: 4 years
Option to study abroad: Yes

Typical offers are for guidance only. Find out more at www.uea.ac.uk/lhd/courses

ABOUT YOU
You will be working towards three A levels (or equivalent) including English Literature (or the combined English Language and Literature).

You will be keen to participate and contribute to an environment celebrated for its association with literature and contemporary writing. You will be excited about attending our many literary events as a way of building on your studies.

If you are applying to study a degree with creative writing, you will be able to produce a portfolio of work of about five pages. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
BA English Literature
Explore a wide range of writing from the medieval period to the present day – from the Arthurian tradition to Shakespeare, Milton, Austen, the Brontës, from Joyce, to novelists who are writing today.

Literature is not an abstract or unworlty pursuit, but something which happens in the real world. That is why you will learn historically and study literature in context. It is also why we host regular extra-curricular events with contemporary writers who read and discuss their work.

In the first year you will gain a firm foundation for the study of literature at degree level. You will learn important theoretical concepts and strategies for both reading and writing texts. As the culmination of two semesters’ work, you and your fellow students will participate in a conference, collaborating, and learning new skills, as you create an event to end your year on a literary-critical high note.

In your second year you will go on to tailor your learning through more specialist paths. Then in your final year, which is based heavily on seminar work you will study topics such as Nervous Narratives, Women’s Writing in the Regency, Chaucer, Trauma and Modern Literature, Revenge Tragedy, James Joyce’s Ulysses, Science Fiction, Queer Literature, and The Gothic.

BA English Literature with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the degree programme. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. All modules are taught via lectures, presentations, seminars and study groups and incorporate a variety of assessment methods, preparing you for the different type of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as: essay writing; research; preparing and giving presentations and understanding and evaluating scholarly arguments.

BA English Literature with Creative Writing
UCAS code: C3W0
A level (typical offer): AAA, including English Literature or combined English Language and Literature
International baccalaureate: 34, including HL English at grade 6
Length of course: 3 years
Option to study abroad: Yes

BA Literature and History
UCAS code: C2Y6
A level (typical offer): ABB, including English Language and Literature and preferably History
International baccalaureate: 32, including HL English and History or grade 5 or above
Length of course: 3 years
Option to study abroad: Yes

In your first year you will gain grounding in English literature. Your first creative writing module is made up of structured exercises using objects, handouts and visualisations to introduce you to the craft and discipline of writing prose and poetry. You will begin with writing ‘what you know’, using memories, family stories and your own notebooks. Later, you will encounter the works of other authors as stimuli for your own writing. In your second creative writing module, you will explore experimental writing practices, and also engage in a creative collaboration with a student from Norwich University of the Arts.

In your second year you will benefit from practical modules taught by practising writers. You will go on to produce work in an exploratory series of exercises and analyses of examples of writing, leading to the submission of two short pieces of fiction, together with a critical self-commentary. You will also have the opportunity to participate in group discussion of your work as an aid to the editing and redrafting process. There are similar second-year modules for scriptwriting, poetry and journalism.

In your final year, there are the options of an advanced course, which offers a foretaste of the renowned MA in Creative Writing, and/or a creative writing dissertation.

BA Literature and History
Combine the study of literary texts with that of the social and political worlds in which they were created. Historians and literary critics sometimes read the same documents, but they are looking for different things and employing different methods of analysis; this programme offers the chance to explore both approaches. The combination leads towards an understanding not simply of literature or of history, but of culture.

On this course you will have the chance to construct a programme that reflects your own intellectual interests and enthusiasms. For example, you may wish to concentrate some of your work around the literature and history of a particular period: the Middle Ages; the Renaissance; the Restoration; the 18th Century; the Victorian Era; Modernism; or the Contemporary. Alternatively, you may prefer to focus on the history of a literary genre: drama, poetry; or prose, or you may wish to select modules that deal with topics such as feminist theory or visual culture. Literature-based modules may focus on a particular genre (eg Satire), or a theme (eg Literature and Desire), or a historical period (eg Contemporary Fiction, or the 17th century), or an author (eg Chaucer).
BA English and American Literature

The writers of Britain and America are deeply connected: often they employ the same language, address the same readers and share cultural reference points. But at the same time, the two traditions differ sharply in their typical values and tone of voice.

On this course you will experience these continuities and distinctions with access to the modules that make up the degrees in English Literature and American Literature, benefiting from the interdisciplinary work of the Department of American Studies, and the literary focus of the School of Literature, Drama and Creative Writing.

You will begin by taking introductory modules in both traditions. Modules such as Imagining America, and Literature in History will provide you with the context within which your future studies will unfold. Through modules chosen from a wide range of options you will broaden your awareness of related subjects such as film, drama, philosophy, linguistics or history.

As your studies progress you will go on to tailor the course you want to follow, with support from your adviser to make sure that you end up with a balanced programme. You are free to take a number of modules outside the immediate English and American Literature programme, including options in drama, film, history, other literatures and creative writing and other modules from the Faculty of Arts and Humanities.

BA Culture, Literature and Politics

Combine the study of literature with the study of its social and political context. This degree is jointly taught by the School of Literature, Drama and Creative Writing and the Department of Political, Social and International Studies.

Literature and contemporary culture are not, and have never been, merely sources of entertainment and decoration. From Shakespeare to Salman Rushdie, literature has played a powerful part within society. It has been censored and sponsored, used as propaganda, as a means of shaping attitudes, expectations and for protest. This programme gives you the opportunity to study, in detail and in depth, the ways in which society and its forms of expression are linked. Drawing from a wide range of optional modules in Politics and English you will be able to explore questions such as: how are political events and tensions reflected in literary texts and influenced by literary developments? And how do literature and culture influence or underpin the political world? Choosing your own modules, in addition to core subjects, also means you can tailor your degree to suit your interests and ambitions.

In your final year you will have the opportunity to write a dissertation and to learn key skills of media production. You could also undertake one of a limited number of work placements in the EU, local or national government or on a research project for a think tank or member of parliament. Or you could take part in work shadowing or short placements in the media industry.

You will also have the opportunity to spend a semester studying abroad in your second year in institutions in Canada, the USA, New Zealand, Australia, Estonia, France, Germany, Luxembourg, Poland, Spain, Norway, Japan and Hong Kong. For more information see page 27.

WHERE NEXT?

Follow the majority of our graduates into careers in the creative arts, media, publishing, teaching, management, charities and NGOs and in the commercial sector. Or, go on to further study for higher degrees or for professional and vocational qualifications.

Norwich’s status as a UNESCO City of Literature makes it a natural home for many writers, both literary and commercial. During your degree you will have the opportunity to gain work experience in copywriting and arts administration. UEA’s own University Writers Service provides paid commercial freelance copywriting experience, while the Writers’ Centre Norwich provides internship opportunities to help students understand the workings of a small arts organisation.

Our Working with Words Conference takes place every year, where over 30 alumni return to share their stories and showcase the range of career possibilities linked with writing skills, from journalism, fiction or non-fiction writing, and editing to digital marketing and corporate communications.

ABOUT US

Each semester, the School welcomes a different UNESCO City of Literature Professor: an award-winning author who comes to live and write amongst us, and to give lectures, seminars and workshops. These have included the Olivier award-winning playwright Tim Waterer, and the Whitbread-winning novelist Ali Smith. In the autumn and spring, we also host a series of readings by well-known writers. Recent guests include Richard Dawkins, Jonathan Franzen, Ian McEwan, Jeanette Winterson, Iain Banks and Stephen Fry. Our students also regularly give readings in various informal venues around Norwich.

WINNER OF THE PRESTIGIOUS QUEEN’S ANNIVERSARY PRIZE FOR HIGHER AND FURTHER EDUCATION IN CREATIVE WRITING
Join one of the longest established and largest schools of environmental sciences in Europe. We offer a range of degree programmes from broad-based environmental sciences degrees, to more specialised programmes in environmental Earth sciences, meteorology and oceanography, and environmental geophysics.

**Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/env/courses**

**Special requirements:** GCSE grade B in the language of your chosen country, if studying in Europe

**Length of course:** 4 years

#### MSci Environmental Sciences

**UCAS code:** F64A

**A level (typical offer):** AAB

**International baccalaureate:** 32, including two HL subjects at 6

**Length of course:** 4 years

#### About You

You will already be thinking of your individual approach to the environmental sciences, and will have A levels or equivalent including at least one of the following subjects: Geography, Geology, Mathematics; Economics; Biology; Chemistry; Environmental Sciences or Physics.

We encourage applications from students with A levels, IB, Access courses, BTECs, or professional qualifications, and will consider a variety of alternatives as equivalent to our stated entry requirements. Our Environmental Sciences with a Foundation Year is a great choice if you do not meet the academic requirements for our other courses.

#### About the Courses

**BSc Environmental Sciences**

First you will develop your core scientific skills in Global Environmental Challenges, Sustainability and Society; Research and Field Skills; Understanding the Dynamic Planet; Physical and Chemical Processes in the Earth’s System, Biodiversity in a Changing World, Earth’s Chemical Processes; Atmosphere and Ocean.

Then you will tailor your degree according to your interests. You will choose from the substantial range of modules that are spread across thematic areas.

In your final year, you will undertake an independent research project that matches your interests. You will also choose more challenging modules from the wide range available, which currently includes: Earthquake and Volcanic Hazards; Pollution, Toxicology and Chemistry; Biodiversity, Conservation and Human Society; Natural Resources and Environmental Economics; Catchment Water Resources.

This course is accredited by the Institution of Environmental Sciences (IES). Students will be eligible for Associate Membership of the IES upon graduation, with the opportunity of achieving Chartered Environmentalist (CEnv) or Chartered Scientist (CSci) status.

**MSci Environmental Sciences**

During the final year of the integrated Master’s programme you will undertake a substantial piece of independent research under the supervision of a research active faculty member. You will also study your choice of advanced level modules such as: Modelling Environmental Processes; The Carbon Cycle and Climate Change; Stable Isotope Geochemistry; GIS for Ecology and Environmental Management.

**Special requirements:** GCSE grade B in the language of your chosen country, if studying in Europe

**Length of course:** 4 years

**BSc Environmental Earth Sciences**

Focus your study on the relationship between the solid Earth, human society and environmental processes. You will use principles of geology, physical geography, chemistry, biology, maths and social sciences, along with research and field skills to increase your knowledge in areas such as Earth cycles, geodynamics, fossil fuels, geochemistry, earthquakes, volcanoes and hydrogeology. As your studies progress you will explore environmental relationships with other science disciplines, an opportunity not usually available in traditional Earth science departments. Finally you will complete an independent research project, under the careful supervision of one of our faculty.

**MSci Environmental Earth Sciences**

Refine and develop your skills in Earth sciences on this four-year programme which builds on the knowledge covered in the BSc and provides the vehicle to undertake a substantial piece of independent research in a topic that matches your interests. You will also study your choice of advanced level modules such as: Isotope Geochemistry; Research Topics in Earth Science; Managing Natural Hazards; Catchment Water Resources.

Specific pathways through these degrees are accredited by The Geological Society of London making it easier for you to qualify as a chartered geologist.

**BSc Environmental Geophysics**

Understand why and how natural phenomena occur. Learn to apply the powerful techniques of mathematics and physics to explain events such as weather systems, earthquakes and floods. Approximately one third of your degree will be spent studying mathematical techniques and gaining the skills necessary to analyse the physical environment. Field work forms an essential part of your training and may include seismic and gravity investigations, magnetic and electrical surveys, or the study of beach shore processes.

There is a wide choice of modules and it is possible to follow a number of routes, for example, geological, atmospheric, marine or any combination of your choosing.

After refining your skills, and choosing the right path for you, you will complete an independent research project under the supervision of a research active faculty member.
**MSci Environmental Geophysics**  
UCAS code: F661  
A level (Typical offer): AAB, including Mathematics

**International Baccalaureate**: 33, including HL Mathematics at 6 and one other HL subject at 6  
**Length of course**: 4 years

**BSc Meteorology and Oceanography with a Year in Industry**  
UCAS code: FF97  
A level (Typical offer): ABB, including Mathematics

**International Baccalaureate**: 32, including HL Mathematics at 5 and one other HL subject at 5  
**Length of course**: 4 years

**MSci Meteorology and Oceanography**  
**Length of course**: 4 years

**BSc Meteorology and Oceanography**  
**Length of course**: 3 years

**MSci Environmental Geophysics**  
Mirroring the content of the BSc for the first three years, you will then undertake a substantial piece of independent research in a topic that matches your interests in the fourth and final year of this degree. You will also study your choice of advanced level modules such as: Carbon Cycle; Research Topics in Earth Science; Managing Natural Hazards; and Science of Climate Change.

**BSc Meteorology and Oceanography**  
Learn how both the atmosphere and the ocean work. We now know that the ocean and the atmosphere are linked together, and to understand weather systems, climate and its variability, you need to study both.

Field work is an essential part of this programme and includes investigation of ocean processes in shelf seas, or tracking balloons to determine local air-flow.

In your final year you will undertake an independent research project in a topic that matches your interests. Throughout the course you will develop transferable skills that will be invaluable in your future career.

**MSci Meteorology and Oceanography**  
In addition to the above programme you will study advanced level modules chosen from the substantial optional range available, currently including: Climate Change: Physical Science Basis; Wave, Tidal and Hydro Energy Engineering; Wind Energy Engineering; Dynamical Oceanography; Meteorology with Advanced Topics. You will also complete a substantial piece of independent research under the supervision of a research active faculty member.

All of our meteorology and oceanography degrees are accredited by the Royal Meteorological Society making it easier for you to go on to gain chartered meteorologist status.

**BSc Degrees with a Year in Industry**  
Enhance your studies with an additional year in industry. Gain valuable work experience in your chosen field on an industrial placement during the third year of these four-year programmes. Put what you have learnt into practice, as theory is transformed into reality in a context governed by very real, time and financial constraints.

Improve your graduate prospects by gaining first-hand knowledge of your chosen field and generate crucial employer contacts to prepare you for a competitive job market, before returning to UEA to complete your final year.

BSc Meteorology and Oceanography with a Year in Industry

**WHERE NEXT?**
After graduation you can pursue a career in the environmental sector, for example conservation; resource management; environmental protection; meteorology; hydrogeology; geology; geophysics; or environmental consultancy. You could also enter professions such as planning, computing or teaching.

Alternatively, you may wish to continue your studies with a PhD, MPhil by Research or an MSc.

**ABOUT US**
The School is a world leader in environmental science research and encompasses the world-famous Climatic Research Unit and the renowned Zuckerman Institute for Connective Environmental Research. In the 2014 Research Excellence Framework (REF) we are ranked first in the UK for the impact of our ‘world-leading’ research.

