

“Evidencing patient-centred intervention and outcome measurement in stroke rehabilitation: Developing and applying comprehensive search strategies to locate the evidence”

**Wednesday 29 April 2015, Queens Building 01.11
Seminar 1 – 2pm, workshop 2 – 3 pm**

Seminar Presentation

Involving patients in the determination of their care is increasingly important, and health-care professionals worldwide have recognised a need for clinical outcome measures and interventions that facilitate patient-centred care delivery in a range of settings. This presentation will consider a mixed-methods review conducted to identify stroke-specific patient-centred outcome measures and patient-centred interventions. It will focus on the development of a comprehensive search strategy designed to identify stroke-specific patient-centred outcome measures and specific elements key to patient-centred interventions, and consider a range of review outputs that formed the basis of a patient-centred toolkit for stroke rehabilitation care settings.

Brief Biography

Dr Maggie Lawrence has a background in neurological rehabilitation nursing and in information science. She is currently employed as a Senior Research Fellow in the School of Health & Life Sciences/Institute for Applied Health Research at Glasgow Caledonian University. She has fourteen years' experience of conducting quantitative and qualitative healthcare research in a range of healthcare settings, and with a range of stakeholders. Maggie's research focus is on stroke; her current programme of research is concerned with the role of lifestyle factor modification and stress management in the prevention of recurrent stroke. Maggie holds a Stroke Association Senior Research Training Fellowship (Jan 2012 – Nov 2015), the focus of which is development of tools and resources to support family-/patient-centred behaviour change interventions. Maggie has engaged in a variety of evidence synthesis and knowledge transfer activities, including development of Scottish Intercollegiate Guidelines Network guidelines and NHS Best Practice Statements

Free. All welcome. No need to book.

If you are attending from outside the University, please check the seminar is taking place.
