

Hi,

On your website under "links" you are showing the URL's of 5 sites that are COMPLETELY [redacted] towards AGW.

Surely for a site that boasts of being independent and unbiased this is utterly wrong.

I would suggest you should include the equivalent number of "skeptical " viewpoint sites for balance.

eg:-

Dr. Richard North's site <http://eureferendum.blogspot.com/>

"Bishops Hill" site <http://bishophill.squarespace.com/>

Anthony Watts site <http://wattsupwiththat.com/>

Steve McIntyre's site <http://climateaudit.org/>

The Air Vent <http://noconsensus.wordpress.com/>

This would then remove the bias from your website!

regards

Patrick