We are a large School, which means that we can teach across a broad range of disciplines with lecturers who are at the forefront of their subjects. Our modules are taught through lectures, seminars, practical classes and field work. Assessment is undertaken through a combination of coursework and end-of-year examinations. You will be allocated an academic adviser who will offer academic support and advice throughout your studies.

Environmental Sciences with a Foundation Year  
Gain the skills, knowledge and confidence you need to progress to a degree in a range of environmental sciences specialisations.

During your foundation year you will be assigned an adviser from the School of Environmental Sciences who will guide you through your course to ensure your progression on to the degree programme of your choice.
ABOUT YOU
You will be working towards three A levels (or equivalent). For Film Studies and English Literature, one of these should be English Literature, or English Language and Literature. You do not need to have studied film or media studies previously.

You will be excited about the prospect of being able to shape your degree around your own interests and career goals. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
BA Film and Television Studies
Explore the history, theory and practices of film and television. Discover how the two media developed as distinct but intersecting industries, art forms and areas of academic study.

From silent cinema experiments like Méliès’ A Trip to the Moon to multi-platform franchises such as Lucas’ ever-expanding Star Wars empire, you will engage with a range of film and television texts, and examine what they can tell us about the cultural and creative contexts in which they were produced and consumed.

Introductory modules are complemented by a wide variety of specialist modules on a global range of cinema and television. Some modules focus on particular film-makers such as Stanley Kubrick or the cinema industries of different countries such as Britain or Japan. Others deal with film and television genres such as comedy or science fiction, or critical issues such as gender in film and television.

Throughout your studies you will explore theories and ideas in essays, projects and presentations. In your second and third years you can also gain practical experience by making fiction, experimental or documentary films, or working in a television studio. In your final year, you will research and produce a dissertation of your own devising, with guidance and support from expert staff.

BA Film and Television Studies with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to a BA Film and Television Studies degree. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. All modules are taught via lectures, presentations, seminars and study groups and incorporate a variety of assessment methods, preparing you for the different type of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as: essay writing; research; preparing and giving presentations and understanding and evaluating scholarly arguments.

BA Film and Television Studies with a Foundation Year UCAS code: W61F
A level (typical offer): CCC
International baccalaureate: 28

BA History and Film Studies
UCAS code: W61G
A level (typical offer): ABB, History preferred
International baccalaureate: 32, including HL History at grade 5
Length of course: 3 years
Option to study abroad: Yes

BA Film Studies and English Literature
Study cutting-edge approaches to film and English literature within two of the most highly-regarded university departments in these closely-linked fields. Learn about film, drama, writing and the relationship between them, through modules which will give you the critical tools to analyse and understand them fully.

In the film studies component of your course, there will be a strong emphasis on history, from silent cinema to contemporary Hollywood. You will study issues of adaption across and between media and explore theories of adaption and authorship. You will also have the opportunity to take screenwriting courses in which you will learn how to adapt novels and other source material for the screen. In the English literature component of your course you will benefit from a wide range of modules, drawing on expertise in literature, history, creative writing and drama.

A number of modules have been designed to bring the disciplines of film studies and English literature together in productive dialogue, such as Shakespeare on Stage to Screen. You can also take television and media studies modules in your second and third years, including a wide choice of creative practice modules in which you have the opportunity to produce films, or work in a television studio.

BA History and Film Studies
This pioneering, interdisciplinary degree unites the teaching expertise and world-leading research of both a long-established prestigious film and media studies department and one of the largest and most respected history departments in the country. Learn about the history and theory of film and television, as well as the ways in which these media have represented, recorded and reconstructed history.

Explore these questions in your projects and essays or by making your own historical documentaries in our fully-equipped television studio, using footage you have sourced first hand from archives. Throughout your studies you will choose from a range of film studies modules and history options, including specially designed modules on documentary history, theory and practice; propaganda and European history on film; historical representation and memory; and the practice and ethics of archival research.

You will be taught by experts from the disciplines of history and film, television and media studies, including film archivists and practitioners with years of experience in their fields.

The unique experience offered by this degree will provide a great foundation for a range of future careers, among them work in the representation industry, film and television documentary making, writing and researching for historical programming, journalism, marketing, education, or archiving.
WHERE NEXT?
You will graduate with the talents, transferable skills and knowledge that are highly valued and sought after by employers in a range of industries.

You will be ready to work in many sectors, including the media and cultural industries, the heritage and art sectors, journalism, advertising and marketing.

ABOUT US
Our research and teaching is focused upon the relationships between film, television and other media, and the creative and cultural contexts in which they are produced and consumed. We are recognised as a leading centre for the study of British, Hollywood and Asian cinemas, popular film and television genres, and feminist approaches to media. Major assets to the programme are the East Anglian Film Archive, a unique resource utilised by our students, and our close links with the British Film Institute in London.

Over 80 per cent of our research was rated ‘world-leading’ or ‘internationally excellent’ in the Research Excellence Framework (REF 2014). Additionally, our research output was rated fourth in the UK in the Times Higher Education REF 2014 rankings.

“STUDYING AT UEA WAS ONE OF THE MOST ENJOYABLE AND SIGNIFICANT FORMATIVE EXPERIENCES OF MY LIFE. IT PROVIDED ME WITH AN ACADEMIC BACKGROUND IN LITERATURE AND FILM WHICH WAS A VITAL STEPPING STONE FOR MY CAREER IN THE BRITISH FILM INDUSTRY”

ADRIAN WOOTTON, CHIEF EXECUTIVE OFFICER FILM LONDON, PREVIOUSLY DIRECTOR LONDON FILM FESTIVAL
A geography degree is your chance to gain an understanding of how the natural environment and human society interact. You will study many key global issues such as those relating to the management of resources, natural hazards, population growth and climate change.

ABOUT YOU
You will want to learn more about how the world works, how its people live. You may even have ambitions to play a role in saving it from the effects of climate change as well as working towards the required academic qualifications, or equivalent.

The prospect of spending time devoted to field work will excite you, as will contributing to seminars and working with teams of other students.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

BSc Geography
Focus on the interactions between the natural environment and human society, through a range of fascinating options which allow you to tailor a programme to your own interests and career aspirations, including topics such as natural hazards, population growth and climate change.

During your first year you will study geographical concepts and thinking, in addition to taking classes on global environmental challenges and a spring field course. Other subjects available as optional modules include:

- Understanding the Dynamic Planet
- Sustainability, Society and Biodiversity
- Physical and Chemical Processes in the Earth’s System

As you progress through the course you will continue to take a range of optional modules and will prepare for a final, independent research project. This will allow you to explore a topic you particularly enjoy in much greater detail.

BA Geography
Study contemporary global challenges at local, national and international levels of analysis. These include the challenges of, and human responses to, processes such as climate change and natural hazards; political conflicts and fragile states; poverty, inequality, and questions of social justice; diseases such as HIV and malaria; water and food security; and migration.

During the course you will enhance your knowledge and understanding of key geographical issues, whilst developing a range of skills relevant to working in project design and management, geographical information systems, and research.

The degree is composed of core modules that develop understanding of key interdisciplinary themes, as well as options to pursue chosen themes in greater depth.

You will also have the chance to undertake a field course in the UK or abroad in, for example Kenya or Spain, and the opportunity to undertake a work experience placement for two to three months in your third year.

BSc Environmental Geography and International Development
UCAS code F387
A level (typical offer): ABB, including Geography
International baccalaureate: 32, including HL Geography at 5
Length of course: 3 years
Option to study abroad: Yes

BA Geography and International Development
UCAS code LL77
With Overseas Experience
UCAS code LE97
A level (typical offer): ABB
International baccalaureate: 32
Length of course: 3 years
Option to study or work abroad: Yes

BSc Environmental Geography and International Development
You will gain an understanding of a variety of environmental and development issues whilst developing the scientific, mathematical and analytical skills you will need throughout your career.

You will learn from teaching that combines the natural and social sciences focusing on both theory and practical aspects of development. During years one and two you will build towards a final year studying or working in the developing world, whilst also carrying out an independent research project.

Final year study destinations include Fiji, Mauritius, Vietnam, India, Peru and Mexico. Work placements could be in the field of teaching, conservation or community care in countries such as Mongolia, Thailand, Nepal or Kenya.

Optional modules in the final year include:

- Catchment Water Resources
- Natural Resources and Environmental Economics
- Globalisation and Economic Development
- Field Course to East Africa
- Resource Development and Conservation
- Public Policy and Welfare.

BA Geography and International Development
Become a specialist in human geography and learn to apply this to the study of major issues in international development, including poverty and inequality, food security, environmental degradation, globalisation, migration and global governance.

Develop your academic rigour and technical skills whilst also ensuring strong employability, through practical skills training, field experience, IT skills including geographical information systems (GIS), and excellent work placement opportunities.

Work towards a major field course in either Scotland or Ireland to explore topics such as human-environment conflicts and conservation. Here you will use standard geographical techniques as well as participatory or rapid rural assessments and other methods.

BA Geography and International Development with Overseas Experience
In addition to the above programme, you will also take up a work placement overseas, for example working on a forestry project in India, or water basin management, or for a community organisation or public agency. You can also choose to study at an overseas university, for example in South Africa, or you could opt to do a work placement in the UK. For more information see page 27.
Gain a holistic perspective on climate change, that includes learning the underlying science as well as how society can adapt to such changes, and the means of mitigating the impacts. Learn about the links between society, environment and climate change, focusing on the historical, geographical, cultural and political aspects of how and why climates around the world are changing. Teaching combines the social and climate sciences with a strong climate change theme.

In your final year you will undertake an independent research project under the supervision of a research active member of faculty. Alongside this you will have the opportunity to choose two modules from the wide range available. You will advance your appreciation of climate change and its environmental and societal implications through two compulsory modules: Science, Society and Sustainability and Global Environmental Change.

**BSc Environmental Geography and Climate Change with a Year in Industry**

Take the option of an additional placement year in industry during your third year. You will have the opportunity to gain valuable work experience in organisations whose business includes climate change, environment and society.

**MSci Environmental Geography and Climate Change**

During the final year of the integrated Master’s programme you will undertake a substantial piece of independent research on a topic that matches your interests. You will also study your choice of advanced level modules such as: Climate Change: Physical Science; Theory of Environmental Assessment; Sustainable Consumption; Narratives of Environmental Change; Biodiversity Conservation and Human Society.

WHERE NEXT?

Graduate ready to work for national and international agencies, the private sector or government in the areas of environmental and resource management, climate change, economic and social development or planning. Or choose to join the 30 per cent of graduates who pursue a higher degree such as a taught MA/MSc or an MPhil or PhD by research.

ABOUT US

Both the School of Environmental Sciences and the School of International Development are internationally renowned for their research and are home to some important research groups including: the Climatic Research Unit; the Tyndall Centre for Climate Change Research; the Centre for Social and Economic Research on the Global Environment; the Science, Society and Sustainability (3S) Group; Global Environmental Justice Research Group; Life Course, Migration and Wellbeing Group; International Development UEA; Globalisation and Transition Group; and the Water Security Research Centre. In the latest Research Excellence Framework (REF 2014) the School of Environmental Sciences was ranked first in the UK for the impact of its research.

Please note we cannot guarantee any student a work placement as this decision rests with potential employers. Although students will be expected to source these placements themselves, support is available from the School staff and the Careers Service. If you have not successfully secured a work placement by the end of your second year you will be transferred onto the three-year programme.

Although students will be expected to source these placements themselves, support is available from the School staff and the Careers Service. If you have not successfully secured a work placement by the end of your second year you will be transferred onto the three-year programme.
We are a leading history department and our courses are designed to allow you to progress from a broad introduction to a range of fascinating, more specialist optional modules in your second and third years. That means you can tailor your degree to suit your interests and ambitions.

ABOUT YOU
You will be working towards three A levels (or equivalent). You will be looking forward to actively participating in seminars, and may already believe, like we do, that history is an argument without end. You will be excited about the prospect of being able to shape your degree around your own study interests and career goals. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
Across all our courses you will learn about the key skills, issues and ideas involved in the study of history. As well as learning through lectures, seminars and your own study, you will benefit from regular one-to-one meetings with a member of academic staff. You will be given guidance on your work and constructive feedback to help you improve.

You will explore a range of topics from the fall of the Roman Empire to modern times with more specialist study undertaken in small group seminars. This is our main teaching method. Learning in small seminar group sizes ensures you get the best teaching experience. You will also spend time studying and researching in the library or carrying out practical work or projects.

BA History
Join the main history programme and you can choose from any of our history modules as your course progresses.

This degree is a great choice if you are interested in most areas of historical study, or if you are still keen to discover the types and periods of history in which you want to specialise.

During your first year you will acquire a solid foundation in the main periods of British and European history from the high Middle Ages to the 20th century. You also receive an introduction to more specialised historical themes, such as witchcraft, and you will have the opportunity to reflect on how historians write history.

In your second year, thanks to the wide range of modules available, you will be able to focus on the subjects that most excite you, for example, medieval history, the political and international history of Britain and Europe since 1789, social and cultural history across time, early modern and modern Britain or modern Europe.

In your final year, you will move on to more intense ‘special subject’ modules. Here you will work and research in small groups on a specialised topic close to the research expertise of a faculty member. You will also have the opportunity to complete an extended project to demonstrate the skills you have acquired during the degree programme. In addition, you are required to study two advanced modules, one of which can be a dissertation on a historical topic of your choice.

BA History and Politics
You are then free to select from a wide range, whether in History, American Studies or in another department. You will also have the opportunity to complete a dissertation.

BA History with a Foundation Year
Gain the skills, knowledge and confidence you need to progress to the degree programme. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to go on to the BA degree. All modules are taught via lectures, presentations, seminars and study groups and incorporate a variety of assessment methods, preparing you for the different type of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as: essay writing; research; preparing and giving presentations and understanding and evaluating scholarly arguments.

BA Modern History
Specialise in the history of Britain, Europe, and the Americas from around 1750 to the present day. First you will benefit from an introduction to Early Modern Studies, Modern History and The Age of Extremes: Europe 1918-2001 before choosing an additional three modules from those available in the department, such as Introduction to Medieval History and Witchcraft, Magic and Belief in Early Modern Europe, or you may opt for one or two modules in politics, such as Social and Political Theory, Introduction to Contemporary Politics or Global Politics 2, or for one module in American history.

You will continue to specialise in the modern era, including options in American history. Or you may decide to broaden the periods you wish to study. You are then free to select from a wide range, whether in History, American Studies or in another department. You will also have the opportunity to complete a dissertation.

