DO YOU WANT TO MAKE A DIFFERENCE?

MSc ADULT NURSING CHANGE LIVES

• Are you a caring individual looking for a change of career?
• Do you want to make an impact and be part of a dedicated and enthusiastic team of health professionals who put patients at the heart of what they do?
• Do you hold an honours degree and are looking for a new challenge?

Make a difference to people’s lives right when they need it most - become an adult nurse.
“Studying an MSc enables a higher level of thinking... It made a difference to me and my confidence in my ability to articulate and analyse evidence to underpin my practice”
Becky, MSc Adult Nurse

IS THIS COURSE FOR ME?
It’s no secret that nursing is an important part of the healthcare system in the UK. Your patients might be young adults, those in their middle and later years or people who may be in their nineties or beyond. As an adult nurse, you will be compassionate, determined and have the communication skills to provide care at all levels.

This NMC approved course is designed for graduates with a degree in another discipline who are looking for a route into nursing; it has been developed in partnership with local NHS Trusts to train the highest calibre of nurses.

You will need to have an Accreditation of Prior Learning before you start the course and have a good understanding of the NHS constitution. The programme structure is 50% theory and 50% practice to ensure you are appropriately prepared for the role of a registered adult nurse. Please see our website for further details.

WHY STUDY AT UEA?
• Train at one of the top 5 schools for nursing in the UK.
• Gain eligibility for nursing registration as well as a Master’s degree.
• Study and train alongside a broad range of other health and social care professionals, including Nurses from other disciplines, Occupational Therapists, Physiotherapists, Speech Therapists, Paramedics, Doctors, Physician Associates and Pharmacists.
• Graduate with excellent employment opportunities – we have a 98% employment record on our other Nursing degrees.
• Enhance your employability with training in leadership, management, service improvement, research consumerism, entrepreneurship, public health and key population and demographic issues.
• Live locally, train locally and work locally. UEA is proud to be part of a large network of healthcare organisations across East Anglia.
