

"Do any of the Review team members have a predetermined view on climate change and climate science?"

No. Members of the research team come from a variety of scientific backgrounds. They were selected on the basis they have no prejudicial interest in climate change and climate science and for the contribution they can make to the issues the Review is looking at. **A purported CV of Professor Boulton in circulation contains a line claiming he has contributed submissions to the IPCC. This is false. He has not, and his name does not appear on any IPCC contributor list."**

Professor Boulton is a signatory to this:

<http://www.metoffice.gov.uk/climatechange/news/latest/uk-science-statement.html>

So please, either withdraw the abovementioned statement from your website or remove Professor Boulton from your panel.

The world is watching.

If you and your organization operate in a duplicitous manner, no one will take you seriously.