BA History and Politics
Combine your study of history with the theory and practice of politics from the 16th century onwards.

In the first year, you will study an Introduction to Early Modern Studies; Introduction to Modern History; The Age of Extremes: Europe 1918-2001; Social and Political Theory and Introduction to Contemporary Politics. Your final option in the first year is chosen from Witchcraft, Magic and Belief in Early Modern Europe, another modern history module, or a module in politics.

In the second and third years you are free to determine the exact proportion of your studies you devote to each subject. You will build on your grounding in the subject with options to make your degree the way you want it, choosing from options such as: British and Europe; International Security; Terrorism and Counter Terrorism; Democratic Theory; Power and Society; Russian Politics; America in the World; the History of US Foreign Relations; The European Union’s Future as an International Actor; International Organisations as well as other politics and history modules. You can also choose to specialise in a particular country or region by combining study of the history of Nazism with contemporary Germany, Russian politics with the history of Stalinism, or British history with international relations.
In the third year, you take a ‘special subject’ in modern history and a further module in politics. Finally, you will take a further advanced module in either politics or history. Advanced history modules include: Russia in Revolution; Twentieth Century Sport History; British Intelligence in the 20th Century; Chamberlain, Churchill and Appeasement; Youth in Modern Europe; or The First World War. You will also have the opportunity to complete a dissertation.

WHERE NEXT?
Graduate from your degree with highly developed skills of written and verbal communication, time management, teamwork and creative thinking – all qualities which employers value highly.

Our graduates go into many different careers, from the media, management, industry, law, public administration and finance through to teaching and museum work. Alternatively you may wish to continue your studies with a postgraduate degree.

ABOUT US
You will be taught by academics who are active researchers, publishing books related to the subjects they teach. With some of the country’s finest teaching staff, we have one of the highest concentrations of eminent historians outside of Oxford, Cambridge and London. Over 75 per cent of research in the School of History was rated ‘world-leading’ or ‘internationally excellent’ in the Research Excellence Framework (REF 2014).

“THE HISTORY COURSE OFFERED EVERYTHING I WANTED TO STUDY, AND THE LIBRARY IS BRILLIANT FOR RESEARCH. THE TUTORS WERE ALWAYS VERY ENTHUSIASTIC AND PREPARED TO GIVE TIME TO OFFER ANY HELP THEY COULD”
ADRIAN WATTS, BA HISTORY GRADUATE
The School of International Development is globally renowned for teaching, research and training in international development. With many students from the UK and over 50 other countries, we are a friendly, thriving and cosmopolitan department. All courses are available with the option of an overseas experience.

### ABOUT YOU
You will be working towards three A levels or alternative equivalent qualifications such as the International Baccalaureate. You may be a school leaver or be returning to study after working or a period of travel. As with all our courses, we welcome students with non-traditional qualifications and experience. We also welcome international applicants and mature students.

You will have a keen interest in international development and global issues. Many of our students have travelled, but not all, and others have been involved in local or school groups concerned with community development, environmental issues, or charitable work. You would love to meet you at one of our Open Days where you can learn more about the subject, career prospects, and meet current students and staff.

### ABOUT THE COURSES
Whichever International Development degree you choose, you will learn through lectures, small group work in seminars, participatory workshops and field trips.

Approximately half of our undergraduates decide to spend three to four months overseas in their final year, either studying at a university overseas, or working on a development project. This will provide you with some valuable insights and practical experience. If you decide to stay in Norwich, you will be able to choose to study additional modules from a wide range according to your own personal interests.

In your final year, you will write a dissertation on a development topic of your choice, supervised by a member of staff who has expertise in your area of research.

### BA International Development
Gain a comprehensive understanding of contemporary issues and processes in international development. During your first and second years you will develop knowledge and skills from different disciplinary areas relevant to development chosen from economics, natural resources and the environment, social anthropology and politics, and geography. You will also acquire a large number of skills that are invaluable in today’s labour market, including the ability to analyse data, prepare reports, make presentations, and work as part of a team.

Throughout your degree, the course is carefully designed to give you the flexibility you need to explore your interests, and strengths before graduating with a world-class degree in development.

### BA International Development with Social Anthropology and Politics
Gain an understanding of key anthropological and political issues in relation to international development.

You will engage with key anthropological debates around kinship, exchange, social organisation and ritual, and key political debates around power, governance, social difference and justice. You will also examine and gain practical experience in social science methods, including broad comparative enquiry, participant observation, key informant interviews, visual media and ethnography. You will critically engage with current research in the disciplines, to understand how social theory can be applied to understanding transformative social change, caused by the processes of globalisation and development.

### BA International Development with Economics
Study international development within the context of microeconomics, macroeconomics and quantitative empirical analysis.

Economics graduates are in demand by employers and amongst the best paid nationally and internationally. By the time you finish your degree, you will have an understanding of economic development and its linkages with poverty and inequality; you will be familiar with theories as well as empirical evidence on trade, investments and economic growth; you will be able to evaluate evidence produced through experimental economics approaches to the study of human behaviour; and you will have the necessary skills to link economic variables to the broader sociopolitical processes and environmental challenges affecting different regions in the world.

### BA Media and International Development
Kony 2012 and the Arab Spring help to illustrate how important the media is in all aspects of international development. The media can promote mass mobilisation and participation, communicate development ‘messages’ and facilitate the flow of information locally, nationally and internationally. The media is also central in encouraging charitable donations, promoting democracy and human rights, and in delivering public health messages during emergencies.

This innovative degree programme will teach you about both media and international development – but also, unlike any other course in the UK, about the relationship between them. Core areas of your degree will address foreign media coverage, communication for development work and the development of the media in the Global South. You will also benefit from a very strong focus on employability skills as well as learning about media production and analysis, project design and management skills.
BSc International Development and the Environment

UCAS code L2F7, L2FR (with Overseas Experience)

A level (typical offer): ABB, including at least one of Geography, Geology, Mathematics, Economics, Biology, Chemistry, Environmental Sciences, Physics or World Development

International baccalaureate: 32

Length of course: 3 years

Option to study or work abroad: Yes

BSc International Development and the Environment

On this degree, you will study international development in relation to the full range of environment and natural resource issues: issues which are increasingly central for poverty alleviation, food security, human wellbeing and sustainability. You will study the research methods and techniques, both quantitative and qualitative, used to analyse environment and development questions. The degree is flexible in terms of study options: you can also study other disciplinary subject areas if you wish (eg social anthropology, geography, economics), and can select from a choice of issue-related or regional modules, for example: education and development; gender and development; South Asian development; Latin American development or Sub-Saharan African development. The degree involves field visits, and a field course for guided independent research. You will visit either Scotland or Ireland to explore topics such as human-environment conflicts and conservation, using standard techniques as well as participatory or rapid rural assessments.

WHERE NEXT?

You will graduate with specialist and practical skills needed for a successful career in the UK or overseas. Many of our graduates decide to work in development (including working with the United Nations, governments, charities and NGOs). Others use the academic and transferable skills gained for careers in business, the voluntary and public sector, community development, environment, and media.

As well as academic skills and knowledge, the School of International Development provides opportunities for practical and professional skills training in topics ranging from project management to filmmaking. The opportunity to gain work experience overseas in your third year will also add to your distinctive skillset and advancement.

ABOUT US

The School’s research is internationally renowned. It is home to three research groups: Social Development; Economic Development; and Environmental Change and Sustainable Development.

You will be taught by academic staff who are actively involved in research across the globe, working with many national and international development agencies. This keeps our lecturers in touch with teaching and development issues at grassroots level and ensures you benefit from the very latest thinking.

The results of the Research Excellence Framework (REF 2014) rank our School’s research fourth (Times Higher Education) nationally by overall GPA, with 74 per cent of our research ranked ‘world-leading’ or ‘internationally excellent’.
Explore the relations between and within states and learn to reflect upon such important phenomena as globalisation and democratisation and their impact on the contemporary world.

ABOUT YOU
As well as working towards the required academic qualifications, you will be able to show us your passion for the subject through your reference and personal experience.

If you intend to study on a course with a foreign language, you will be expected to have studied that language at a minimum of GCSE level.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
BA International Relations
Gain a solid grounding in different theories of international relations and how these are practically applied in real life situations.

At the same time you will develop important analytical and research skills, broaden your knowledge and gain a sophisticated understanding of contemporary international relations.

From your first year, you will build your understanding, through modules such as Global Politics. There is also an introductory module designed to help you with the study and employability skills you’ll need both during your time at university and after graduation.

You will go on to select from a wide range of exciting options which allow you to specialise in areas that interest you. Options include: The Global Political Economy, EU’s Future as an International Actor; International Security; International Politics since 1945; Britain and the EU; International Organisations; Politics in the USA; Russian Politics; and The Modern Middle East.

In your final year, you will complete individual research and project work. This can include writing a dissertation on a topic of your choice. Other third year modules include: Western Political Thought; Politics and Popular Culture; Multiculturalism; Power Over the Pacific; Ethics in International Relations; Shifting Powers: Africa in the 21st Century.

BA International Relations and Politics
Some of the most important political questions are those about international relations. Is it right to intervene in the politics of other countries? How ought we to respond to the threat of global warming? How big a threat is international terrorism? What should be done to improve international security? How much power do multinational corporations have? Is America too powerful, or will China overtake the US as the major power in the world?

These are the sorts of questions you will consider when studying international relations and politics. You will think about and explore the causes of conflict – in the Middle East, for example – and assess attempts to resolve them.

BA International Relations and Modern History
This course, in short, gives you the opportunity to study the forces and issues, which shape the contemporary world around us.

After gaining a grounding in international relations you will then specialise by choosing modules from a wide range of options, including International Security; International Politics since 1945; Politics in the USA, Russian Politics; the Modern Middle East; The Global Political Economy; Comparative Politics; Power and Society; Introduction to the European Union; and Britain and Europe.

BA International Relations and Modern History
Looking at the contemporary world, two things are apparent. The first is that our world is increasingly shaped by international politics and the global connections between people and nations. The second is that the current state of our world and our societies is the product not of the moment, but of events and processes that have occurred over time.

This degree, taught jointly with the School of History, is designed for students who are interested in exploring and understanding international relations in a historical context. You will benefit from the opportunity to choose from a wide range of options in the two Schools. These include: The Rise and Fall of British Power; Modern Germany, 1914-1990; Imperial Russian and Soviet History, 1860-1945; Napoleon to Stalin: The Struggle for Mastery in Europe; Politics in the USA; America in the World: The History of US Foreign Relations.

During your first year, you will gain a good grounding in the core elements of political theory, international relations, government and modern history. During the second year, you will specialise in those areas that interest you the most. Then in your final year you will place more emphasis on individual research and project work. You can also study a foreign language if you wish and you are encouraged to consider the possibility of spending a semester abroad in your second year. For more information see page 27.

Study Abroad
Whichever of our courses you choose you will have the chance to spend a semester abroad studying in a European university through the Erasmus exchange programme, subject to approval by the department. Exchanges with partner universities in the USA, Canada, New Zealand, Australia, Japan and Hong Kong are also available. For more information see page 27.

BA International Relations and Modern Languages (French, Spanish or Japanese)
This exciting degree allows you to study international relations in depth whilst also learning a foreign language to graduate level.

Continued on the next page.
Studying a modern language will broaden your horizons, improve your knowledge of different countries and cultures, and give you a much better chance of working abroad. It also means you can read foreign language texts and conduct interviews with non-English speakers which allow you to conduct primary research in your work at the University and beyond.

One innovative aspect of this course is the year abroad in a country where your chosen study language is spoken. The time abroad will improve your linguistic ability and increase your confidence as a whole.

Many students go to another university through an exchange agreement and study academic subjects in their study language, but it is also possible to have a work placement, for part or the whole of the year, in a business, public service or third sector organisation. Some placements attract funding from schemes such as Erasmus and other sources, and a small contribution towards travel and accommodation may be available. For more information see page 27.

WHERE NEXT?
Your International Relations degree will equip you for working in international and non-governmental organisations, the civil and diplomatic service, European institutions and businesses, the media and the military. Alternatively you might go into further postgraduate study and teaching.

To help you make the transition from student to working life our Careers Service organises very successful events such as ‘Working in Politics and Government’, ‘Working in Charities and NGOs’ and ‘Working in Westminster and Whitehall’ uniting successful graduates with current students and providing first-hand experience, advice and the chance to make valuable contacts. You will also have the opportunity to take part in work sharing ‘tasters’ and parliamentary internships.

ABOUT US
You will be taught by an enthusiastic and committed group of staff who are all active researchers, publishing in international academic contexts. Our research focuses on: international relations; US foreign policy; conflict and security; Russian politics and foreign policy; democratisation; terrorism; religious fundamentalism; comparative European politics and European integration; political economy; environmental governance and international organisations.

We also house the Centre for Research in European Studies, which organises conferences and a guest seminar series in which, as an international relations student, you will be invited to take an active part. They feature academics, politicians and other practitioners giving talks on every aspect of politics and international relations. Recent speakers have included the Rt Hon Charles Clarke, Baroness Shirley Williams, Vince Cable, Professor Anthony Giddens and Sir Stephen Wall.
Study at a top Law School that makes a difference to its students and the wider world. Benefit from excellent teaching – frequently in small groups – with first class pastoral support. Enjoy Earlham Hall, in which we have invested £8 million to create a unique home for the School and its students. Participate in exciting activities to build your skills, confidence and CV. Let us equip you to thrive in your future career.

ABOUT YOU
You will be working towards three good A levels (or equivalent) and be interested in the law and in the way it shapes our lives. You will be an original and creative individual, articulate and determined to achieve your full potential. You may want to practise law or develop transferable skills for success in another career, whether in the world of business, finance, government or the charitable sector.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

LLB Law
You will study the subjects necessary to progress towards qualification for legal practice, including Constitutional and Administrative Law, Criminal Law, Contract, Tort, Trusts, Land Law and EU Law. You will also develop important legal skills such as legal reasoning, research and writing, as well as career management skills, by taking Law in Practice; Legal Method, Skills and Reasoning and the English Legal Process.

In your second year you will begin tailoring your degree by choosing modules that suit your interests. In your third year you will choose all of your subjects from a wide range of options, including among many others, Company Law, Competition Law, Employment Law, Family Law, Humanitarian Law, International Law, Internet Law, Law and Medicine and Miscarriages of Justice. You can also choose to write a dissertation under the direction of a member of faculty.

