

Presentations and activities for secondary schools

We know that the experiences students have in school are hugely influential in determining their future pathways. Therefore we have developed a range of activities to help support their learning and motivate them to achieve the best they can for themselves. We want to support your students to make informed choices about their futures and to consider Higher Education as one of their options. To do this we offer:

Campus Visits

For students from Year 7 upwards to learn about university through interactive workshops, campus tours and inspirational talks. All of our activities are intended to be educational and fun and we work closely with schools to agree content so the visits deliver maximum benefit for your students.

University in the Classroom

We can come to your school and deliver informative talks and interactive activities covering topics such as the benefits of Higher Education, student finance support, courses, graduate careers and student life. We can also run stands at other events, such as parents evenings or careers fairs.

Academic Tasters

Curriculum linked academic sessions give a broad introduction to the range of subjects we teach at the University. These are an opportunity for students to experience university teaching styles and explore the range of careers that they could lead to.

Study Skills

A series of workshops designed to enhance students' learning and help prepare them for big milestones like exams and interviews. These include wellbeing, revision skills, future careers and interview tips. We also run bespoke activities such as team building.

I have a rough idea about uni now. I didn't want to go, but today changed my mind!

Move On Up

Annually we host a huge collaborative event on campus to which every school in Norfolk and Suffolk is invited to bring a small cohort of Year 10 students to take part in hands-on, interactive academic sessions. This year's event will run on 24 and 25 April 2014.

Summer Schools for Years 9-11

Targeted participants stay on campus in student accommodation and participate in a full academic and social programme to gain a real insight into student life. The aim is for them to have fun, meet new people and learn more about what it would be like to come to university.

Enrichment Events

A range of exciting and interactive subject tasters and events which give high achieving Year 10-12 students the opportunity to study a subject at a higher level in a university setting. For further information visit: www.uea.ac.uk/universitytasters.

STEM

The STEM Ambassadors Programme enables those with science, technology, engineering and maths (STEM) skills to enthuse and inspire young people. STEM ambassadors are a free resource and help to raise aspirations, illuminate a subject with a real-life perspective and assist CPD by updating knowledge. For further information email: stemambassadors@uea.ac.uk.

Teachers' E-Newsletter

UEA produces a monthly e-newsletter called Insight for teachers and education advisers. It includes information about upcoming events, Higher Education news and updates about the university. To subscribe to Insight email: schoolsoutreach@uea.ac.uk.

The UCAS talk really helped those students unsure if they could afford university to feel more positive.

Many of the students came back fascinated by the Art History lecture.

All outreach activities are free, and are designed to be inclusive. In addition, we can run bespoke events for looked after children or students with disabilities.
