

Sirs

In reference to the introduction to your research on the above you have used the term 'hacked' (see extract below). We must presume that evidence that this is the case is available which will be made public otherwise why is this not being included as part of your analysis?

'The independent Climate Change Email Review was announced in December 2009 after emails from the University of East Anglia's Climate Research Unit were **hacked** and published online'.

Regards

Chris Allen