You will also be able to build your skills, confidence and CV by engaging in an extensive range of other activities. You might want to:
- Benefit from one of the 55+ internships arranged each year in law firms and other organisations
- Be one of the 25-30 UEA students each year who ‘marshal’ for judges – spending a day on the bench with a judge during a trial
- Benefit from our alumni mentoring scheme, where distinguished graduates offer career mentoring to individual students
- Connect with employers at the UEA Law Fair or at the many talks given by visitors from law firms, the Bar, business or government
- Make a difference to society and gain valuable experience, working for the public good ‘pro-bono’ by helping others – explaining the law, giving advice or representing people in tribunals under appropriate supervision. Every year at least 175 students undertake pro bono work. Over the past 18 months our students have worked with one of the School’s pro bono partners (the Norfolk Community Law Service) and have recovered no less than £500,000 for welfare claimants. This outstanding work won the prestigious LawWorks Pro Bono Partnership Award in 2014, a top national award.

You will also have fun, build your profile and hone valuable skills by engaging in Law Society activities. As well as social events these include: junior and senior mooting contests (trials of points of law) where the finals are held in real courts and judged by real judges or barristers; and negotiation, client interviewing and mediation competitions, the finals of which are hosted by law firms.

All these activities are equally open to students on all of our programmes.

LLB Law with European Legal Systems
Study law in its European context. You will cover the modules needed to progress towards qualification as a lawyer in England and spend a year abroad as an Erasmus exchange student at one of the following universities: Leiden, Maastricht and Groningen (Netherlands); Leuven (Belgium); Lund and Uppsala (Sweden); Aarhus (Denmark); Prague (Czech Republic); Thessaloniki (Greece); Vilnius (Lithuania); Luiss, Rome (Italy); Lucerne (Switzerland); Ljubljana (Slovenia) and Comenius, Bratislava (Slovakia). All these universities offer law courses taught in English.

If you have French or Spanish A level (or equivalent) you can follow a modified programme to include French or Spanish language tuition at UEA to prepare for your year in France (Bordeaux, Lorraine, Lyon III, Tours, Rennes I, Strasbourg) or Spain (Deusto Bilbao, Salamanca). Students fluent in German may study at universities in Berlin, Hamburg, Marburg and Trier (Germany) or Salzburg (Austria). For more information see page 27.

LLB Law with American Law
Study law with a transatlantic dimension. At UEA you will cover the modules needed to progress towards qualification as a lawyer in England and also aspects of American law: the US legal system and the US Constitution. You will spend a year in America at Cumberland Law School (Alabama), South Texas College of Law or Stetson College of Law (Florida). For more information see page 27.
WHERE NEXT?
Take the professional stage of qualification to practise as a barrister or solicitor, or use your transferable skills in business, banking, accountancy, the civil or diplomatic service, the charitable sector, teaching or academia.

Many of our graduates have gone on to build careers in leading firms in London and internationally such as Linklaters, Freshfields, Herbert Smith, Baker & McKenzie and Eversheds and at a wide variety of other firms of all sizes and types. Others work as in-house counsel in limited companies, public authorities and the Government Legal Service. We also have a significant number of graduates who are barristers including several Queen’s Counsel.

ABOUT US
We are a top Law School that makes a difference. We make a difference to our students by providing excellent courses, a superb collegiate environment at Earlham Hall and an unparalleled range of opportunities. We make a difference to the world through our influential research in a wide range of fields including, commercial law, competition law, the law of public protest, internet and media law, law and medicine, and the law of government commerce. We are proud that our students make a difference to society through their pro bono work.

The results of the Research Excellence Framework (REF 2014) rank the Law School 21st in the country ahead of most of our competitors (Times Higher Education). Over 70 per cent of research within our School was judged to be ‘world-leading’ or ‘internationally excellent’.

RANKED AS A TOP 15 LAW SCHOOL BY THE SUNDAY TIMES GOOD UNIVERSITY GUIDE 2015, WE HAVE A REPUTATION FOR EXCELLENCE AND ARE RANKED JOINT FOURTH FOR TEACHING OUT OF ALL ENGLISH LAW SCHOOLS IN THE 2014 NATIONAL STUDENT SURVEY
Study mathematics in a flourishing department, committed to excellence in teaching and research. Our undergraduate courses are renowned for their quality teaching, drawing on the varied expertise of our academic staff: from algebra, logic and number theory to fluid mechanics and combinatorics. We favour small-group teaching, giving you more contact with both your tutors and your peers.

ABOUT YOU
You will already be passionate about the study of maths, attracted to its beauty and structure or perhaps its vast applications and implications in all aspects of life. Your academic achievements so far will reflect this. You may be studying Further Mathematics at A level, but this is not essential.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

**BSc Mathematics**

First you will establish a strong foundation in a wide range of maths topics such as calculus, set theory, complex numbers and mathematical modelling. Some of the material you will study will follow naturally from A level courses, while other topics are completely new and conceptually challenging.

In your second year you will go on to study linear algebra and calculus in depth, alongside probability, sets and numbers, and differential equations. In addition, one module will focus on problem-solving workshops, developing mathematical thinking and promoting accurate writing and interpretation of mathematics. You will also have the chance to tailor your studies and specialise in pure or applied mathematics or to mix your topics with a range of modules such as statistics or environmental mathematics.

As your studies progress further, you will have the flexibility to choose from a substantial range of fascinating and challenging options. These currently include:

- Fluid Dynamics
- Mathematical Biology
- Dynamical Meteorology
- Statistical Mechanics
- Learning and Teaching of Mathematics
- Financial Mathematics
- History of Mathematics
- Galois Theory
- Topology
- Mathematical Logic

In your second or third year, you will have the opportunity to complete an individual project. This allows you to study a topic of your choice in some depth, carefully guided by a faculty member. Topics this year have included knot theory, tsunami propagation, surreal numbers and infinite graphs. The project is an opportunity to develop key employability skills with independent, self-directed study and research.

It is possible to transfer from this programme to the four-year integrated Master’s (MMath) in Mathematics, subject to strong academic performance.

**MMath Master of Mathematics**

Prepare for a career as a mathematician on this prestigious four-year Master of Mathematics programme.

Alongside advanced level lecture courses, you will spend a third of your final year on an individually supervised research project. You can choose from a broad range of topics, ensuring your project is tailored to your own interests.

Recent project topics have included the acoustics of stringed instruments, elliptic curves and Fermat’s Last Theorem, Gödel’s incompleteness theorem, and the Black-Scholes equation.

**MMath Master of Mathematics with a Year Abroad**

Spend your third year of study at either a North American or an Australian university. In recent years, students have travelled to Colorado, San Diego, Melbourne, Sydney and Adelaide.

You will be allocated an academic adviser at your destination university in addition to your home adviser at the University of East Anglia. This will help you settle into the new environment, and to make the most of your year studying mathematics abroad. For more information see page 27.

**BSc Mathematics with Business**

Study mathematical concepts and advanced techniques and their application in the business world. This course is offered in association with Norwich Business School, which has a first-class reputation for teaching and for the development of professional business skills.

Over the three-year programme you will study a broad range of mathematical fields, opening up a wide range of possible careers. Statistics is of particular relevance to business, and there are a range of statistics options available. Understanding of the underlying theory of statistics gives our graduates a head start in many applications.

In the business component of the programme, various strands of study are possible: finance, economics, management and accountancy. You can choose to focus on one specific area of business study, or get a good grounding in a wider range of fields.

Examples of mathematics modules include:

- Financial Mathematics
- Advanced Statistics
- Mathematical Modelling
- Mathematical Logic
- Number Theory.

List is continued on the next page.
Examples of business modules include:
- Financial Accounting
- Principles of Marketing
- Operations Strategy and Management
- Business Finance
- Business and Company Law

WHERE NEXT?
Choose to enter a profession traditionally associated with mathematics, such as accountancy, banking and finance, statistics and data analysis, and secondary or higher education.

Or follow other graduates into roles in which logical thought and problem solving are important; these include information technology, engineering, logistics and distribution, central or local government, and other business areas. Many of our graduates also choose to continue their studies by going on to a higher degree.

The School of Mathematics works together with the University’s Careers Service to offer support to students at every stage of their course, from finding paid or voluntary work opportunities and choosing a career, through to applying for graduate jobs and further study.

ABOUT US
Our mathematics research is of an exceptionally high standard, with 100 per cent receiving international recognition in the 2014 Research Excellence Framework.

As a student in the School of Mathematics, you will be part of a close-knit undergraduate community with great academic support. Our lecturers and professors are leading experts and we have a dedicated team of support staff that ensures our students excel.

Our staff includes leading experts on a broad range of mathematical topics, such as algebra and combinatorics, fluid and solid mechanics, logic and number theory. This research invigorates our teaching; every final year module draws on the lecturer’s own research. Every MMath student writes an individually supervised research project in the final year.
Our approach to media studies and cultural studies combines theory and creative practice, politics, history and sociology as a way to understand the art and business of media production, and the diverse ways in which it has an impact on the world around us.

 ABOUT YOU
You will be working towards three A levels (or equivalent), but we are keen to accept students with other equivalent qualifications such as the International Baccalaureate.

It is not essential for you to have previously studied these subjects. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

 ABOUT THE COURSES
Across all our courses there is an emphasis on allowing you to tailor your degree to suit your interests and ambitions. For that reason we offer a broad range of modules to choose from.

Examples of available modules across both courses include: New Media and Society, Politics and Popular Culture, Political Communication, Broadcast Journalism; Youth, Media and Subculture, Consumer Culture and Society; Women, Islam and the Media, Analysing Media Discourses; The Media and Identity; Social and Political Theory; Politics and Mass Media; Sound and Society; Media, Society and Power; Documentary Theory and History; TV Studio Production; Animation.

On both these courses you will have the opportunity to spend a semester studying abroad at an institution in North America, Australasia, Europe, Japan or Hong Kong. This provides a unique experience of the media and culture of another country. It is an aspect of the courses that has proved very popular with future employers as it has with students. For more information see page 27.

BA Media Studies
You will be introduced to a range of approaches for studying media texts, industries and audiences, all of which will help you to understand the operations and social influence of the media in contemporary society. You may also explore these theories practically within media production modules designed to develop your understanding and practical skills at all stages of the creative process. You will have the opportunity to develop and pitch your ideas, and write and produce fictional and factual work across a range of media formats, and to undertake internships or paid work experience via the video production unit, MAKE@uea.

Introductory modules cover issues such as the relationships between media and society, the nature of the media industries and the specifics of working within them. In the second and third years, specialist modules cover a variety of media and media practices ranging from magazine journalism to youth media, documentary production to television comedy. You will also explore the ways in which the world has been shaped by media. In your final year, you will research a dissertation topic of your own devising, as well as having the opportunity to work on a longer creative practice project, all with the guidance and support of our expert staff.

BA Society, Culture and Media
This degree allows you to study media, cultural texts and their audiences, and lets you see these in a wider context. Our students receive training in methods of social research and have the opportunity to develop practical skills in media production. You also have the opportunity, if you wish, to study a language as part of your degree or as a free extracurricular course.

In your first and second years you will be introduced to key debates in media, society and culture, have the opportunity to engage in more advanced debates about social and cultural theory and you will be able to study more advanced research methods. In your final year, we offer a limited number of work placements and internships. Our students get hands-on experience of what it means to work in the EU, but also local and national government. Students on this course have carried out research projects for think tanks and members of parliament. There are also opportunities for work shadowing and short placements in the media industry.

WHERE NEXT?
The analytical, critical and creative skills that you will develop during your degree are invaluable to employers. Recent graduates have gone on to work in the media and cultural industries, political life, social services, the leisure industry and charities, and others have become lawyers, journalists, teachers and researchers. Many go on to further study for professional and vocational qualifications and higher degrees.

ABOUT US
All staff who teach on these programmes are undertaking cutting-edge research in areas such as: media history; audiences and cultural consumption; media genres; feminist media studies; creativity; the cultural industries; new media; popular music; cultural politics; political campaigning; social identity; critical theory; political communications; sociology; intercultural communications; language and rhetorical analysis and journalism studies.

Over 80 per cent of our research was rated ‘world-leading’ or ‘internationally excellent’ in the Research Excellence Framework (REF 2014). Additionally, our research output was rated third in the UK (REF 2014). As a media and culture studies student you will be part of our active research community. You will be invited to attend research seminars, lectures and masterclasses by visiting scholars and practitioners.
Join Norwich Medical School at UEA and prepare for your future as a highly competent and confident doctor. We ranked number one in the UK when it came to preparing our students for their first year as a doctor. Over 97 per cent of our graduates agreed that ‘the skills I learnt at Medical School set me up well for working as a foundation doctor’.

ABOUT YOU
You are passionate about becoming a doctor and are able to meet the demanding academic entrance requirements for the highly competitive MB BS Medicine degree, or meet the criteria for entry onto our Foundation Year.

At UEA you will be part of an exceptional group of medical students, studying to become a doctor at one of the most highly regarded universities in the UK. Patients will be at the core of your work and study and early exposure to clinical practice means you develop the necessary knowledge and skills needed to meet the health needs of patients in the 21st century.

You will benefit from our team of internationally renowned teaching and research academics, who will support your learning. You will also have access to world-leading facilities, such as the brand new Bob Champion Research and Education Building.

At UEA, we put our students at the heart of what we do. With consistently high scores for student satisfaction and employability, we will give you the best start towards achieving your ambition of becoming a leading doctor in your chosen field.

ABOUT THE COURSES
Our MB BS courses are carefully designed to create graduates who are knowledgeable scholars and scientists, skilful medical practitioners and ethical professionals, ready to use their skills and knowledge to improve the health of all those in their care.

MB BS Medicine
This course is organised into modules based on body systems. You will study the underpinning biological, social and clinical sciences alongside experiencing their application in hospital and general practice placements. Each week, working in small groups in both university and primary care placements, you will apply problem-based learning techniques to virtual scenarios and real patients. You will also participate in a weekly programme of lectures and seminars, supporting your learning of the relevant sciences and specialist skills. In addition, you will undertake dissections and use specimens and models in order to understand the detailed structure and function of the human body.

Assessment is on a module-by-module basis including clinical skills (the Objective Structured Clinical Examination or ‘OSCE’), analytical reviews, portfolios, presentations and projects. You will also be required to pass written and clinical exams at the end of each year.

Key features:
- Clinical placements from semester one in hospitals and general practice providing you with patient contact from the start
- Core clinical sciences taught alongside clinical practice in cutting-edge facilities

WHERE NEXT?
On graduating, you can apply for provisional registration with the General Medical Council with a licence to practise. This becomes a full licence after a year of satisfactory clinical service in approved positions of employment as a Foundation Programme doctor. All of our provisionally registered graduates can apply to work in our local Foundation Programme, meaning we are on-hand to support you during your first year.

