COURSE OVERVIEW

Are you interested in a career as a Paramedic? **Preparing for Paramedicine** is our brand new distance learning course aimed at preparing students for their application to UK Paramedic training programs and for the role of Paramedic.

All new UK Paramedics now study at degree level. These are usually science based diplomas or degrees ie - Foundation Degree (FdSc), Bachelors Degree (BSc / BSc Hons). Successful completion of one of these courses allows you to register with the Health & Care Professions council and to work as a registered Paramedic in the UK.

There are many rewarding aspects to being a Paramedic. However, there are also significant challenges. This course will help you to understand and prepare for these using online interactive learning. That is what makes the **Preparing for Paramedicine** course unique.

The aim of the course is to allow you to consider the role in more depth and if you then feel this is the career for you, to make your application 'stand out from the crowd'.

WHAT WILL I LEARN?

By the end of this module, you will be able to:

- Understand the current UK Ambulance Sector
- Demonstrate greater understanding of the Paramedic role
- Understand the learning & educational requirements
- Understand the current Paramedic curriculum in the UK
- Be better prepared for the interview process
- Prepare for the fitness and driver training requirements