At Norwich Medical School we are passionate about helping our students become the best doctors they can be. Since our inception, every graduate who has immediately applied to become a Foundation doctor has gained a post. Seventy five per cent go on to enter the specialist training of their choice. (*source: UK Foundation Programme Office F2 Careers Destination Report)

ABOUT US
At Norwich Medical School you will benefit from a large pool of excellent teachers from the University, NHS hospitals and general practice. Academic staff are actively involved in research as well as teaching. On average over 85 per cent of our health research has been rated as ‘world-leading’ or ‘internationally excellent’ according to the Research Excellence Framework (2014). Our research is focused on answering important health questions such as an understanding of the basic mechanisms and genetics of disease, to clinical trials and clinical guidelines. We are part of the Norwich Research Park which hosts world-class research institutes including the John Innes Centre, The Genome Analysis Centre and the Institute of Food Research.
Learn from teachers who are native speakers, and benefit from our small class sizes and close-knit community, our large multimedia room, Sanako language laboratory and interpreter-training suite.

ABOUT YOU
In addition to working towards your academic qualifications and proficiency in your languages, you will be able to demonstrate a high level of commitment to language study.

It is likely you will have a keen interest in current affairs and cultural matters, keeping abreast of events in both the English and foreign language media.

For the BA Intercultural Communication with Business Management, non-native speakers of English will need to have two well-established working languages of which one should be English. Native speakers of English will need two well-established working languages and/or experience of living in a non-UK culture. If you have an A grade at A level or its equivalent in the language, you may wish to take our three-year fast track option.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
Study a language with teachers who are native speakers and benefit from a close-knit community with smaller classes for higher quality learning.

In our large multimedia self-access room, you will have the opportunity to access live worldwide satellite broadcasts and use a number of language specific tools such as keyboard switch options, customised spell checkers and comprehensive dictionaries, as well as translating facilities including specific translation and professional subtitling software. Additionally, you will have opportunities to apply your language skills in creative ways, for example participate in French speaking performances, get involved in UEA’s student Spanish magazine and explore the Sainsbury Institute for the Study of Japanese Arts and Culture. You can go even further in our digitised Sanako language laboratory for advanced language learning and our high-spec professional interpreter-training suite.

BA Modern Languages with a Year Abroad
Immerse yourself in the advanced study of French, Spanish or Japanese language, or a combination of two of these.

Complement your core language learning with study of translation issues, or the way language works in society and the media, or European literature. Alternatively, you could acquire or enhance a subsidiary language such as Arabic, British Sign Language, Mandarin Chinese, French, German, Greek, Italian, Japanese, Korean, Russian and Spanish.

The language learning element of your degree will involve translation from and into English; reading and listening comprehension; précis and paraphrase work; the study of different styles and registers; lexical exercises and oral work. Since presentation skills are vital in the contemporary work environment, our language work in Japanese, French and Spanish also focuses on vocal and physical projection, on developing poise and managing nerves, and on the ability to speak from notes, improvise, and structure arguments coherently.

In addition you will also be able to choose from fascinating options such as: France, Spain or Japan Through the Eye of a Lens; Aspects of the French Language; Introduction to Latin American Film, Japanese Film Adaptation; Translation Issues Across Media; Subtitling and Dubbing; Intercultural Communication in Practice; Translation Theory and Practice; Introduction to Conference Interpreting; Introduction to Public Service Interpreting and Language and Gender.

You will spend your third year in a country where your honours language is spoken. If you are studying two languages at degree level, you will split your time between the two countries where those languages are spoken. During your year you will extend your experience of the language and the culture by studying at a local university, taking up a teaching assistantship or arranging a suitable work placement.

We have Erasmus exchange links with many universities in France and Spain, as well as links with the Universidade de Guadalajara and the Universidad de las Americas in Mexico.

Students of Japanese will spend their time in Japan studying at one of our partner universities. We visit our partner universities regularly, and whether you are at university, on a paid teaching assistantship or an approved work placement, you may be eligible for an Erasmus grant. For more information see page 27.

Three-Year Fast Track Option
In place of the year abroad, you will spend the spring semester of your second year at a university in an appropriate country.

BA Modern Language(s) with Management Studies with a Year Abroad
Combine the study of your chosen language with a management course taught in our Norwich Business School. This course is specially designed for students who plan to go into the challenging and rewarding world of international commerce. Sixty per cent of UK trade is now with non-English speaking countries and most people work in or with multilingual multinational companies during their careers. This means that employees with advanced language and communication skills are more valuable than ever.

You will gain a general and discerning knowledge of the purpose of management in business and organisations; insights into the practice of management and its environment, and the ability to use the inter-relationship of theory and practice to help solve the key management issues that arise in modern business and organisational life.

In the management studies component of this course you will take two-year-long modules. In your first year, you will study Introduction to Business and
BA Translation and Interpreting with Modern Language Double Honours (with a Year Abroad)

UCAS code: QPRH

A level (typical offer): ABB, including grade A in French, Spanish or Japanese or equivalent

International baccalaureate: 32, including HL French, Spanish or Japanese at grade 6 or above

Length of course: 4 years

Study abroad: Yes

Typical offer grades are for guidance only. Find out more at www.uea.ac.uk/ls/courses

Introduction to Organisational Behaviour: In your second year you will study Human Resource Management and Principles of Marketing. Then in your final year, you will study Strategic Management and one other module from a range of exciting options.

In the language-based component of the course, you will acquire specific expertise in the traditional language skills of reading, writing, speaking and listening, as well as transferable skills such as time management, self-discipline and self-motivation, intercultural awareness, flexibility and resourcefulness, mediation skills, IT literacy and teamwork.

You will also study the skills necessary for presentation, vital in the contemporary work environment. Focus on vocal and physical projection, on developing poise and managing nerves, and on the ability to speak from notes, improvise, and structure arguments coherently.

You will spend your third year abroad, in the country or countries where your chosen language is spoken, before returning to UEA for your final year. During your year abroad you will extend your experience of the language and the culture by studying at a local university or arranging a suitable work placement. For more information see page 27.

BA Translation and Interpreting with Modern Language Double Honours with a Year Abroad

Join this four-year degree programme, and improve your command of your chosen pair of languages (French and/or Spanish and/or Japanese) whilst developing professional expertise in translation and interpreting. You will devote between one-half and two-thirds of your time to your language studies, aiming at equal competence in both. You will also be introduced to a range of specialist translation skills.

Your studies will include compulsory language modules in your chosen languages. These will include topics such as French, Spanish and Japanese culture and society. You then have the opportunity to choose from a range of options such as French Language in Action; An Introduction to Popular Culture in Latin America; Language, Culture and Intercultural Communication; Discourse and Power; and Introduction to Japanese Popular Culture.

You will also have the chance to tailor your degree by choosing from options such as: Subtitling and Dubbing; The Construction of News; Language and Politics; and modules on society as depicted in the cinema and on TV.

You will spend your third year abroad, in the country or countries where your chosen language is spoken. During this year you will extend your experience of the language and the culture by studying at a local university or arranging a suitable work placement. For more information see page 27.

BA Translation, Media and Modern Language(s) with a Year Abroad

Join the only UK course to combine advanced language learning with the study of translation issues and media. You will study French and/or Spanish and/or Japanese language to degree level and choose from a range of specialist modules in translation and media. We welcome native speakers of French or Spanish to this programme.

You will be introduced to the theory and technique of translating, and questions of style and register in a range of specialised areas, including how text is adapted across languages, media and genres; multilingual publications and packaging; digital and online texts; film subtitles; theatre translation. You will also explore how globalisation has affected translation. An optional Translation Work Experience module provides the opportunity to experience professional translation first-hand. You will also have the opportunity to take modules from other departments in the University, such as the School of Art, Media and American Studies. This chance to work with other departments within UEA means you will learn to approach issues from several different angles. It also means you can tailor your degree to your interests and career aspirations.

You will spend your third year in a country where your language is spoken. If you are studying two languages at degree level, you will split your time between two countries where those languages are spoken. During your year abroad you will extend your experience of the language and the culture by studying at a local university, taking up a teaching assistantship or arranging a suitable work placement. For more information see page 27.

Three-Year Fast Track Option

In place of the year abroad, you will spend the spring semester of your second year at a university in an appropriate country.

BA Intercultural Communication with Business Management

In a globalised world where economies are interdependent, intercultural awareness is crucial. This programme, taught jointly with our Norwich Business School, gives you the chance to develop expertise in intercultural communication, business management, and aspects of translation studies. As a graduate, these skills will enable you to operate more effectively in international business.

An optional Translation Work Experience module provides you with the opportunity to experience professional translation first-hand, while the Intercultural Communication in Practice module explores how you can become a more effective communicator in international or multicultural settings.

UK, EU and international students are taught alongside each other which constantly enhances your linguistic and intercultural communication skills. You will have the option of extending or consolidating your proficiency in another language from the wide range offered by the department to further broaden your access to other cultures.
BA Intercultural Communication with Business Management with a Foundation Year

Gain the skills and confidence you need to go on to the degree programme. The foundation year is an intensive course offering an average of 14 hours per week of guided learning, ensuring you are given the support you need to achieve your goals. All modules are taught via lectures, presentations, seminars and study groups and incorporate a variety of assessment methods, preparing you for the different type of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as: essay writing; research; preparing and giving presentations and understanding and evaluating scholarly arguments.

WHERE NEXT?

Graduating with a language degree from the University of East Anglia greatly increases the variety of jobs for which you are qualified, significantly improves your chances of getting a good job and also increases your earning power. Demand for foreign language skills is constantly increasing and our graduates enter a very wide range of professions, both in the UK and abroad. You will take employability modules in your first, second and final years to boost your career prospects. We are well above the national average for graduates using their language skills in long-term jobs and have one of the highest employment rates at the University.

You could also choose to build on your undergraduate work with further study, in particular via our MA in Applied Translation Studies.

You will also benefit from our annual Careers Using Languages Fair, where we showcase the range of opportunities available to students. This is a great chance to meet employers and to hear alumni speak about their career paths since graduating.

ABOUT US

Our teaching staff are native speakers in the language you are studying. Language and Communication Studies has come fifth in the UK with 74 per cent of its research rated ‘world-leading’ or ‘internationally excellent’ in the Research Excellence Framework (REF 2014), a major Government analysis of university research quality.

Natural Sciences works together with the University’s Careers Service to offer support to students at every stage of their course, from finding paid or voluntary work opportunities and choosing a career, through to applying for graduate jobs and further study.

**ABOUT US**

The Faculty of Science is internationally renowned for its world-class research. There are strong research links between the subject areas of Biological Sciences, Chemistry, Computing Sciences, Environmental Sciences, Mathematics, Physics, Engineering, and Pharmacy. This interdisciplinarity is extended beyond the Faculty of Science to our partners at the Norwich Research Park, which includes the John Innes Centre, The Genome Analysis Centre, the Institute of Food Research and the Norfolk and Norwich University Hospital.

---

Create a unique degree that crosses conventional boundaries as you tailor your choices from across the sciences. Whichever modules you choose, you will learn at the forefront of your chosen disciplines from our stimulating, research-led teaching programme.

**ABOUT YOU**

You will be achieving at the highest level in your studies so far and be excited about studying sciences in this unique, award-winning environment. You may already have an eye on a future in which you continue to specialise in your chosen field or you may want the freedom to tailor a path to your growing interests and evolving strengths.

As with all our courses, we also welcome students with non-traditional qualifications and experience, including mature students.

**ABOUT THE COURSES**

**MNatSci and BSc Natural Sciences**

You will study modules from the wide range that is available in the Faculty of Science. The flexibility of the degree allows you to specialise or maintain a broad range of interests. Your individually supervised research project in your final year may also be in a combination of disciplines.

The four-year integrated Master’s programme enables you to study at least two subjects at Master’s level including chemistry, biology, mathematics, computing, physics or environmental sciences.

**BSc Natural Sciences with a Year Abroad**

Spend your third year at universities in Australasia including Sydney, Perth, Brisbane and Auckland, or in the United States or Canada, including Florida, California, Vancouver and Calgary. You can also choose a European year abroad, in which case you will take appropriate language modules during your second year, before spending your third year of study at a university in France, Spain, Italy, Germany or the Netherlands amongst others. For more information see page 27.

**BSc Natural Sciences with a Year in Industry**

Spend your third year of study on an industrial placement where you will have the opportunity to immerse yourself in a commercial environment. Here you will gain invaluable experience and a greater understanding of the application of your science interests. We have links with organisations such as AstraZeneca, Aviva, Environment Agency or GlaxoSmithKline.

**WHERE NEXT?**

You will graduate exceptionally well prepared for your future career, having gained skills that are highly valued by employers. The latest figures show 100 per cent of our graduates, that were available to work, were in employment or further study within six months of leaving us. About a third of students go on to postgraduate research studies. Many Natural Sciences graduates choose to continue to specialise in their chosen scientific fields across a broad range of careers including forensics, teaching, science journalism or laboratory research.
NURSING AND MIDWIFERY

BSc Adult Nursing
UCAS code 8701
A level (typical offer): BBB, excluding General Studies and Critical Thinking
International baccalaureate: 31
Special requirements: Five grade A-C GCSEs, including English Language/Literature and Mathematics as a minimum, with Science also preferred
Length of course: 3 years (September and January intakes)

Additional Requirements:
Successful applicants will also be subject to a satisfactory Occupational Health check, an Enhanced Disclosure and Barring Service screening and two satisfactory references.

All successful applicants are required to attend a face-to-face interview and are expected to demonstrate values as reflected within the NHS Constitution. Applicants must also demonstrate their eligibility for NHS funding.

We welcome mature students and our BSc Nursing programmes consider international students. Evidence of recent study and proficiency in English is preferred.

Typical offer: grades are for guidance only. Find out more at www.nhsbsa.nhs.uk/courses

ABOUT YOU
To study to be a nurse or a midwife you will need to be caring, compassionate and have a commitment to helping and assisting people in need. You’ll also need to have excellent people skills in order to communicate difficult and sometimes complex health issues effectively.

Nursing and midwifery are ever-changing professions. In these demanding but rewarding careers, you will need to be highly motivated with a mature attitude. Predominantly a team player, you will also have to work on your own initiative.

ABOUT THE COURSES
Across all our nursing and midwifery degrees, you will work with healthcare students from other fields for a significant proportion of your School-based learning, giving you insight into other professional perspectives and helping you develop important teamwork skills.

Your first year will see you experience a high level of contact time with lecturers. This gradually decreases over the three-year period as you become a more confident and independent learner.

You will experience different assessment methods, which have been carefully chosen to reflect the importance of being able to apply relevant theoretical knowledge to practise. With guidance and support, you will also build a sound portfolio of evidence demonstrating your progression, reflecting both your theoretical and clinical skills throughout the three-year programme.

All our nursing and midwifery programmes are funded by the NHS so there are no tuition fees to pay to the University. You may also be eligible for a bursary from the NHS. Find out more at www.nhsbsa.nhs.uk/students

BSc Adult Nursing
Adult nursing is a rewarding and challenging career where you can make a positive difference to people’s lives. As a qualified adult nurse, you will care for adult patients suffering from a wide range of acute or long-term illnesses. During this course, you will learn to become a nurse who is caring, determined and has exceptional communication skills.

In 2014, all of our adult nursing graduates achieved ‘good honours’ (2:1 or above). Our qualified nurses are highly sought after and well respected professionals, with 99 per cent employability within six months of graduating (Unistats, 2014).

BSc Mental Health Nursing
UCAS code 8760
A level (typical offer): BBB, excluding General Studies and Critical Thinking
International baccalaureate: 31
Special requirements: Five grade A-C GCSEs, including English Language/Literature and Mathematics as a minimum, with Science also preferred
Length of course: 3 years (September intake)

BSc Children’s Nursing
UCAS code 8730
A level (typical offer): ABB, excluding General Studies and Critical Thinking
International baccalaureate: 32
Special requirements: Five grade A-C GCSEs, including English Language/Literature and Mathematics as a minimum, with Science also preferred
Length of course: 3 years (September intake)

BSc Learning Disabilities Nursing
UCAS code 8761
A level (typical offer): BBB, excluding General Studies and Critical Thinking
International baccalaureate: 31
Special requirements: Five grade A-C GCSEs, including English Language/Literature and Mathematics as a minimum, with Science also preferred
Length of course: 3 years (September intake)

Additional Requirements:
Successful applicants will also be subject to a satisfactory Occupational Health check, an Enhanced Disclosure and Barring Service screening and two satisfactory references.

All successful applicants are required to attend a face-to-face interview and are expected to demonstrate values as reflected within the NHS Constitution. Applicants must also demonstrate their eligibility for NHS funding.

We welcome mature students and our BSc Nursing programmes consider international students. Evidence of recent study and proficiency in English is preferred.

BSc Mental Health Nursing
Mental health nursing is often complex, demanding and very rewarding. As many as one in three people are thought to suffer some form of mental health problem. However, dealing with the human mind and behaviour is not an exact science. Important strengths required to be a mental health nurse are communication skills, a strong personality and empathy.

As a nurse working in mental health, you will work as part of a team that includes general practitioners, psychologists, social workers, psychiatrists, occupational therapists, arts therapists and healthcare assistants.

BSc Children’s Nursing
Children’s nursing is a very important and valuable career. You will care for children of different ages in various settings. You will need to have strong verbal and non-verbal communication skills and people skills. In this career you will not only care and support children, but will be required to provide support to their families too.

BSc Learning Disabilities Nursing
Learning disability nurses play a vital role in improving the health, wellbeing and life expectancy of people with learning disabilities.

You will develop the highest standards of verbal and non-verbal communication skills supporting people of all ages. You may work in acute hospitals, adult community teams, learning disability child and adolescent services, respite services, forensic services and children’s hospices.

In addition to helping to meet the diverse healthcare needs of people with learning disabilities, you will also support them and their families in overcoming other important challenges. These include promoting and protecting the human rights of people with learning disabilities and ensuring their equal and full participation and inclusion in society.

Be part of an innovative and established research-led School, where you will benefit from award-winning facilities and lecturers with a reputation for excellence. You will have early patient contact from the outset and a mentor to guide you along the way, enabling you to be fully prepared for your nursing or midwifery career.
Midwifery is unique. It is the only profession that focuses solely on the care of pregnant women and their families throughout the whole childbirth experience – from preconception, pregnancy and labour, to the early stages of parenthood.

Our course has a reputation for excellence. We will teach you the highest standards of care and give you the necessary skills required to enable you to support the needs of childbearing women and their families.

You will come to represent a reliable and constant source of care and advice during what is one of the most important times of their lives.

WHERE NEXT?
Successful completion of our pre-registration nursing and midwifery courses entitles you to apply for registration as a qualified nurse or midwife with the Nursing and Midwifery Council.

Our graduates go on to work within the NHS, Armed Forces and education sector, as well as charities, research and private practice in the UK and overseas.

Continuing professional development is facilitated through our post-registration courses and a variety of study days.

ABOUT US
The School of Health Sciences is led by a team of highly dedicated healthcare professionals. Our research is world-class and underpins all our courses and learning. Through our clinical practice we work in partnership with healthcare providers in the region, collaborating with service users and carers. This ensures our students benefit from a wide range of practice placements.

As a team, everything we do is focused on you, the student – we pride ourselves in making sure that everyone who studies with us performs at their very best, and graduates with the necessary skills, knowledge, confidence and experience they need to go on to become leaders in their chosen field of health care.

Our nursing and midwifery courses are based in a state-of-the-art building adjacent to the main campus on the internationally renowned Norwich Research Park, alongside the Norfolk and Norwich University Hospitals NHS Foundation Trust.

Become a qualified occupational therapist or physiotherapist with UEA and you will receive the best possible academic grounding and practical experience. You will be set up for a rewarding career where you will use your skills and knowledge to make a crucial difference to people’s quality of life and independence.

ABOUT YOU
Occupational therapists work with people who find it difficult to participate in life due to illness, injury or disability. You will need to consider the physical, psychological, social, spiritual and environmental needs of your service user, helping them to develop the skills and confidence to carry out practical and purposeful activities. You will enjoy being a creative problem solver, and you will have an interest in working closely with people to enable them to lead full and satisfying lives as independently as possible.

If you are considering a career as a physiotherapist, you will need to be dedicated, single-minded and have excellent communication skills. Motivation and patience are also essential, as many cases will require long-term treatment. When you study with us you will have the opportunity to apply your knowledge and experience, solving problems and putting into practice treatments for a whole range of physical problems.

ABOUT THE COURSES
Teaching methods are varied and include lectures, seminars, group work and self-directed learning. You will make use of case material as a basis for applying theory and problem solving. There is a large practical component to the courses where skills are acquired by practising on your fellow students. You will then be able to apply what you have learnt and develop further knowledge and skills on placement, under the guidance of your practice educator.

BSc Occupational Therapy
Explore the dynamics of human occupation such as the barriers and opportunities to participation, which will link with studies in anatomy, physiology, sociology and psychology.

Over the duration of your studies, you will gain the skills, knowledge, confidence and experience needed for occupational therapy practice.

Your transition from student to qualified practitioner is considered throughout the course, and as you progress you will develop the skills required for a more autonomous practice.

To encourage active learning about the importance of occupation you will take part in occupational experience activities. You will also work with a range of students from different health professions in order to gain an understanding of different professional perspectives.

On graduation you will be eligible to apply for registration with the Health and Care Professions Council and to join the membership of the College of Occupational Therapists.

BSc Physiotherapy
Learn to maximise health and wellbeing potential through the understanding of human function and movement.

Over this three-year course, you will gain the professional knowledge and abilities required to work as a physiotherapist. You will develop skills in assessment and treatment of a wide range of problems of impairment, activity and participation. You will also be confident in manual therapy, therapeutic exercise and the use of electrophysical modalities.

Your training will cover the core areas of neuro-muscular, musculoskeletal, cardiovascular and respiratory therapy as well as new and emerging areas of physiotherapy. Teaching and learning in the University setting is delivered by highly-skilled and experienced lecturers using a variety of methods including lectures, seminars and tutorials, practical classes, project work and workshops.

Upon graduation you will be eligible to apply for registration with the Chartered Society of Physiotherapy.

MSc Occupational Therapy and MSc Physiotherapy
If you already have a degree in an appropriate subject, our Master’s degrees offer an accelerated route to registration in the fields of occupational therapy or physiotherapy. For more details email admissions@uea.ac.uk

WHERE NEXT?
You will graduate ready to begin a career in your chosen field. Our courses are designed to prepare you for the working environment and to develop your skills of leadership, problem solving and flexibility. In fact, surveys of managers who employ our graduates indicate that our graduates are capable candidates and well prepared for the modern health and social care services.

After graduation you could go on to a career in the NHS. Alternatively you could seek employment in an increasing range of non-NHS settings, for example, within the private and voluntary sectors, industry, research and education. The School of Health Sciences supports students in developing the skills required for work and collaborates with the University’s Careers Service who offer additional support to students in this area.

ABOUT US
Throughout your course, you will work with university tutors, practising clinicians, clients and their families/carers in a combination of academic study and practice placements. Our innovative approach to student-centred learning enables all of our graduates to achieve at their highest level. As a School, all of our academics are focused on the student experience, with both courses ranking seventh place in the Guardian league table (2015). The School has a thriving research community and was ranked sixth in the UK for the quality of its research outputs for Nursing and the Allied Health Professions (Research Excellence Framework, 2014).
You’ll be fully prepared for life as a paramedic or an operating department practitioner when you choose to study with us. You’ll gain the relevant clinical skills training from lecturers who are highly experienced in their fields together with first-hand experience through high quality placements.

ABOUT YOU
You will be prepared to take on the training needed for a role that is demanding, both physically and mentally, and can at times be stressful. You will be driven by the reward of knowing that you are making a difference.

You will also already be committed to the values of the NHS, which form a key part of our admissions process.

ABOUT THE COURSES
Dip HE Operating Department Practice
Operating department practitioners work alongside surgeons, anaesthetists and theatre nurses in delivering a vital role in the management and care of patients undergoing a surgical procedure.

The Operating Department Practice course is a two-year Diploma in Higher Education during which you spend 60 per cent of the course on clinical placement enabling you to develop competence in patient care, clinical skills and in the use of technology within the operating theatre environment.

Over the two years you will gain the competence and confidence in all aspects of perioperative practice. By the time you graduate you will be able to provide evidence-based patient care to a high standard.

Our Operating Department Practice programme is approved by the Health and Care Professions Council.

This programme is funded by the NHS so there are no tuition fees to pay to the University. You may also be eligible for an NHS bursary. Find out more at www.nhbsa.nhs.uk/students

BSc Paramedic Science
Paramedics are the first senior healthcare professionals at an accident or medical emergency, rapidly assessing the patient’s condition and giving essential treatment as required. On this course, you will learn how to swiftly assess the patient’s condition and take important and life-saving decisions about the treatment needed.

First you will establish a firm foundation for paramedic practice. Study will include modules on practice-based learning, key clinical and assessment skills and professional practice, psychosocial aspects of practice, evidence-based practice, communication and personal development.

As you progress, you will encounter more complex patient management and decision-making situations, through simulation and scenario work and clinical placements. You will explore current issues in paramedic and out-of-hospital practice and develop confidence and skills in critical care. You will also further develop your research awareness, service improvement and teamwork skills.

Finally, you will cover enhanced clinical assessment and decision making for first contact care, practice education, leadership and service improvement. Your final year programme is also carefully designed to prepare you for the transition into practice as an independent registered paramedic.

This course has been developed collaboratively with the East of England Ambulance Service NHS Trust (EEAST) and throughout the three years of your degree you will be able to apply your developing knowledge and skills across a range of placements with the EEAST, alongside other community and hospital-based locations.

Our BSc Paramedic Science is endorsed by the College of Paramedics and approved by the Health and Care Professions Council.

WHERE NEXT?
After completing your Dip HE Operating Department Practice you will be ready to work alongside surgeons, anaesthetists and theatre nurses in the NHS and the private sector.

As well as employment opportunities within NHS ambulance services, paramedics are employed within private ambulance services and can specialise within critical care, urgent and primary care – for example, working in walk-in centres and GP practices, as well as with the police and the courts.

ABOUT US
As well as face-to-face learning, you will also learn through inter-professional experiences with medical students, nurses, midwives, pharmacists and allied health professionals across a range of programmes.

You will have an allocated personal adviser on hand for any course concerns, with whom you will regularly review your progress and learning needs.

Both courses are delivered by enthusiastic and supportive lecturers, including experts from practice.
About you

As well as a strong interest in chemistry and working towards the right academic credentials, you will be considering a future in the pharmaceutical industry or research.

You will also be excited about the prospect of a course developed in consultation with industry-leading experts. As with all our courses, we also welcome students with non-traditional qualifications and experience, including mature students.

About the course

BSc Pharmacology and Drug Discovery

You will gain a strong foundation in basic neuroscience, the chemistry of the life sciences, drug delivery and pharmacology.

You will then go on to apply your knowledge to individual systems of the body. These include neurology, immunology and the cardiovascular, renal and gastrointestinal systems. In addition, modules will cover cancer and infectious diseases. You will learn how drugs are designed, synthesised, and about their mechanisms of action.

As you develop your skills as a scientist, you will also take a course in business studies at Norwich Business School. This will provide you with an understanding of the world of management and the key concepts of management practice, vital tools to working in today’s corporate world.

Visiting lecturers from industry will expose you to real-world challenges and topics in the pharmaceutical industry, helping you to prepare for tomorrow’s job market.

In the final year you will exploit your knowledge from the first two years and perform a final year project in collaboration with a research active faculty member. This could include tackling current challenges in cancer, infectious diseases, age-related disorders, epigenetics, drug design, and drug delivery.

In addition to the final research project, you will have the opportunity to select from modules covering a broad range of topics in biology, drug discovery and pharmacology. Furthermore, you will experience how toxicology and quality control of drugs are performed. Finally, in collaboration with Norwich Business School, you will take a course in project management.

Where next?

Graduate with the skills and knowledge required to work in pharmacology or drug design and development areas. Employability is embedded throughout the course, with careers workshops, to support developing CVs, interview techniques, presentation skills, team working, research skills, business skills and building links with industry.

About us

The School of Pharmacy’s research environment has been rated 100 per cent ‘world-leading’ or ‘internationally excellent’ in the 2014 Research Excellence Framework. Research in pharmacology and drug discovery focuses on age-related diseases including cancer, cardiovascular disease, inflammatory diseases and neurodegenerative disorders which in turn feeds into our teaching, ensuring you are informed of the latest developments in the field.

Study at a School consistently ranked within the top six in all major university league tables for pharmacy and pharmacology
Graduate ready for professional pharmacy practice from the highest ranking Pharmacy School in the National Student Survey 2014. Be it a career in community, hospital or industrial pharmacy our graduates are highly successful in securing pre-registration training in some of the most sought after locations in the UK.

ABOUT YOU
You will have an interest in combining your love of science with a healthcare perspective into a rewarding career. You will be working towards the academic entry requirements and share the values of the National Health Service.

For all our pharmacy courses you will be required to undertake an enhanced Disclosure and Barring Service screening during your course.

For our Pharmacy with a Foundation Year course, you may be a pharmacy technician holding NVQ level 3 qualifications. You may not have studied science previously or you may have had disadvantages in your secondary education. All applicants for this course are considered on a case-by-case basis and all candidates will be interviewed before being offered a place on the course.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
On all our courses we utilise a range of teaching and assessment methods to prepare you for practice as both a scientist and a practitioner. These include problem-based and team-based learning (PBL and TBL), portfolio-based assessment and practical examinations to assess your ability to practise as a pharmacist.

MPharm Pharmacy
During this integrated course you will develop your skills in chemistry and biology and learn how these are applied to drug design, drug delivery, pharmacology and medicines management with leading researchers and practitioners.

To prepare you for multi-professional practice you will also be given a number of opportunities to learn with medical, nursing and healthcare professions students.

Placements in community and hospital settings are provided throughout the course, with electives in the final year providing opportunities for you to work alongside prison-based pharmacists, armed forces pharmacists and senior pharmacy managers.

You will undertake a research project in your final year, and gain a greater insight into a specialist subject area. This can be undertaken, as part of the Erasmus scheme, at an English-speaking laboratory in a European university. We currently have arrangements with Pharmacy Schools in Germany, France, Spain and Norway.

Pharmacy with a Foundation Year
UCAS code 19829
Requirements: See our website for specific entry criteria. Grade C or above in GCSE English Language and Mathematics
Length of course: 5 years

Pharmacy with a Foundation Year
With a foundation year you can gain the skills and knowledge you need to progress to a pharmacy degree.

In both semesters you will study biology and chemistry. In your first semester you will also study a mathematics module, which will be tailored to your previous experience. In your second semester you will also follow the specialised introduction to Pharmacy Skills module.

During the foundation year you will be assigned an adviser from the School of Pharmacy who will guide you through your course to ensure your progression on to the MPharm Pharmacy degree.

WHERE NEXT?
Following graduation you can undertake a 12-month structured pre-registration training period leading to registration as a pharmacist by the General Pharmaceutical Council.

As a pharmacy graduate, you will benefit from excellent career prospects both regionally and nationally: working in community practices; hospital pharmacies; primary care and the pharmaceutical industry.

The latest Guardian University Guide 2015 shows that 100 per cent of our graduates go on to graduate-level jobs or further study within six months of graduation.

The School of Pharmacy collaborates with the University’s Career Service to offer you support at every stage of your course, from choosing a career through to applying for graduate jobs.

ABOUT US
The School of Pharmacy at UEA was founded by a group of leading pharmacists who wanted to change the way the subject is taught.

What resulted is an innovative degree programme that produces graduates with a wealth of real-world experience, and inspired widespread change in pharmacy education.

At UEA we were the first to emphasise professional experience from the first year, introduce innovative teaching methods such as problem-based learning and provide extensive careers support.

As well as this exceptional teaching from a dedicated team of academic staff and registered practising pharmacists, we are at the forefront of pharmacy research.

We ranked first for research output among all UK Pharmacy Schools in the latest Research Excellence Framework 2014 and 87 per cent of our research was deemed ‘world-leading’ or ‘internationally excellent’
PHILOSOPHY

Study philosophy in a vibrant community of teaching and research staff, graduate students and undergraduates with a shared quest to explore the greatest questions of all time, such as those concerning life, values, mind and the universe.

ABOUT YOU
You will be a bright and interested student with an independent mind. There are no specific A or AS level subjects that are required in order to take up philosophy at university, and it is not necessary to have studied any philosophy before. We welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES
Philosophy thrives on discussion. That is why as well as lectures and your own study, in every module we teach, part of your time is spent in a seminar or tutorial group. This gives you the opportunity to explore your own ideas, and to debate the issues with the lecturer. We use a variety of types of written work and exercises both in teaching and assessment. Additionally, you will also have the opportunity to study a foreign language alongside your degree course.

BA Philosophy
In your first year you will study Philosophical Problems, Classic Readings in Philosophy, Reasoning and Logic, Modern Readings in Philosophy and Great Books. In your second and third years, in addition to studying Language and Reality, you will have the opportunity to choose your own modules, including up to two from outside philosophy, tailoring your degree to your interests.

In your final year, you will complete a dissertation on your chosen project. This can cross the subject boundary if you are taking a joint honours degree. Students find this an excellent preparation for continuing to a Master’s degree, which can also be taken at UEA, by adding a fourth year to your studies.

BA Philosophy and History
By combining the study of philosophy and history you will gain a unique perspective on both the history of philosophy, the philosophy of history and the historical context of some of the most important ideas of all time.

In your first year you will study Classic Readings in Philosophy, Great Books, Modern Readings in Philosophy, Introduction to Medieval History, Introduction to Early Modern Studies. In your second and third years, in addition to studying The Philosophy of History, you will have the opportunity to choose your own modules, typically half from philosophy and half from history, tailoring your degree to your interests. You will also have the opportunity to write a dissertation.

BA English Literature and Philosophy

Again and again, creative writers and philosophers consider the same questions in different ways. This is what makes the combination of English literature and philosophy so fruitful.

Through the study of philosophy and literature, you will explore some of the most important attempts to make sense of human life and the questions it raises. For example, Jane Austen’s Pride and Prejudice invites the question “What is it to live well?”. Shakespeare’s The Tempest raises questions about the gap between the mind and the world, and whether there is such a thing as natural justice; and Eliot’s Four Quartets is a meditation on the concealed nature of God. In your first year you will study Classic Readings in Philosophy, Modern Readings in Philosophy, Literature in History, Reading Texts I, Reading Texts II and either Great Books or Reasoning and Logic. In your second and third years, in addition to studying Literature and Philosophy, you will have the opportunity to choose your own modules tailoring your degree to your interests. You will also have the chance to write a dissertation.

BA Philosophy with a Foundation Year

UCAS code: V505
A level (typical offer): ABB
International baccalaureate: 32 including HL History with a score of 5 or above
Length of course: 3 years
Option to study abroad: Yes

ABOUT US

Our lectures engage in research in a range of topical areas of the discipline, including philosophy and literature, ethics, environmental philosophy, philosophy of mind and language, and cutting-edge work at the intersection between philosophy and empirical sciences such as psychology, linguistics and economics. We also research a range of periods in the history of philosophy such as classical philosophy, early modern philosophy, twentieth century philosophy both in the analytic and continental traditions, notably the philosophy of Ludwig Wittgenstein.

You will develop working relationships with our research-active staff, whose books and articles are read in universities the world over.

WHERE NEXT?

Through the study of philosophy you will develop many key transferrable skills. You will learn how to solve problems, present rigorous arguments, analyse texts and evidence and make judgements. Such skills are highly regarded by employers, opening the door to a wide range of occupations, including politics, journalism, marketing and computing. After further study, many philosophy graduates also go into law, teaching or academic research.

Philosophy graduates also make good business leaders because they are well equipped to navigate this increasingly complex world tackling ethical issues and existential questions. Others are drawn to computer programming, due to their grasp of logic and reasoning. An annual event unites philosophy alumni with current students where you can benefit from insights into their career path since leaving university.

The modules you study with us will develop your ability to think critically and give you a deeper understanding of literature and the humanities. Students find our modules to be both intellectually challenging and enjoyable and most of our students find that attending lectures is a particularly positive experience.

The University of East Anglia is a public university in Norwich, England. It was established in 1963 as a founding member of the University of East Anglia Group. The university has an international reputation in the fields of science, technology, and the arts.

The university is home to several research centres and institutes, including the Centre for Research in the Arts, Social Science, and Technology (CRASSH), the Centre for Research in the Arts, Social Science, and Technology (CRASSH), and the Centre for Research in the Arts, Social Science, and Technology (CRASSH). The university also has a strong focus on environmental research, with centres such as the Centre for Environmental Change and the Centre for Solid State Science.

The university offers a range of undergraduate and postgraduate degree programmes, including many in the arts, humanities, and social sciences. Students can choose from a variety of courses, including English literature, philosophy, history, and politics.

The university is located in the city of Norwich, a historic city that is rich in history and culture. The city is known for its medieval architecture, including the Norwich Castle and the Norwich Cathedral. The city also has a strong cultural scene, with a number of museums and art galleries.

The university is committed to providing a high-quality education to its students. It is a member of the Russell Group, an alliance of leading research-intensive universities in the United Kingdom.
About You
You will be passionate about physical education, sport and health and excited by the prospect of a career in physical education, sport, physical activity or in the health sector.

You will be working towards three A levels or alternative equivalent qualifications such as the International Baccalaureate. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

Due to the nature of this degree, you will be required to undertake an Enhanced Disclosure and Barring Service screening.

About the Course
BA Physical Education
The integration of theory, research and practice provides the foundation for learning on this multi-disciplinary programme. You will study the policy, practice, participation and promotion of physical education, physical activity and sport both within and beyond the National Curriculum.

You will benefit from module choices that allow you to tailor your development towards a range of careers and postgraduate study opportunities and small group teaching to facilitate interaction between lecturers and students.

Due to the nature of this degree, you will be required to undertake an Enhanced Disclosure and Barring Service screening.

About Us
Teaching on the Physical Education degree is research-led and benefits from the active research community in the School of Education and Lifelong Learning. You will learn from lecturers who are members of the Physical Education Pedagogy Research Group and expertise focuses on policy and practice-related issues such as motivation, educational transitions, inclusion, pupil voice, health and curriculum development.

Where Next?
Our graduates go on to work in teaching, physical activity and health agencies, the health and fitness industry, sports clubs and for local councils.

This degree will also provide you with the skills and knowledge necessary to progress to apply for a PGCE in secondary physical education school teaching. Plus many of our graduates decide to continue their studies and undertake other postgraduate courses including Master’s degrees in topics such as physiotherapy, nutrition, sports coaching and performance analysis and business management.

“This course excels in providing the basis of knowledge within PE. It is delivered by an inspiring and supportive department, which encourages students to grow academically and professionally. Through a mix of stimulating lectures and motivating practical sessions, I have acquired valuable skills such as communication and organisation. More importantly, I have grown in confidence and have the opportunity to shape my future career.”

Lucy Rogerson, Teacher of PE and a SENDco at Archbishop Sancroft Church of England High School, Norfolk.
Politics is in the fabric of all modern life, which is why we offer courses flexible enough for you to study it with media, philosophy and internationally with opportunities for travel and placements abroad.

ABOUT YOU
You will be working towards achieving ABB at A level or equivalent, but not necessarily in Politics. As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

If you don’t meet the entry requirements, you may wish to apply for BA Politics with a Foundation Year. On this course you will learn all the skills needed to go on to study at degree level.

ABOUT THE COURSES
Our politics programmes offer a strong introduction to the subject before enabling you to progress to choose from a wide range of more specialist options in your second and final years, allowing you to customise your degree according to your interests and career ambitions.

You will have the opportunity to learn about political communication by exploring the relationship between politics and media.

Teaching combines lectures, small group seminars and tutorials. We use a range of teaching methods including case studies, group work, debates, simulation games and more. You will have the opportunity to practise newly acquired skills through work placements, internships, networking masterclasses, work shadowing arrangements in the UK and the EU.

You will also have the opportunity to study abroad for a semester. You could choose a European university, subject to approval by the department. Exchanges with partner universities in the USA, Canada, New Zealand, Australia, Japan and Hong Kong are also available. For more information see page 27.

You also have the opportunity to write a dissertation on an area of your choosing. Additionally, you can choose to study a foreign language alongside your degree course.

BA Politics
You will have the opportunity to learn from active researchers and practitioners in local and national government, across your choice of a wide range of options, from political ideas and theories, to national and international political processes and institutions. We also offer options on the politics of Britain, America, Russia, Africa, the Middle East and other European countries; on international relations and the EU; on democracy, political ideology, and the history of political thought; on rhetoric and political communications; on mass media, political culture and identity, and popular culture.

In your final year, you can apply for one of a number of EU and Parliamentary Research Placements (a chance to research on a project for an MP) or to do your own research. You may also select modules from a choice that in previous years has included: Politics and Popular Culture; International Communication; Western Political Thought; The Clash of Fundamentalisms; Terrorism and Counter-Terrorism; Distributive Justice; Australia Politics, Culture, Society; Rhetoric: Democracy and the Politics of Persuasion; The Politics of Elections and Electoral Malpractice; Localism in Britain: Politics and Governance with Internship.

BA Politics with a Foundation Year
With a foundation year you can gain the skills, knowledge and confidence you need to progress onto the degree programme. This intensive course includes an average of 14 hours per week of guided learning, ensuring you are given the support you need to achieve your goals. All modules are taught via lectures, presentations, seminars and study groups and incorporate a variety of assessment methods, preparing you for the different type of assessments you will undertake in your continuing study. Through group tutorials, interactive training sessions and formative feedback you will be able to develop skills in areas such as: essay writing; research; preparing and giving presentations and understanding and evaluating scholarly arguments.

BA Politics and Media Studies
Learn to understand the role of the media in national and international politics on this course offered by the School of Politics, Philosophy, Language and Communication Studies. You will train in core elements of political science and media studies and choose to develop skills in journalism, media production and research methods.

You will learn to investigate and debate the power and influence of both the traditional mass media and new forms of communication in national and international politics, as well as cultivating key media skills through a wide range of course options.

In your final year, we also offer a limited number of work placements and internships. Our students get hands-on experience of what it means to work in the EU, and also local and national government. Students on this course have also carried out research projects for think tanks and members of parliament. There are also opportunities for work shadowing and short placements in the media industry.

BA Philosophy and Politics
The study of philosophy and politics has been closely intertwined ever since the days of the Ancient Greeks. Our political scientists and philosophers have come together to offer an exciting interdisciplinary degree programme giving you the opportunity to address issues such as the philosophical underpinnings of democracy, the ethics of world politics, and the philosophical basis of utopian political systems. This programme also includes a mixture of historical reflection - exploring questions that earlier philosophers have raised and testing the value of their answers – and cutting-edge work on questions and theories that seem new and fashionable.
WHERE NEXT?
A politics degree provides you with transferable skills that are relevant in a wide variety of professions in the public and private sectors. In addition to working in politics and public service, our graduates have pursued careers in journalism, accountancy, management, advertising and teaching. Some graduates go on to higher degrees and become researchers and lecturers. We help our students to gain experience through work placements, internships and work shadowing arrangements in the UK and the EU. Our Careers Service organises a very successful ‘Working in Politics’ day for the benefit of our students.

ABOUT US
You will be taught by lecturers who are active in their field, and are close to all new developments in local and national government.

Our research focuses on social and political theory; international relations; policy-making; European politics; British politics and governance and the politics of media and culture. We also research religion and politics, security and terrorism, global cities, celebrity politics, new forms of political activism, political rhetoric, migration, hate speech, electoral systems and South African politics.

All of our teaching is research led; 70 per cent of research in Politics and International Relations was rated ‘world-leading’ or ‘internationally excellent’, according to the Research Excellence Framework (REF 2014). We ask the same questions of our students that we do in our research. This means your teaching is at the cutting edge of the discipline. Because politics is closely linked with other subjects at the University, much of this work combines the approaches and insights of different disciplines to produce distinct and innovative programmes.

WE OFFER OPPORTUNITIES FOR PARLIAMENTARY INTERNSHIPS AND TO STUDY ABROAD. NINETY FIVE PER CENT OF OUR POLITICS STUDENTS ARE SATISFIED WITH THE TEACHING THEY RECEIVE FROM US ACCORDING TO THE GUARDIAN UNIVERSITY GUIDE, 2015
The School of Psychology has an outstanding reputation for research and high-quality teaching. We employ a range of innovative and dynamic teaching approaches. In the 2014 National Student Survey we were rated first in the UK for learning resources and third for overall quality of teaching.

ABOUT YOU

As well as having the right academic qualifications, you will be able to demonstrate your passion and interest in the subject through your reference and personal statement.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

ABOUT THE COURSES

BSc Psychology

Benefit from a degree that is fully accredited by the British Psychological Society, and adopts a robust psychological perspective, which is enriched by interdisciplinary influences. You will learn from an approach which reflects the growing consensus that human behaviour is best understood as the result of an interaction between nature and nurture, biology and culture, genes and the environment.

You will explore a range of theoretical ideas and research evidence from core specialist areas including developmental psychology, social psychology, cognitive psychology, cognitive psychology/cognitive neuroscience, cognitive neuroscience, biological psychology and the individual differences.

Your course will bridge conventional disciplinary boundaries, taking theories from the behavioural and social sciences and using them to throw light on real world, practical situations.

You will also learn about both qualitative and quantitative methods, from discourse analysis and quasi-experimental questionnaire design through to neuro-imaging techniques. You will enjoy access to our state-of-the-art laboratory facilities, including a fully-immersive virtual reality suite, electroencephalography (EEG), eye-tracking and motion-tracking equipment.

You can also take advantage of a wide range of extra-curricular activities including student conference trips and entrepreneurial training, plus a year abroad and other work experience opportunities.

In your final year, you will have the opportunity to demonstrate all you have learned by designing and implementing an individual research project of your choosing.

BSc Social Psychology

This programme, also accredited by the British Psychological Society, allows you to focus on topics related to social psychology, including forensic psychology, drug use, family life, and societal prejudice.

Throughout your degree you will study a range of theoretical ideas and develop expert research skills. Then in your third and final year, you will also design and implement an individual research project. This project will be broadly related to a social psychological topic of your choosing.

BSc Social Psychology with a Year Abroad

WHERE NEXT?
Graduate with the skills, knowledge and confidence you need for a range of careers in psychology, human resources, teaching, media, communications, marketing and management, health care, criminal justice and social welfare. The theoretical and research components of the degree also lay strong foundations for going on to postgraduate study.

Psychology as a discipline provides training in a range of key skills highly prized by future employers, making psychology graduates among the most employable graduates in the UK (Higher Education Career Services Unit, 2012; QAA, 2010).

Employability skills and entrepreneurial training are embedded in both our curriculum and our extra-curricular activities. Throughout your degree, you will meet and work with respected psychologists and business leaders in a variety of settings.

You will also benefit from a range of additional training opportunities running in parallel with your degree programme. These are carefully designed to help maximise what you have to offer future employers. They include paid placement and internship opportunities, a business training residential event, and a range of career planning support mechanisms.

All our degree courses are accredited by the British Psychological Society (BPS) as providing the Graduate Basis for Registration.

ABOUT US
Our teaching is research-led, allowing you to share in the creative excitement of scientific discovery. You will be taught by leading researchers in their fields, working in areas such as cognitive and social neuroscience, attachment and relationships, gender and crime, cognitive development, developmental psychopathology, addiction, language disorders and ADHD, perception and action, mental health, social identity, social groups and social change.

All of our research submitted to the Research Excellence Framework (REF 2014) was rated to be of international quality, with over 80 per cent judged to be ‘world-leading’ or ‘internationally excellent’.

“I ENJOYED STUDYING AT UEA. IT WAS A VARIED COURSE WITH A RANGE OF MODULES TO CHOOSE FROM. I THINK MY FAVOURITE THING ABOUT THE COURSE WAS THAT YOU WERE ABLE TO PICK MODULES THAT INTERESTED YOU AND THAT MIGHT APPLY TO WHAT YOU WANT TO DO IN THE FUTURE”
KATIE MCCALL, BSC PSYCHOLOGY GRADUATE
If you are looking for a career which is highly-rewarding then social work is the ideal profession for you. Social work education at UEA has long been very highly regarded. Our Social Work degree has been accredited by the Health and Care Professions Council (HCPC) and endorsed by The College of Social Work. On completion of the degree you will be eligible to apply to register as a social worker with the HCPC.

### About You

Your interpersonal skills will be as important as your educational background and your application will need to reflect your potential in both these areas.

We encourage you to gain practical experience to support your application. This could be voluntary or paid work and might include work in schools, in residential or home care or other work with children, families or vulnerable adults who need additional help or support.

You will be required to undertake an Enhanced Disclosure and Barring Service screening, provide two satisfactory references and to tell us about any major health issues that might affect your study to become a social worker.

As with all our courses, we welcome students with non-traditional qualifications and experience, including mature students.

### About the Course

**BA Social Work**

Social workers help and support the most vulnerable members of our society to overcome the challenges they face and to achieve their full potential. As a social worker you therefore need to be good at building positive relationships with a wide range of children, adults and their families in the community. You will become an active advocate for the people you are working with, but also help people take control of their own lives, often in difficult circumstances.

Social work is intellectually, ethically and personally challenging. Our programme is designed to be both academically rigorous and supportive in order to help you develop your skills in all these areas and ensure you are ready to face the challenges your future career will bring.

Throughout the course you will have the opportunity to immerse yourself in social work theory, research, policy and practice. Our aim is that you understand the social policy and legal context of social work, especially regarding children and families, mental health, disability and older people.

Through your studies and through social work placements, you will develop skills in working with individuals, families, social work teams and other professionals.

Your learning will focus on strengthening the links between theory and practice, working with service users and refining skills for effective intervention in people’s lives.

### Further Information

Undergraduate Admissions
School of Social Work
Faculty of Social Sciences
University of East Anglia
Norwich Research Park
Norwich NR4 7TJ
Tel: +44 (0) 1603 591515
E: admissions@uea.ac.uk
www.uea.ac.uk/swk

In your first year you will undertake a short shadowing placement, followed by substantial practice placements in your second and third years. In your final year you will also undertake a dissertation on a topic of special interest to you, and sit your final examination.

You will graduate as a highly trained professional, equipped with the knowledge and skills to become a confident and competent social worker. The demands are high but so is the satisfaction of knowing that your knowledge and skills are being used to the full in the interests of other people and the community.

### Where Next?

You will graduate with excellent employment prospects. Throughout your degree we will focus on building your future career and in your final year you will be supported in finding employment as a qualified social worker. Our most recent figures show 92 per cent of our graduates are in work or further study within six months of graduation.

Many of our graduates will take up posts in local authorities working with children and families, young offenders or adult services. Others take up posts with voluntary or independent organisations who, for example, provide foster care placements, family support or specialist services to people with disabilities or mental health difficulties.

Throughout your career you can expect to work with a wide range of other professionals – teachers, health visitors, the police, doctors, psychiatrists and community nurses.

### About Us

Many of your lecturers will be actively involved in research and all are experienced social workers. They share and use their experience and knowledge in their teaching and tutorial roles. All staff are members of our internationally renowned Centre for Research on Children and Families. Current research topics include: adoption, fostering and residential care; child protection; children’s participation; court proceedings involving children; youth offending; changing parental roles and family life.

The results of the Research Excellence Framework (REF 2014) rank the School of Social Work fourth (Times Higher Education) in the country for overall research with 90 per cent of our research judged to be ‘world-leading’ or ‘internationally excellent’.

### Ranked in the Top 10 by the Complete University Guide 2015. The School of Social Work has an International Reputation as One of the Top Centres of Social Work Education and Research in the UK

All staff are members of our internationally renowned Centre for Research on Children and Families. Current research topics include: adoption, fostering and residential care; child protection; children’s participation; court proceedings involving children; youth offending; changing parental roles and family life.

The results of the Research Excellence Framework (REF 2014) rank the School of Social Work fourth (Times Higher Education) in the country for overall research with 90 per cent of our research judged to be ‘world-leading’ or ‘internationally excellent’.

### Ranked in the Top 10 by the Complete University Guide 2015. The School of Social Work has an International Reputation as One of the Top Centres of Social Work Education and Research in the UK

---
ABOUT YOU
As well as the right academic qualifications you will be a skilled communicator, flexible learner with a creative mind, and be an empathetic and resilient person. You will have an understanding of the NHS values and be motivated to make a difference in people’s lives and contribute to the profession.

ABOUT THE COURSE
BSc Speech and Language Therapy
Learn to make an impact on the estimated 2.5 million people in the UK who suffer from a communication disorder. Speech and language therapy (SLT) works to maximise people’s communication potential and improve their quality of life. Working in an inter-professional environment, qualified SLTs assess, diagnose and provide intervention to people of all ages who have speech, language, communication and swallowing difficulties.

Our three-year course was the first speech and language therapy degree in the UK to fully integrate the clinical and theoretical aspects of the discipline through a problem-based learning curriculum. This means your learning reflects real-world practice and ensures you graduate with the necessary problem-solving abilities.

In line with the wider profession, we promote evidence-based practice throughout your three years of study. You will study a wide range of core subjects and will learn to apply this knowledge in clinical practice. You will start as a ‘Conversation Partner’ in the first year where you learn about your own communication skills. In your second year you will move to ‘Therapy Facilitator’ when you will begin to apply your knowledge and skills in planning intervention. In your final year you will move into the pre-registration phase when you take increasing responsibility for carrying out sessions with clients.

WHERE NEXT?
From your first day, your skills will be developed through real-world problem solving, clinical experience and academic achievement based on the needs of specific client groups. The course is highly intensive, which ensures you graduate with the skills, confidence and knowledge you need to start your career.

ABOUT US
We offer a mix of teaching through lectures, seminars, workshops, independent study, and placements. Masterclasses from visiting professionals further enrich the student learning experience. There is a dedicated Communications Laboratory, and DVD clips and sound files are used extensively in phonetics and in speech and language therapy sessions.

SPEECH AND LANGUAGE THERAPY

BSc Speech and Language Therapy
UCAS code B620
A level (typical offer): AAB, excluding General Studies and Critical Thinking
International baccalaureate: 33
Special requirements: Five grade A-C GCSEs including English Language, Mathematics and a Science
Length of course: 3 years

Apart from the right academic qualifications you will be a skilled communicator, flexible learner with a creative mind, and be an empathetic and resilient person. You will have an understanding of the NHS values and be motivated to make a difference in people’s lives and contribute to the profession.

GETTING HERE

OUR PARTNERS
The Norwich Research Park includes the John Innes Centre, The Sainsbury Laboratory, The Genome Analysis Centre, the Bob Champion Research and Education Building and the Institute of Food Research.

The main site for our nursing students is at the Edith Cavell Building, adjacent to the Norfolk and Norwich University Hospital.

BY AIR
Norwich International Airport has regular flights to and from Aberdeen, Edinburgh, Manchester and Exeter, and international connections to 200 cities worldwide through regular direct flights to and from Schiphol Airport in Amsterdam. The easiest way to reach the University from the airport is by taxi.

Flight enquiries:
+44 (0) 1603 411923
www.norwichairport.co.uk

BY TRAIN
Norwich is less than two hours from London by train and there is an InterCity link with the Midlands, the north of England and Scotland via Peterborough. Trains run from London Liverpool Street approximately every half hour. You can reach the University from the station by taxi, which takes approximately 15 minutes. There are regular buses direct to the University from the station forecourt – numbers 25 and 26.

Rail enquiries:
+44 (0) 8457 484950
www.nationalrail.co.uk

BY BUS AND COACH
National Express coaches run from all major cities in Great Britain to the Surrey Street Bus Station in the city centre. They also run from the UEA campus to Heathrow, Stansted and Gatwick airports. Buses 25 and 26 run regularly from Castle Meadow in the city centre to the University campus. We are also served by Megabus who operate a twice daily service to London.

DISCLAIMER
We have taken great care in compiling the information contained in this prospectus, which we believe to be accurate at the time of going to press. However, the provision of courses, facilities and other arrangements described in the prospectus are regularly reviewed and may, with good reason, be subject to change without notice. Applicants for undergraduate programmes will be notified immediately of any material changes likely to have a bearing on their application, such as cancellation of, or major modification to, degree programmes or modules offered; changes to the delivery of courses, changes to accommodation provision, changes to entry requirements; or changes to fees and charges to be levied by the University.

Should industrial action or other circumstances beyond the control of the University occur, and this interferes with the University’s ability to deliver programmes or other services in accordance with the descriptions provided, the University will use all reasonable endeavours to minimise disruption as far as it is practicable to do so. Provided the University complies with its obligations set out above, it shall not be liable to students or applicants, for any loss, costs, charges or expenses arising out of the information set out in this prospectus, changes to that information or any disruption or interference of the type described above.

The University of East Anglia operates an Admissions Complaints Procedure. If you feel that you have a well-founded complaint regarding your application, please contact your Admissions Office in the first instance.

EQUAL OPPORTUNITIES
The University of East Anglia operates an equal opportunities admissions policy. It aims to ensure that no applicant will receive less favourable treatment on the grounds of sex, age, marital status, race, colour, nationality, ethnic origin, sexual orientation, or political or religious belief. The University welcomes applications from candidates with disabilities.

Information contained in this prospectus may also be made available in other formats, to ensure access for everyone. Please call +44 (0) 1603 593753 to discuss.

ETHICAL INVESTMENT POLICY
The University of East Anglia operates an Ethical Investment Policy.
